To whom it may concern:

Please accept this as request for any information/documentation/files with your department regarding the above-referenced property.

AEI Consultants is currently conducting the Phase I Environmental Site Assessment for the property. The current ASTM Practice E1527 Standard Practice of Environmental Site Assessments requires that a records search be conducted with local regulatory departments for information regarding the subject property. Of particular interest are the following items:

- Records regarding hazardous materials usage/storage/incidents or known environmental concerns/contamination which may have affected the property,
- Records regarding aboveground or underground storage tank (UST) systems, which are currently or historically located at the property,
- Record of septic systems installation and repairs at the subject property, and/or
- Records of wells in connection with the subject property.

Please call (669-999-6114) or email (j cudmore@aeiconsultants.com) me to discuss the file information or if you require further information. Thank you for your time and attention regarding this matter.

Respectfully,

Jay Cudmore, AEP

## AEI CONSULTANTS

701 CAMPUS SQUARE W, STE.723A

EL SEGUNDO, CA 90245

JCUDMORE@AEICONCONSULTANTS.COM

February 14, 2023

Dear: AEI CONSULTANTS,

**SUBJECT: 3001 WEST EMPIRE AVE., BURBANK CA 91504**

I, the undersigned, being the Custodian of Records, certify that a thorough search of our files, carried out under my direction and control, revealed no landfill, septic tank, or water well records as named in your request for records.

It is to be understood that this does not mean that records do not exist under another spelling, another name, or under another classification, but that with the information furnished to our office, and to the best of our knowledge, no such records exist in our files. Also, note that the DPH reserves the right to assert all applicable privileges/doctrines and exemptions.

If you have any questions, please contact me at (323) 659-6148.

Sincerely,

*Na'Keya Haslett*

**To:** Amela, Natalie <[NAmela@burbankca.gov](mailto:NAmela@burbankca.gov)>  
**Subject:** Public Records Request - Please review 3001 W Empire Ave

A Public Records Request (PRR) has been received. Your department has been identified as possibly having records in response to this request. If you feel there are other departments that this request may be applicable to, please contact the City Clerk's Office **immediately**.

**Please note:** There are 10 days in which to respond to a PRR either with: a request for a time extension, informing requestor of an amount for duplication costs, providing actual records or a denial for producing the records (i.e. they no longer exist or are not releasable). Simple requests should be responded to immediately so the requester is not kept waiting. Records do not have to be provided in a format in which they do not currently exist, although there are times when it is appropriate to do so, in which case we may charge staff time to convert them. If you have a question on this, contact the City Attorney's Office. We currently do not have a charge for electronic records. Please check with the City Attorney's Office if you are unsure if the record is a releasable record under the law. All mailing costs can be recovered as well. If multiple departments are assigned this request, it is best to coordinate the response together before updating the [Public Records Request](#) List on BEN. Please see further directions below.

**Description of Request:**

Formerly 2200 North Ontario Street Phase I Environmental Site Assessment See attachments for details

**Requester Contact Information:**

Jay Cudmore C: 669.999.6114 E: [jcudmore@aeiconsultants.com](mailto:jcudmore@aeiconsultants.com)

**Due Date:**

**2/15/2023**

**Additional Remarks:**

PRR started by Dekermenji, Melissa on 2/6/2023 8:37 AM

Comment:

---

**To respond to a Public Records Request:**

1. Gather requested information per [3001 W Empire Ave.](#)
2. Contact the Requester no later than **2/15/2023**.
3. Please note that a 14 day extension may be requested in the event that the research for records is extensive; however, this is not an extension to provide extra time on simple requests. If additional time is necessary, please contact **Arvin Setaghaian at x5702** immediately, but before the 10<sup>th</sup> day, then update the [Public Records Request List](#) to reflect this request.
4. Once the Public Records Request has been completed and the Requester has received the information, use the **Open this task** button (located on the ribbon of this email) to mark the task as **Completed**, then update the item's status field in the [Public Records Request List](#).

APPENDIX F  
ASTM USER QUESTIONNAIRE

DRAFT

AEI Consultants  
Headquarters  
2500 Camino Diablo  
Walnut Creek, CA 94597

### ASTM E 1527-21 USER QUESTIONNAIRE

According to ASTM 1527-21, to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must conduct the following inquiries required by 40 C.F.R. §§ 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

**Please note that you are not being asked to evaluate the property, but rather to provide your knowledge of information on the subject property.**

Subject Property Address: 3001 Empire Ave Burbank, CA 91504

#### 1. Environmental liens that are filed or recorded against the subject property (40 C.F.R. § 312.25).

Did a search of land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the subject property under federal, tribal, state, or local law?

Yes  No  If you answer yes, please include an explanation in the space provided below:

#### 2. Activity and use limitations that are in place on the subject property or that have been filed or recorded against the subject property.

Did a search of land title records (or judicial records where appropriate) identify any AULs, such as engineering controls\*, land use restrictions or institutional controls\*\* that are in place at the subject property and/or have been filed or recorded against the subject property under federal, tribal, state or local law?

*\*Engineering controls are defined by ASTM 1527-21 (3.2.26) as a physical modifications to a site or facility (for example, capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or groundwater on a property.)*

*\*\*Institutional controls are defined by ASTM 1527-21 (3.2.42) as a legal or administrative mechanism (for example, "deed restrictions," restrictive covenants, easements, or zoning) on the use of, or access to, a site or facility to (1) reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.*

Yes  No  If you answer yes, please include an explanation in the space provided below:

**3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 C.F.R. § 312.28).**

Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes  No  If you answer yes, please include an explanation in the space provided below:

**4. Relationship of the purchase price to the fair market value of the subject property if it were not contaminated (40 C.F.R. § 312.29).**

Does the purchase price being paid for this subject property **reasonably reflect the fair market value** of the property?

Yes  No  If you answer "No," have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property?

**5. Commonly known or reasonably ascertainable information about the subject property (40 C.F.R. § 312.30).**

Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

a. Do you know the past uses of the subject property?

Yes  No

b. Do you know of specific chemicals that are present or once were present at the subject property?

Yes  No

c. Do you know of spills or other chemical releases that have taken place at the subject property?

Yes  No

d. Do you know of any environmental cleanups that have taken place at the subject property?

Yes  No

If you answered yes to any of the questions above, please include an explanation in the space provided below:

6. The degree of obviousness of the presence or likely presence of contamination at the subject property, and the ability to detect the contamination by appropriate investigation (40 C.F.R. § 312.31).

Based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of releases at the subject property?

Yes  No  If you answer yes, please include an explanation in the space provided below:

**Information for the person completing the questionnaire:**

Subject: Phase I Environmental Site Assessment  
3001 West Empire Avenue  
Burbank, California 91504  
AEI Project No. 401960

Dear Samir Srivastava:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (925) 746-6000 or [cmonheit@aeiconsultants.com](mailto:cmonheit@aeiconsultants.com).

Sincerely,

## EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by ABS Burbank, LLC to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 3001 West Empire Avenue, Burbank, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address(es)	3001 West Empire Avenue, Burbank, Los Angeles County, California 91504
Property ID (APN or Block/Lot)	2464-006-045
Location	Along the northern side of West Empire Avenue with North Ontario Street to the west and North Fairview Street to the east
Property Type	Parking Lot
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	0.67/Site Contact
Number of Buildings	N/A
Building Construction Date(s)	N/A
Building Square Footage (SF)/Source	N/A
Number of Floors/Stories	N/A
Basement or Subgrade Area(s)	N/A
Number of Units	N/A
Additional Improvements	Concrete sidewalks, landscaping
On-site Occupant(s)	N/A; the subject property is used as a paved parking lot
Current On-site Operations/Use	Parking Lot
Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	None identified

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Use (Historical Addresses)	Source(s)
Prior to 1928	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, Sanborn maps
1928 - 1940	Agricultural land	Aerial photographs
1940-1948	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, Sanborn maps, City directories
1948 - present	Parking lot (2200 North Ontario)	Aerial photographs, Sanborn maps, Agency records, Interviews, Site observations

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Alley followed by: Multi-family residential (2214 – 2220 North Ontario Street)	None identified
	Alley followed by: Multi-family residential (2215 North Fairview Street)	None identified
Northeast	Alley followed by: North Fairview Street followed by: Parking Lot (2212 North Fairview Street)	None identified
East	North Fairview Street followed by: Commercial (2919 West Empire Avenue)	WIP, RCRA-SQG, FINDS, ECHO
South	West Empire Avenue followed by: Multi-tenant / commercial (3000 West Empire Avenue)	WIP, LOS ANGELES CO. HMS (listed twice), ENVIROSTOR, HIST UST (listed twice), EMI, ENF, HAZNET (listed twice), CPS-SLIC, NPDES, WDS, CIWQS, RCRA-LQG, FINDS (listed twice), ECHO
	West Empire Avenue followed by: All Phase Electric Supply (3020 West Empire Avenue)	CPS-SLIC, EMI, ENF, WIP
	West Empire Avenue followed by: Specialty Lighting Distributors (3030 West Empire Avenue)	WIP
West	North Ontario Street followed by: Media Studio Group Parking Lot (unknown address)	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

#### FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- Based on a review of aerial photographs, the subject property was historically used for agricultural purposes. There is potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site, and that the subject property has been impacted by the use of such agricultural chemicals. AEI understands that the subject property is slated for residential and commercial redevelopment. Consequently, AEI recommends the performance of on-site sampling to determine if the subject property has been significantly impacted in connection with the historical agricultural use for the protection of the construction workers and future occupants of the subject property.
- The subject property is located inside the San Fernando Valley Area 1 Superfund Site. This site is listed in the National Priorities List (NPL) database. Also known as Superfund sites, NPL lists sites that have known releases or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States and its territories. This site is listed in multiple databases, all relating to the NPL listing. Based on information obtained from the Environmental Protection Agency's Third Five Year

Review (TFYR) of this site known as San Fernando Valley (SFV) – Area 1 Superfund Site, North Hollywood and Burbank, Los Angeles County, California published on September 21, 2018, The San Fernando Valley Area 1 Superfund Site (SFV Area 1) consists primarily of two large plumes from multiple sources in the San Fernando Valley. Site contaminant sources include, but are not limited to, the former Bendix Aviation and Allied Signal-Aerospace Company facilities in North Hollywood (successor cooperation is now Honeywell International), the former Lockheed Martin Corporation facilities near the Burbank Airport, and many other known sources throughout Area 1. Trichloroethene (TCE) and tetrachloroethene (PCE) were widely used in the San Fernando Valley starting in the 1940s for dry cleaning and for degreasing machinery. Disposal was not well-regulated at that time, and releases from a large number of facilities throughout the eastern SFV Area 1 have resulted in the large plume of VOC-contaminated groundwater that starts in the Area 1 Site and extends southeast, down-gradient, through the San Fernando Valley Superfund, Area 2 Site and through the San Fernando Valley Superfund, Area 4 Site. Based on an examination of the concentration maps in the TFYR, the subject property is located in a PCE groundwater contamination plume as indicated on the 2017 Contamination in Groundwater Eastern San Fernando Valley Map with concentrations of 50 to 499 micrograms per liter ( $\mu\text{g/L}$ ). Based on the depth of groundwater in the vicinity of the subject property, vapor intrusion does not appear to be a concern. The documented groundwater contamination associated with SFV Area 1 represents a REC; however, assessment of the subject property does not indicate that the subject property would be investigated as a source of this contamination, and therefore, it is unlikely that the subject property owner would be responsible for cleanup costs associated with the release at this site.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- AEI did not identify evidence of OECs during the course of this assessment.

## CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 3001 West Empire Avenue, Burbank, Los Angeles County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section. AEI recommends the following:

- On-site sampling to determine if the subject property has been significantly impacted in connection with the historical agricultural use for the protection of the construction workers and future occupants of the subject property

DRAFT

## 1.0 INTRODUCTION

---

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 3001 West Empire Avenue, Burbank, Los Angeles County, California (Appendix A: Figures and Appendix B: Property Photographs).

### 1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

### 1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

### 1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

## 1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

#### 1.5 LIMITING CONDITIONS/DEVIATIONS

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- AEI requested an interview with the subject property owner; however, the subject property owner has not responded as of this report date. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.
- Due to the large volume of vehicles within the parking areas of the subject property, direct visual observation of the ground in many areas was not possible. Features may be present that were not observed during AEI's site inspection.
- On February 28, 2019, AEI contacted the Los Angeles County Public Health Investigations via email for information on the subject property. Files at this agency may contain information regarding hazardous substance storage and use, underground storage tanks, unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area, wells and/or septic systems. As of the date of this report, LACPHI has not responded to this request. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.

#### 1.6 DATA FAILURE AND DATA GAPS

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back

to 1940, whichever is earlier, or periods of five years or greater.

### 1.6.1 DATA FAILURE

The following data failure was identified during the course of this assessment:

Data Failure	The earliest historical resource obtained during this assessment was an aerial photograph from 1928 indicating that the subject property was developed agriculturally. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for agricultural purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Sanborn fire insurance maps, aerial photographs

Data Failure	Historical sources were not obtained at five-year intervals dating back to 1940. AEI was not able to track the history of the subject property between the years 1940 and 1948 as none of the historical sources utilized as part of this assessment covered this time period. In the 1940 aerial photograph, the subject property appears as agricultural land. The property was developed for use as a parking lot since 1948. Thus, it is assumed that during this time period the subject property would have been agricultural, vacant, or developed for use as a parking lot. Therefore, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Sanborn fire insurance maps, aerial photographs, City directories

### 1.6.2 SIGNIFICANT DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

### 1.7 RELIANCE

All reports, both verbal and written, are for the benefit of ABS Burbank, LLC. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by ABS Burbank, LLC on February 28, 2019. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

## 2.0 SITE AND VICINITY DESCRIPTION

### 2.1 SITE LOCATION AND DESCRIPTION

PROPERTY INFORMATION	
Site Address(es)	3001 West Empire Avenue, Burbank, Los Angeles County, California 91504
Property ID (APN or Block/Lot)	2464-006-045
Location	Along the northern side of West Empire Avenue with North Ontario Street to the west and North Fairview Street to the east
Property Type	Parking Lot
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	0.67/Site Contact
Number of Buildings	N/A
Building Construction Date(s)	N/A
Building Square Footage (SF)/Source	N/A
Number of Floors/Stories	N/A
Basement or Subgrade Area(s)	N/A
Number of Units	N/A
Additional Improvements	Concrete sidewalks, landscaping
On-site Occupant(s)	N/A; the subject property is used as a paved parking lot
Current On-site Operations/Use	Parking Lot
Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	None identified

### 2.2 ON-SITE UTILITIES

Utility	Source/System Information
Heating System	N/A
Cooling System	N/A
Potable Water	N/A
Sewage Disposal/Treatment	N/A

### 2.3 SITE AND VICINITY CHARACTERISTICS

The subject property is located in a commercial and residential mixed-use area of Burbank, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Alley followed by: Multi-family residential (2214 – 2220 North Ontario Street)	None identified
	Alley followed by: Multi-family residential (2215 North Fairview Street)	None identified
Northeast	Alley followed by: North Fairview Street followed by: Parking Lot (2212 North Fairview Street)	None identified

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
East	North Fairview Street followed by: Commercial (2919 West Empire Avenue)	WIP, RCRA-SQG, FINDS, ECHO
South	West Empire Avenue followed by: Multi-tenant / commercial (3000 West Empire Avenue)  West Empire Avenue followed by: All Phase Electric Supply (3020 West Empire Avenue)  West Empire Avenue followed by: Specialty Lighting Distributors (3030 West Empire Avenue)	WIP, LOS ANGELES CO. HMS (listed twice), ENVIROSTOR, HIST UST (listed twice), EMI, ENF, HAZNET (listed twice), CPS-SLIC, NPDES, WDS, CIWQS, RCRA-LQG, FINDS (listed twice), ECHO  CPS-SLIC, EMI, ENF, WIP  WIP
West	North Ontario Street followed by: Media Studio Group Parking Lot (unknown address)	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

#### 2.4 PHYSICAL SETTING

Geologic Unit: Description/Source	According to the United States Department of Agriculture's Report and General Soil Map for Los Angeles County, the area surrounding the subject property is underlain by soils of the Tujunga-Soboba association. These soils occur on nearly level to gently sloping alluvial fans and tend to be somewhat excessively drained with rapid subsoil permeability. In places, these soils are subject to occasional overflow. Inherent fertility is very low and these soils tend to be used for residential development / USGS and United States Department of the Interior
Soil Series: Description/Source	Tujunga soils are over 60 inches deep, are somewhat excessively drained, and have rapid subsoil permeability. They have brownish-gray or grayish-brown sand or loamy fine sand surface layers underlain by similar substratum which may be stratified. They are slightly acid to mildly alkaline throughout. In places there soils are subject to occasional overflow. Available water-holding capacity is 4.0 to 5.0 inches for 60 inches of soil depth. Inherent fertility is low. Soboba soils are over 60 inches deep, are excessively drained, and have very rapid subsoil permeability. They have pale-brown, neutral, cobbly very fine sandy loam surface layers about 3 inches thick underlain by pale-brown and light brownish-gray very cobbly loamy coarse sand that becomes calcareous in the lower part. Gravel and cobbles make up 35 percent or more of the soil profile. Available water-holding capacity is 2.0 to 3.0 inches for 60 inches of soil depth. In places, these soils are subject to occasional overflow. Inherent fertility is very low. Tujunga soils make up about 60 percent and Soboba soils 20 percent of the association. The remaining 10 percent is composed of unnamed sandy and cobbly material in the beds of intermittent streams. Included near Pomona at the San Bernardino County line is an unnamed sand wind-blown soil. These soils are used extensively for residential development. They are also used for incidental grazing in the spring, for wildlife habitat and recreational purposes / USDA Soil Survey
Groundwater Flow Direction/Source	South / Topographic map interpretation

Estimated Depth to Groundwater/ Source	176 to 193 feet bgs / Quarterly Groundwater Monitoring Report Fourth Quarter 2018 for the Lockheed Martin Plant B-1 located at 1705 North Victory Place (approximately 0.85 mile east of the subject property) obtained from the Regional Water Quality Control Board
Surface waters on the subject property or adjacent sites	None
Additional notes	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

DRAFT

### 3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Use (Historical Addresses)	Source(s)
Prior to 1928	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, Sanborn maps
1928 - 1940	Agricultural land	Aerial photographs
1940-1948	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, Sanborn maps, City directories
1948 - present	Parking lot (2200 North Ontario)	Aerial photographs, Sanborn maps, Agency records, Interviews, Site observations

Based on a review of aerial photographs, the subject property was historically used for agricultural purposes. There is potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site, and that the subject property has been impacted by the use of such agricultural chemicals. AEI understands that the subject property is slated for residential and commercial redevelopment. Consequently, AEI recommends the performance of on-site sampling to determine if the subject property has been significantly impacted in connection with the historical agricultural use for the protection of the construction workers and future occupants of the subject property.

If available, copies of historical sources are provided in the report appendices.

#### 3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjacent Site Descriptions
1928	Agricultural land	NORTH: Agricultural land NORTHEAST: Roadway followed by: Agricultural Land EAST: Roadway followed by: Agricultural land SOUTH: Roadway followed by: Agricultural land WEST: Roadway followed by: Agricultural land

Year(s)	Subject Property Description	Adjacent Site Descriptions
1938	No significant change is noted	NORTH: No significant change is noted NORTHEAST: No significant change is noted EAST: No significant change is noted SOUTH: Roadway followed by: commercial structures and undeveloped land WEST: No significant change is noted
1940	No significant change is noted	NORTH: Residential structure and undeveloped land NORTHEAST: No significant change is noted EAST: No significant change is noted SOUTH: Roadway followed by commercial structures and associated parking WEST: No significant change is noted
1952	The subject property appears developed for use as a parking lot	NORTH: No significant change is noted NORTHEAST: No significant change is noted EAST: Roadway followed by: Commercial structures SOUTH: No significant change is noted WEST: Roadway followed by: commercial structures and associated in yard storage
1954	No significant change is noted	NORTH: No significant change is noted NORTHEAST: Alley followed by: Roadway followed by: multi-family residence EAST: No significant change is noted SOUTH: No significant change is noted WEST: No significant change is noted
1964	No significant change is noted	NORTH: Alley followed by: residential structures NORTHEAST: No significant change is noted EAST: No significant change is noted SOUTH: Roadway followed by: multiple commercial structures and associated parking WEST: No significant change is noted
1972	No significant change is noted	NORTH: No significant change is noted NORTHEAST: Alley followed by: Roadway followed by: Current parking lot EAST: Roadway followed by: current commercial structure SOUTH: Roadway followed by: commercial structures with associated parking and a parking lot WEST: No significant change is noted
1981	No significant change is noted	NORTH: No significant change is noted NORTHEAST: No significant change is noted EAST: No significant change is noted SOUTH: Roadway followed by: commercial structures with associated parking WEST: No significant change is noted

Year(s)	Subject Property Description	Adjacent Site Descriptions
1989, 1994	No significant change is noted	NORTH: No significant change is noted NORTHEAST: No significant change is noted EAST: No significant change is noted SOUTH: No significant change is noted WEST: Roadway followed by: cleared undeveloped land
2005, 2009, 2010, 2012	No significant change is noted	NORTH: No significant change is noted NORTHEAST: No significant change is noted EAST: No significant change is noted SOUTH: No significant change is noted WEST: Roadway followed by: Current parking lot

Based on a review of aerial photographs, the subject property was historically used for agricultural purposes. Please refer to Section 3.0 for further discussion.

### 3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

The following maps were reviewed:

Year(s)	Subject Property Description (Listed Address)	Adjacent Site Descriptions
1953, 1954	The subject property is depicted as developed as an auto parking lot (2200 North Ontario)	NORTH: Alley followed by: a vacant lot and a residential dwelling NORTHEAST: Alley Followed by: North Fairview Street followed by: three residential dwellings EAST: North Fairview Street followed by: A machine shop SOUTH: West Empire Avenue followed by: Offices, a machine shop, a tractor and equipment repair shop, associated outbuildings and truck parking with gas and oil in yard WEST: North Ontario Street followed by: what appears to be a steel storage yard with sheet metal storage and a commercial structure that appears to be used to x-ray materials for Lockheed
1956	No significant change is noted	NORTH: Alley followed by: the current multi-family apartment and a residential dwelling NORTHEAST: No significant change is noted EAST: No significant change is noted SOUTH: No significant change is noted WEST: North Ontario Street followed by: a steel storage yard with office

Year(s)	Subject Property Description (Listed Address)	Adjacent Site Descriptions
1960	No significant change is noted	NORTH: No significant change is noted NORTHEAST: No significant change is noted EAST: North Fairview Street followed by: offices SOUTH: No significant change is noted WEST: No significant change is noted
1966	No significant change is noted	NORTH: No significant change is noted NORTHEAST: No significant change is noted EAST: No significant change is noted SOUTH: West Empire Avenue followed by: A machine shop, a machinery warehouse, two offices, a tractor and equipment repair shop, associated outbuildings with gas and oil in yard WEST: No significant change is noted
1968	No significant change is noted	NORTH: No significant change is noted NORTHEAST: No significant change is noted EAST: No significant change is noted SOUTH: West Empire Avenue followed by: A machine shop, a metal products assembly building, an office, a tractor and equipment repair shop, associated outbuildings with gas and oil in yard WEST: No significant change is noted
1969	No significant change is noted	NORTH: No significant change is noted NORTHEAST: No significant change is noted EAST: No significant change is noted SOUTH: West Empire Avenue followed by: A machine shop, a metal products assembly building and a parking lot WEST: No significant change is noted

Based on a review of historical sources, the adjacent site to the south, east and west has been historically occupied by industrial operations. Environmental concerns associated with the adjacent sites are discussed in Section 5.1.

Based on a review of historical sources, Lockheed Building 85 was situated northwest of the subject property. AEI presumes that the adjacent site to the west was also associated with Lockheed. Environmental concerns associated with Lockheed Building 85 A-1 Lots 16 and 16A is discussed in Section 5.1.

### 3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. No potential tenants of concern were identified based on AEI's review of the historical city directories. Directories were reviewed in approximate five-year increments from 1920 to 2014. The subject property is not listed in the City directories. Please refer to the appendices for a complete list of historical subject property tenants identified by EDR.

Year(s)	Address - Occupant Listed
1920 - 2014 (non-inclusive)	2200 North Ontario; 3001 West Empire Avenue - No listings

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the city directory review.

### 3.4 HISTORICAL TOPOGRAPHIC MAPS

Based on the quality of information obtained from other sources, historical topographic maps were not reviewed as a part of this assessment.

### 3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

## 4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

### 4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles County Public Health Investigations (LACPHI)	February 28, 2019	Email	N/A	Response pending, refer to Section 1.5

### 4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Burbank Fire Department (BFD)	February 28, 2019	Email	Quyen Hartman, Intermediate Clerk	No records on file

### 4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Burbank Building Department (BBD)	February 28, 2019	Email	Ms. Carol-Ann Coates, Building Administration Manager	Records discussed below

#### Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
Undated	Golden State Redevelopment Project	Unnamed document with note indicating the subject property is developed for use as a parking for 2919 Empire (property located adjacent to the east)

Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the BBD.

### 4.4 PLANNING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Burbank Planning Department (BPD)	February 28, 2019	Email	Ms. Carol-Ann Coates, Building Administration Manager	No evidence indicating the existence of AULs on file for the subject property

#### 4.5 ASSESSOR'S OFFICE

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles County Assessor's Office	February 28, 2019	Website	N/A	Information obtained is discussed below

#### Records Summary

APN	2464-006-045
Acreage	0.67 acres
Construction Date	1948
Building Square Footage	N/A square feet
Current Owner	Not provided

#### 4.6 OTHER AGENCIES SEARCHED

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	February 28, 2019	Website	N/A	No records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	February 28, 2019	Website	N/A	No records on file
CA DTSC Envirostor	February 28, 2019	Website	N/A	No records on file
South Coast Air Quality Management District (SCAQMD)	February 28, 2019	Online records request	Ms. Stacey Walkowiak	No records on file

#### 4.7 OIL AND GAS WELLS

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Department of Conservation Division of Oil, Gas and Geothermal Resources (DOGGR)	February 28, 2019	DOGGR Map	No

#### 4.8 OIL AND GAS PIPELINES

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	February 28, 2019	NPMS Public Map Viewer	No

#### 4.9 STATE ENVIRONMENTAL SUPERLIENS

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

#### 4.10 STATE PROPERTY TRANSFER LAWS

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

DRAFT

## 5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjacent site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

### 5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Listings Within Search Distance	Subject Property	Adjacent Site(s)	Other Nearby Sites of Concern
NPL	1.0	2		✓

ADDITIONAL ENVIRONMENTAL RECORD SOURCES	SP/ADJ	22		✓	

Facility Name	1928 Jewelry Company, Mel Bernie & Company, Inc, Accessory Plating
Address	3000 West Empire Avenue
Distance & Direction	Adjacent to the south
Hydrologic Position	Down-gradient
Databases Listed	WIP, LOS ANGELES CO. HMS (listed twice), ENVIROSTOR, HIST UST, EMI, ENF, HAZNET (listed twice), CPS-SLIC, HIST UST, NPDES, WDS, CIWQS, RCRA-LQG, FINDS (listed twice), ECHO

Comments	<p>This site is listed in the Well Investigation Program (CA WIP) database. The Los Angeles Regional Water Quality Control Board (LARWQCB) has been investigating sources of ground water contamination in the San Fernando Valley under its Underground Tank and Well Investigation Programs since 1984 in an attempt to identify sources contributing to ground water pollution. The file status is listed as "Backlog". No further information is provided in the database.</p> <p>This site was listed twice in the CA LOS ANGELES CO. HMS database. This database lists industrial waste and UST sites listed with the Los Angeles County Department of Public Works. Dates were not available for permitting. The database indicates facility status as Open and permit status as "Not reported".</p> <p>This site is identified as an Envirostor site on the regulatory database. The Envirostor database is maintained by the Department of Toxic Substances Control (DTSC) and identifies sites that have known contamination or sites for which further investigation is warranted. The status of the site is listed as "Refer: Other Agency". No further information was available in this database.</p> <p>This site is listed twice in the Historical Underground Storage Tank (HIST UST) database with three underground storage tanks. All three tanks were reportedly installed in 1977 and each is listed as a 2,000-gallon Sump containing plating effluent. No further information was available in this database.</p> <p>This site is listed in the Emissions Inventory Data (EMI) database. Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies. Emissions generated by this facility were reported to the AQMD from 1987 until 2005. No further information was provided in the database.</p> <p>This site is listed in the Enforcement Action Listing (ENF) database. This is a listing of Water Board Enforcement Actions. On November 9, 2000 a 13267 Letter was issued regarding the WIP program. No further information was available in this database.</p> <p>This site is listed twice in the Facility and Manifest Data (HAZNET) database. Data is extracted from copies of manifests received by the DTSC. Complete listing of reported waste disposed of from this site is listed in section 4.6.</p> <p>This site was listed in the Spills, Leaks, Investigations and Cleanup (SLIC) database. The database indicates a status of "Competed - Case Closed" as of December 23, 2014. Copies of documents available from the RWQCB were dated February 22 and September 15, 2006. The no further requirements for Chromium VI investigation letter dated September 15, 2006 referred to the Boards heavy metals investigation in the San Fernando Valley. The board included the statement that it should be noted that this letter in no way release you from responsibility regarding other chemicals or release to the environment. No further information was available in this database.</p> <p>This site is listed in the National Pollutant Discharge Elimination System (NPDES) database. No violations were reported in the NPDES database.</p> <p>This site is listed in the Waste Discharge System (WDS) database. Listing in this database indicates that the site has been issued waste discharge requirements. This site is listed as a minor threat to water quality.</p>
----------	--

	<p>This site is listed in the California Integrated Water Quality System (CIWQS) database. The CIWQS is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections and manage violations and enforcement activities.</p> <p>This site was identified in the regulatory database as a Resource Conservation and Recovery Act (RCRA) Large Quantity Generators (LQG) site. Violations were noted in 2001 with penalty amounts proposed.</p> <p>This site is listed as a FINDS and ECHO site in association with the above RCRA listing.</p> <p>Based on the depth and inferred direction of groundwater flow, this site is not expected to represent a significant environmental concern. Furthermore, assessment of the subject property does not indicate that the subject property would be investigated as a source of any potential remaining contamination at this site.</p>
--	---

Facility Name	Cadam, I K Curtis Services, I K Curtis Services. Inc.
Address	2919 Empire Avenue, 2907 - 2919 Empire Avenue
Distance & Direction	Adjacent to the East
Hydrologic Position	Cross-gradient
Databases Listed	WIP (listed twice), RCRA-SQG (listed twice), FINDS (listed twice), ECHO (listed twice), HIST UST (listed twice)
Comments	<p>This adjacent property is listed twice in the Well Investigation Program (CA WIP) database. The Los Angeles Regional Water Quality Control Board (LARWQCB) has been investigating sources of ground water contamination in the San Fernando Valley under its Underground Tank and Well Investigation Programs since 1984 in an attempt to identify sources contributing to ground water pollution. The file status is listed as "Historical". No further information is provided in the database.</p> <p>This site is identified in the regulatory database as a Resource Conservation and Recovery Act (RCRA) Small Quantity Generators (SQGs) site. No Violations were noted in this database.</p> <p>This site is listed in the Historical Underground Storage Tank (HIST UST) database. One UST is listed, content, capacity or status was not reported in this database.</p> <p>This property is listed twice as a FINDS and ECHO site in association with the above RCRA listing. No violations or enforcement actions were identified on the EPA websites Envirofacts and ECHO. Based on the nature of this listing and lack of violations, it is not expected to represent a significant environmental concern.</p> <p>Based on the non-release nature of the listings, and the depth and inferred direction of groundwater flow, the review of regulatory files for this adjacent site was not deemed necessary and the listings are not expected to represent a significant environmental concern.</p>

Facility Name	Sierracin-Harrison
Address	3020 Empire Avenue
Distance & Direction	Adjacent to the south
Hydrologic Position	Down-gradient
Databases Listed	CPS-SLIC, EMI, ENF, WIP
Comments	<p>This site was listed in the Spills, Leaks, Investigations and Cleanup (SLIC) database. The database indicates a status of "Open-Inactive" as of October 29, 2014. No further information was provided regarding the status date in 2014.</p> <p>This site is listed in the Emissions Inventory Data (EMI) database. Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies. Emissions from this site were reported to AQMD from 1987 until 2004. No further information was provided in the database.</p> <p>This site is listed in the Enforcement Action Listing (ENF) database. This is a listing of Water Board Enforcement Actions. On November 9, 2000 a 13267 Letter was issued regarding the WIP program. No further information was available in this database.</p> <p>This site is listed in the Well Investigation Program (CA WIP) database. The Los Angeles Regional Water Quality Control Board (LARWQCB) has been investigating sources of ground water contamination in the San Fernando Valley under its Underground Tank and Well Investigation Programs since 1984 in an attempt to identify sources contributing to ground water pollution. The file status is listed as "Backlog". No further information is provided in the database.</p> <p>The adjacent site on the west side of the subject property is listed in the regulatory database as an open SLIC case. Details regarding the listing were not identified. Online records at the GeoTracker website included a No Further Requirements Letter issued by RWQCB on July 24, 1996 after reviewing a Soil Gas Investigation and a No Further Requirements Letter issued on July 6, 2005 indicating that no further requirements with respect to the RWQCB heavy metals investigation in the San Fernando Valley was complete, however, it should be noted that the letter in no way releases this site from responsibility regarding other chemicals or releases to the environment.</p> <p>Based on the issued NFRs, the inactive status, the depth and inferred direction of groundwater flow, this site is not expected to represent a significant environmental concern. Furthermore, assessment of the subject property does not indicate that the subject property would be investigated as a source of any potential remaining contamination at this site.</p>

Facility Name	Associated Components Manufacturing, Inc.
Address	3030 Empire Avenue
Distance & Direction	Adjacent to the south
Hydrologic Position	Down-gradient

Comments	<p>This adjacent property is listed in the Well Investigation Program (CA WIP) database. The Los Angeles Regional Water Quality Control Board (LARWQCB) has been investigating sources of ground water contamination in the San Fernando Valley under its Underground Tank and Well Investigation Programs since 1984 in an attempt to identify sources contributing to ground water pollution. The file status is listed as "Historical". No further information is provided in the database.</p> <p>Based on the non-release nature of the listing, and the depth and inferred direction of groundwater flow, the review of regulatory files for this adjacent site was not deemed necessary and this listing is not expected to represent a significant environmental concern.</p>
----------	---

Facility Name	San Fernando Valley (Area 1)
Address	North Hollywood Wellfield Area, North Hollywood, California
Distance & Direction	At and adjacent to the subject property
Hydrologic Position	N/A
Databases Listed	NPL, SEMS, US ENG CONTROLS, US INST CONTROL, ENVIROSTOR, HIST Cal-Sites, ROD, PRP, CONSENT, FINDS, ECHO, Cortese

Comments	<p>The subject property is located inside the San Fernando Valley Area 1 Superfund Site. This site is listed in the National Priorities List (NPL) database. Also known as Superfund sites, NPL lists sites that have known releases or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States and its territories. This site is listed in multiple databases, all relating to the NPL listing. Based on information obtained from the Environmental Protection Agency's Third Five Year Review (TFYR) of this site known as San Fernando Valley (SFV) – Area 1 Superfund Site, North Hollywood and Burbank, Los Angeles County, California published on September 21, 2018, The San Fernando Valley Area 1 Superfund Site (SFV Area 1) consists primarily of two large plumes from multiple sources in the San Fernando Valley. Site contaminant sources include, but are not limited to, the former Bendix Aviation and Allied Signal-Aerospace Company facilities in North Hollywood (successor cooperation is now Honeywell International), the former Lockheed Martin Corporation facilities near the Burbank Airport, and many other known sources throughout Area 1. Trichloroethene (TCE) and tetrachloroethene (PCE) were widely used in the San Fernando Valley starting in the 1940s for dry cleaning and for degreasing machinery. Disposal was not well-regulated at that time, and releases from a large number of facilities throughout the eastern SFV Area 1 have resulted in the large plume of VOC-contaminated groundwater that starts in the Area 1 Site and extends southeast, down-gradient, through the San Fernando Valley Superfund, Area 2 Site and through the San Fernando Valley Superfund, Area 4 Site. Based on an examination of the concentration maps in the TFYR, the subject property is located on a PCE groundwater contamination plume as indicated on the 2017 Contamination in Groundwater Eastern San Fernando Valley Map with concentrations of 50 to 499 micrograms per liter (µg/L). Based on an examination of the TCE concentration maps in the TFYR, the subject property is located on, a TCE groundwater contamination plume as indicated on the 2017 Contamination in Groundwater Eastern San Fernando Valley Map with concentrations of 50 to 499 micrograms per liter (µg/L). Based on the depth of groundwater in the vicinity of the subject property, vapor intrusion does not appear to be a concern. The documented groundwater contamination associated with SFV Area 1 represents a REC; however, assessment of the subject property does not indicate that the subject property would be investigated as a source of this contamination, and therefore, it is unlikely that the subject property owner would be responsible for cleanup costs associated with the release at this site.</p>

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions &amp; Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners. Envirostor Land Use Restrictions were added to</p>
----------	--

	<p>the deed as of September 19, 1997.</p> <p>This site is identified as an Envirostor site on the regulatory database. The Envirostor database is maintained by the Department of Toxic Substances Control (DTSC) and identifies sites that have known contamination or sites for which further investigation is warranted. The status of the site is listed as "Certified O&amp;M - Land Use Restrictions Only" as of September 19, 1997. Confirmed contaminants of concern were identified as Lead Chromium III Copper and compounds Nickel Zinc. This is listed as a soils only case.</p> <p>This site is listed in the Statewide Environmental Evaluation and Planning System (SWEEPS UST) database. The underground storage tank listing was updated and maintained by the State Water Resources Control Board in the early 1990's. The listing is no longer updated or maintained. No information regarding number of USTs, content, capacity or status is available in this database.</p> <p>This site was identified in the regulatory database as a Resource Conservation and Recovery Act (RCRA) NonGen/NLR database. This database includes sites which generate, transport, store, treat, and/or dispose of hazardous waste as defined by the RCRA. Non-Generators do not presently generate hazardous waste. No violations were noted in this database.</p> <p>This site is listed in the Facility and Manifest Data (HAZNET) database. Data is extracted from copies of manifests received by the DTSC. Hazardous waste was generated at this site in 1993.</p> <p>This site was listed in the CA LOS ANGELES CO. HMS database. This database lists industrial waste and UST sites listed with the Los Angeles County Department of Public Works. Dates were not available for permitting. The database indicates facility status as "Open".</p> <p>This site is listed in the HWP database. This database lists EnviroStor permitted facilities. Detailed information on permitted hazardous waste facilities and corrective action tracked in EnviroStor. The status of this site is Closed and is reported as Historical - Non-Operating.</p> <p>This site is listed in the Well Investigation Program (CA WIP) database. The Los Angeles Regional Water Quality Control Board (LARWQCB) has been investigating sources of ground water contamination in the San Fernando Valley under its Underground Tank and Well Investigation Programs since 1984 in an attempt to identify sources contributing to ground water pollution. The file status is listed as "Historical". No further information is provided in the database.</p> <p>Based on the site certification by the DTSC as a soils only case with only land use restrictions, the distance from the subject property and the depth of groundwater, this site is not expected to represent a significant environmental concern for the subject property.</p>
--	---

Facility Name	Lockheed A-1, Building 85, Lots 16, 16A
Address	3220 West Thorton
Distance & Direction	0.24 Mile North-northwest

Hydrologic Position	Cross-gradient
Databases Listed	CPS-SLIC, WIP
Comments	<p>This site was listed in the Spills, Leaks, Investigations and Cleanup (SLIC) database. The database indicates a status of "Open-Site Assessment" as of January 3, 1990. Chromium and Volatile organic compounds have been reported as potential contaminants of concern. A soil vapor extraction system has operated at this site removing VOCs. Lockheed Martin Corporation facilities near the Burbank Airport are included as sources of contamination included in the San Fernando Valley Area 1. Trichloroethene (TCE) and tetrachloroethene (PCE) were widely used in the San Fernando Valley starting in the 1940s for degreasing machinery.</p> <p>This site is listed in the Well Investigation Program (CA WIP) database. The Los Angeles Regional Water Quality Control Board (LARWQCB) has been investigating sources of ground water contamination in the San Fernando Valley under its Underground Tank and Well Investigation Programs since 1984 in an attempt to identify sources contributing to ground water pollution. The file status is listed as "Active". No further information is provided in the database.</p> <p>Based on the proximity of this site to the subject property and the known designation as a responsible party for the SFV Area 1 NPL listing, this represents a REC and is further discussed above in the SFV area 1 writeup.</p>

## 5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Based on a review of available resources as documented in this report, AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

## 6.0 INTERVIEWS AND USER PROVIDED INFORMATION

### 6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

#### 6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	N/A	N/A	N/A	N/A	Not interviewed; refer to Section 1.5
Key Site Manager	N/A	N/A	N/A	N/A	Not interviewed; refer to Section 1.5

#### Interview Summary

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	Unknown	Unknown
Do you have any knowledge of previous environmental investigations conducted on site?	Unknown	Unknown
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	Unknown	Unknown
Are you aware of any known plans for site redevelopment or change in site use?	Unknown	Unknown
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	Unknown	Unknown
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	Unknown	Unknown
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	Unknown	Unknown
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	Unknown	Unknown

#### 6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI attempted to obtain contact information for past owners, operators and occupants of the subject property in order to interview them regarding the potential for contamination at the property. AEI requested this contact information, reviewed agency records, and performed online research to obtain this information. Contact information was not found. As such, interviews with

past owners, operators and occupants were not reasonably ascertainable.

### 6.1.3 INTERVIEW WITH OTHERS

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

### 6.2 USER PROVIDED INFORMATION

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
<p>1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)</p> <p>Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?</p>	<p>Information not provided</p>
<p>2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)).</p> <p>Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?</p>	<p>Information not provided</p>
<p>3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).</p> <p>Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?</p>	<p>Information not provided</p>
<p>4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).</p> <p>Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?</p>	<p>Information not provided</p>

Question	Response/ Comment
<p>5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).</p> <p>Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:</p> <p>(a) Do you know the past uses of the property?</p> <p>(b) Do you know of specific chemicals that are present or once were present at the property?</p> <p>(c) Do you know of spills or other chemical releases that have taken place at the property?</p> <p>(d) Do you know of any environmental cleanups that have taken place at the property?</p>	<p>Information not provided</p>
<p>6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).</p> <p>Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?</p>	<p>Information not provided</p>

### 6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION

No prior reports or other relevant documentation in association with the subject property was made available to AEI during the course of this assessment.

### 6.4 ENVIRONMENTAL LIEN SEARCH

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

## 7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	March 5, 2019
AEI Site Assessor(s)	Jeffrey L. McNeil
Property Escort(s)/ Relationship(s) to Property	Mr. Anibal Dominguez, Project Development & Construction Management
Units/Areas Observed	AEI was granted full access to the subject property
Area(s) not accessed and reason(s)	Due to the large volume of vehicles within the parking areas of the subject property, direct visual observation of the ground in many areas was not possible. Features may be present that were not observed during AEI's site inspection.  Refer to Section 1.5 for discussion of limiting condition(s).
Other Physical Constraints	None

### Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjacent Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use		✓
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids	✓	✓
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers		
Pits, Ponds, and Lagoons		
Stained Soil or Pavement	✓	
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems		
Biomedical Wastes		
Other		

### 7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

## ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

### *Transformers*

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/No)	Non-PCB Label (Yes/No)
Pole-Mounted	1	Los Angeles Department of Water and Power	Unknown	No	No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the transformer. Based on the good condition of the equipment, the transformer is not expected to represent a significant environmental concern.

## STAINED SOIL AND PAVEMENT

Minor amounts of oily surface staining were observed in the parking area. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not expected to represent a significant environmental concern.

## 7.2 ADJACENT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

## REGULATED HAZARDOUS SUBSTANCES/WASTES AND/OR PETROLEUM PRODUCTS IN CONNECTION WITH PROPERTY USE

The adjacent site to the south was observed to be occupied by a light-industrial business. Based on the nature of use, hazardous substances are likely utilized/stored on the site. This site was identified in the regulatory database and is further discussed in Section 5.1.

## ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

### *Transformers*

Several pole-mounted and pad-mounted transformers were observed on the adjacent sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

DRAFT

## 8.0 NON-ASTM SERVICES

---

### 8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

The subject property is currently a parking lot and lacks structures. Consequently, no building components containing suspect asbestos containing materials were identified during the site inspection.

### 8.2 LEAD-BASED PAINT

The subject property is currently a parking lot and lacks structures. Consequently, AEI did not observe building components likely to contain suspect LBP during the site reconnaissance.

### 8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2 pCi/L and 4 pCi/L, equal to or below the action level of 4 pCi/L set forth by the US EPA.

### 8.4 MOLD

The subject property is currently a parking lot and lacks structures. Consequently, mold was not addressed as part of this assessment.

## 9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

---

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

2814,3000,3001W EMPIRE 2214N ONTARIO 2200N FAIRVIE  
BURBANK, CA 91504

#### COORDINATES

Latitude (North): 34.1917430 - 34° 11' 30.27"  
Longitude (West): 118.3431120 - 118° 20' 35.20"  
Universal Transverse Mercator: Zone 11  
UTM X (Meters): 376238.9  
UTM Y (Meters): 3784036.5  
Elevation: 655 ft. above sea level

### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal NPL site list***

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 12/12/2018 has revealed that there are 2 NPL

## EXECUTIVE SUMMARY

sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>SAN FERNANDO VALLEY</b> Cerclis ID:: 902252 EPA Id: CAD980894901	<b>CRYSTAL SPRINGS WELL</b>	<b>SSE 1/2 - 1 (0.838 mi.)</b>	<b>0</b>	<b>43</b>

### ***Federal CERCLIS list***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/12/2018 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>SAN FERNANDO VALLEY</b> Site ID: 0902251 EPA Id: CAD980894893	<b>NORTH HOLLYWOOD WELL</b>	<b>0 - 1/8 (0.000 mi.)</b>	<b>0</b>	<b>80</b>

### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/13/2018 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

### ***Federal RCRA CORRACTS facilities list***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

### ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 14 RCRA-SQG sites within approximately 0.25 miles of the target property.

### **Federal institutional controls / engineering controls registries**

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 07/31/2018 has revealed that there is 1 US ENG CONTROLS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>SAN FERNANDO VALLEY</b>	<b>NORTH HOLLYWOOD WELL</b>	<b>0 - 1/8 (0.000 mi.)</b>	<b>0</b>	<b>80</b>
EPA ID:: CAD980894893				
EPA ID:: CAD980894893				

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 07/31/2018 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/29/2018 has revealed that there are

## EXECUTIVE SUMMARY

19 ENVIROSTOR sites within approximately 1 mile of the target property.

### **State and tribal landfill and/or solid waste disposal site lists**

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 28 CPS-SLIC sites within approximately 0.5 miles of the target property.

### State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 3 UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### ADDITIONAL ENVIRONMENTAL RECORDS

#### **Local Lists of Hazardous waste / Contaminated Sites**

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there are 2 HIST Cal-Sites sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

#### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 5 SWEEPS UST sites within approximately 0.25 miles of the target property.

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

CA BOND EXP. PLAN: Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

A review of the CA BOND EXP. PLAN list, as provided by EDR, and dated 01/01/1989 has revealed that there is 1 CA BOND EXP. PLAN site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
LOCKHEED-BURBANK PLA	2555 NO. HOLLYWOOD W	WNW 1/4 - 1/2 (0.286 mi.)	Q73	222

Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the Cortese list, as provided by EDR, and dated 12/20/2018 has revealed that there is 1 Cortese site within approximately 0.5 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### **EDR Exclusive Records**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as

**FINDS:**

Registry ID: 110000782564

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

**HAZARDOUS AIR POLLUTANT MAJOR**

**STATE MASTER**

**HAZARDOUS WASTE BIENNIAL REPORTER**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Scoring: 2

Summary Details:

Conditions at proposal October 15, 1984): San Fernando Valley Area 2) is an area of contaminated ground water located in the vicinity of the Crystal Springs Well Field in the Cities of Los Angeles and Glendale, Los Angeles County, California. This area is part of the San Fernando Valley Basin, a natural underground reservoir that represents an important source of drinking water for at least 3 million people in the Los Angeles metropolitan area. The contaminated ground water, which underlies an area of approximately 6,680 acres, contains trichloroethylene (TCE) and perchloroethylene (PCE), according to tests conducted by the California Department of Health Services, as well as numerous local government agencies. The State s recommended drinking water guidelines for TCE and PCE 5 and 4 parts per billion respectively) are exceeded in a number of public wells in this area. To alleviate this contamination, wells are either taken out of service or blended withwater from clean sources to ensure that the public receives water with TCE/PCE concentrations below the State s guidelines. Status June 10, 1986): EPA and the Los Angeles Department of Water and Power are entering into a cooperative agreement for a remedial investigation of the San Fernando Valley Basin and a feasibility study targeted at Area 1, the most contaminated area. The RI is scheduled to begin in early 1986.

Background Info: essentially been put out of commission.  
Exposure of receptors to contaminants can possibly occur through ingestion of contaminated drinking water, inhalation of vapors released from the contaminated water as in taking showers, and dermal exposure as in washing or bathing. However, with the strict regulatory control over water quality by the State's Department of Health, Office of Drinking Water (ODW), the RWQCB,

**SAN FERNANDO VALLEY (AREA 2) (Continued)**

**1000710134**

and other agencies, residents are assured that the water they consume is safe and that no one is drinking water which contains concentrations of contaminants above regulatory standards. Federal, state, and local agencies have been conducting investigations and cleanup of contaminated groundwater in the SFVGWB since contamination was discovered in 1979. These activities involve measuring the extent of contamination, developing and implementing cleanup remedies, and identifying responsible parties. EPA provided oversight of the basinwide Remedial Investigation (RI) of groundwater contamination conducted by the Los Angeles Department of Water and Power (LADWP). The RI objectives were to collect lithological and water quality data and information regarding basin operations for the eastern SF and Verdugo basins; develop a regional characterization of geology, hydrology, hydrogeology and the nature and extent of groundwater contamination within the eastern & Verdugo basins; study fate and transport of compounds in the environment; identify Applicable or Relevant and Appropriate Requirements (ARAR's); and evaluate the potential risk to human health and the environment.

The Remedial Investigation of the SFVGWB was divided into two phases:

Phase I activities have included vertical profile borings and installation of monitoring wells to obtain preliminary contamination information. Monitoring wells have been installed as follows: 34 in North Hollywood (Area #1); 29 in Crystal Springs (Area #2); 7 in Verdugo (Area #3); and 17 in Pollock (Area #4).

Information obtained from Phase I investigation activities identified the need for several operable units. Operable Unit is a federal term which is similar to the State's definition of a removal action.

Phase II activities consist of basinwide remedial investigation conducted by the LADWP.

Remedial Actions (RAs):

North Hollywood (Area #1) -- Two RAs were identified for Area #1, the North Hollywood OU and the Burbank OU.

A Record of Decision (ROD) for the North Hollywood RA was signed in September 1987, selecting groundwater extraction and treatment (air stripping) of 2,000 gallons per minute (gpm) of contaminated water as an interim remedy. This RA was constructed with funding from EPA and the State and has been treating contaminated groundwater since March 1989. This facility is located at 11845 Vose Street in the N. Hollywood section of Los Angeles.

A ROD for the Burbank OU was signed in June 1989, again selecting groundwater extraction and treatment of about 12,000 gpm of contaminated water. Phase I of the Burbank OU began operations in January 1996 treating groundwater at a rate of 6,000 gpm. Phase II began operations in May 1998 adding an additional 3,000 gpm to the Burbank OU's treatment capacity.

Crystal Springs (Area #2) -- LADWP has completed a focused RI/FS for this proposed RA. The Glendale OU was separated into a North OU and a South OU based on the amount of contamination and the facilities contributing to the GW contamination. A ROD for each OU was signed on June 18, 1993

**SAN FERNANDO VALLEY (AREA 2) (Continued)**

**1000710134**

designating groundwater extraction and treatment as the interim remedy. The PRPs formed a group and combined the RA efforts for each OU into one document. The selected alternative is GW extraction and treatment. The Glendale OU began operations in September 2000.

Verdugo and Pollock (Areas #3 and #4) --

Currently no RAs have been identified for Area #3 or for Area #4. In October 2003, US EPA proposed No Remedial Action Verdugo Basin (Area #3).

Another contaminant of concern, hexavalent chromium, has been identified in the San Fernando Valley Groundwater Basin. EPA and the RWQCB are currently identifying potential sources of contamination and pursuing PRPs that may be responsible for contaminating groundwater. As these PRPs are identified, individual site investigations and mitigation activities will be pursued. Enforceable agreements and orders will be implemented at numerous specific potential source sites within the Basin by RWQCB and DTSC.

The San Fernando Valley Ground Water Basin (SFGWB) is located within the Upper Los Angeles River Area and consists of the eastern portion of the San Fernando Valley and the entire Verdugo Basin. The SFGWB encompasses approximately 112,000 acres of alluvial valley fill deposits and provides enough water to serve approximately 600,000 residents. The Basin is bounded on the north and the northwest by the Santa Susana Mountains, on the northeast by the San Gabriel Mountains, on the west by the Simi Hills and on the south by the Santa Monica Mountains.

The San Fernando Valley Study area includes four National Priorities List (NPL) sites. They are:

Area #1 - North Hollywood NPL site covers 9336 acres in the eastern part of the San Fernando Valley. The site has been divided into the North Hollywood Operable Unit (OU) and the Burbank OU.

Area #2 - Crystal Springs NPL Site covers 3975 acres southeast of the North Hollywood NPL site and is located in the cities of Glendale and Los Angeles.

Area #3 - Verdugo NPL Site covers 2673 acres in the eastern part of the San Fernando Valley and is located in and adjacent to La Crescenta in the Verdugo Mountains.

Area #4 - Pollock NPL Site covers 1653 acres in the southeastern part of the San Fernando Valley and is located in and adjacent to the cities of Los Angeles and Glendale. Groundwater contamination in the SFGWB is linked to prewar, postwar, and current industrialization in the San Fernando Valley.

The primary contaminants of concern are volatile organic compounds (VOCs), trichloroethylene (TCE), and tetrachloroethylene (PCE), which have been and/or are being used in many San Fernando Valley industries, such as aeronautical, automotive, dry cleaning, and metal plating. These solvents have found their way to the groundwater basin as a result of both past and improper use, storage, and disposal practices. The SFGWB Superfund sites, added to the NPL in 1986, are areas where groundwater from wells have been found to contain VOCs above the state and federal drinking water standards. Groundwater contamination at numerous wells have been so severe with TCE and PCE that these wells have

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

SUPERFUND NPL

Pathway: GROUND WATER PATHWAY  
Scoring: 2

Summary Details:

Conditions at proposal (October 15, 1984): San Fernando Valley Area I) is an area of contaminated ground water in the vicinity of the North Hollywood section of the City of Los Angeles, Los Angeles County, California. This area is part of the San Fernando Valley Basin, a natural underground reservoir that represents an important source of drinking water for at least 3 million people in the Los Angeles metropolitan area. The contaminated ground water, which underlies an area of approximately 5,156 acres, contains trichloroethylene (TCE) and perchloroethylene (PCE), and to a lesser extent, carbon tetrachloride and chloroform, according to analyses conducted by the California Department of Health Services, as well as numerous local government agencies. The State's recommended drinking water guideline for TCE and PCE (5 and 4 parts per billion respectively) are exceeded in a number of public wells in this area. To alleviate this contamination, wells are either taken out of service or blended with water from clean sources to ensure that the public receives water with TCE/PCE concentrations below the State's guidelines. Status (June 10, 1986): EPA and the Los Angeles Department of Water and Power are entering into a cooperative agreement for a remedial investigation of the San Fernando Valley Basin and a feasibility study targeted at Area 1, the most contaminated area. The RI is scheduled to begin in early 1986.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: 5 Year Review Reports  
Completed Date: 08/17/1998  
Comments: A second 5-year review of remedial activities is conducted at the North Hollywood OU (NHOU) and covers operations from 1993 thru 1997. The purpose was to evaluate whether the NH Interim Remedy achieved the objectives specified in the ROD. The findings of the 5-year review are that the objectives of the ROD have been met.

Background Info: The San Fernando Valley Ground Water Basin (SFGWB) is located within the Upper Los Angeles River Area, and consists of the eastern portion of the San Fernando Valley and the entire Verdugo

MAP FINDINGS

**SAN FERNANDO VALLEY (AREA 1) (Continued)**

**1000709322**

Basin. The SFVGWB encompasses approximately 112,000 acres of alluvial valley fill deposits and provides enough water to serve approximately 600,000 residents. The Basin is bounded on the north and the northwest by the Santa Susana Mountains, on the northeast by the San Gabriel Mountains, on the west by the Simi Hills and on the south by the Santa Monica Mountains.

The San Fernando Valley Study area includes four National Priorities List (NPL) sites. They are:

Area #1 - North Hollywood NPL Site covers 9336 acres in the eastern part of the San Fernando Valley. The site has been divided into the North Hollywood Operable Unit(OU) and the Burbank OU.

Area #2 - Crystal Springs NPL Site covers 3975 acres located southeast of the North Hollywood NPL site and is in the cities of Glendale and Los Angeles.

Area #3 - Verdugo NPL Site covers 2673 acres in the eastern part of the SF Valley and is located in and adjacent to La Crescenta in the Verdugo Mountains.

Area #4 - the Pollock NPL Site covers 1635 acres in the south-eastern part of the San Fernando Valley and is located in and adjacent to the cities of Los Angeles and Glendale.

Groundwater contamination in the SFVGWB is linked to prewar, postwar, and current industrialization in the San Fernando Valley.

The primary contaminants of concern are the volatile organic compounds (VOCs) trichloroethylene (TCE) and tetrachloroethylene (PCE). These compounds have been and/or are being used in many San Fernando Valley industries, such as aeronautical, automotive dry cleaning, and metal plating. These solvents have found their way to the groundwater basin as a result of both past and improper use, storage and disposal practices. The SFVGWB Superfund sites, added to the NPL in 1986, are areas where groundwater from wells have been found to contain VOCs above the state and federal drinking water standards. Groundwater contamination in numerous wells have been so severe with TCE and PCE that these wells have essentially been put out of commission. Exposure of receptors to contaminants can possibly occur through ingestion of contaminated drinking water, inhalation of VOC vapors released from the contaminated water as in taking showers, and dermal exposure as in washing or bathing. However, with the strict regulatory control over water quality by the State's Department of Health, Office of Drinking Water (ODW), the RWQCB, and other agencies, residents are assured that the water they consume is safe and that no one is drinking water which contains concentrations of contaminants above regulatory standards. Federal, state, and local agencies have been conducting investigations and cleanup of contaminated groundwater in the San Fernando Valley since contamination was discovered in 1979. These activities involve measuring the extent of contamination, developing and implementing cleanup remedies, and identifying responsible parties. EPA provided oversight of the basinwide Remedial Investigation (RI) of groundwater contamination conducted by the Los Angeles Department of Water and Power (LADWP). The RI objectives were to collect lithological and water quality data and information regarding basin operations for the eastern SF and Verdugo basins; develop a regional characterization of geology,

**SAN FERNANDO VALLEY (AREA 1) (Continued)**

**1000709322**

hydrology, hydrogeology and the nature and extent of groundwater contamination within the eastern and Verdugo basins; study fate and transport of compounds in the environment; identify Applicable or Relevant and Appropriate Requirements; (ARAR's) and evaluate the potential risk to human health and the environment. The Remedial Investigation of the SFVGWB was divided into two phases.

Phase I activities have included vertical profile borings and installation of monitoring wells to obtain preliminary contamination information. Monitoring wells have been installed as follows: 34 in North Hollywood (Area #1); 29 in Crystal Springs (Area #2); 7 in Verdugo (Area #3); and 17 in Pollock (Area #4).

Information obtained from Phase I investigation activities identified the need for several operable units. Operable Unit is a federal term which is similar to the State's definition of a removal action.

Phase II activities consist of a basinwide remedial investigation conducted by the LADWP.

**Remedial Actions (RAs):**

North Hollywood (Area #1) -- Two RAs were identified for Area #1, the North Hollywood OU and the Burbank OU.

A Record of Decision (ROD) for the North Hollywood RA was signed in September 1987, selecting groundwater extraction and treatment (air stripping) of 2,000 gallons per minute (gpm) of contaminated water as an interim remedy. This RA was constructed with funding from EPA and the State and has been treating contaminated groundwater since March 1989. This facility is located at 11845 Vose Street in the N. Hollywood section of Los Angeles.

A ROD for the Burbank OU was signed in June 1989, again selecting groundwater extraction and treatment of about 12,000 gpm of contaminated water. Phase I of the Burbank OU began operations in January 1996 treating groundwater at a rate of 6,000 gpm. Phase II began operations in May 1998 adding an additional 3,000 gpm to the Burbank OU's treatment capacity.

Crystal Springs (Area #2) -- LADWP has completed a focused RI/FS for this proposed RA. The Glendale OU has been separated into a North OU and a South OU based on the amount of contamination and the facilities contributing to the GW contamination. A ROD for each OU was signed on June 18, 1993 designating groundwater extraction and treatment as the interim remedial. The PRPs have formed a group and combined the RA efforts for each OU into one document. The selected alternative is GW extraction and treatment. The Glendale OU began operations in September 2000.

Verdugo and Pollock (Areas #3 and #4) --

Currently no RAs have been identified for Area #3 or for Area #4.

In October 2003 US EPA proposed No Remedial Action for Verdugo Basin (Area #3).

Another contaminant of concern, hexavalent chromium, has been identified in the San Fernando Valley Groundwater Basin.

EPA and the RWQCB are currently identifying potential sources of contamination and pursuing PRPs that may be responsible for contaminating groundwater. As these PRPs are identified,

MAP FINDINGS

**SAN FERNANDO VALLEY (AREA 1) (Continued)**

**1000709322**

individual site investigations and mitigation activities will be pursued. Enforceable agreements and orders will be implemented at numerous specific potential source sites within the Basin by RWQCB and DTSC

**Environmental Interest/Information System**

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

**SUPERFUND NPL**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also

Classification: Large Quantity Generator

. Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002

. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003

. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

- . Waste code: D002
- . Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
  
- . Waste code: D003
- . Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
  
- . Waste code: D007
- . Waste name: CHROMIUM
  
- . Waste code: D035
- . Waste name: METHYL ETHYL KETONE
  
- . Waste code: F003
- . Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
  
- . Waste code: F005
- . Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: D000  
. Waste name: Not Defined

. Waste code: D001  
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

**FINDS:**

Registry ID: 110001189785

**Environmental Interest/Information System**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

**AIR EMISSIONS CLASSIFICATION UNKNOWN**

generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Local Agency: Not reported  
RB Case Number: 104.5153  
File Location: Regional Board  
Potential Media Affected: Aquifer used for drinking water supply  
Potential Contaminants of Concern: Not reported  
Site History: Site assessments indicated elevated concentrations of PCE and TCE in the vadose zone in the northwest portion of the site near a former AST. An NFR letter was issued on November 16, 1995 excluding the VOC-contaminated northwest area. An SVE system operated intermittently between 1997 and 2002. PCE, TCE, and 1,1-DCE were significantly reduced compared to baseline concentrations and asymptotic conditions were attained. VLEACH modeling indicated that residual VOCs will not further degrade groundwater quality beneath the site. The Regional Board issued an NFR for soils letter on February 7, 2003. LMC monitors and treats the groundwater in the BOU on an ongoing basis with oversight by USEPA.

**FINDS:**

**Registry ID:** 110002814438

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CA BOND EXP. PLAN:

**Actual:**  
**679 ft.**

Reponsible Party: RWQCB REFERRAL SITE  
 Project Revenue Source Company: Not reported  
 Project Revenue Source Addr: Not reported  
 Project Revenue Source City,St,Zip: Not reported  
 Project Revenue Source Desc: The PRP is providing for the remediation of the site under RWQCB lead and will pay all costs associated with site cleanup. There are no current plans for expenditure of Bond funds for the site.  
 Site Description: The site is the location of an aircraft manufacturing facility constructed in the late 1930's and early 1940's. Operational activities include aircraft research, manufacturing and maintenance. Hazardous materials which are used at the facility include plating solutions, acids, fuels, and solvents.  
 Hazardous Waste Desc: The facility overlies the San Fernando Valley Ground Water Basin. Analysis of monitoring wells on the facility and downgradient has revealed contamination of the ground water by perchloroethylene (PCE) and trichloroethylene (TCE). Concentrations of PCE vary from approximately 20 to 12,000 parts per billion (ppb) and from approximately 20 to 1,600 ppb for TCE. Other compounds detected at low levels are acetone, chloroform, methyl ethyl ketone, chlorobenzene, ethylbenzene, and benzene.  
 Threat To Public Health & Env: The contaminated aquifer is a major source of drinking water for the city. Wells downgradient have been shut down due to contamination from this or other sources. If the contamination migrates further offsite, additional wells may become contaminated, thus leading to a reduction in water quality and potential long-term loss of water supply.  
 Site Activity Status: The potentially responsible party (PRP) has installed ground water monitoring wells and is currently working under the direction of the Regional Water Quality Control Board to determine the nature and extent of the contamination.

Potential Contaminants of Concern: Not reported  
Site History: An SVE system operated at the site from 2003 - 2008 and removed approximately 28,000 lbs of VOCs, particularly PCE. Historical metals investigation data shows CrVI was removed during remedial excavation activities. This site is being reviewed for a soils-only closure. No monitoring wells are located on site.

- . Waste code: D002  
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002  
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Potential Media Affected: Aquifer used for drinking water supply  
Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Dichloroethene (DCE), Tetrachloroethylene (PCE), Trichloroethylene (TCE), Freon, Other CFCs, Chromium, Chromium VI, Other Metal  
Site History: The Hydro-Aire facility is a subsidiary of Crane, a diversified manufacturer of engineered industrial products with operations worldwide. Hydro-Aire has been in operation at this location since 1946 (Hydro-Aire, 1987). Hydro-Aire manufactures aviation and aeronautical equipment at the site. The site encompasses

MAP FINDINGS

**CRANE AEROSPACE (Continued)**

**S102628781**

approximately 11 acres in an industrial area of the City of Burbank (Figure 1). Kerr Canning Company used to occupy the site and the adjacent properties were used for agricultural purposes (grape growing). Pursuant to the California Environmental Quality Act (CEQA), the DTSC has prepared a Notice of Exemption (NOE) dated August 15, 2011, which concludes that the project will not have significant effect on the environment and a Land Use Covenant is to be recorded to restrict the property to current industrial/commercial use. Currently, several office and manufacturing buildings occupy the central and northern portions of the property, and paved parking areas are located in the eastern and southern portions of the site. The former plating room and the former wastewater treatment system were located at the south end of Building 1 (Figure 2). Hydro-Aire began electroplating operations at this location in 1951. In February 1985, an automated wastewater treatment system was installed as an integral part of the plating line (Hydro-Aire, 1986). The plating and wastewater treatment operations were discontinued in February 1991. Demolishing of the former plating room and wastewater treatment system components was conducted in 1991 and 2001. The California Regional Water Quality Control Board Los Angeles Region (RWQCB) has been the lead agency for the Hydro-Aire site investigation and remediation work since the 1980s. Significant investigation and remediation work at the site have been completed under the RWQCBs oversight including the former plating room assessments and soil remediation and groundwater monitoring. Concurrently with the RWQCB, the DTSC and City of Burbank have also provided oversight for this project. Detailed descriptions of the former plating room and operations have been provided in reports submitted to the Regional Board.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**FINDS:**

Registry ID: 110002653682

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CPS-SLIC:

Actual:  
683 ft.

Region: STATE  
Facility Status: Completed - Case Closed  
Status Date: 10/21/2015  
Global Id: SL603798624  
Lead Agency: LOS ANGELES RWQCB (REGION 4)  
Lead Agency Case Number: Not reported  
Latitude: 34.1982618342722  
Longitude: -118.34401845932  
Case Type: Cleanup Program Site  
Case Worker: GP  
Local Agency: Not reported  
RB Case Number: 104.0997  
File Location: Regional Board  
Potential Media Affected: Aquifer used for drinking water supply  
Potential Contaminants of Concern: Chromium, Chromium VI  
Site History:

Space-Lok, Inc. occupied the site (Site) from approximately 1962 to 1996, producing primarily aircraft fasteners. Aqueous finishing was only conducted in the building located in the southeastern portion of the Site. Solid sodium-dichromate was documented to have been stored inside the building. Subsurface soil investigations for heavy metals were conducted in June 2013 and July 2014. All CrVI detections were below the commercial/industrial RSL of 6.3 mg/kg. Concentrations of CrVI slightly exceeding the residential RSL of 0.3 mg/kg (0.45 mg/kg and 0.72 mg/kg) are shallow and limited in extent (one boring).

**S106483563**

had a meeting on 11/10/2009 with the RP and staff of The Source Group at the site. Mike Wood of the Source Group sent an email to Mr. Zaidi summarizing the meeting notes, which were reviewed and amended by Mr. Zaidi and sent back to Mr. Wood in an email dated 11/25/09. After collecting soil gas samples from the wells, The Source Group will submit a technical report after receiving the analytical results of the soil gas samples to the Regional Board staff for their review. The RP consultant has collected soil gas samples for a rebound test on 2/19/2010, and plans to drill two confirmation soil borings in March 2010. Regional Board staff issued a No Further Requirements for Soil Only letter dated 3/30/11 for the Former Premier Cleaners site. The Site was found to be an open lot during staff's site inspection in 2010.

**FINDS:**

Registry ID: 110002878752

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

**FINDS:**

Registry ID: 110002660291

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

POTW: Not reported  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

Completed Sub Area Name: Not reported  
Completed Document Type: Land Use Restriction - Site Inspection/Visit  
Completed Date: 03/26/2012  
Comments: 3/22/2012, DTSC's PM visited the site, and performed walk through of the site with Mr. Sergik Avakian representing the American Best Engineering, the current operator at the site. It was observed that the restricted area as defined by the LUC is in full compliance with the stipulated terms in the LUC. Mr. Avakian mentioned that he is renting/lease the site from a new owner. On 3/26/2012 DTSC's PM contacted Mr Richard Fond, and was confirmed Mr Fond sold the property on March 2012. DTSC's PM requested Mr Fond to advise DTSC regarding the particulars on the ownership transfer as required by the LUC, Mr. Fond will respond to the request.

**Handler Activities Summary:**

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

. Waste code: D001  
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE

MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002  
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003  
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: D006  
. Waste name: CADMIUM

. Waste code: D007  
. Waste name: CHROMIUM

. Waste code: D035  
. Waste name: METHYL ETHYL KETONE

. Waste code: F007  
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS

**FINDS:**

Registry ID: 110002651915

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

**RISK AND TECHNOLOGY REVIEW**

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002  
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D006  
. Waste name: CADMIUM

. Waste code: D007  
. Waste name: CHROMIUM

File Location: Regional Board  
Potential Media Affected: Aquifer used for drinking water supply  
Potential Contaminants of Concern: Other Acid or Corrosive, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Cyanide, Chromium, Chromium VI, Other Metal  
Site History: AH Plating is located at 1837 Victory Place in Burbank, CA. The Los Angeles County Assessor's parcel number for the property is 2464-017-010. A.H. Plating currently conducts electroplating operations primarily servicing the aviation industry. The facility has been in operation under the current owners for approximately 31 years. Prior to the AH Plating ownership, the property was owned and operated by Sun Valley Machine, Inc. from 1966 to through 1978. The plating facility consists of a one-story production building situated on the northern half of the property and an equipment storage area in the southern portion of the property. Plating operations are conducted in open-top plating tanks situated within concrete-lined containment areas within the production building. AH Plating conducts three principal metal coating operations including chromium plating, nickel plating, and cadmium plating.

these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

**HAZARDOUS AIR POLLUTANT MAJOR**

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

**RISK AND TECHNOLOGY REVIEW**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**STATE MASTER**

**HAZARDOUS WASTE BIENNIAL REPORTER**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Date form received by agency: 01/21/2008  
Site name: STEVE'S PLATING CORPORATION  
Classification: Large Quantity Generator

. Waste code: D001  
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002  
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A

**1000431948**

CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D035  
. Waste name: METHYL ETHYL KETONE

. Waste code: F005  
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006  
. . Waste name: Unspecified organic liquid mixture

. Waste code: D001  
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002  
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN

**WDS:**

Facility ID: 4 19I016820  
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.  
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board  
Subregion: 4

POTW: Not reported  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

RB Case Number: 104.0676  
File Location: Regional Board  
Potential Media Affected: Aquifer used for drinking water supply  
Potential Contaminants of Concern: Not reported  
Site History: The Lockheed Martin Corporation was subject to CAO No. 1987-161 issued to Lockheed Aeronautical Systems Company on Dec. 17, 1987. Beginning in 1997 and through 2008, SVE was used to extract approx. 184,000 pounds of VOCs to residual concentrations. Former Plant B1 occupied approx. 100 acres southwest of the Bob Hope Airport. It was in use by Lockheed between 1928 and 1991 with operations entailing completed parts fabrication and subassembly, including tooling, parts shaping, machining, plating, deburring, cleaning, and painting. An investigation was conducted under a 13267 Order No. R4-2013-0063 issued on April 18, 2013 to delineate the extent of VOCs and CrV in the subsurface and groundwater.

Potential Media Affected: Aquifer used for drinking water supply  
Potential Contaminants of Concern: Not reported  
Site History: Magna Plating was developed as a plating facility from 1953 through July 2006. The present ownership has operated Magna-Plating Company since 1963. Magna-Plating Company utilized cadmium, zinc, nickel and chromium in their operations as a plating facility. Chromium use was reportedly phased out in 1997. The Los Angeles Regional Water Quality Control Board (LARWQCB) required the plating facilities to evaluate and remediate the presence of heavy metals in soil, and chlorinated solvents, total chromium, hexavalent chromium and metals in groundwater.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/12/2018	Source: EPA
Date Data Arrived at EDR: 12/28/2018	Telephone: N/A
Date Made Active in Reports: 01/11/2019	Last EDR Contact: 02/15/2019
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/15/2019
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/12/2018	Source: EPA
Date Data Arrived at EDR: 12/28/2018	Telephone: N/A
Date Made Active in Reports: 01/11/2019	Last EDR Contact: 02/15/2019
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/15/2019
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Data Release Frequency: No Update Planned

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/12/2018

Telephone: 703-603-8704  
Last EDR Contact: 01/04/2019  
Next Scheduled EDR Contact: 04/15/2019  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/12/2018  
Date Data Arrived at EDR: 12/28/2018  
Date Made Active in Reports: 01/11/2019

Last EDR Contact: 02/15/2019  
Next Scheduled EDR Contact: 04/29/2019  
Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/13/2018	Source: EPA
Date Data Arrived at EDR: 12/28/2018	Telephone: 800-424-9346
Date Made Active in Reports: 01/11/2019	Last EDR Contact: 02/15/2019
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/29/2019
	Data Release Frequency: Quarterly

## **Federal RCRA CORRACTS facilities list**

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/01/2018	Source: EPA
Date Data Arrived at EDR: 03/28/2018	Telephone: 800-424-9346
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 12/03/2018

## **Federal RCRA non-CORRACTS TSD facilities list**

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (415) 495-8895
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 12/03/2018
Number of Days to Update: 86	Next Scheduled EDR Contact: 04/08/2019
	Data Release Frequency: Quarterly

## **Federal RCRA generators list**

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (415) 495-8895

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (415) 495-8895

	Data Release Frequency: Quarterly

## RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (415) 495-8895

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 10/17/2018	Source: Department of the Navy
Date Data Arrived at EDR: 10/25/2018	Telephone: 843-820-7326
Date Made Active in Reports: 12/07/2018	Last EDR Contact: 02/07/2019
Number of Days to Update: 43	Next Scheduled EDR Contact: 05/27/2019
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 07/31/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/28/2018	Telephone: 703-603-0695
Date Made Active in Reports: 09/14/2018	Last EDR Contact: 02/04/2019
Number of Days to Update: 17	Next Scheduled EDR Contact: 06/10/2019
	Data Release Frequency: Varies

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 07/31/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/28/2018	Telephone: 703-603-0695
Date Made Active in Reports: 09/14/2018	Last EDR Contact: 02/04/2019
Number of Days to Update: 17	Next Scheduled EDR Contact: 06/10/2019
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **Federal ERNS list**

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/24/2018

Date Data Arrived at EDR: 09/25/2018

Date Made Active in Reports: 11/09/2018

Number of Days to Update: 45

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Next Scheduled EDR Contact: 05/11/2019

Data Release Frequency: Quarterly

## **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 10/29/2018

Date Data Arrived at EDR: 10/30/2018

## ADDITIONAL ENVIRONMENTAL RECORDS

### Local Brownfield lists

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/17/2018

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/21/2018

## CERS TANKS: California Environmental Reporting System (CERS) Tanks

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs.

Date of Government Version: 10/22/2018	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 10/23/2018	Telephone: 916-323-2514
Date Made Active in Reports: 11/30/2018	Last EDR Contact: 01/24/2019
Number of Days to Update: 38	Next Scheduled EDR Contact: 05/06/2019
	Data Release Frequency: Quarterly

## Local Land Records

### LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 11/29/2018	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 12/04/2018	Telephone: 916-323-3400
Date Made Active in Reports: 01/11/2019	Last EDR Contact: 02/27/2019
Number of Days to Update: 38	Next Scheduled EDR Contact: 06/17/2019
	Data Release Frequency: Varies

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 12/12/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2018	Telephone: 202-564-6023
Date Made Active in Reports: 01/11/2019	Last EDR Contact: 02/15/2019
Number of Days to Update: 14	Next Scheduled EDR Contact: 05/06/2019
	Data Release Frequency: Semi-Annually

### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 12/03/2018	Source: DTSC and SWRCB
Date Data Arrived at EDR: 12/05/2018	Telephone: 916-323-3400

Number of Days to Update: 37	Next Scheduled EDR Contact: 03/18/2019
	Data Release Frequency: Semi-Annually

## Records of Emergency Release Reports

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 03/26/2018	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 03/27/2018	Telephone: 202-366-4555
Date Made Active in Reports: 06/08/2018	Last EDR Contact: 02/08/2019
Number of Days to Update: 73	Next Scheduled EDR Contact: 04/08/2019
	Data Release Frequency: Quarterly

## CHMIRS: California Hazardous Material Incident Report System

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 04/06/2018	Source: Office of Emergency Services
Date Data Arrived at EDR: 04/24/2018	Telephone: 916-845-8400
Date Made Active in Reports: 06/14/2018	Last EDR Contact: 01/24/2019
Number of Days to Update: 51	Next Scheduled EDR Contact: 05/06/2019
	Data Release Frequency: Semi-Annually

## LDS: Land Disposal Sites Listing (GEOTRACKER)

Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 12/10/2018	Source: State Water Quality Control Board
Date Data Arrived at EDR: 12/11/2018	Telephone: 866-480-1028
Date Made Active in Reports: 01/15/2019	Last EDR Contact: 12/12/2018
Number of Days to Update: 35	Next Scheduled EDR Contact: 03/25/2019
	Data Release Frequency: Quarterly

## MCS: Military Cleanup Sites Listing (GEOTRACKER)

Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 12/10/2018	Source: State Water Resources Control Board
Date Data Arrived at EDR: 12/11/2018	Telephone: 866-480-1028
Date Made Active in Reports: 01/15/2019	Last EDR Contact: 12/12/2018
Number of Days to Update: 35	Next Scheduled EDR Contact: 03/25/2019
	Data Release Frequency: Quarterly

## SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012	Source: FirstSearch

Date Made Active in Reports: 02/22/2013	Last EDR Contact: 01/03/2013
Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## **Other Ascertainable Records**

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 02/08/2019
Number of Days to Update: 88	Next Scheduled EDR Contact: 05/20/2019
	Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/08/2018	Telephone: 703-308-4044

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 12/12/2018	Source: EPA
Date Data Arrived at EDR: 12/28/2018	Telephone: 703-416-0223
Date Made Active in Reports: 01/11/2019	Last EDR Contact: 02/15/2019
Number of Days to Update: 14	Next Scheduled EDR Contact: 03/18/2019
	Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 10/26/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/06/2018	Telephone: 202-564-8600
Date Made Active in Reports: 01/11/2019	Last EDR Contact: 01/22/2019
Number of Days to Update: 66	Next Scheduled EDR Contact: 05/06/2019
	Data Release Frequency: Varies

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

## PRP: Potentially Responsible Parties

A listing of verified Potentially Responsible Parties

Date of Government Version: 08/13/2018	Source: EPA
Date Data Arrived at EDR: 10/04/2018	Telephone: 202-564-6023
Date Made Active in Reports: 11/09/2018	Last EDR Contact: 02/15/2019
Number of Days to Update: 36	Next Scheduled EDR Contact: 05/20/2019
	Data Release Frequency: Quarterly

## PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 09/14/2018	Source: EPA
Date Data Arrived at EDR: 10/11/2018	Telephone: 202-566-0500
Date Made Active in Reports: 12/07/2018	Last EDR Contact: 01/11/2019

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 10/02/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/03/2018	Telephone: 202-343-9775
Date Made Active in Reports: 11/09/2018	Last EDR Contact: 01/03/2019
Number of Days to Update: 37	Next Scheduled EDR Contact: 04/15/2019
	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007

Data Release Frequency: Varies

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

**HAZNET:** Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Date of Government Version: 12/10/2018	Source: State Water Resources Control Board
Date Data Arrived at EDR: 12/12/2018	Telephone: 916-341-5810

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Licensed Facilities

Source: Department of Social Services

**The EDR Aerial Photo Decade Package**

# EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

DRAFT

# Executive Summary

This is the third combined Five-Year Review of the San Fernando Valley Area 1 Superfund Site located in North Hollywood and Burbank, Los Angeles County, California. The purpose of this Five-Year Review is to review information to determine if the remedy is and will continue to be protective of human health and the environment.

The San Fernando Valley Area 1 Site has two groundwater operable units, the North Hollywood Operable Unit and the Burbank Operable Unit, located within its boundaries. This Five-Year Review represents the sixth Five-Year Review for the North Hollywood Operable Unit and the fourth Five-Year Review for the Burbank Operable Unit. The triggering action for this statutory review is the previous Five-Year Review. The Five-Year Review is required due to the fact that hazardous substances, pollutants, or contaminants remain at the Site at levels above those that would allow for unlimited use and unrestricted exposure.

In September 2009, EPA selected the following interim remedy for the North Hollywood Operable Unit: construction of new extraction wells; modification/rehabilitation of several existing extraction wells; expanded treatment; chromium treatment for NHE-1, NHE-2 and two of the new extraction wells; 1,4-dioxane treatment for NHE-2; installation of additional monitoring wells; institutional controls; and, use of the treated water in Los Angeles Department of Water and Power's water supply system. EPA subsequently amended this remedy in 2014 via a Record of Decision Amendment to add reinjection as an end use, and in 2017 via a Memorandum to File to add more extraction wells targeting 1,4 dioxane contamination. EPA recently issued an Explanation of Significant Differences in February 2018, which increases the groundwater extraction rate by adding new extraction wells and expanding the treatment system to accommodate the higher flow from the new wells. EPA determined that increased groundwater extraction would be required to achieve containment. None of these remedy enhancements have yet been implemented.

For the Burbank Operable Unit, EPA's selected remedy in the June 1989 Record of Decision included: extraction of contaminated groundwater, treatment by stripping, and reuse of the water by the City of Burbank for drinking water. Subsequently, EPA signed two Explanation of Significant Differences: November 1990 and February 1997. The 1990 Explanation of Significant Differences included blending of the extracted and treated groundwater with a water supply lower in nitrate, reinjection of excess water, and a clarification that the interim remedy could be designed, constructed, and operated in phases. In the second Explanation of Significant Differences, EPA eliminated the reinjection requirement and suspended the extraction rate requirement when nitrate levels in the extracted groundwater exceed 50 milligrams per liter (mg/l) as nitrate. The City of Burbank committed to accept an annual average of 9,000 gallons per minute (gpm) from interim remedy facilities.

For the Burbank Operable Unit, the results of the data review and the 2015 capture analysis indicate the remedy functions as intended, by meeting the Remedial Action Objectives specified in the Record of Decision; however, the treatment system continued to operate below the interim Record of Decision specified extraction rate of 9,000 gpm. Capture of the contaminated plume is occurring, and the appropriate extraction rate is being evaluated in a new focused feasibility study. An interconnect with Los Angeles Department of Water and Power (LADWP) is under construction, which will provide enough capacity to discharge up to 9,000 gpm, the current capacity of the treatment system. A Focused Feasibility Study is currently underway to address emerging contaminants and to optimize the remedy.

The North Hollywood Operable Unit is not currently operating, and is therefore not achieving capture. EPA recently revised the remedy, and expects capture will be achieved when the revised remedy is implemented.

Exposure assumptions, toxicity data, and Remedial Action Objectives used at the time of remedy selection are still valid for both remedies. Applicable or relevant and appropriate requirements identified in the Record of Decision have not changed since the last Five-Year Review. Toxicity values for Site contaminants of concern have not changed. Risk assessment methodologies have not changed in a way that could affect the protectiveness of the remedy. There are no changes in exposure pathways. The combined remedial action objectives are still valid.

The remedy at the North Hollywood Operable Unit is currently protective of human health and the environment because there is no exposure to untreated groundwater. Despite the fact that the extraction and treatment system is not currently operating, the public is not exposed to untreated groundwater because LADWP is not extracting groundwater from the areas of high contaminant concentrations and governmental controls prevent other extraction of the groundwater. When the system was operational, the treatment system effluent contaminant concentrations were less than their regulatory cleanup goals. Once the new remedy is implemented, EPA expects that all Remedial Action Objectives will be achieved.

The remedy at the Burbank Operable Unit is currently protective of human health and the environment. The treatment system effluent contaminant concentrations are less than their regulatory cleanup goals and there are governmental controls in place that prevent exposure to untreated groundwater.

# 1. Introduction

The purpose of a Five-Year Review (FYR) is to evaluate the implementation and performance of a remedy in order to determine if the remedy will continue to be protective of human health and the environment. The methods, findings, and conclusions of reviews are documented in FYR reports. In addition, FYR reports identify any issues found and document recommendations to address them.

The U.S. Environmental Protection Agency (EPA) is preparing this FYR pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act Section 121, 40 Code of Federal Regulation (CFR) Section 300.430(f)(4)(ii) of the National Contingency Plan and EPA policy.

This is the third FYR for the San Fernando Valley (Area 1) Superfund Site (Site). The triggering action for this statutory review is the signing of the previous FYR on September 30, 2013. The FYR has been prepared due to the fact that hazardous substances, pollutants, or contaminants at the Site remain above levels that allow for unlimited use and unrestricted exposure.

The Site consists of two operable units<sup>1</sup> (OUs): the North Hollywood Operable Unit (NHOU) and the Burbank Operable Unit (BOU). Both will be addressed in this FYR. Volatile organic compound (VOC)-contaminated groundwater in the North Hollywood area is addressed for the NHOU. The VOC-contaminated groundwater plume in the Burbank area is addressed for the BOU.

Kelly Manheimer and Gary Riley, Remedial Project Managers from EPA, led the Site FYR. Alison Burcham (environmental engineer) and Jeffrey Weiss (hydrogeologist), from the U.S. Army Corps of Engineers (USACE), participated.

---

<sup>1</sup> During cleanup, a site can be divided into a number of distinct areas depending on its complexity. These areas, called operable units (OUs), may address geographic areas, specific problems, or media where a specific action is required.

## 1.1. Background

The San Fernando Valley Area 1 Superfund Site (SFV Area 1) consists primarily of two large plumes from multiple sources in the San Fernando Valley. Site contaminant sources include, but are not limited to, the former Bendix Aviation and Allied Signal-Aerospace Company facilities in North Hollywood (successor cooperation is now Honeywell International), the former Lockheed Martin Corporation facilities near the Burbank Airport, and many other known sources throughout Area 1. Trichloroethene (TCE) and tetrachloroethene (PCE) were widely used in the San Fernando Valley starting in the 1940s for dry cleaning and for degreasing machinery. Disposal was not well-regulated at that time, and releases from a large number of facilities throughout the eastern SFV Area 1 have resulted in the large plume of VOC-contaminated groundwater that starts in the Area 1 Site and extends southeast, down-gradient, through the San Fernando Valley Superfund, Area 2 Site and through the San Fernando Valley Superfund, Area 4 Site.

Further investigation to define other sources is ongoing. SFV Area 1 is in a populated urban area, and does not affect any environmentally sensitive areas.

## 1.2. Physical Characteristics

The Site is an area of VOC-contaminated groundwater that encompasses approximately 13 square miles beneath the Cities of North Hollywood and Burbank in the eastern San Fernando Valley, within the Upper Los Angeles River area.

The San Fernando Valley is a 122,800-acre alluvial basin in the south-central portion of the Transverse Ranges. The San Fernando Valley is bordered on the northeast by the San Gabriel Mountains with the Verdugo Mountains to the southeast, on the north and northwest by the Santa Susana Mountains, on the west by the Simi Hills, and on the south by the Santa Monica Mountains. Average annual precipitation in the San Fernando Valley is approximately 15 inches per year. However, during water years 2006 to 2007 and 2013 to 2014 (October 1 to September 30), precipitation was well below average, at less than 5 inches.

The two OUs located within the Site, North Hollywood Operable Unit (NHOU) and Burbank Operable Unit (BOU), each have a groundwater extraction and treatment system (Figure 2). The treatment facility for the NHOU is located west of Lankershim Boulevard in North Hollywood. There are eight extraction wells associated with the treatment system. The NHOU treatment facility is approximately 3.8 miles north of the Los Angeles River.

The treatment facility for the BOU is located southeast of the airport in Burbank. There are eight extraction wells associated with the BOU treatment facility located approximately half a mile north of the BOU. The BOU treatment facility is located approximately 3.5 miles north of the Los Angeles River.

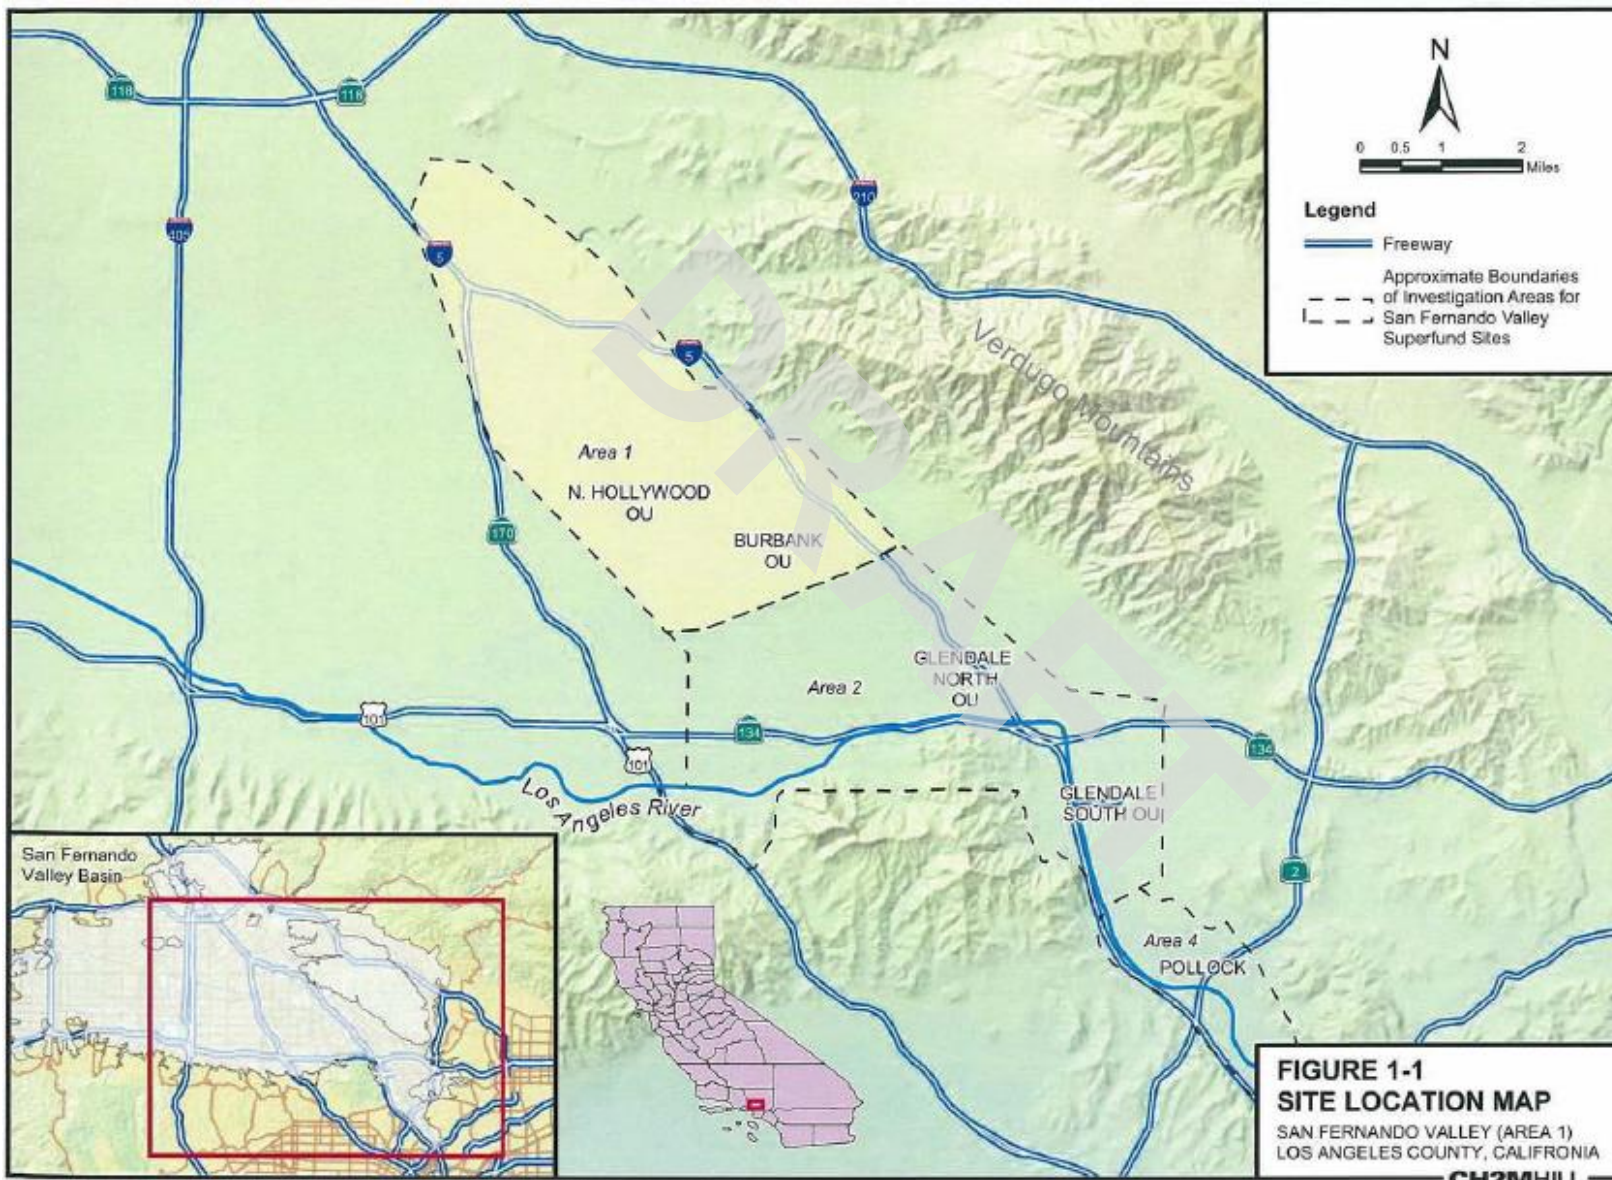

Figure 1. Location Map for the San Fernando Valley (Area 1) Superfund Site

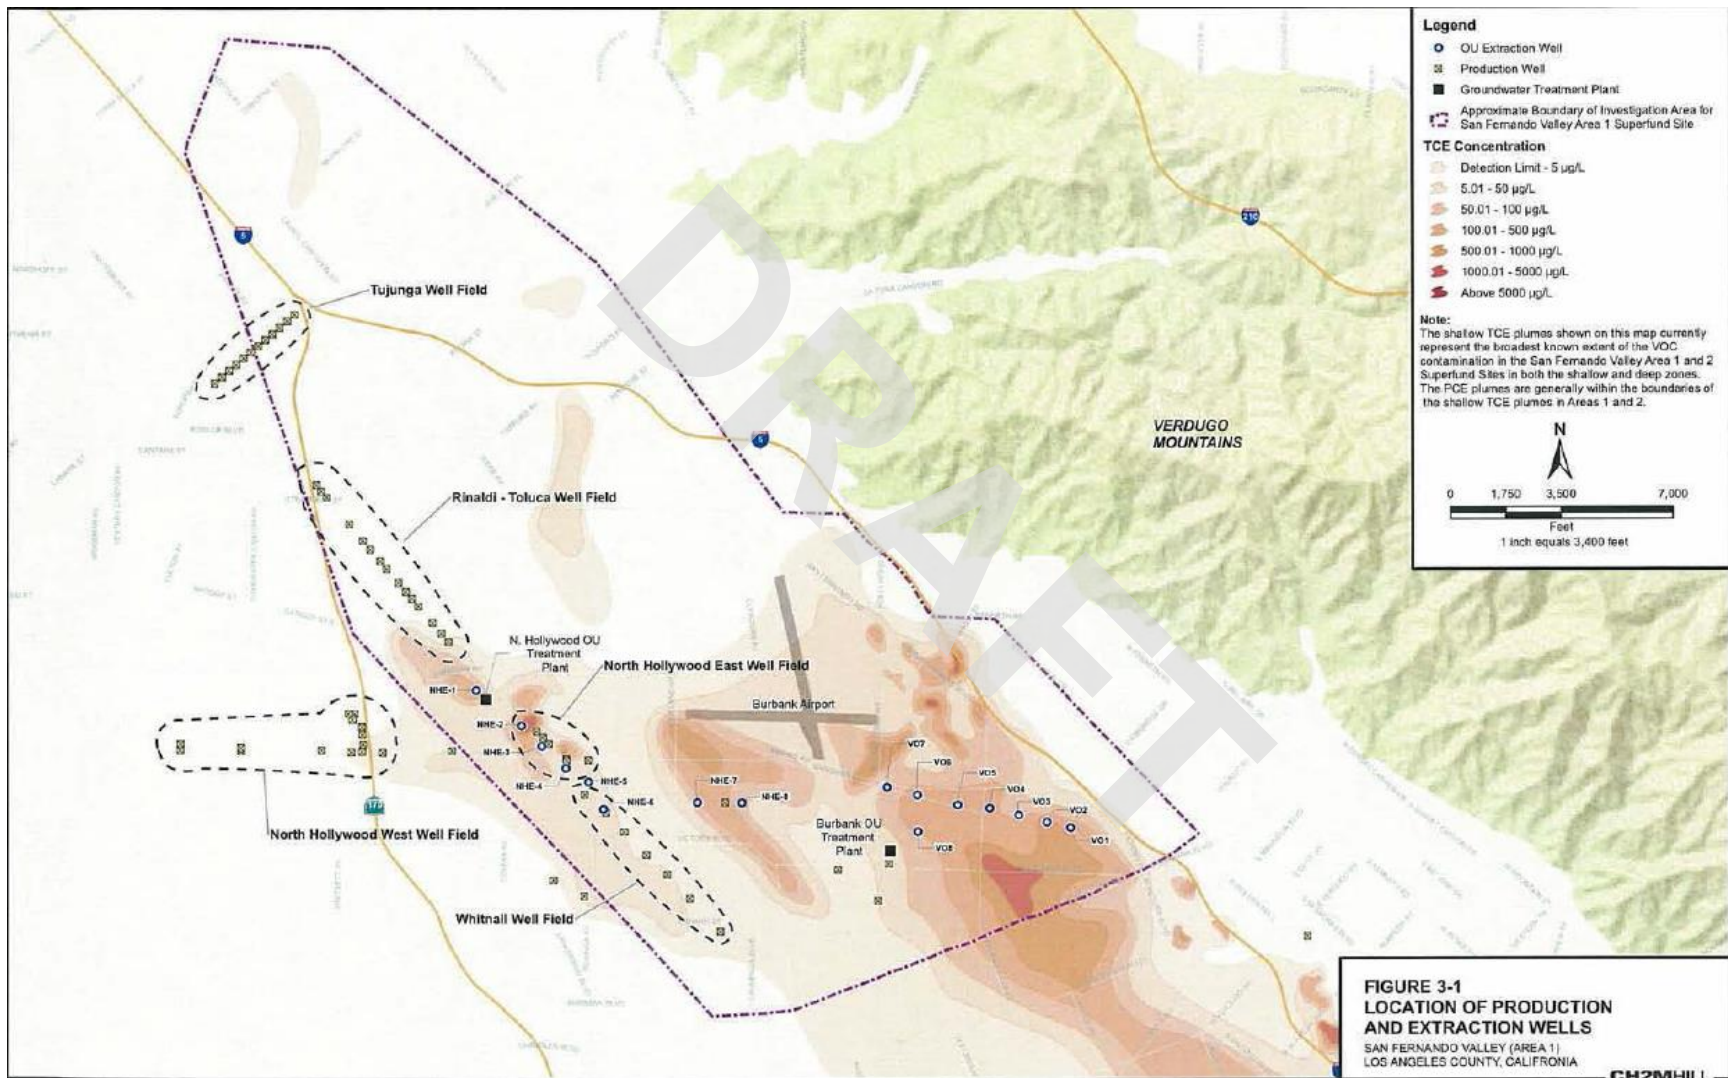

Figure 2. Location of Wells and Treatment Plants

### 1.3. Hydrology

Alluvial deposits in the San Fernando Basin contain groundwater. Geologic investigations at the Site have defined several hydrostratigraphic units within these alluvial deposits. The primary contaminated units at the Site are the Water Table aquifer and the B-zone aquifer. The Water Table aquifer is an unconfined aquifer within the coarse-grained sands and gravels present up to 350 feet below ground surface, and overlies a leaky aquitard consisting of interbedded sands, silts, and clays. Beneath the aquitard is the B-zone aquifer, which consists of coarse-grained sands and gravels from about 350 to 425 feet below ground surface. The depth to groundwater ranges from approximately 120 to 425 feet below ground surface.

**Table 2. Comparison of stratigraphic and hydrostratigraphic units in the SFV Area 1**

Approx. Depth (feet)	Geologic Age	JMM (1992) Zone Designation	ULARA Watermaster Units	Oberlander, et al. (1993) units	Depth Region	NHOU Hydrostratigraphic Units <sup>1</sup>
100	Holocene	Upper	A - eluvial sand, gravel, and rocks		1	A Zone (Water Table)
200			L - gravel			
300			K, J - fine grained	A' - coarse sands, gravel, cobbles

600	M - sand and gravel					
700			Blue Star - marker bed			
700			Q - brown clay, gravel, rocks			
800						
900	Upper Pliocene		Deeper Units		4	
1000						

Natural horizontal hydraulic gradients in the eastern San Fernando Valley generally run south and east, toward the Los Angeles River Narrows. However, extraction and production wells in the NHOU and BOU affect the gradient, and draw the flow of groundwater toward these wells. Figure 3 is a recent groundwater elevation map that shows the gradient in the Water Table aquifer within the BOU. Groundwater gradients in the SFV Area 1 were estimated during the Remedial Investigation to range from approximately 0.001 to 0.021. The 2016 Groundwater Elevation Memorandum (Tetra Tech, 2016) for the Burbank Operable Unit reported the groundwater gradient near the BOU extraction wells between 0.0023 and 0.0139.

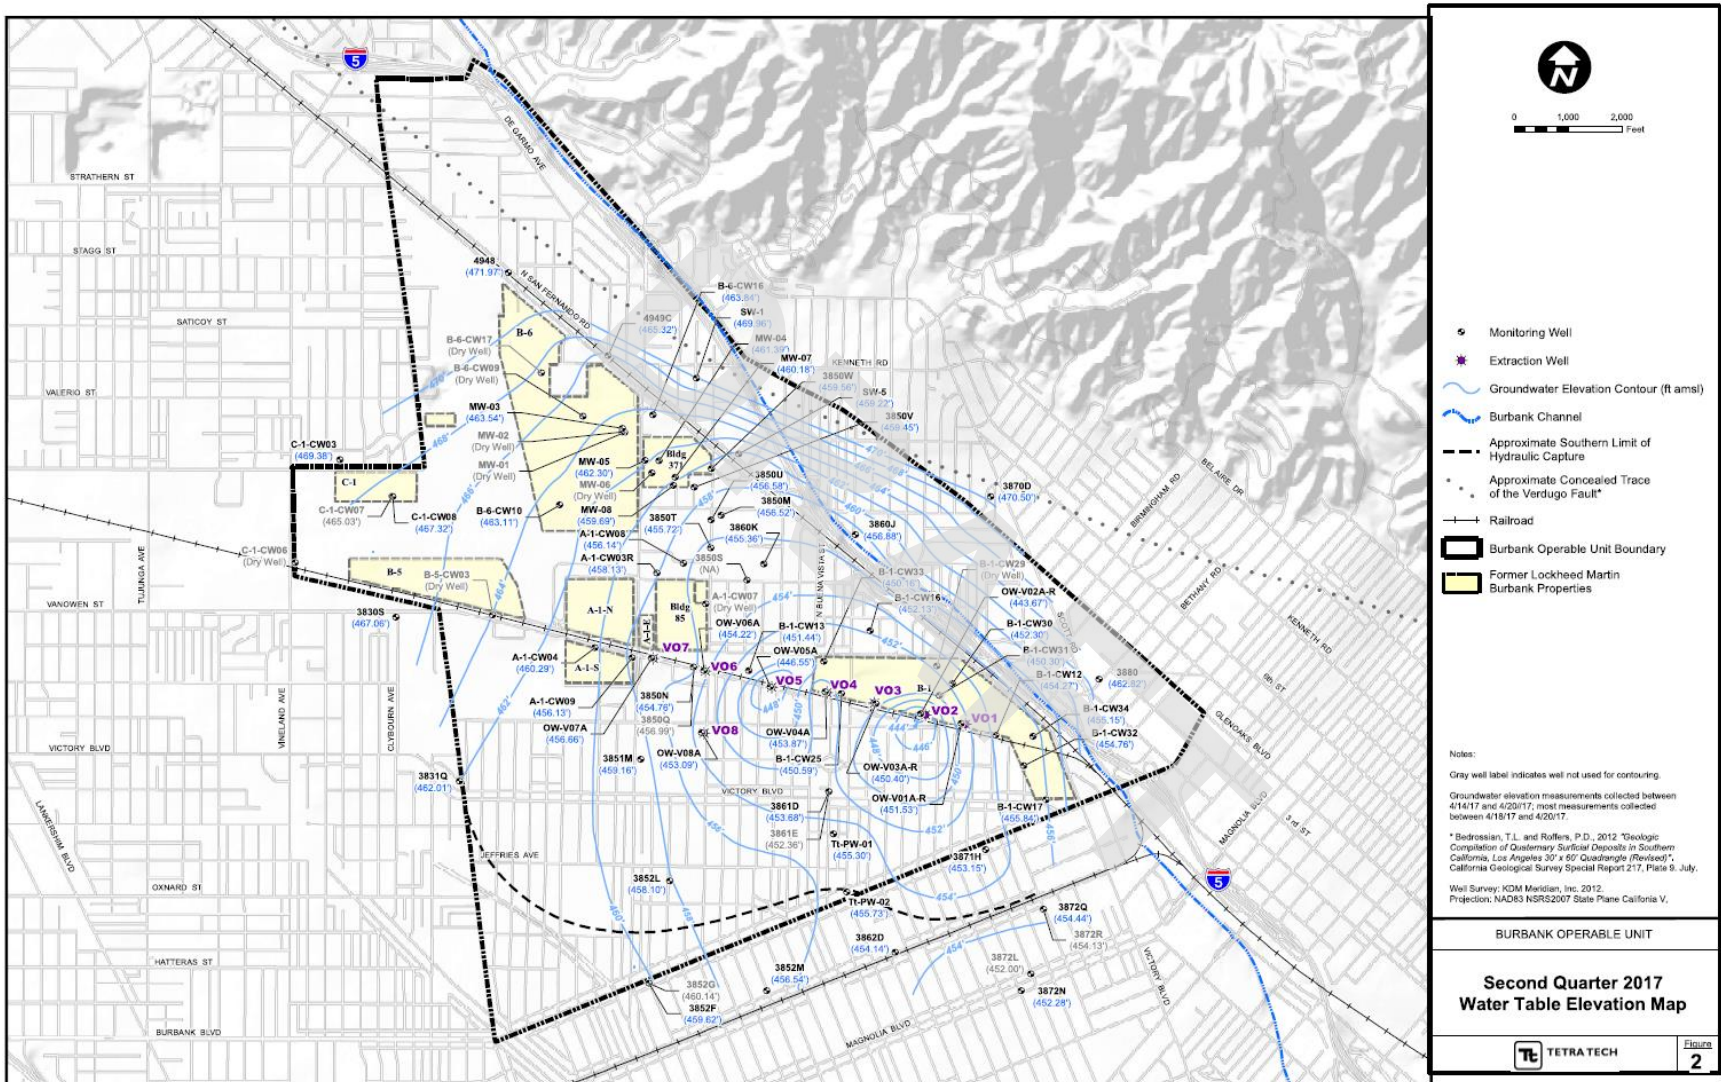

Figure 3. Burbank Operable Unit Groundwater Elevations in the Water Table Aquifer

## 2. Remedial Actions Summary

### 2.1. *Basis for Taking Action*

The presence of TCE and PCE in Site groundwater, at concentrations above their respective maximum contaminant levels (MCLs), provided the basis for taking action. The risk is to human health from potential ingestion of drinking water. TCE and PCE are probable human carcinogens. Carbon tetrachloride, 1,2-Dichloroethane, and arsenic are also found in Site groundwater, and contribute to carcinogenic risk. The primary threat to human health is ingestion.

Groundwater is at least 120 feet below the ground surface, so contaminated groundwater does not interact with Site surface water. Thus, ecological risk posed by contaminants in groundwater is negligible.

### 2.2. *Remedy Selection*

#### 2.2.1. NHOU

EPA signed the first interim Record of Decision (ROD) for the NHOU in September 1987. The selected interim remedy addressed VOC-contaminated groundwater in the North Hollywood area. Due to the large area and complexity of the Site, EPA and the State of California split responsibility for cleanup, with EPA responsible for oversight of regional groundwater remediation and the State's Los Angeles Regional Water Quality Control Board responsible for source investigation and remediation. The cooperative agreement that formalized this arrangement is still active.

In the 1987 ROD, EPA selected groundwater extraction, treatment of VOCs by air stripping and disinfection with chlorine, and conveyance of the effluent to the North Hollywood Pumping Station Complex as the remedy. The effluent was then blended with water from the Los Angeles Aqueduct Filtration Plant, water purchased from the Metropolitan Water District, and groundwater from other Los Angeles Department of Water and Power (LADWP)-operated pumping fields in the vicinity of the NHOU prior to being served to consumers. VOCs in emissions from the air stripper are treated by vapor phase granular activated carbon (VPGAC) prior to discharge to the atmosphere.

EPA signed a second Interim Action ROD for the NHOU in September 2009. The Remedial Action Objectives (RAOs) are:

- Prevent exposure to contaminated groundwater above acceptable risk levels.
- Contain areas of groundwater with contaminant concentrations that exceed the MCLs and notification levels to the maximum extent practicable.
- Prevent further degradation of water quality at the Rinaldi-Toluca and North Hollywood West production wells fields by preventing the migration toward these well fields of the more highly contaminated areas of the VOC plume located to the east/southeast.

- Achieve improved hydraulic containment to inhibit horizontal and vertical contaminant migration in groundwater from the more highly contaminated areas and depths of the aquifer to the less-contaminated areas and depths of the aquifer, including the southeast portion of the NHOU in the vicinity of the Erwin and Whitnall production well fields.
- Remove contaminant mass from the aquifer.

The second interim remedy for the NHOU requires an extraction well network and above-ground treatment system to contain and remediate contaminated groundwater. The selected remedy includes extraction and treatment of contaminated groundwater at certain locations within the plume, expanded treatment for VOCs, and additional treatment for chromium and 1,4-dioxane. It also includes a groundwater management plan as an institutional control to ensure nearby water supply production well pumping does not negatively impact NHOU remedy performance. Components of the remedy include:

- Construction of new extraction wells.
- Modification/rehabilitation of several existing extraction wells.
- Expanded VOC treatment.
- Chromium treatment for extraction wells NHE-1, NHE-2, and two of the new extraction wells.
- Installation of additional monitoring wells.
- Institutional control (Groundwater management plan)
- Use of the treated water in LADWP's water supply system.

In 2014, EPA issued a ROD amendment allowing re-injection of treated water into the aquifer, in addition to delivering treated water to LADWP. EPA had concluded that re-injection of the treated groundwater might be necessary if LADWP and the NHOU potentially responsible parties are unable to reach an agreement that is acceptable to EPA regarding terms for delivery and acceptance of the treated water. This Amended Remedy ensures that EPA has the flexibility to design the most effective remedy and implement that remedy without significant delay. Although this ROD Amendment allows re-injection as an additional end-use option, it does not specify which end use will be implemented. Consequently, both the drinking water and the re-injection end uses are considered part of EPA's Preferred Alternative in the Amended Remedy.

In 2016, EPA determined that additional extraction wells were necessary to protect the North Hollywood West production wellfield from 1,4-dioxane contamination, and issued a Memorandum to File which clarified that these wells were part of the required remedy.

EPA subsequently issued an Explanation of Significant Differences (ESD) in February 2018, which expanded the amount of water extracted by the remedy. After reviewing additional groundwater data collected since 2009 and securing LADWP's and the City of Burbank's cooperation regarding its planned groundwater extraction rates and potential use of LADWP and Burbank extraction and conveyance infrastructure, EPA determined that increased groundwater extraction in the NHOU could practicably achieve greater containment than the remedy selected in the 2009 ROD. Requirements in the ESD include:

- Addition of new extraction wells.
- Diversion of four wells to the Burbank Operable Unit for treatment.
- Expansion of the NHOU treatment plant to accommodate the additional flow created by the new wells.

### 2.2.2. BOU

EPA signed the interim ROD for the BOU in June 1989. The selected interim remedy addressed the VOC-contaminated groundwater plume in the Burbank area. The two RAOs used to select the remedy are:

- To partially control the movement and spread of groundwater contaminants in the Burbank Operable Unit area, while contributing to aquifer restoration in the San Fernando Valley Basin Area 1 Superfund Site.
- To address the public health threat posed by contamination of the City of Burbank's public water supply wells by providing residents in the area with a water supply that meets state and federal drinking water standards.

The selected remedy includes extraction wells to pump groundwater to the treatment plant for VOC removal by air stripping followed by a liquid phase granular activated carbon (LPGAC) polishing step. The treated water is conveyed to the City of Burbank for municipal supply. The air stream is treated through VPGAC vessels prior to discharge to the atmosphere.

EPA signed an ESD in November 1990. The ESD concluded that, based on information suggesting high nitrate levels in the groundwater, additional measures were required to meet the MCLs for nitrate in the extracted and treated groundwater. EPA required blending of the extracted and treated groundwater with additional water from a water supply lower in nitrate, such that water served to the public would achieve the MCL. The resultant larger quantity of water raised the possibility that the City of Burbank would not have the capacity to accept the quantity of water produced. In the ESD, EPA required reinjection of excess treated water into the aquifer. Finally, the ESD clarified that the interim remedy could be designed, constructed, and operated in phases.

EPA signed a second ESD in February 1997. Based on additional study of the local groundwater system, an extraction rate of 9,000 gallons per minute (gpm) resulted in substantially the same level of groundwater containment as an extraction rate of 12,000 gpm (the rate called for in the 1989 ROD). Therefore, the interim remedy extraction rate was lowered to 9,000 gpm. EPA decided to eliminate the requirement for reinjection based on projections that the revised extraction rate would not produce excess water. In the second ESD, the City of Burbank committed to accepting an annual average of 9,000 gpm from the interim remedy facilities, contingent on water demand. Finally, EPA suspended the 9,000 gpm extraction rate requirement during times when nitrate levels in the extracted groundwater exceed 50 milligrams per liter. In these cases, the quantity of blend water required to meet the nitrate MCL could make extraction at 9,000 gpm infeasible.

## 2.3. *Remedy Implementation*

### 2.3.1. NHOU

Construction of the original NHOU treatment system was completed in March 1989 and operation commenced December 1989. The system consisted of eight groundwater extraction wells (NHE-1 through NHE-8), one air stripping tower to remove VOCs from the extracted groundwater, two vapor-phase granular activated carbon (VPGAC) adsorbers to remove VOCs from the air stream, and ancillary equipment. Each extraction well is approximately 300 feet deep (screened in NHOU Water Table aquifer) and has an approximate capacity of 300 gpm. Extraction well NHE-1 was never operated because of insufficient groundwater yield. A schematic of the NHOU groundwater treatment facility is shown in Figure 4.

Extracted groundwater fed through a 48-foot-tall packed air stripper (packing height of 22 feet) with a capacity of 2,000 gpm. After disinfection, treated groundwater was discharged into an LADWP blending facility where it combined with water from other sources before entering the LADWP municipal supply system. LADWP tests all treated water on a regular basis to ensure it meets all federal and state standards for drinking water. Both EPA and the State Division of Drinking Water oversaw treatment facility operations to ensure compliance with these standards.

This remedy was shut down in November 2017 due to declining water levels and maintenance issues, and will remain shut down until the new remedy can be designed and built.

**Figure 4. Schematic of NHOU groundwater treatment facility**

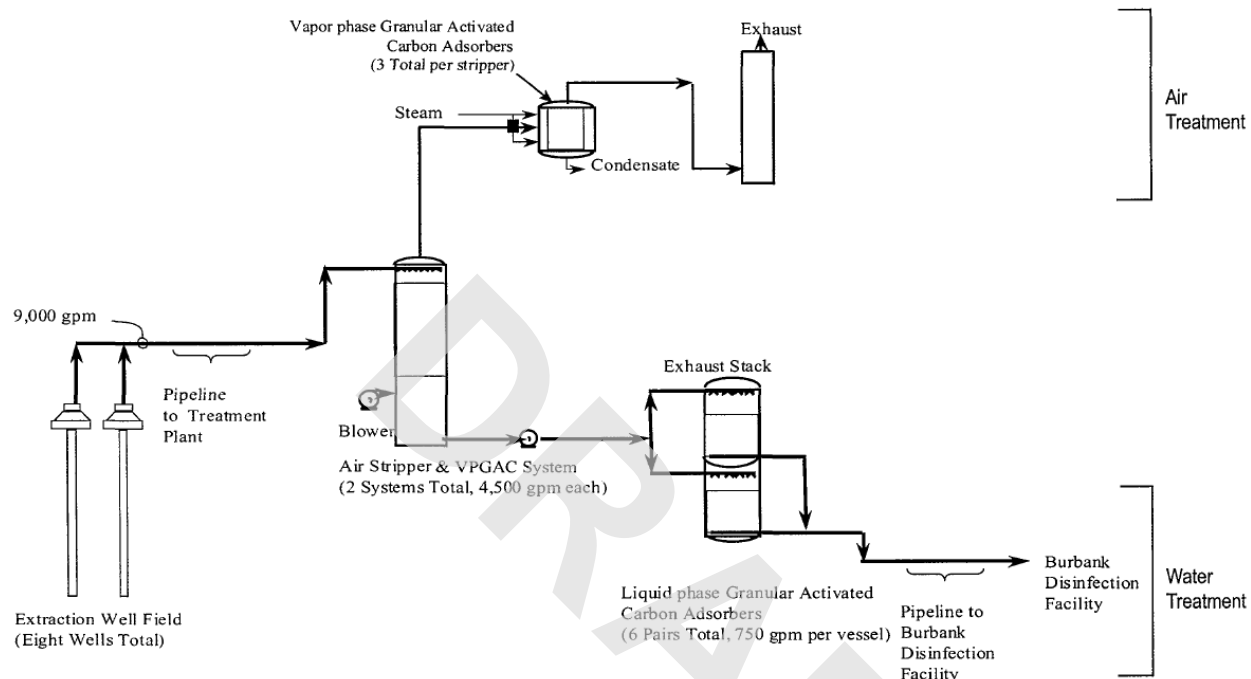

### 2.3.2. BOU

The treatment system for the BOU was completed in two phases. Construction of Phase I of the BOU treatment system occurred from 1993 to 1994, which included the installation of seven extraction wells capable of producing a combined flow of 6,000 gpm. Operation began in 1996. In Phase II, a new well was added to allow an increase in the groundwater extraction rate from 6,000 gpm to 9,000 gpm. The City's municipal supply well W-10 (also known as WP-180) was modified and incorporated into the interim remedy as BOU extraction well VO-8. Construction of Phase II of the BOU completed in December 1997 and operation commenced in 1998.

The treatment facility for the BOU is located southeast of Bob Hope Airport, and approximately 3.5 miles north of the Los Angeles River. There are eight extraction wells within a half-mile of the treatment facility, VO-1 through VO-8. Wells VO-1 to VO-7 are located north of the treatment plant in an east-west alignment. Well VO-8 is located between the treatment plant and the other wells.

Figure 5 shows a schematic diagram of the BOU groundwater treatment facility. A pipeline conveys the extracted groundwater to the BOU treatment system. The BOU air stripper treats contaminated groundwater and the air-stream then passes through a VPGAC system to remove VOCs prior to release to

the atmosphere. Treated groundwater (effluent from the LPGAC vessels) is then conveyed to the City of Burbank's Valley Forebay for distribution and storage, then to the blending facility. At the blending facility, the groundwater is blended with water from the Metropolitan Water District prior to distribution.

**Figure 5. Schematic of BOU Groundwater Treatment Facility**

### 2.3.3. Institutional Controls, for Both OUs

There are no specific institutional control instruments in place within Area 1, although there is an effective governmental control in place which prevents exposure to untreated contaminated groundwater. This governmental control is the 1979 Final Judgment in *Los Angeles v. San Fernando*, (Superior Court Case No. 65079)(LA v. San Fernando). The 1979 Final Judgment in *LA v. San Fernando* upheld the Pueblo Right of the City of Los Angeles to all groundwater in the ULARA Basin from precipitation within the ULARA and all surface and groundwater flows from the Symar and Verdugo Basins. 14 Cal. 3d 199 (1975). *LA v. San Fernando* also established the water rights of the cities of Los Angeles, Glendale, and Burbank to all water imported from outside the Basin and either spread or delivered within the Basin. With the exception of a few legacy entities including a few cemeteries and a hotel, only the cities that are party to the Judgment have the authority to extract groundwater from the basin.

The Final Judgment created the entity known as "Watermaster" with full authority to administer the adjudication, under the auspices of the Superior Court. Under the final judgment in *LA v. San Fernando*, with the exception of certain minor historical water rights holders, only the cities of Los Angeles, Burbank, and Glendale are permitted to extract groundwater from the Basin. Each of these municipalities administers a public water system, which is regulated by the California State Water Resources Control Board, Division of Drinking Water.

Additional governmental controls on the use of groundwater as drinking water include EPA and State of California-promulgated MCLs and California State Action Levels that require drinking water standards to be met before delivery of the treated water to the potable water supply. These drinking water controls and the Watermaster's authority to regulate and allocate water resources eliminate unregulated use of area groundwater; therefore, the interim remedies are currently protective of human health.

## 2.4. Operation and Maintenance (O&M)

### 2.4.1. NHOU

LADWP has been conducting long-term operations and maintenance of the NHOU extraction and treatment system in accordance with the EPA-approved 1988 O&M plan, and the 2003 preventative maintenance schedule. LADWP provided quarterly reports to EPA detailing the operations and maintenance of the NHOU, and to the California State Water Resources Control Board, Division of Drinking Water on the quality of the water delivered from the system. As of November 2017, the extraction wells ceased to provide sufficient water for the treatment plant to operate, so the system was shut down.

### 2.4.2. BOU

The City of Burbank conducts long-term operations and maintenance activities for the BOU according to the O&M plan provided to EPA in 1998. EPA received a revised Operational Sampling Plan in 2017. This plan presents a treatment plant monitoring program that provides the data necessary to evaluate if the treatment plant is operating within permit conditions. The wider groundwater monitoring program intended to evaluate the near-field and far-field effects of the BOU extraction well field is conducted by the responsible party. The four primary objectives of the long-term groundwater monitoring program are:

- Verify containment of the 5 micrograms per liter ( $\mu\text{g/L}$ ) tetrachloroethene (PCE) and 100  $\mu\text{g/L}$  trichloroethene (TCE) plumes in groundwater.
- Collect sufficient data to evaluate groundwater extraction system performance with respect to mass removal.
- Characterize the nature and extent of emerging compounds.
- Characterize the nature and extent of the primary chemicals of concern (PCE and TCE) to refine and update the conceptual site model.

## 3. Progress Since the Last Five-Year Review

### 3.1. Previous Five-Year Review Protectiveness Statement and Issues

The protectiveness statement from the 2013 FYR for the San Fernando Valley Area 1 Site stated:

*The remedy at the NHOU is currently protective of human health and the environment because there is no exposure to untreated groundwater. The treatment system effluent contaminant concentrations are less than their regulatory cleanup goals and there are governmental controls in place that prevent exposure to untreated groundwater. However, to be protective in the long term, the existing treatment facility needs to be modified consistent with the remedy selected in the 2009 ROD, and chromium and 1,4 dioxane impacts to the remedy need to be addressed. The implementation of the selected remedy is in the design phase.*

*The remedy at the BOU is currently protective of human health and the environment because there is no exposure to untreated groundwater. Their treatment system effluent contaminant concentrations are less than their regulatory cleanup goals and there are governmental controls in place that prevent exposure to untreated groundwater. There is uncertainty as to whether containment capture is being achieved since the BOU pumps at rates less than those prescribed in the 1997 ESD. In order to make a containment determination the facility must operate at an average annual rate of 9,000 gpm, or BOU parties must demonstrate that containment can be achieved at lower pumping rates.*

The 2013 FYR included three issues and recommendations. Each recommendation and the current status is discussed below.

**Table 3. Status of Recommendations from the 2013 FYR**

<b>Operable Unit</b>	<b>Issue</b>	<b>Recommendations</b>	<b>Current Status</b>	<b>Current Implementation Status Description</b>	<b>Completion Date (if applicable)</b>
BOU	According to the 1997 ESD, the City of Burbank is committed to accepting an annual average of 9,000 gpm of water from treatment facility, yet the annual extraction for the BOU is consistently less than 9,000 gpm, at average annual rates at or near 6,500 gpm.	A formal evaluation of pumping rates and contaminant capture should be conducted and presented to EPA if pumping rates less than 9,000 gpm is to be used to meet BOU ROD and ESD objectives.	Completed	Lockheed Martin completed a technical memorandum in 2015. EPA responded to the evaluation on August 9, 2016.	8/9/2016
NHOU	The Second Interim Remedy (2009) for the NHOU does not explicitly address treatment of chromium in well NHE-3. Well NHE-3 remains off-line pending an evaluation on how to best address chromium as part of the remedial design.	Address chromium contamination in well NH-3, and additional wells as needed.	Ongoing	Chromium treatment for NHE-3 was added in the 2018 ESD. The new system is currently in design, and there are agreements in place with the PRPs to construct the remedy once design is completed.	
NHOU	The notification level for 1, 4-dioxane has been exceeded at least once in all of the operating NHOU wells.	Sample the influent and effluent of the NHOU plant for 1, 4-dioxane and take appropriate actions to keep concentrations below the notification level.	Ongoing	The 2009 ROD addresses 1,4 dioxane, and treatment will be included in the new system. In addition, the 2016 Memo to File adds new wells to protect the NH West wellfield from 1,4 dioxane contamination.	

### 3.2. Work Completed at the Site During this Five-Year Review Period

#### 3.2.1. NHOU

During this five-year review period, EPA issued an Explanation of Significant Differences in February 2018 to expand the treatment plant, add additional wells and to divert extracted water from four wells to the Burbank Operable Unit treatment plant. A Memorandum to the File confirmed the need for additional extraction wells to protect the North Hollywood West wellfield from 1,4 dioxane contamination.

In addition, design of the new system is approximately 60% complete. Construction of three new extraction wells has been completed, and construction of the treatment system is expected to be

completed within the next two years. Administrative orders are in place with the potentially responsible parties to complete design, construct and operate the interim extraction and treatment system.

As noted previously, on November 13, 2017, LADWP ceased all operation and maintenance activities in the NHOU First Interim Remedy. When the extraction wells and treatment system operated, the treatment system had significant maintenance issues. These issues are being considered and addressed in the new remedy design.

### 3.2.2. BOU

Since the completion of the last FYR, Lockheed Martin's contractor, Tetra Tech, completed a capture analysis and associated technical memorandum. Further details about this analysis are in the Data Review section. The City of Burbank updated the conference building and storage buildings at the treatment plant in the last five years, and switched the method for storing contaminants removed from the treatment system to allow for more simplified transportation. They are still configuring the final method for storing contaminants awaiting pickup.

In 2018, Lockheed Martin, under EPA oversight, started a Focused Feasibility Study to assess the current nature and extent of contaminants from the 1989 ROD and emerging contaminants identified since that time. The Focused Feasibility Study will evaluate the impact of emerging contaminants and optimize the remedy. The Focused Feasibility Study will also consider the diversion of four wells from the NHOU to the BOU treatment plant.

## 4. Five-Year Review Process

### 4.1. *Community Notification, Involvement and Site Interviews*

On June 27, 2018, a public notice was published in the *Los Angeles Daily News* announcing the commencement of the Five-Year Review process for the San Fernando Valley Area 2 Site, providing contact information for EPA's Remedial Project Managers, Kelly Manheimer and Gary Riley, and inviting community participation. The Five-Year Review report will be made available to the public once it has been finalized. Copies of this document will be placed in the designated public repositories: City of Glendale Public Library, 222 East Harvard St. Glendale, CA or call (818) 548-2021 and Los Angeles Public Library, 630 W. Fifth St., Los Angeles CA 90071 or call (213) 228-7000.

During the FYR process, interviews were conducted to document any perceived problems or successes with the remedy that has been implemented to date. The results of these interviews are summarized below.

During the site visit of the NHOU treatment plant, plant operators, maintenance personnel, and engineers from LADWP were interviewed. Because the treatment plant and extraction wells are not currently operational, most of the discussion focused on the planned upgrades to the system. The plant operators

felt the treatment system was effective when operational, and have relayed operational issues to EPA and other entities in a timely manner.

During the site visit to the BOU treatment plant, plant operators and maintenance personnel from Terranear PMC were interviewed. Overall, the treatment plant and remedy was working well. Within the past five years, two technical memorandums (Tetra Tech 2015 and Tetra Tech 2016) addressing the effectiveness of the capture zone were prepared. The interviewees feel these memorandums address the previous questions regarding the capture zone. Currently, the BOU plant cannot pump at capacity because they do not have sufficient demand in the City of Burbank water system for all of the treated water. However, a new interconnect is being installed between Burbank Water and Power and LADWP conveyance pipelines which will allow the Burbank Water and Power to provide water to LADWP.

Refer to Appendixes F and G for more details from the site inspections and interviews conducted during the site inspections.

## 4.2. Data Review

Data collected during the past five years were used to evaluate if the interim remedies at NHOU and BOU are meeting the RAOs and remain protective of human health and the environment. Data reviewed for this FYR included groundwater quality data from monitoring and extraction wells and groundwater elevation data from wells within SFV Area 1. The groundwater quality data included plume maps, annual monitoring reports, and monthly groundwater quality reports from the NHOU treatment plants. The groundwater elevation data was obtained from a capture zone study completed by Lockheed Martin within the Burbank Operable Unit and annual monitoring reports for the Burbank Operable Unit.

The data review focuses on how the data relates to the current remedy, which includes hydraulic capture, prevention of further groundwater degradation, and contaminant mass removal.

### 4.2.1. NHOU

During the past five years, groundwater extraction and treatment within the NHOU has removed contaminant mass and attained partial hydraulic capture through the use of six North Hollywood East (NHE) extraction wells. Mass removal was estimated using the influent PCE and TCE concentrations from the extraction wells and volume of water extracted. Containment of groundwater with concentrations that exceed the MCLs was evaluated by comparing plume maps from 2014 and 2017 and evaluating PCE and TCE trends at select wells during the past five years. The sections below discuss how data from this review period supports the question of whether RAOs are achievable in a reasonable timeframe. Appendix B includes data and trend analysis used for the evaluation.

### 4.2.2. NHOU Contaminant Mass Removal

Groundwater extraction and treatment within the NHOU has contributed to contaminant mass removal of VOCs, including PCE and TCE, during the past five years. Groundwater was extracted from six wells<sup>2</sup> in

---

<sup>2</sup> NHE-1 and NHE-5 are not used due to declining groundwater levels.

the North Hollywood East well field, including NHE-2, 3, 4, 6, 7 and 8. Groundwater from NHE-4, 6, 7 and 8 was treated at the North Hollywood Treatment Plant and delivered to the public water supply and groundwater from NHE-2 and NHE-3<sup>3</sup> was discharged to the sanitary sewer due to elevated chromium concentrations. Figure 8 presents the total volume of water treated each month at the North Hollywood Treatment Plant and the estimated mass of PCE and TCE removed each month. Between March 2013 and June 2017, approximately 1.069 billion gallons of groundwater was treated for VOCs at the North Hollywood Treatment Plant and it was estimated that approximately 305 pounds of TCE and 65 pounds of PCE were removed from the treated water.

Estimated TCE/PCE removal was calculated by multiplying the average influent PCE and TCE concentrations for the past five years by the monthly volume of groundwater treated for the months where influent concentrations were not provided in the quarterly reports.

**Figure 8. Estimated Mass of TCE and PCE Removed at North Hollywood Treatment Plant**

<sup>3</sup> NHE-2 and NHE-3 are operated by Honeywell and the volume of water extracted was not available when preparing this report.

### 4.2.3. NHOU Hydraulic Containment

A remedial action objective identified for the remedy in the 1997 ROD was to contain high-concentration areas of contaminated groundwater to the maximum extent practicable. The ROD specifically highlighted two areas in the NHOU where the remedy should prevent plume migration: the Rinaldi-Toluca and North Hollywood West production wells fields, and the Erwin and Whitnall production well fields. Hydraulic containment had not been achieved prior to the current five-year review period. Comparison of TCE and PCE plumes from 2014 and 2017 in Figures 8 and 9 indicate the North Hollywood West and Rinaldi-Toluca well fields continue to be impacted by the contaminant plume.

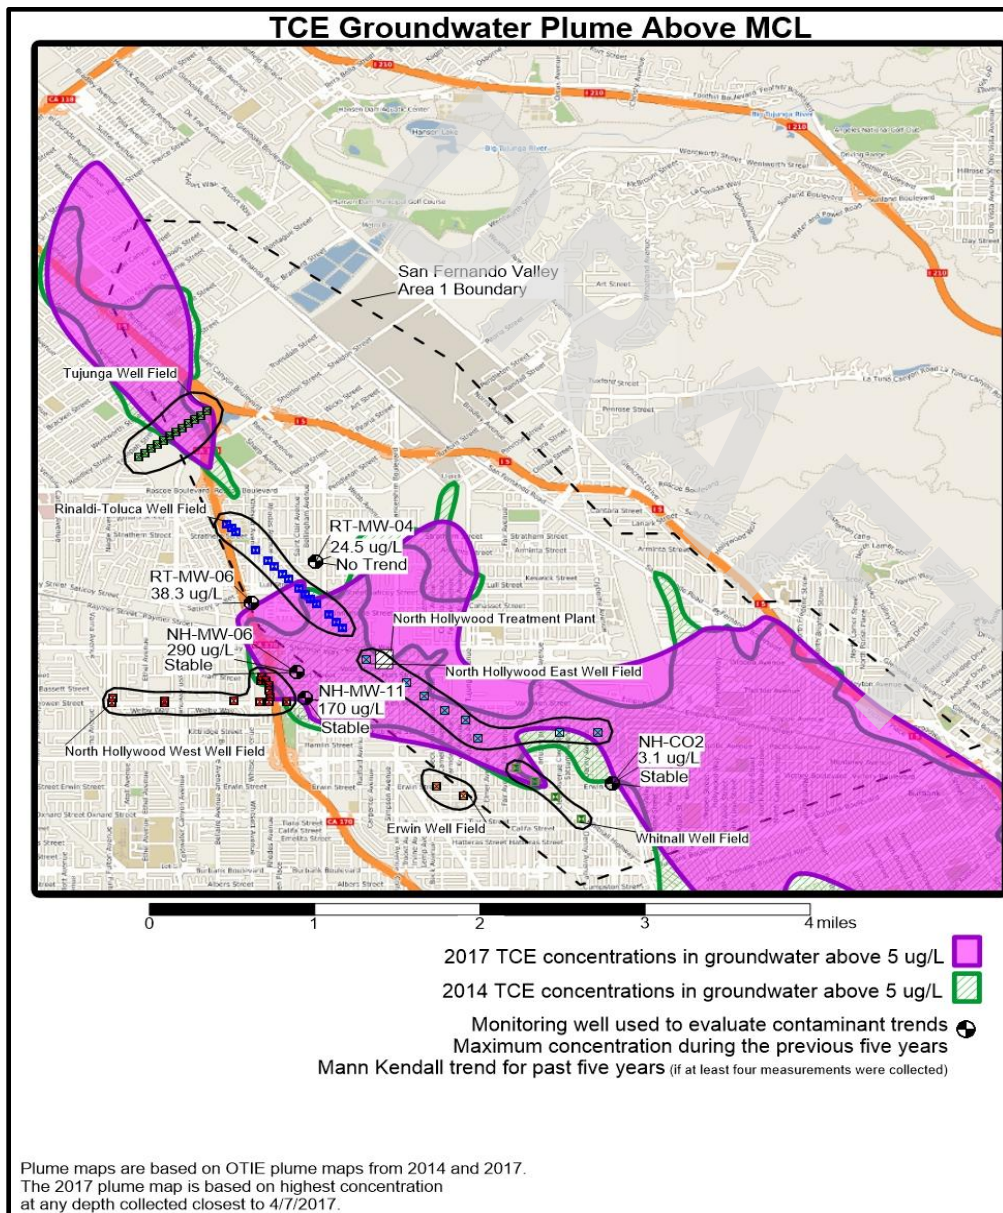

Figure 9. TCE Groundwater Plume above MCL

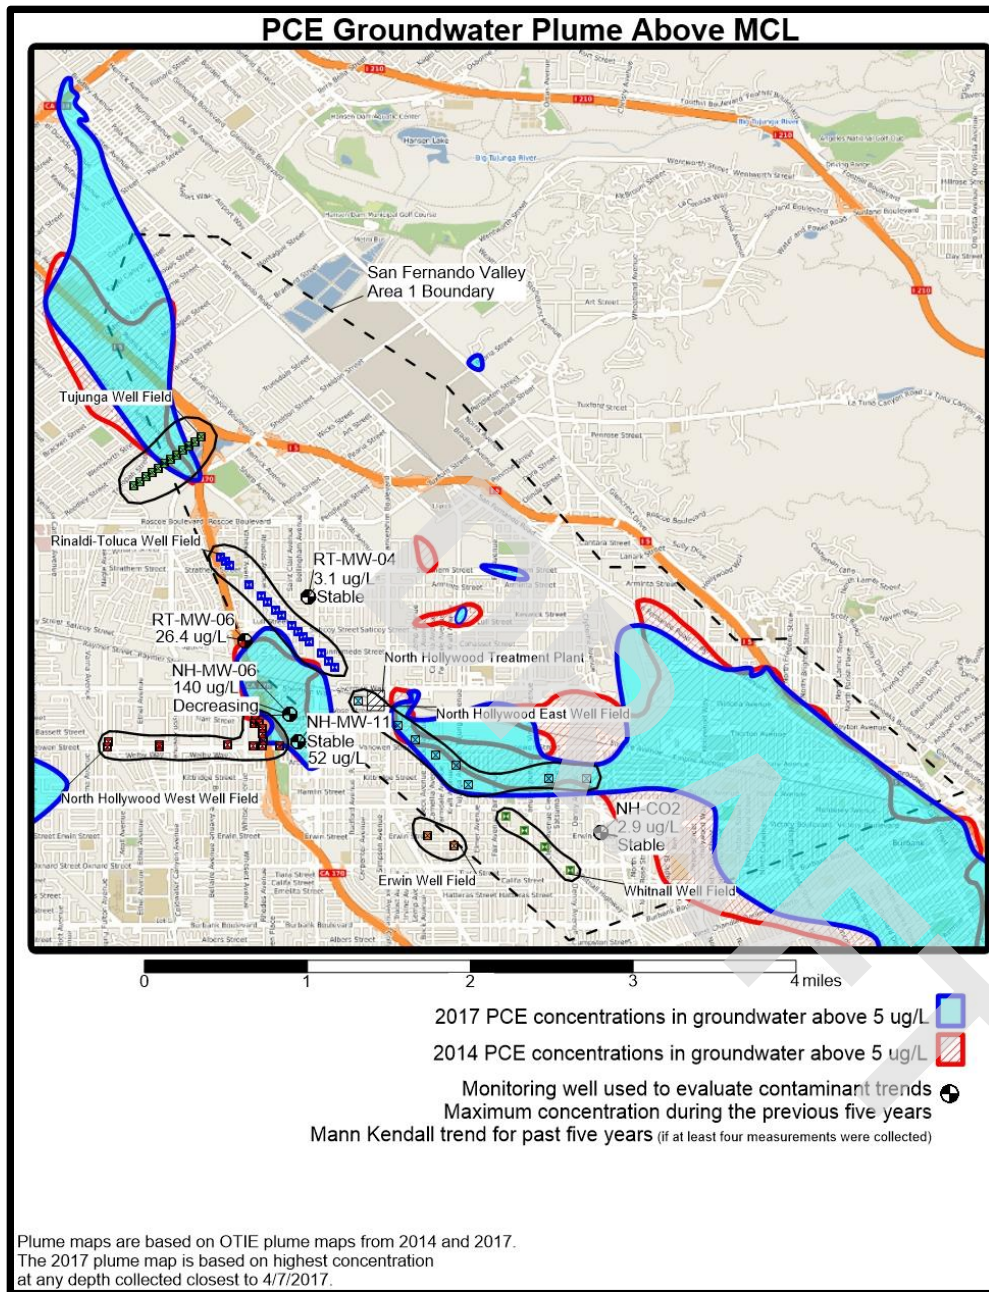

Figure 10. PCE Groundwater Plume above MCL

The contaminant plume for TCE and PCE had migrated into the Rinaldi-Toluca and North Hollywood West well fields prior to 2013. Prior to 2013, monitoring wells located near these well fields that contained TCE and PCE in excess of the 5 micrograms per liter ( $\mu\text{g/L}$ ) MCL include RT-MW-04, RT-MW-06, NH-MW-06 and NH-MW-11. Within this area, it appears that the maximum concentrations of TCE and PCE may have peaked in 2015 at concentrations of 260  $\mu\text{g/L}$  and 140  $\mu\text{g/L}$  respectively. Since the completion of the previous FYR, the TCE and PCE concentration trends have been stable or decreasing in this area.

**Table 4. Concentrations at the Rinaldi-Toluca and North Hollywood West well fields**

Well ID	Date	PCE (µg/L)	TCE (µg/L)
NH-MW-06	5/15/2014	72	98
	12/16/2015	140	290
	12/1/2016	46.1	127
	8/10/2017	27.4	106
	9/14/2017	23.5	93.9
	Mann-Kendall	Decreasing	Stable
NH-MW-11	5/28/2014	52	32
	10/14/2015	17.3	170
	11/15/2016	35.6	104
	8/31/2017	5.3	10.6
	Mann-Kendall	Stable	Stable
RT-MW-06	6/25/2014	1.8	0.43
	10/18/2016	26.4	38.3
	7/25/2017	2.77	7.65
RT-MW-04	7/18/2014	3.1	2.9
	12/8/2015	1.45	3.09
	10/11/2016	0.718	2.45
	6/15/2017	1.11	24.5
	Mann-Kendall	Stable	No-Trend

Contaminant concentrations have not significantly increased near Whitnall production well field in the southeast corner of the NHOU, and remain below their MCL of 5 µg/L. Mann-Kendall trend analysis of the data from NH-CO2, located east of the Whitnall Well Field in the southern portion of the NHOU, during the past five years indicates that contaminant concentrations are stable and below the MCL. The Erwin production well field has not been impacted.

**Table 5. PCE and TCE Concentrations at NHOU near the Whitnall production well fields**

Well ID	Date	PCE (µg/L)	TCE (µg/L)
NH-CO2	4/10/2012	2.5	3.1
	10/12/2012	2.9	2.5
	4/11/2014	0.5	0.089
	4/26/2017	0.39	1
	Mann-Kendall	Stable	Stable

Chromium, 1,4-dioxane, 1,2,3-trichloropropane, and nitrate concentrations above their respective MCL do not extend beyond the PCE and TCE plumes. Therefore, conclusions regarding hydraulic capture for PCE and TCE also apply to other contaminants of concern at the Site. Groundwater contamination continues to impact nearby production well fields and extend beyond the boundary of San Fernando Valley Area 1. Additional extraction wells and increased pumping required in the ESD will likely improve the hydraulic containment and prevent further degradation of the aquifer.

#### 4.2.4. BOU

Concentrations of TCE and PCE are declining, hydraulic capture is minimizing groundwater contamination from migrating beyond the BOU, and contaminant mass is being removed. These conclusions were reached after a review of the 2015 capture zone study, an evaluation of groundwater contamination via Mann-Kendall analysis, and the estimation of VOC mass removal from groundwater. The data analysis focused on TCE and PCE, since they are the primary contaminants of concern.

A Mann-Kendall analysis was completed by Tetra Tech using groundwater data from 1996 to 2017, which led to the conclusion that PCE and TCE concentrations at the Site are declining, as presented in the 2017 Annual Groundwater Monitoring Report (Tetra Tech 2017).

USACE also completed Mann-Kendall analysis for select wells, which focused on data from the past five years. The Mann-Kendall analysis<sup>4</sup> using groundwater data from 1996 to 2017 indicates PCE concentrations are declining at all 20 wells within the Water Table Aquifer, and at 7 of the 10 wells within the B-zone aquifer. Wells with increasing PCE concentrations were located between an extraction well and higher contaminant concentration areas, indicating that the extraction wells are pulling contaminant mass towards the extraction wells. It is expected that monitoring wells close to the extraction wells may show a temporary increase in concentration. A similar pattern was observed when analyzing the TCE concentrations from the 39 wells in Water Table aquifer and B-zone aquifer. Of these 39 wells, only two had increasing trends.

Only contaminant trends for PCE and TCE were analyzed for this FYR, because they are the primary contaminants of concern for the current remedy and have the highest concentrations at the Site. The declining trends for PCE and TCE indicate that water quality is improving and the remedy is moving towards meeting state and federal drinking water standards.

#### 4.2.5. BOU Capture Zone

Hydraulic capture is occurring at the Site based on multiple evaluations presented in a 2015 technical memorandum (Tetra Tech 2015), which used numerical modelling to assess the groundwater capture zones of extraction wells within the BOU. The model indicated the highest concentrations of TCE (above 500 µg/L) are within the BOU capture zone. The memo also included a triangular irregular network analysis to estimate groundwater gradients, which indicated that groundwater down-gradient from the

---

<sup>4</sup> Mann-Kendall analysis was completed using contaminant concentrations from wells with at least four values above the detection limit.

extraction wells primarily flows towards the extraction wells. Groundwater plume maps generated using 2014 data and 2017 groundwater data indicate the PCE and TCE plumes are not expanding between 2014 and 2017. Figures 11 and 12 are the PCE plumes from 2014 and 2017, and Figures 13 and 14 are the TCE plumes from 2014 and 2017.

After reviewing the 2015 technical memorandum (Tetra Tech 2015), EPA concluded that a “A sustained long-term flow rate of 9,000 gpm would provide increased capture of the southernmost plume, where PCE and TCE concentrations are well above the 100 ppb and 5 ppb concentration thresholds, respectively. The increased capture would better achieve the ROD’s remedial action objective to “partially control the movement and spread of ground water contaminants in the Burbank OU area, while contributing to aquifer restoration at the SFV Area 1 Site. It would provide for correspondingly higher mass removal, decreased overall cleanup time, and reduced potential for further downgradient migration which may threaten water supply wells.” (EPA, 2016). EPA recommended to increase the average, sustained extraction rate to 9,000 gpm providing increased capture until a second interim remedy is in place. An interconnect with LADWP is under construction, which will provide enough capacity to discharge up to 9,000 gallons per minute, the current capacity of the treatment system. A Focused Feasibility Study is also currently underway, which will result in a second interim remedy.

Figure 11. 2014 PCE Concentrations

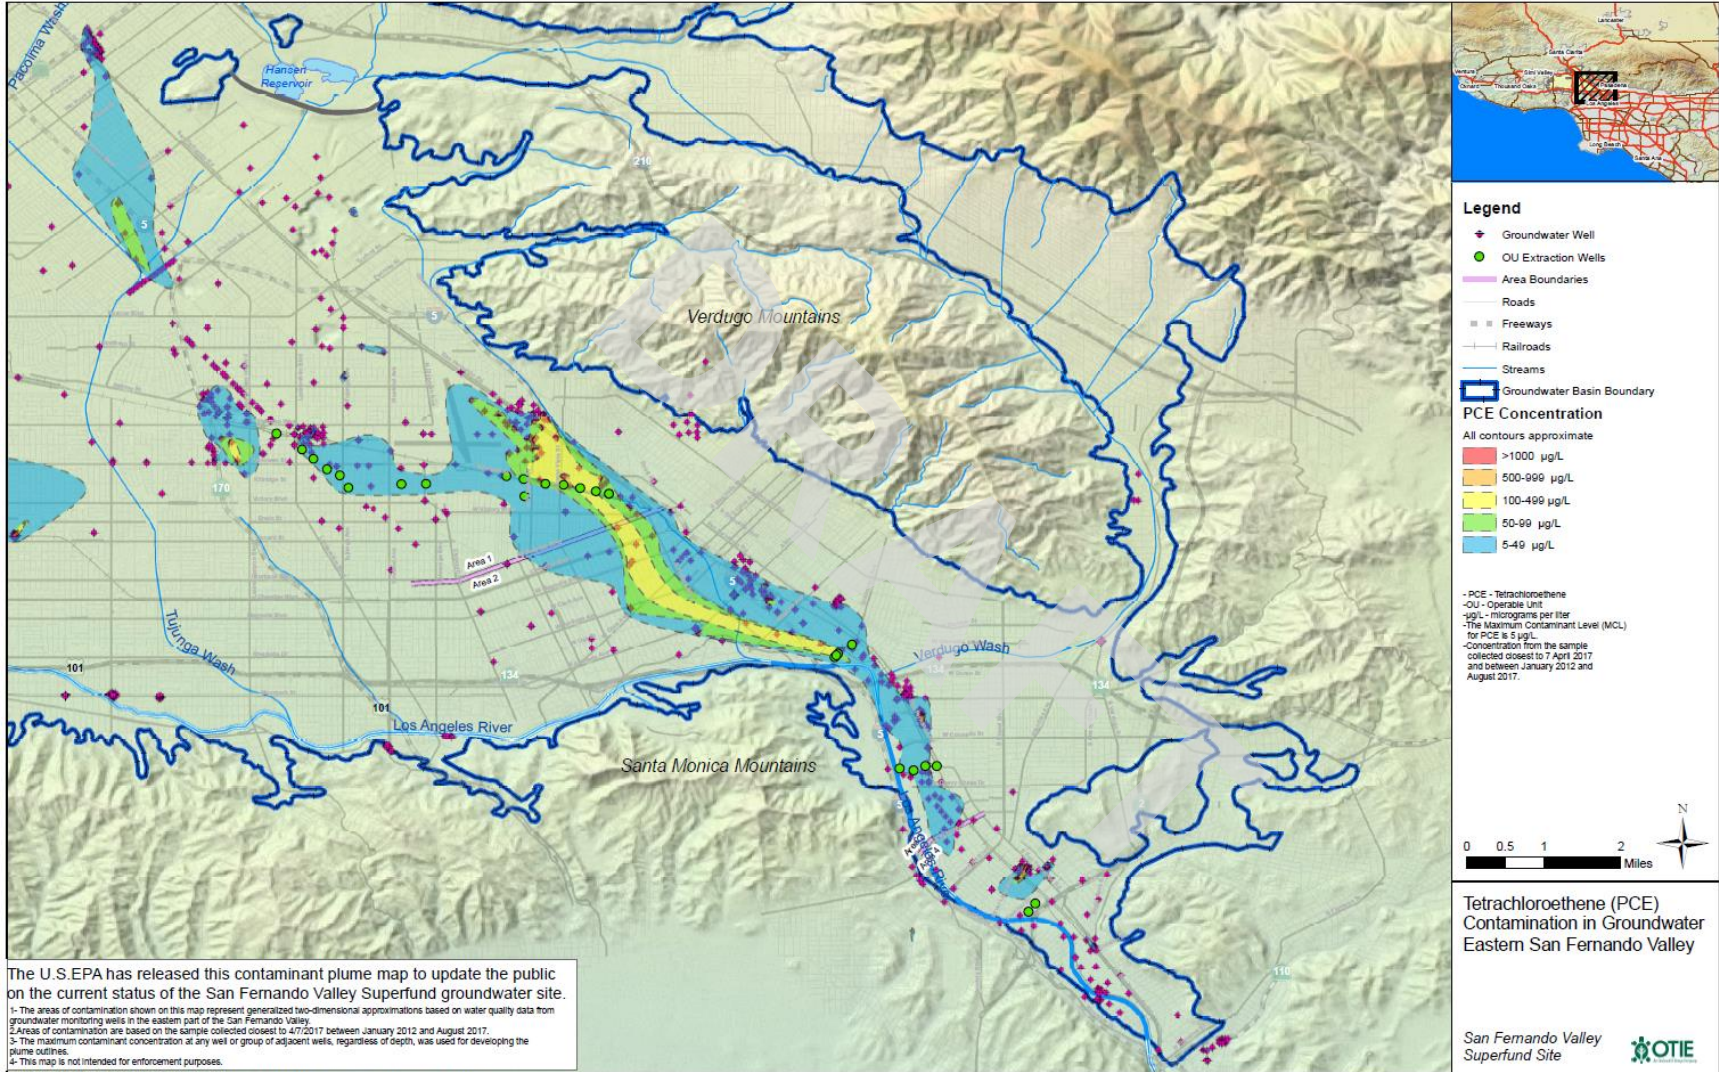

Figure 12. 2017 PCE Concentrations

Figure 13. 2014 TCE Concentrations

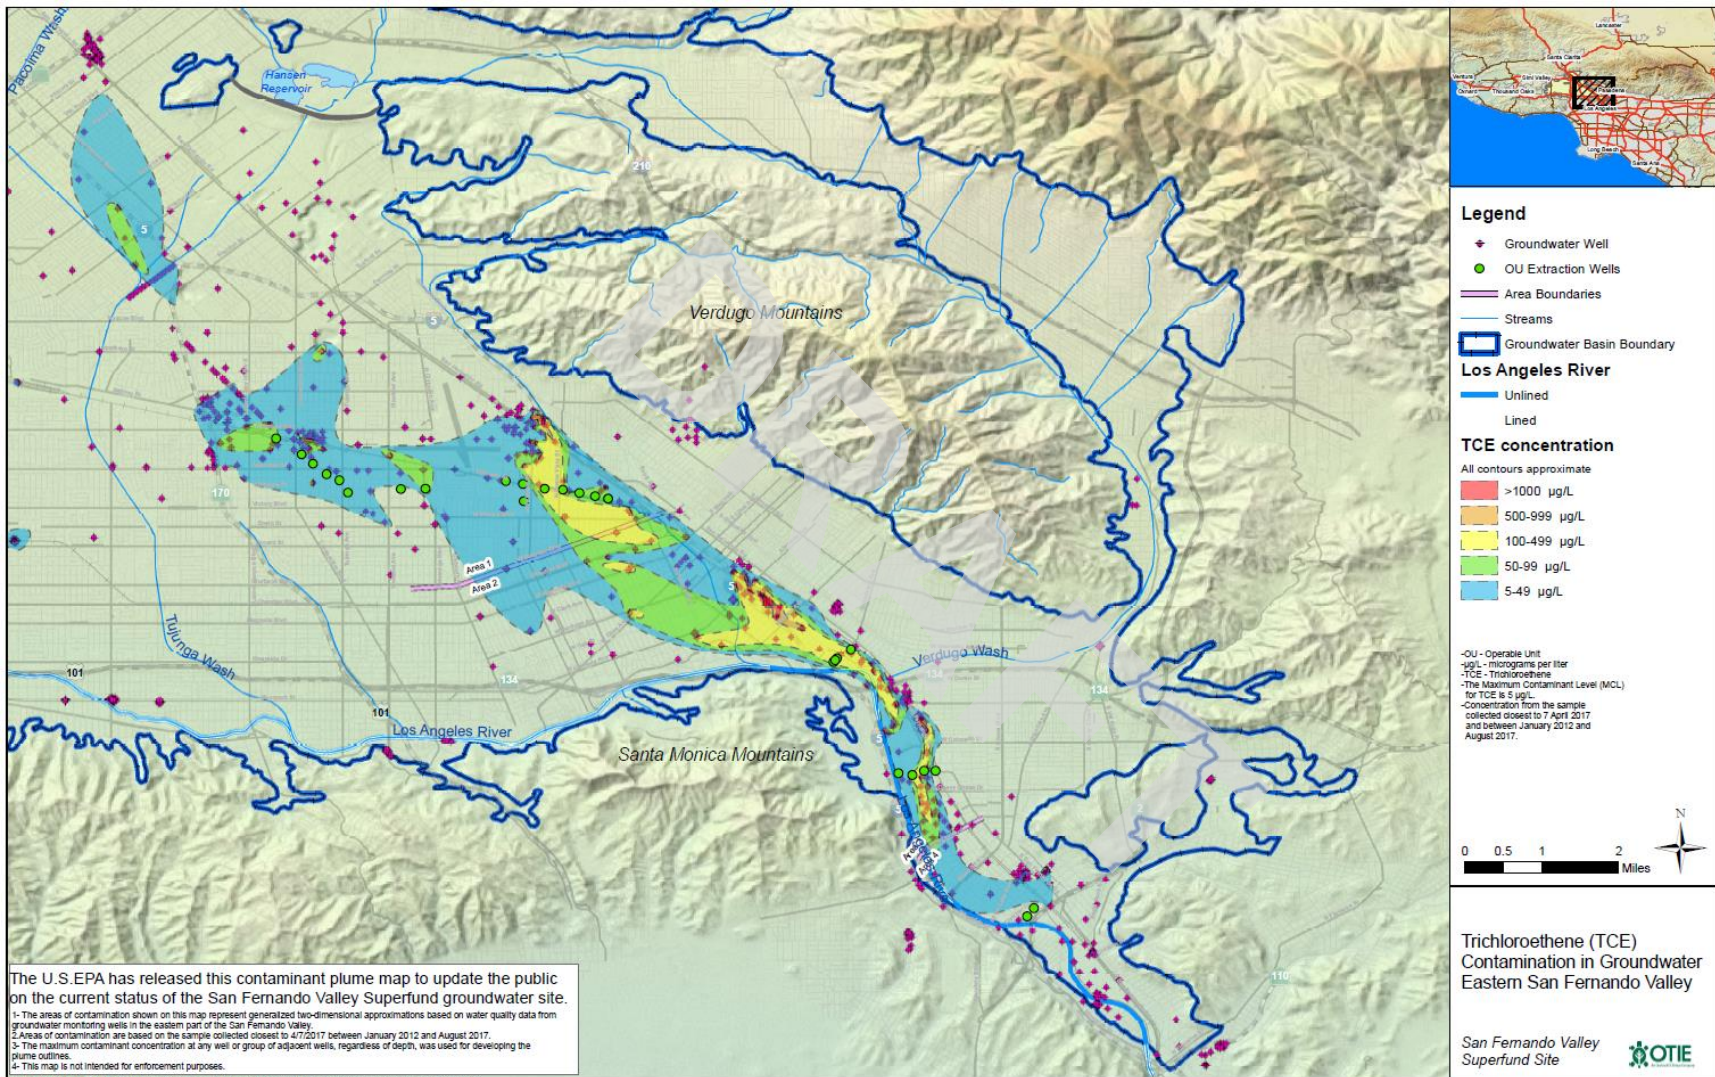

Figure 14. 2017 TCE Concentrations

#### 4.2.6. BOU Contaminant Mass Removal

The remedy continues to contribute to aquifer restoration, a key RAO for the remedy, by removing mass from the aquifer. The Burbank Treatment Plant has removed 17,901 pounds of VOCs from January 2013 to April 2017, which demonstrates that contaminant mass is continuing to be removed from groundwater. Table 5 presents the contaminant mass removed and volume of water treated for each of the past five years. The rate of contaminant mass removal has declined over the past five years, which is typical of an aging groundwater extraction system.

**Table 6. Burbank Treatment Plant Contaminant Mass Removal**

<b>Year</b>	<b>Total Flow Treated (gallons)</b>	<b>Cumulative Flow Treated (gallons)</b>	<b>Total VOC Mass Removed (pounds)</b>	<b>Cumulative VOC Mass Removed (pounds)</b>
2013	3,637,576,057	54,002,901,370	5,164	246,686
2014	3,114,113,237	57,117,014,607	3,707	250,393
2015	3,365,140,780	60,482,155,387	4,368	254,761
2016	3,133,756,552	63,615,911,939	3,789	285,550
2017 (Jan-April)	771,530,941	64,387,442,880	873	255,634

#### 4.3. Site Inspection for Both OUs

Site inspections of the North Hollywood treatment plant and the Burbank treatment plant were completed on January 24, 2018. The purpose of the inspections was to assess the protectiveness of the remedy. Kelly Manheimer, Gary Riley and Rusty Harris-Bishop from EPA, and Jeffrey Weiss from USACE attended the site inspections. Hector Santiago, Matt Qassis, Mark Hazschuh, Gonzolo Reyes, and Vahe Dabbaghian of LADWP were at the North Hollywood treatment plant inspection. Charles Grace, Richard Salazar, and Jennifer Wehner of Terranear PMC were at the Burbank treatment plant. The interviews were completed as a group at the site visit, and pertinent information from the interviews is included in the site inspection and trip report.

The North Hollywood treatment plant was not operating. The Burbank treatment plant was operating as intended.

## 5. Technical Assessment

### *5.1. Question A: Is the remedy functioning as intended by the decision documents?*

For NHOU, the remedy was not functioning as intended when it was in operation before the fall of 2017, and did not contain the plume, prevent further degradation of water quality at the Rinaldi-Toluca and North Hollywood West production wells, nor inhibit migration in groundwater to the vicinity of the Erwin and Whitnall production well fields. EPA has updated the remedy to address shortcomings, and the responsible parties are in the process of designing and implementing the updated remedy.

For BOU, the treatment system continued to operate below the interim ROD specified extraction rate of 9,000 gpm. However, the results of the data review and the 2015 capture analysis indicate the remedy is achieving its objectives of partially controlling the movement and spread of groundwater contaminants in the Burbank OU area, and removing mass, even at the reduced flowrate. An interconnect with LADWP is under construction, which will provide enough capacity to discharge up to 9,000 gpm, the current capacity of the treatment system. A Focused Feasibility Study is currently underway to address emerging contaminants and to optimize the remedy.

For both OUs, the governmental controls in place at the site are effective in preventing exposure to contaminated groundwater.

### *5.2. Question B: Are the exposure assumptions, toxicity data, cleanup levels, and Remedial Action Objectives (RAOs) used at the time of remedy selection still valid?*

Yes, exposure assumptions, toxicity data, and RAOs used at the time of remedy selection are still valid. Applicable or relevant and appropriate requirements (ARARs) identified in the RODs, as amended, have not changed since the last FYR. Although the toxicity data for some VOCs have changed, the remedy remains protective because VOC levels in treated water are non-detect. Cleanup levels for groundwater were not established at the time of remedy selection.

Vapor intrusion is not a significant pathway because the depth to groundwater exceeds 120 feet. There are no changes in exposure pathways. The combined RAOs are still valid.

### *5.3. Question C: Has any other information come to light that could call into question the protectiveness of the remedy?*

No other information has come to light that calls into question the protectiveness of the remedy.

## 6. Issues/Recommendation

There are no issues that affect protectiveness at the North Hollywood or the Burbank Operable Units. The remedy for North Hollywood OU has recently been modified to increase pumping rates and add new wells. The North Hollywood remedy is not operating at this time while the upgrades are constructed.

## 7. Protectiveness Statement

**Table 7. Protectiveness Statement NHOU**

Protectiveness Statement(s)	
<i>Operable Unit: NHOU</i>	<i>Protectiveness Determination:</i> <b>Protective</b>
<i>Protectiveness Statement:</i> The remedy at the North Hollywood Operable Unit is currently protective of human health and the environment because there is no exposure to untreated groundwater. Despite the fact that the extraction and treatment system is not currently operating, the public is not exposed to untreated groundwater because LADWP is not currently extracting groundwater from the areas of high contaminant concentrations and governmental controls prevent other extraction of the groundwater. The remedy for North Hollywood OU has recently been modified to increase pumping rates and add new wells. Once these improvements have been implemented, EPA expects that all Remedial Action Objectives will be achieved.	

**Table 8. Protectiveness Statement BOU**

Protectiveness Statement(s)	
<i>Operable Unit: BOU</i>	<i>Protectiveness Determination:</i> Protective
<i>Protectiveness Statement:</i> The remedy at the Burbank Operable Unit is currently protective of human health and the environment. The treatment system effluent contaminant concentrations are less than their regulatory cleanup goals and there are governmental controls in place that prevent exposure to untreated groundwater.	

## 8. Next Review

The next FYR report for the Site is required five years from the completion date of this review.

DRAFT

## Appendix B: Data Review

Appendix B includes figures used for the data review. The results from the data review are in section 4.2.

Figures B-1 through B-4 are Mann-Kendall results for PCE and TCE in the BOU monitoring wells. The Mann-Kendall results indicate contaminant concentrations are generally decreasing or stable in the BOU. Figures B-5 and B-6 are results from Triangular Irregular Network analysis used to calculate the groundwater gradients within the BOU. The gradients indicate groundwater is primarily flowing towards the extraction wells. Figures B-7 and B-8 are results of a numeric model used to calculate the radial influence of the extraction wells. The results of the model indicate extraction wells are preventing migration of contaminants beyond the BOU.

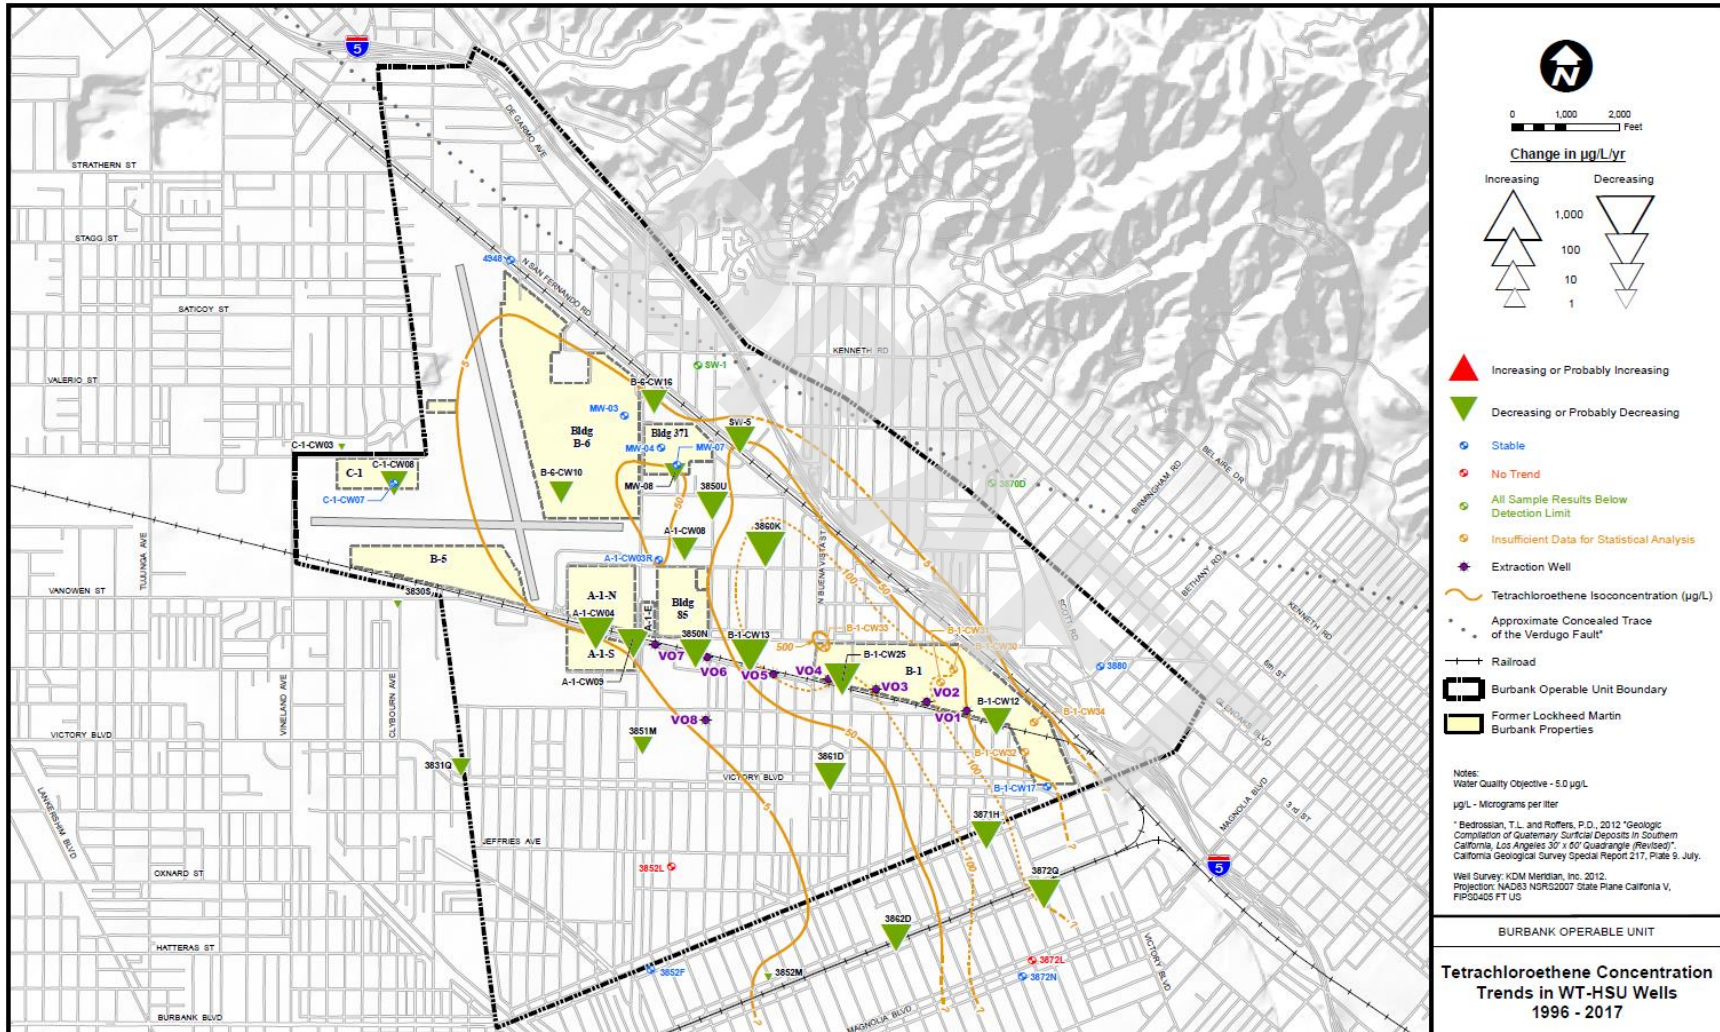

Figure B-2. Mann-Kendall Results for PCE in Water Table aquifer for BOU

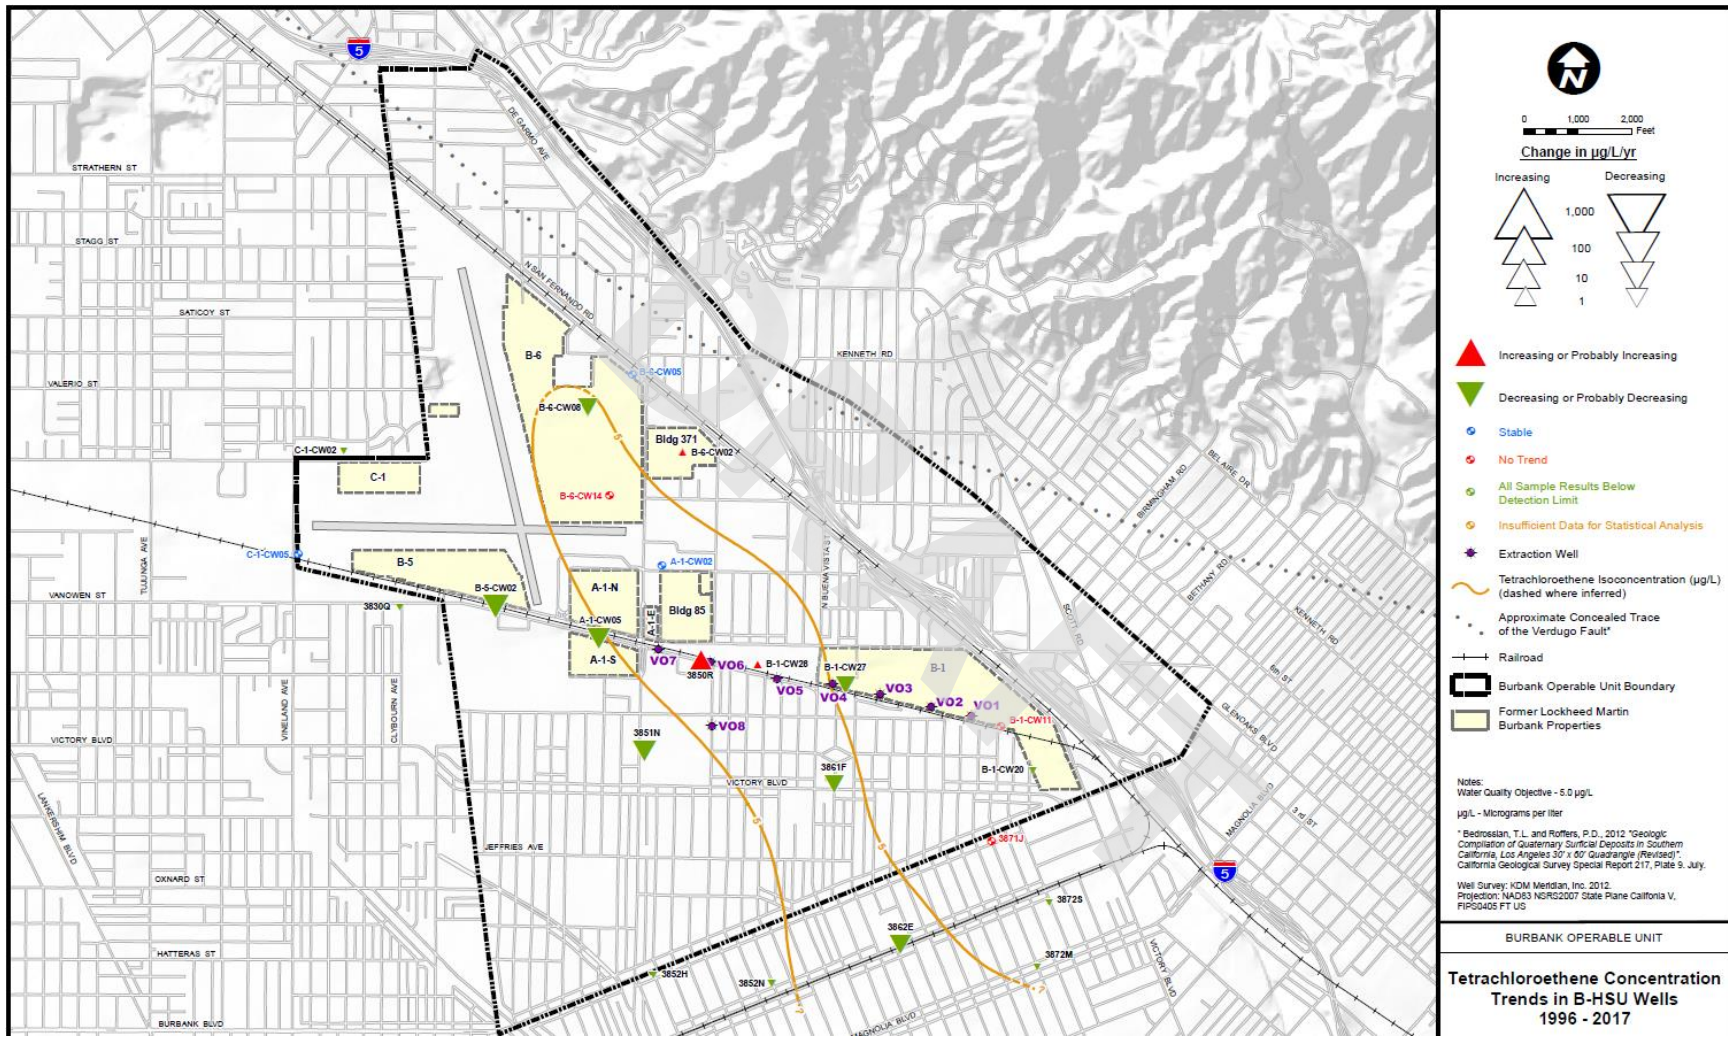

Figure B-3. Mann-Kendall Results for PCE in B-zone aquifer for BOU

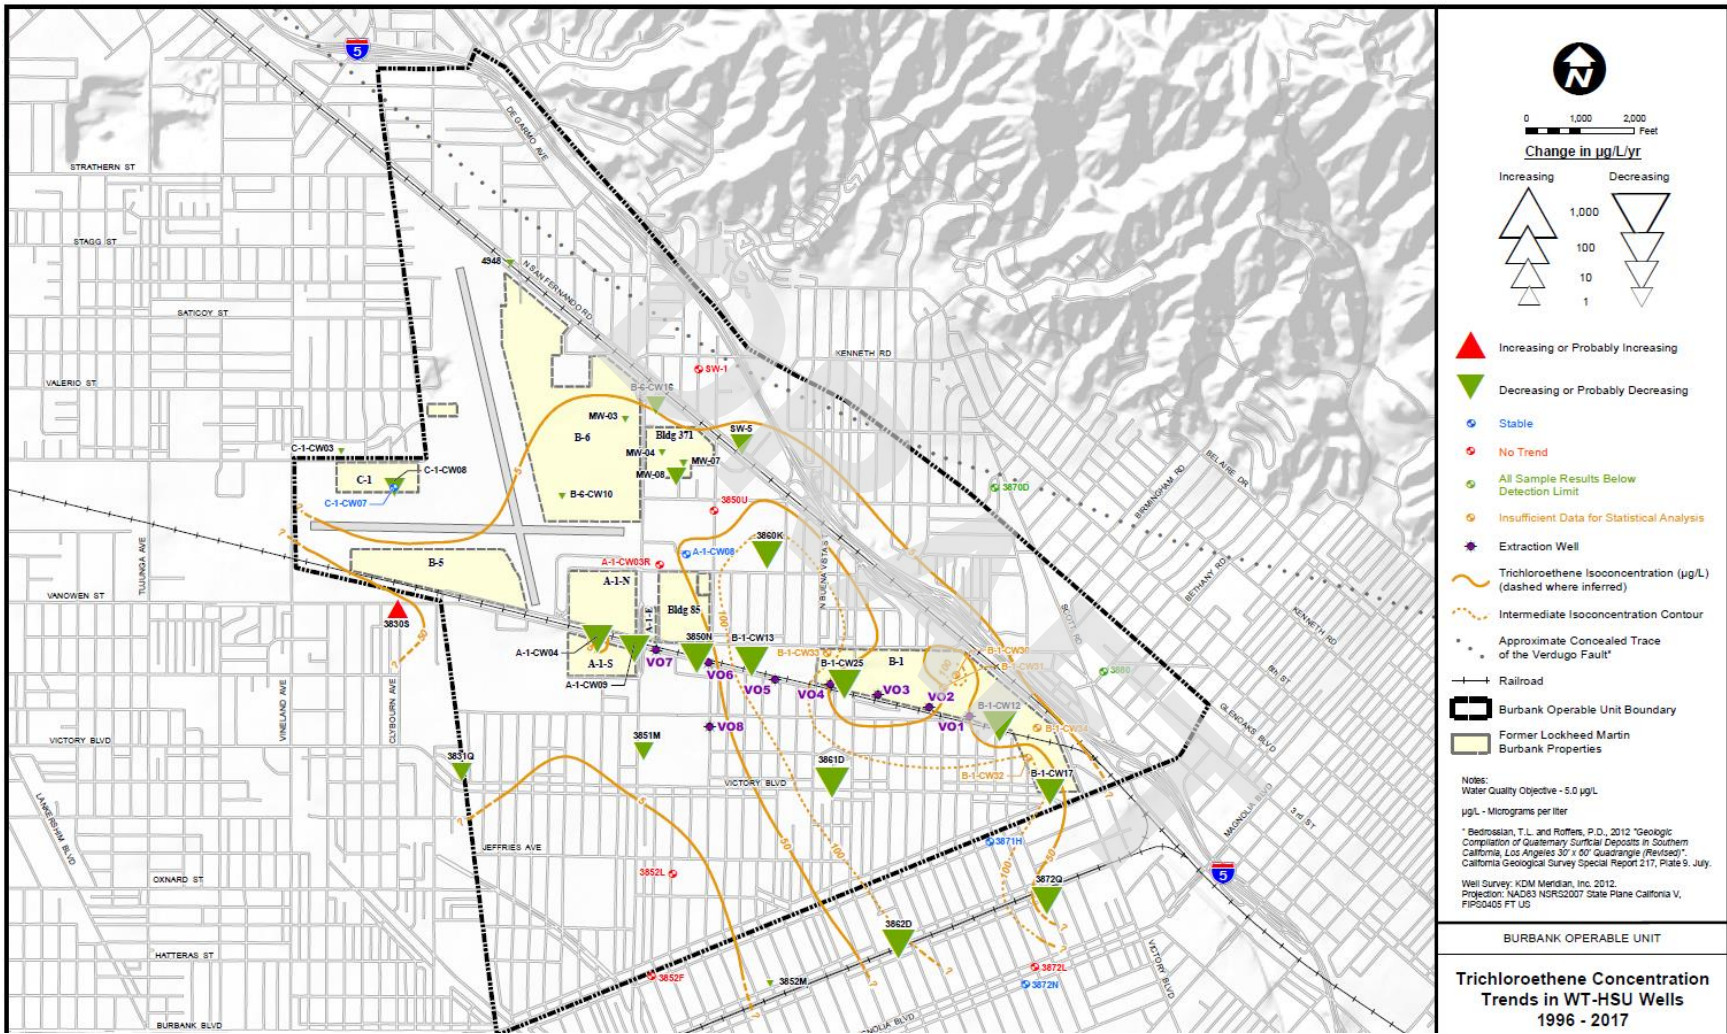

Figure B-4. Mann-Kendall Results for TCE in Water Table aquifer for BOU

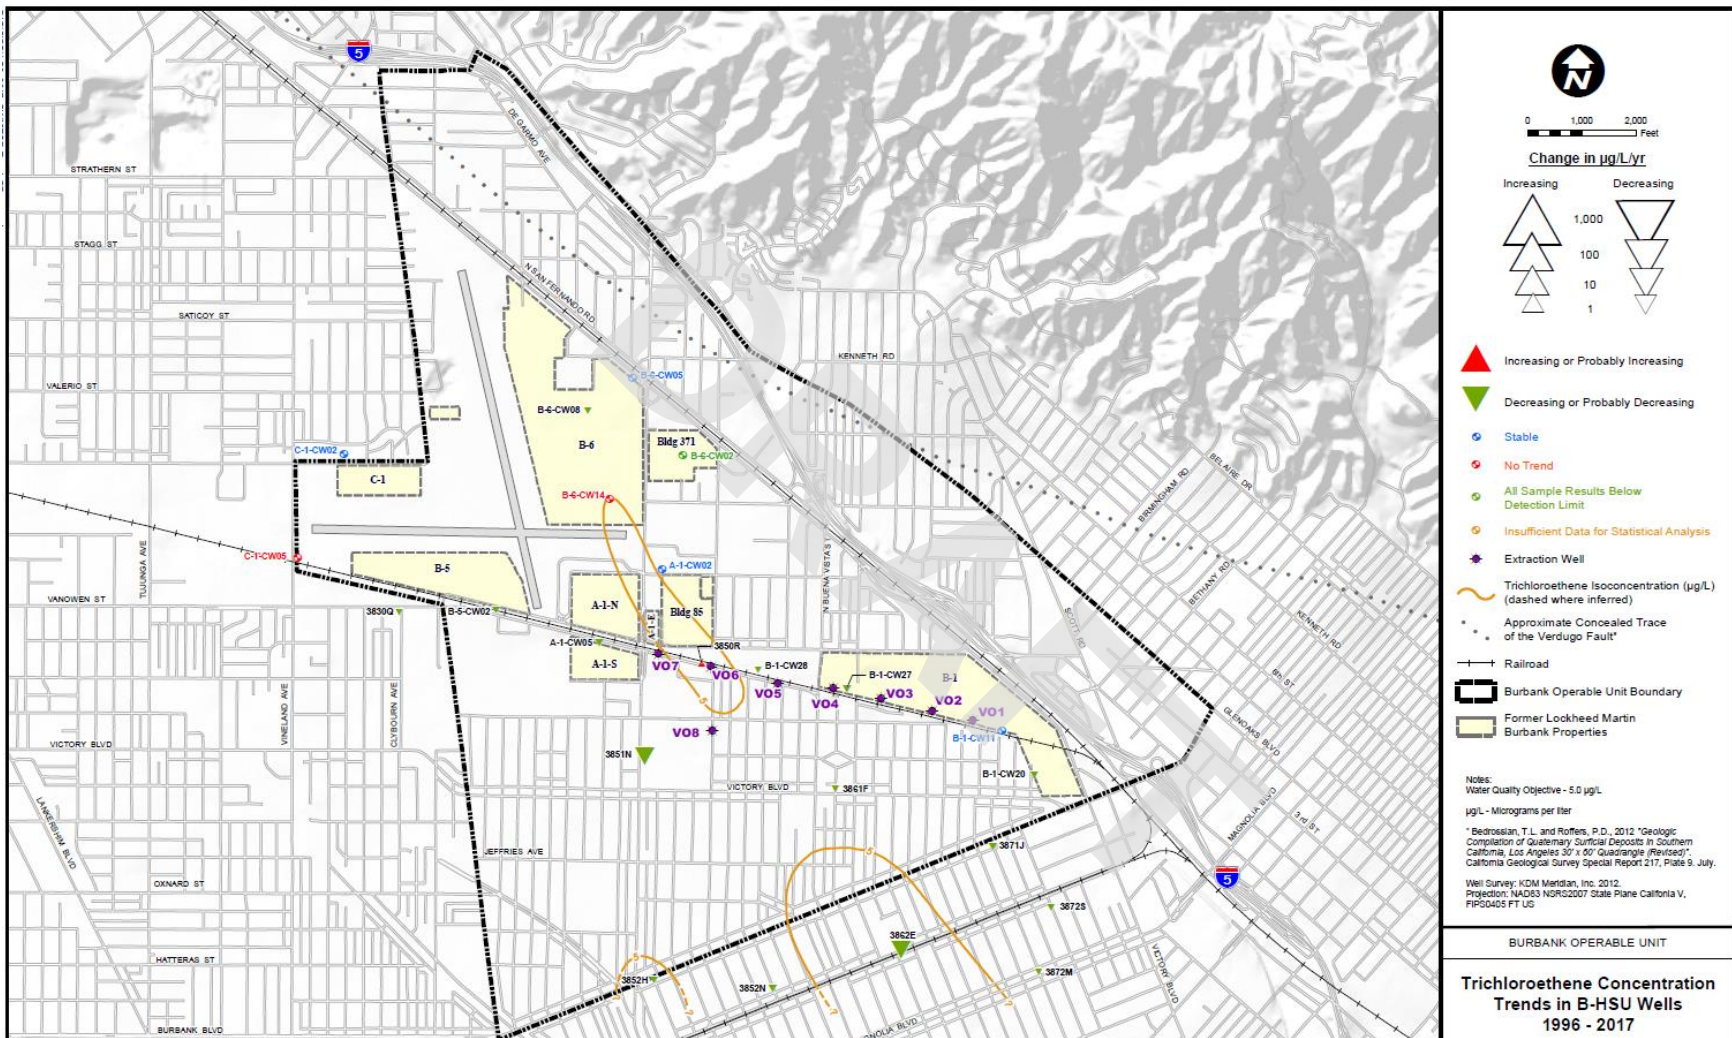

Figure B-5. Mann-Kendall Results for TCE in B-zone aquifer for BOU

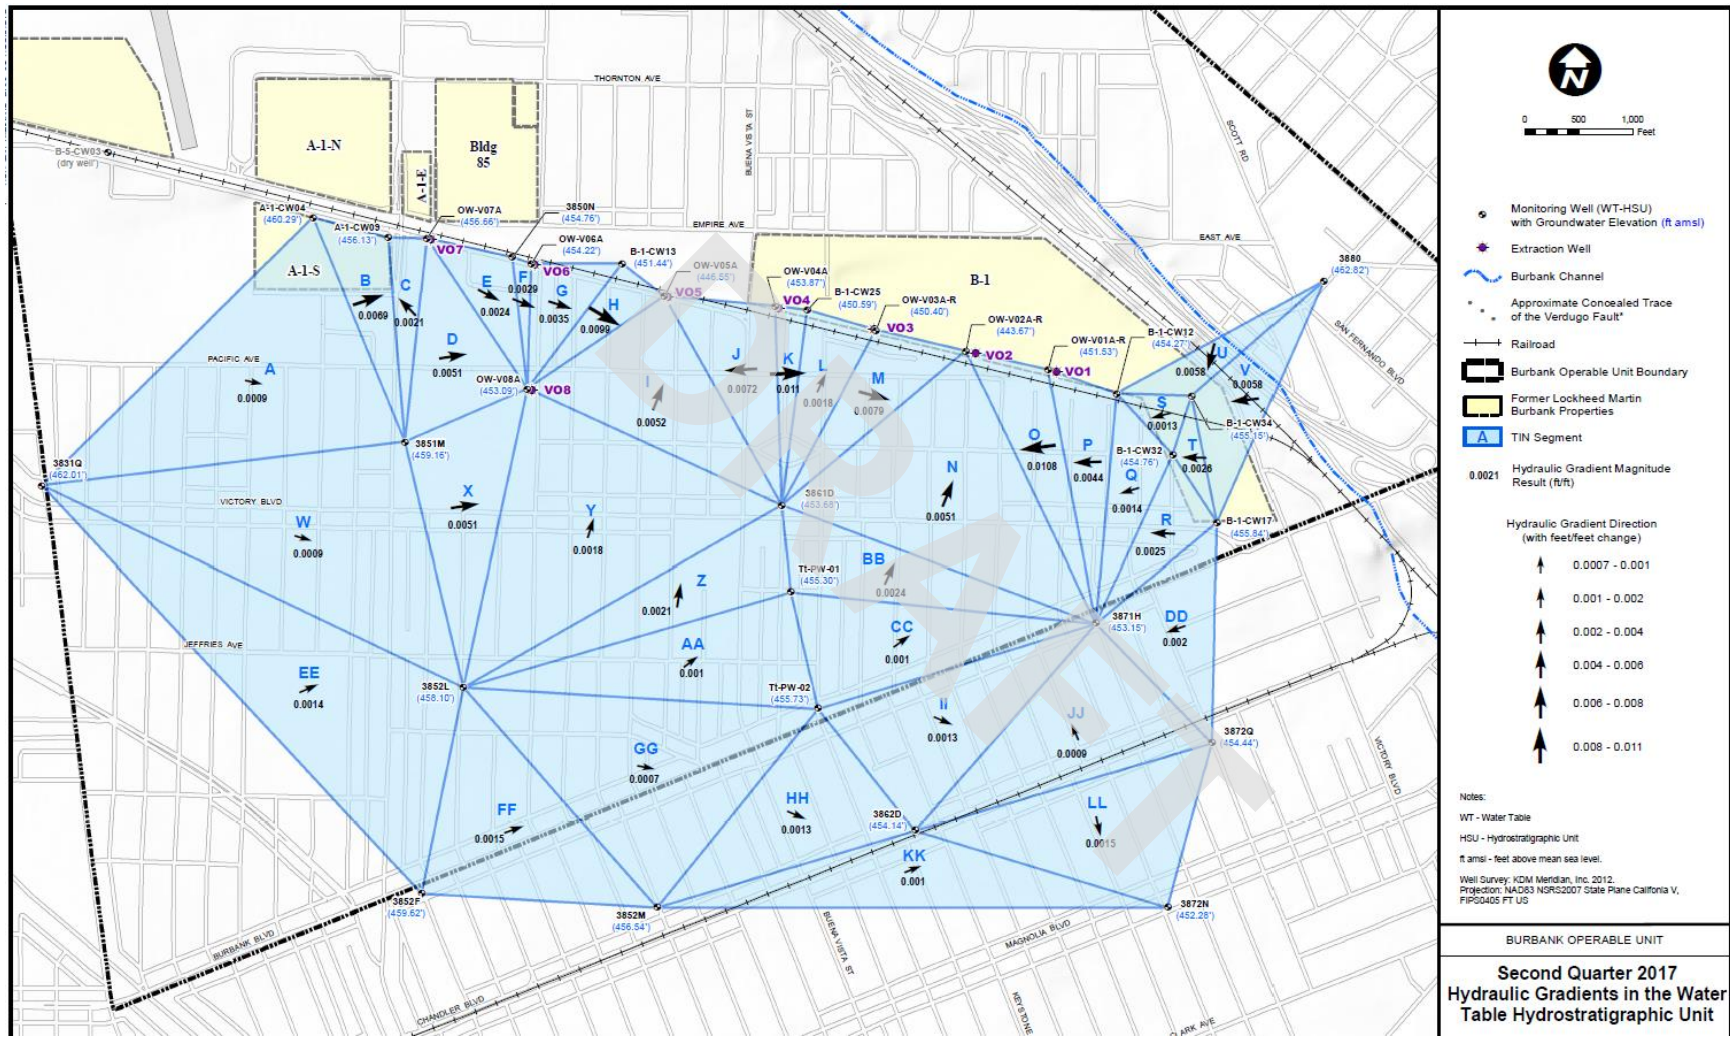

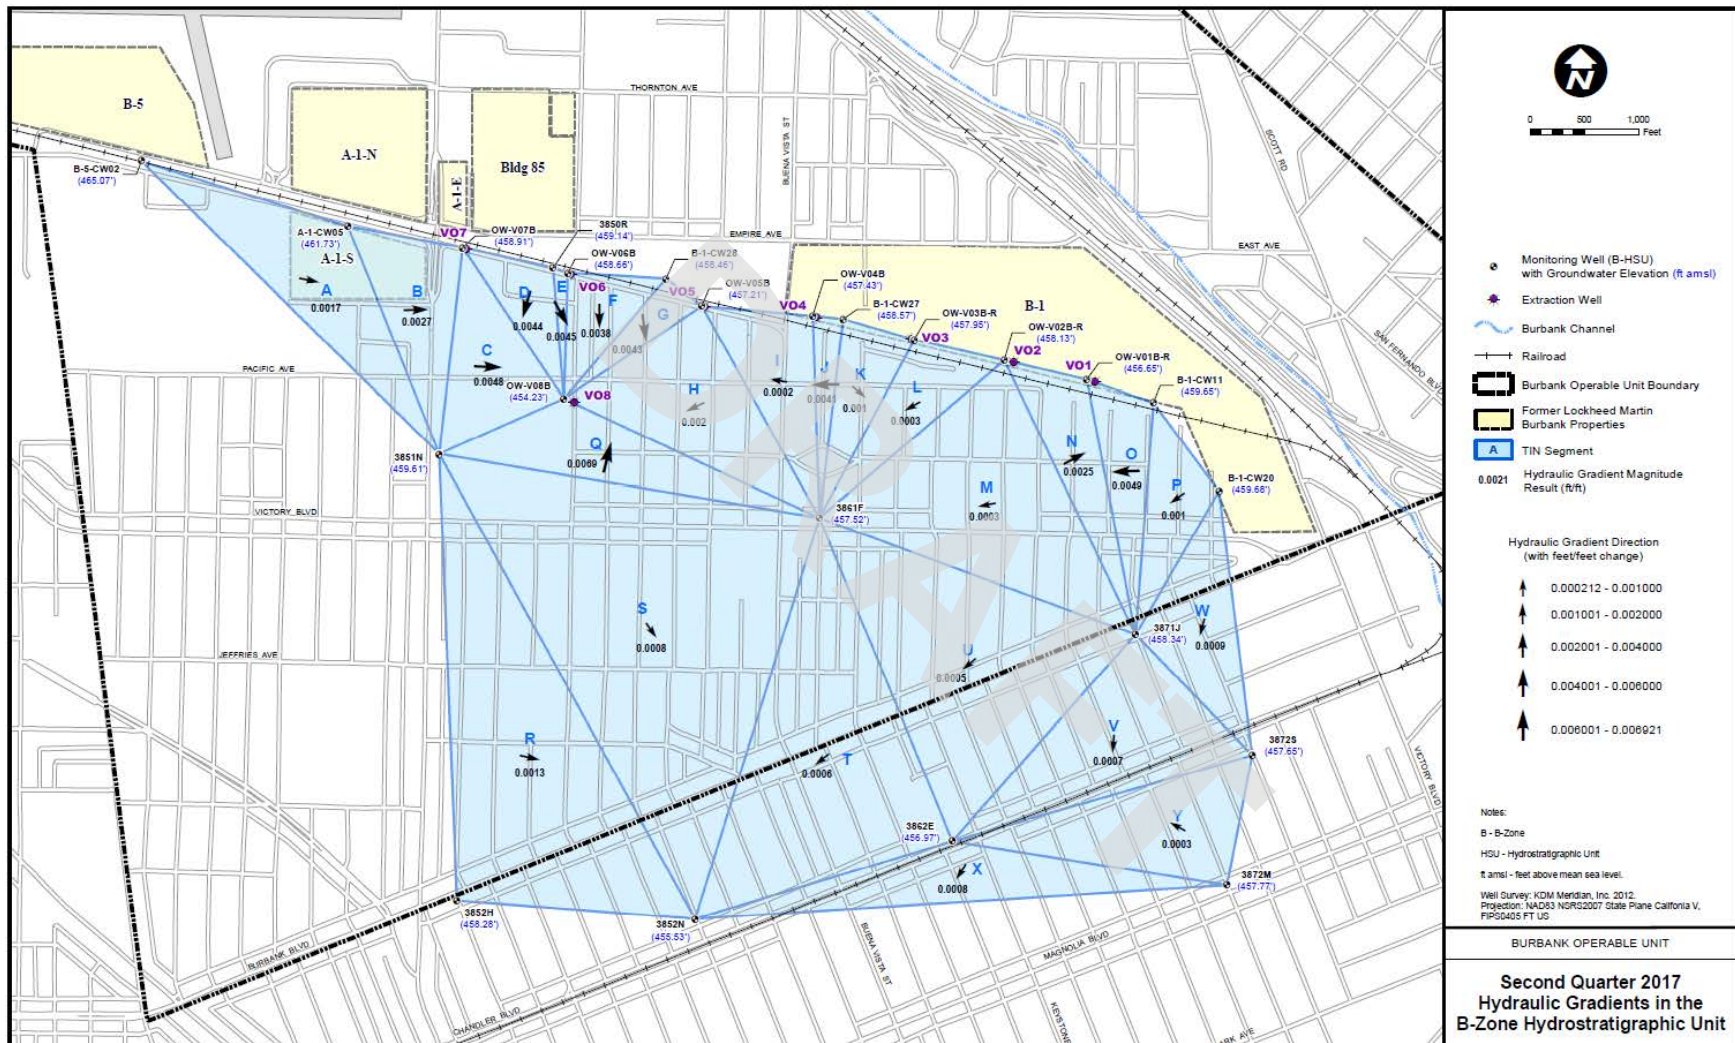

Figure B-6. Triangular Irregular Network Analysis of Hydraulic Gradient in Water Table aquifer for BOU

**Figure B-8. Model-Simulated Capture Zone Extent under Average Water Level Conditions for BOU**

**Figure B-9. Model-Simulated Capture Zone Extent under Elevated Water Level Condition for BOU**

# Appendix C: ARAR Assessment

## ARAR Analysis Appendix

The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Section 121(d)(1)(A) requires that remedial actions at CERCLA sites attain (or justify the waiver of) any federal or state environmental standards, requirements, criteria, or limitations that are determined to be legally applicable or relevant and appropriate requirements (ARARs). federal ARARs may include requirements promulgated under any federal environmental laws. State ARARs may only include promulgated, enforceable environmental or facility-siting laws of general application that are more stringent or broader in scope than federal requirements and that are identified by the state in a timely manner. ARARs are identified on a Site-specific basis from information about the chemicals at the Site, the remedial actions contemplated, the physical characteristics of the Site, and other appropriate factors. ARARs include only substantive, not administrative, requirements and pertain only to onsite activities. There are three general categories of ARARs: chemical-specific, location-specific, and action-specific.

Because these were interim actions for containment of groundwater contamination, EPA has not established chemical-specific ARARs for restoration of groundwater remaining onsite. EPA is waiving this ARAR pursuant to CERCLA Section 121(d) (4) (A), 42 U.S.C. § 9621(d) (4) (A), and 40 CFR § 300.430(f) (1) (ii) (C), which allows EPA to select a remedy that does not achieve an ARAR when the remedial alternative selected is an interim measure that will become part of a final remedial action that will attain ARARs. EPA's waiver of the aquifer cleanup standard does not apply to water extracted from the aquifer and delivered to municipalities for use as drinking water. All extracted and treated water complies with maximum contaminant level (MCL) ARARs.

The current regulatory standards for trichloroethene (TCE), tetrachloroethene (PCE), and the other volatile organic compound (VOC) contaminants of concern are the state and federal MCLs. No revisions to these MCLs occurred during the five-year review period.

Hexavalent chromium is not regulated, but currently addressed by both federal and state MCLs for total chromium. In October 2014, the California Office of Administrative Law approved a regulation enacting an MCL for hexavalent chromium. However, due to a judgment issued by the California State Superior Court, the CA MCL for hexavalent chromium is no longer in effect.

federal and state laws and regulations, other than the chemical-specific ARARs that have been promulgated or changed over the past five years, are described in Table C-1. The table does not include those ARARs identified that are no longer pertinent. For example, ARARs related to remedial design and construction are not included in the table if they do not continue into long-term O&M. There have been no revisions to laws or regulations that affect the protectiveness of the remedy.

The following ARARs have not changed since the last Five-Year Review; and therefore, do not affect protectiveness:

- Clean Air Act SCAQMD, Rule 1401
- California Water Code and State Water Resources Control Board Model Well Standards Ordinance (1989), Division 7, Chapter 10, Section 13700 et seq.
- California Hazardous Waste Regulations, Generator Requirements, 22 CCR 66262.10, 22 CCR 66262.11, 22 CCR 66262.34(a)(1)(A), 22 CCR 66265.170 et seq. (Article 9), 22 CCR 66265.190 et seq. (Article 10)
- California Land Disposal Restrictions, Requirements for Generators, 22 CCR 66268.3, 22 CCR 66268.7, 22 CCR 66268.9, 22 CCR 66268.50
- California Land Disposal Restrictions, Requirements for Generators, 22 CCR 66268.1 et seq. (Article 1)
- Spent Carbon Disposal, 40 CFR 268.40
- Groundwater Reinjection, State Water Resources Control Board Resolution 68-16
- Groundwater Reinjection, RCRA Section 3020

**Table C-1. Applicable or Relevant and Appropriate Requirements Evaluation**

Original ARAR	Document	Original ARAR requirement	Revised requirement	Revision Date (between Sept. 2013-present)	Effect on Protectiveness
Clean Air Act SCAQMD, Regulation XIII		Regulation XIII requires that stationary sources of air emissions meet best available technology standards.	Rule 1309 Rule 1325	February 5, 2013 November 4, 2016	Rules 1309 (Emission Reduction Credits and Short-Term Credits), 1315 (federal New Source Tracking System), and 1325 (federal PM2.5 New Source Review Program) of Regulation XIII have been amended or adopted since the previous FYR, but none of the changes affect protectiveness.

# High court rules against crisis pregnancy center law

By Maria Sherman and Jessica Gordon  
 The Associated Press

WASHINGTON — The Supreme Court on Tuesday effectively put an end to a California law that forces anti-abortion crisis pregnancy centers to provide information about abortion.

The 5-4 ruling was decided on a similar law in Hawaii and Illinois.

The California law took effect in 2010. It requires centers that are licensed by the state to disclose about the availability of abortion, abortion counseling, and other services, at little or no cost. Centers that do not are not required to post a sign that said so. The court struck down that portion of the law.

The justices said they were split 5-4 on whether to deliver a message with which they disagreed. California said the law was needed to let poor women know all their options.

Justice Clarence Thomas, in his majority opinion, said the centers "are unlikely to succeed" in their constitutional challenge to the portion of the law involving licensed centers. That means that while the law is currently on the books, its challengers can go back to court to get an order halting its enforcement. An attorney for the challenger said Tuesday that they expect to be able to do that quickly. California had not been enforcing the law, however.

"California cannot opt-out the message for it," Thomas wrote for himself, Chief Justice John Roberts and Justice Anthony Kennedy, Samuel Alito and Neil Gorsuch. He called the requirement for an "informed" decision "unjustified and unduly burdensome."

Justice Stephen Breyer said among the reasons the law could be upheld is that the high court has previously upheld the law requiring doctors to tell women seeking abortions about abortion services. "If that's all, the law must be upheld," Breyer said in a dissenting opinion, joined by his liberal colleagues, Justice Sotomayor, Chief Justice Sonia Sotomayor and Elena Kagan.

Visitors depart the Supreme Court on Monday in Washington, D.C. The Supreme Court on Tuesday effectively put an end to a California law that forces anti-abortion crisis pregnancy centers to provide information about abortion. Anti-abortion groups cheered the decision.

and anti-abortion groups were among those cheering the decision. The Trump administration had argued that California law violates their right of licensed centers but had no objection to the requirement for the unlicensed centers. "If people would not be forced by their government to promote a message with which they disagree, and provide pregnancy centers in California should not be forced to advertise about one and condemn the very reason they exist," Justice said in a dissent. "The day California Attorney General Xavier Becerra, a Democratic, called the decision 'unfortunate' has said 'our work is not over' and

California receive accurate information about their health care options with confidence." The abortion rights group NARAL Pro-choice California was a prime sponsor of the California law. NARAL can testify that the centers misled women about their options and try to persuade them to forgo abortion. Statistics of the number of crisis pregnancy centers in the U.S. run from 1,100 to over 2,000, compared with fewer than 1,000 abortion providers, a women's rights group said in a dissent. NARAL president Ryan Sigurdson said in a dissent after Tuesday's decision that the Supreme

Court had "turned its back on women and abandoned the dignity tactics used by state women's health centers." California lawyers challenged by the National Institute of Family and Life Advocacy, an organization with ties to 1,400 pregnancy centers nationwide and 140 in California. The group was represented at the Supreme Court by Alliance Defending Freedom, a Christian law firm. ADFA president Thomas A. Cooney applauded the court's decision Tuesday. He said the decision "accomplishes" and said it was a "great day for pro-life pregnancy centers" and for the people.

Other state laws have also passed were related to crisis pregnancy centers. In 2016, a federal appeals court in New York City's constitution, though it upheld the requirement for a licensed center to say that they lack a license. Other state laws that regulate doctors' speech in the abortion context. In Louisiana, Texas and Wisconsin, doctors must display a sonogram and describe the fetus to a pregnant woman on a computer screen before an abortion, according to the Supreme Court decision, which supports abortion rights. Similar laws have been blocked in Kentucky, North Carolina and Oklahoma.

U.S. Environmental Protection Agency (EPA) Conducts Third Five-Year Review of Cleanup at the San Fernando Valley, Area 1, Superfund Site in Los Angeles, CA

The U.S. Environmental Protection Agency (EPA) is conducting the 2018 Five-Year Review of the cleanup at the San Fernando Valley (SFV) Area 1 Superfund site in Los Angeles and Burbank, CA. The Five-Year Review is being conducted to determine whether the groundwater pump and treat systems are adequately protecting human health and the environment. The systems are designed to capture and contain the contaminated groundwater and prevent it from moving into clean groundwater areas. The primary contaminants of concern in the groundwater are volatile organic compounds (VOCs), including trichloroethylene (TCE) and perchloroethylene (PCE).

SFV other cleanup steps, complete clean up of another managed process called operate until 2015, SFV Area 1 is divided into two cells, the Burbank operating cell (BOPU) and the North Hollywood operating cell (NHOC). Each cell has its own groundwater pump and treat system and cleanup plan. Both pump and treat systems and related plans will be evaluated in the Five-Year Review. The previous Five-Year Review for SFV Area 1 found the cleanup plans for both cells are adequately protecting human health and the environment.

The SFV Area 1 site, approximately 25 square miles, was placed, ready to commence and paying indirect operating in the site from the 1960s to 1980s.

EPA invites the community to sign up now about the review process and provide input to the Agency. You may contact Judy Maravilla, Remedial Project Manager (RPM) for the SFV, at (415) 953-3306 or maravilla.judy@epa.gov, or Cheryl Hines, RPM for the BOPU, at (415) 953-3300 or hines.cheryl@epa.gov.

The 2018 Five-Year Review report will be completed by September 30, 2018 and available shortly after this date at the following locations and websites. The next review will be in 2023.

4.	<b>Permits and Service Agreements</b> <input checked="" type="checkbox"/> Air discharge permit <input type="checkbox"/> Readily available <input type="checkbox"/> Up to date <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Effluent discharge <input type="checkbox"/> Readily available <input type="checkbox"/> Up to date <input type="checkbox"/> N/A <input type="checkbox"/> Waste disposal, POTW <input type="checkbox"/> Readily available <input type="checkbox"/> Up to date <input checked="" type="checkbox"/> N/A <input type="checkbox"/> Other permits _____ <input type="checkbox"/> Readily available <input type="checkbox"/> Up to date <input type="checkbox"/> N/A Remarks <u>Permits and Service Agreements not maintained on site, but rather at LADWP Sylmar facility.</u>
5.	<b>Gas Generation Records</b> <input type="checkbox"/> Readily available <input type="checkbox"/> Up to date <input checked="" type="checkbox"/> N/A Remarks <u>None</u>
6.	<b>Settlement Monument Records</b> <input type="checkbox"/> Readily available <input type="checkbox"/> Up to date <input checked="" type="checkbox"/> N/A Remarks <u>None</u>
7.	<b>Groundwater Monitoring Records</b> <input checked="" type="checkbox"/> Readily available <input type="checkbox"/> Up to date <input type="checkbox"/> N/A Remarks <u>LADWP provides monthly water quality reports for influent and effluent to the plant. Groundwater monitoring wells sampled by other entities.</u>
8.	<b>Leachate Extraction Records</b> <input type="checkbox"/> Readily available <input type="checkbox"/> Up to date <input checked="" type="checkbox"/> N/A Remarks <u>None</u>
9.	<b>Discharge Compliance Records</b> <input checked="" type="checkbox"/> Air <input type="checkbox"/> Readily available <input type="checkbox"/> Up to date <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Water (effluent) <input type="checkbox"/> Readily available <input type="checkbox"/> Up to date <input type="checkbox"/> N/A Remarks <u>Discharge Compliance Monitoring Records provided with Quarterly Reports</u>
10.	<b>Daily Access/Security Logs</b> <input checked="" type="checkbox"/> Readily available <input checked="" type="checkbox"/> Up to date <input type="checkbox"/> N/A Remarks <u>Access and maintenance are recorded on paper and at LADWP Sylmar facility.</u>
<b>IV. O&amp;M COSTS</b>	
1.	<b>O&amp;M Organization</b> <input type="checkbox"/> State in-house <input type="checkbox"/> Contractor for State <input type="checkbox"/> PRP in-house <input type="checkbox"/> Contractor for PRP <input type="checkbox"/> federal Facility in-house <input type="checkbox"/> Contractor for federal Facility <input checked="" type="checkbox"/> Other <u>Los Angeles Department of Water and Power (LADWP)</u>
2.	<b>Unanticipated or Unusually High O&amp;M Costs During Review Period</b> Describe costs and reasons: <u>Issues with the heater for the air stripper and power supply to the plant has been a big problem that has caused shut downs, LADWP looking at improving power supply when plant is upgraded.</u>

<b>V. ACCESS AND INSTITUTIONAL CONTROLS</b> <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A			
<b>A. Fencing</b>			
1.	<b>Fencing damaged</b>	<input type="checkbox"/> Location shown on site map	<input checked="" type="checkbox"/> Gates secured <input type="checkbox"/> N/A
Remarks: <u>No Fencing Damage</u> ; treatment system is double fenced and fairly isolated.			
<b>B. Other Access Restrictions</b>			
1.	<b>Signs and other security measures</b>	<input type="checkbox"/> Location shown on site map	<input type="checkbox"/> N/A
Remarks <u>Security cameras on both sides of air stripper, alarms on doors that notify LADWP when door is opened.</u>			
<b>C. Institutional Controls (ICs)</b>			
1.	<b>Implementation and enforcement</b>		
	Site conditions imply ICs not properly implemented	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> N/A
	Site conditions imply ICs not being fully enforced	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> N/A
	Type of monitoring (e.g., self-reporting, drive by)	<u>N/A</u>	
	Frequency	<u>N/A</u>	
	Responsible party/agency	<u>N/A</u>	
	Reporting is up-to-date	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> N/A
	Reports are verified by the lead agency	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> N/A
	Specific requirements in deed or decision documents have been met	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> N/A
	Violations have been reported	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> N/A
	Other problems or suggestions:	<input type="checkbox"/> Report attached	
<u>An IC is not necessary since the basin has a moratorium on installation of new wells.</u>			
2.	<b>Adequacy</b>	<input checked="" type="checkbox"/> ICs are adequate	<input type="checkbox"/> ICs are inadequate <input type="checkbox"/> N/A
Remarks <u>None</u>			
<b>D. General</b>			
1.	<b>Vandalism/trespassing</b>	<input type="checkbox"/> Location shown on site map	<input checked="" type="checkbox"/> No vandalism evident
Remarks			
2.	<b>Land use changes on site</b>	<input checked="" type="checkbox"/> N/A	
Remarks <u>None</u>			
3.	<b>Land use changes off site</b>	<input checked="" type="checkbox"/> N/A	
Remarks <u>None</u>			
<b>VI. GENERAL SITE CONDITIONS</b>			
<b>A. Roads</b> <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A			
1.	<b>Roads damaged</b>	<input type="checkbox"/> Location shown on site map	<input checked="" type="checkbox"/> Roads adequate <input type="checkbox"/> N/A
Remarks <u>None</u>			
<b>B. Other Site Conditions</b>			
Remarks <u>None</u>			
<b>VII. LANDFILL COVERS</b> <input type="checkbox"/> Applicable <input checked="" type="checkbox"/> N/A			
<b>VIII. VERTICAL BARRIER WALLS</b> <input type="checkbox"/> Applicable <input checked="" type="checkbox"/> N/A			

<b>IX. GROUNDWATER/SURFACE WATER REMEDIES</b> <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
<b>A. Groundwater Extraction Wells, Pumps, and Pipelines</b> <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
1.	<b>Pumps, Wellhead Plumbing, and Electrical</b> <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> All required wells properly operating <input type="checkbox"/> Needs Maintenance <input type="checkbox"/> N/A Remarks <u>Only visited one extraction well that was not operating due to plant shut down.</u>
2.	<b>Extraction System Pipelines, Valves, Valve Boxes, and Other Appurtenances</b> <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks <u>None</u>
3.	<b>Spare Parts and Equipment</b> <input checked="" type="checkbox"/> Readily available <input type="checkbox"/> Good condition <input type="checkbox"/> Requires upgrade <input type="checkbox"/> Needs to be provided Remarks <u>Parts are stored offsite in a nearby warehouse, which was not visited during the site inspection.</u>
<b>B. Surface Water Collection Structures, Pumps, and Pipelines</b> <input type="checkbox"/> Applicable <input checked="" type="checkbox"/> N/A	
<b>C. Treatment System</b> <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
1.	<b>Treatment Train</b> (Check components that apply) <input type="checkbox"/> Metals removal <input type="checkbox"/> Oil/water separation <input type="checkbox"/> Bioremediation <input checked="" type="checkbox"/> Air stripping <input checked="" type="checkbox"/> Carbon adsorbers <input type="checkbox"/> Filters _____ <input checked="" type="checkbox"/> Additive (e.g., chelation agent, flocculent) <u>Hexametaphosphate descalant</u> <input type="checkbox"/> Others _____ <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance <input checked="" type="checkbox"/> Sampling ports properly marked and functional <input checked="" type="checkbox"/> Sampling/maintenance log displayed and up to date <input checked="" type="checkbox"/> Equipment properly identified <input type="checkbox"/> Quantity of groundwater treated annually _____ <input type="checkbox"/> Quantity of surface water treated annually <u>None</u> Remarks <u>None</u>
2.	<b>Electrical Enclosures and Panels</b> (properly rated and functional) <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks <u>The electrical system is antiquated and often requires the attention of technicians.</u>
3.	<b>Tanks, Vaults, Storage Vessels</b> <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Proper secondary containment <input type="checkbox"/> Needs Maintenance Remarks <u>None</u>
4.	<b>Discharge Structure and Appurtenances</b> <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks _____
5.	<b>Treatment Building(s)</b> <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition (esp. roof and doorways) <input type="checkbox"/> Needs repair <input type="checkbox"/> Chemicals and equipment properly stored Remarks _____
6.	<b>Monitoring Wells</b> (pump and treatment remedy) <input type="checkbox"/> Properly secured/locked <input type="checkbox"/> Functioning <input checked="" type="checkbox"/> Routinely sampled <input type="checkbox"/> Good condition <input type="checkbox"/> All required wells located <input type="checkbox"/> Needs Maintenance <input type="checkbox"/> N/A Remarks <u>Monitoring Wells were not visited on the site inspection.</u>

<b>D. Monitoring Data</b>	
1.	Monitoring Data <input checked="" type="checkbox"/> Is routinely submitted on time <input checked="" type="checkbox"/> Is of acceptable quality
2.	Monitoring data suggests: <input type="checkbox"/> Groundwater plume is effectively contained <input type="checkbox"/> Contaminant concentrations are declining
<b>E. Monitored Natural Attenuation</b>	
1.	<b>Monitoring Wells</b> (natural attenuation remedy) <input type="checkbox"/> Properly secured/locked <input type="checkbox"/> Functioning <input type="checkbox"/> Routinely sampled <input type="checkbox"/> Good condition <input type="checkbox"/> All required wells located <input type="checkbox"/> Needs Maintenance <input type="checkbox"/> N/A Remarks <u>This is not an MNA remedy, it is a containment remedy.</u>
<b>3.X. OTHER REMEDIES</b>	
N/A	
<b>XI. OVERALL OBSERVATIONS</b>	
<b>A.</b>	<b>Implementation of the Remedy</b>
Describe issues and observations relating to whether the remedy is effective and functioning as designed. Begin with a brief statement of what the remedy is to accomplish (i.e., to contain contaminant plume, minimize infiltration and gas emission, etc.). <u>The extraction wells and treatment system need to be updated to prevent further migration of the contamination. The treatment system has not been operating since November 2017 due to issues with the wells. A new treatment system and new wells will be installed to improve the remedy. .</u>	
<b>B.</b>	<b>Adequacy of O&amp;M</b>
Describe issues and observations related to the implementation and scope of O&M procedures. In particular, discuss their relationship to the current and long-term protectiveness of the remedy. <u>The treatment system is scheduled to be update.</u>	
<b>C.</b>	<b>Early Indicators of Potential Remedy Problems</b>
Describe issues and observations such as unexpected changes in the cost or scope of O&M or a high frequency of unscheduled repairs that suggest that the protectiveness of the remedy may be compromised in the future. .	
<b>4.D.</b>	<b>Opportunities for Optimization</b>
Describe possible opportunities for optimization in monitoring tasks or the operation of the remedy. <u>The new remedial design will optimize the system. The existing extraction wells could be deepened or new extraction wells could be drilled.</u>	

<b>III. ON-SITE DOCUMENTS &amp; RECORDS VERIFIED</b> (Check all that apply)			
1.	<b>O&amp;M Documents</b>	<input checked="" type="checkbox"/> Readily available	<input checked="" type="checkbox"/> Up to date <input type="checkbox"/> N/A

3.	<b>Unanticipated or Unusually High O&amp;M Costs During Review Period</b> Describe costs and reasons: <u>None. High cost to re-build/rehab wells, but this is anticipated.</u>
<b>V. ACCESS AND INSTITUTIONAL CONTROLS</b> <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
<b>A. Fencing</b>	
1.	<b>Fencing damaged</b> <input type="checkbox"/> Location shown on site map <input checked="" type="checkbox"/> Gates secured <input type="checkbox"/> N/A Remarks <u>No damage. Fencing and gates look good.</u>
<b>B. Other Access Restrictions</b>	
1.	<b>Signs and other security measures</b> <input type="checkbox"/> Location shown on site map <input type="checkbox"/> N/A Remarks: <u>New security cameras were installed near the office.</u>
<b>C. Institutional Controls (ICs)</b>	
1.	<b>Implementation and enforcement</b> Site conditions imply ICs not properly implemented <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A Site conditions imply ICs not being fully enforced <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A  Type of monitoring (e.g., self-reporting, drive by) <u>N/A</u> Frequency <u>N/A</u> Responsible party/agency <u>N/A</u>  Reporting is up-to-date <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A Reports are verified by the lead agency <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A  Specific requirements in deed or decision documents have been met <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A Violations have been reported <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A Other problems or suggestions: <input type="checkbox"/> Report attached <u>There is no specific institutional control for the site however there is a decent decree that prevents new wells from being installed in the basin.</u>
2.	<b>Adequacy</b> <input checked="" type="checkbox"/> ICs are adequate <input type="checkbox"/> ICs are inadequate <input type="checkbox"/> N/A Remarks <u>None</u>
<b>D. General</b>	
1.	<b>Vandalism/trespassing</b> <input type="checkbox"/> Location shown on site map <input checked="" type="checkbox"/> No vandalism evident Remarks <u>An updated conference building and storage buildings have provided secure locations for storage.</u>
2.	<b>Land use changes on site</b> <input checked="" type="checkbox"/> N/A Remarks <u>None</u>
3.	<b>Land use changes off site</b> <input checked="" type="checkbox"/> N/A Remarks <u>None</u>
<b>VI. GENERAL SITE CONDITIONS</b>	
<b>A. Roads</b> <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
1.	<b>Roads damaged</b> <input type="checkbox"/> Location shown on site map <input checked="" type="checkbox"/> Roads adequate <input type="checkbox"/> N/A Remarks <u>None</u>
<b>B. Other Site Conditions</b>	
Remarks <u>Site looks clean and well organized. High pitch noise had been heard off site by at least one resident; sound dampening blankets have been placed over blowers and considering building a sound reduction wall near the blowers.</u>	

<b>VII. LANDFILL COVERS</b> <input type="checkbox"/> Applicable <input checked="" type="checkbox"/> N/A	
<b>VIII. VERTICAL BARRIER WALLS</b> <input type="checkbox"/> Applicable <input checked="" type="checkbox"/> N/A	
<b>IX. GROUNDWATER/SURFACE WATER REMEDIES</b> <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
<b>A. Groundwater Extraction Wells, Pumps, and Pipelines</b> <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
1.	<b>Pumps, Wellhead Plumbing, and Electrical</b> <input checked="" type="checkbox"/> Good condition <input checked="" type="checkbox"/> All required wells properly operating G Needs Maintenance G N/A Remarks: Only visited one extraction well, did not inspect all the off-site infrastructure. Currently waiting on new motor for one of the pumps and should be installed within the next couple of weeks.
2.	<b>Extraction System Pipelines, Valves, Valve Boxes, and Other Appurtenances</b> <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks <u>None</u>
3.	<b>Spare Parts and Equipment</b> <input checked="" type="checkbox"/> Readily available <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Requires upgrade <input type="checkbox"/> Needs to be provided Remarks <u>None</u>
<b>B. Surface Water Collection Structures, Pumps, and Pipelines</b> <input type="checkbox"/> Applicable <input checked="" type="checkbox"/> N/A	
<b>C. Treatment System</b> <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
1.	<b>Treatment Train</b> (Check components that apply) <input type="checkbox"/> Metals removal <input type="checkbox"/> Oil/water separation <input type="checkbox"/> Bioremediation <input checked="" type="checkbox"/> Air stripping <input checked="" type="checkbox"/> Carbon adsorbers <input type="checkbox"/> Filters _____ <input checked="" type="checkbox"/> Additive (e.g., chelation agent, flocculent) <u>C150 proprietary antiscalant (NALCO)</u> <input type="checkbox"/> Others _____ <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance <input checked="" type="checkbox"/> Sampling ports properly marked and functional <input checked="" type="checkbox"/> Sampling/maintenance log displayed and up to date <input checked="" type="checkbox"/> Equipment properly identified <input type="checkbox"/> Quantity of groundwater treated annually _____ <input type="checkbox"/> Quantity of surface water treated annually <u>N/A</u> Remarks <u>Treatment system looks clean and well maintained</u>
2.	<b>Electrical Enclosures and Panels</b> (properly rated and functional) <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks <u>None</u>
3.	<b>Tanks, Vaults, Storage Vessels</b> <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Proper secondary containment <input type="checkbox"/> Needs Maintenance Remarks: Consider lining pipes that transfer waste to prevent pin holes.
4.	<b>Discharge Structure and Appurtenances</b> <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks <u>None</u>
5.	<b>Treatment Building(s)</b> <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition (esp. roof and doorways) <input type="checkbox"/> Needs repair <input checked="" type="checkbox"/> Chemicals and equipment properly stored Remarks <u>None</u>
6.	<b>Monitoring Wells</b> (pump and treatment remedy) <input type="checkbox"/> Properly secured/locked <input type="checkbox"/> Functioning <input checked="" type="checkbox"/> Routinely sampled <input type="checkbox"/> Good condition <input type="checkbox"/> All required wells located <input type="checkbox"/> Needs Maintenance <input type="checkbox"/> N/A Remarks <u>Monitoring Wells were not visited on the Site Inspection</u>

<b>D. Monitoring Data</b>	
5.	Monitoring Data <input type="checkbox"/> Is routinely submitted on time <input checked="" type="checkbox"/> Is of acceptable quality
6.	Monitoring data suggests: <input type="checkbox"/> Groundwater plume is effectively contained <input type="checkbox"/> Contaminant concentrations are declining
<b>D. Monitored Natural Attenuation</b>	
1.	<b>Monitoring Wells</b> (natural attenuation remedy) <input type="checkbox"/> Properly secured/locked <input type="checkbox"/> Functioning <input type="checkbox"/> Routinely sampled <input type="checkbox"/> Good condition <input type="checkbox"/> All required wells located <input type="checkbox"/> Needs Maintenance <input checked="" type="checkbox"/> N/A Remarks <u>This is a containment remedy, not an MNA remedy.</u>
<b>7.X. OTHER REMEDIES</b>	
N/A	
<b>XI. OVERALL OBSERVATIONS</b>	
<b>A. Implementation of the Remedy</b>	
Describe issues and observations relating to whether the remedy is effective and functioning as designed. Begin with a brief statement of what the remedy is to accomplish (i.e., to contain contaminant plume, minimize infiltration and gas emission, etc.). <u>The remedy functions very well. Contaminants are being removed from the aquifer, but levels appear to be consistent.</u>	
<b>B. Adequacy of O&amp;M</b>	
Describe issues and observations related to the implementation and scope of O&M procedures. In particular, discuss their relationship to the current and long-term protectiveness of the remedy. <u>None</u>	
<b>C. Early Indicators of Potential Remedy Problems</b>	
Describe issues and observations such as unexpected changes in the cost or scope of O&M or a high frequency of unscheduled repairs, that suggest that the protectiveness of the remedy may be compromised in the future. <u>None</u>	
<b>8.D. Opportunities for Optimization</b>	
Describe possible opportunities for optimization in monitoring tasks or the operation of the remedy. 1) <u>A new interconnect will be built between LADWP to allow for more water to be blended and increase the efficiency of the plant. Currently the production wells that supply water to the plant have packers installed to reduce the production rate due to not having enough water to blend with.</u> 2) <u>Variable frequency drive pump may help increase energy efficiency.</u> 3) <u>Allow the use of recirculated water for the vapor phase carbon bed regeneration which would reduce the amount of water discharged to the sewer.</u>	

# Appendix F: Trip Report and Photographs from Site Inspection Visit

## Trip Report

San Fernando Valley Area 1 Superfund Site, Glendale, CA

---

### INTRODUCTION

- a. Date of Visit: January 24, 2018
- b. Location: Burbank, CA
- c. Purpose: A site visit was conducted to visually inspect and document the conditions of the remedy, the Site, and the surrounding area for inclusion into the Five-Year Review Report.
- d. Participants: *List all attendees:*

<u>NAME</u>	<u>ORGANIZATION</u>	<u>SITE</u>
Kelly Manheimer	EPA – RPM

Vahe Dabbaghian	LADWP PM	NHOU
Jeffrey Weiss		USACE

### 2. SUMMARY

Site visits were completed at the North Hollywood Treatment Plant (North Hollywood Treatment Plant – North Hollywood Operable Unit [NHOU]) and Burbank Treatment Plant (BTP – Burbank Operable Unit [BOU]) on January 24, 2018 as part of the San Fernando Valley Area 1 Superfund Site (Site) Five-Year Review. The participants listed attended the Site listed next to their name. EPA and USACE personnel attended both site visits. The weather was sunny and in the 60s. The site visit at North Hollywood Treatment Plant lasted from approximately 8:00 to 9:30 a.m., and the BTP from

approximately 10:00 to 11:30 a.m. That afternoon, EPA and USACE also visited three of the extraction well locations to observe the condition of the well heads. The sections below describe the conditions at each Site and Appendix F of the Five-Year Review includes a Site Inspection Checklist completed by Jeffrey Weiss for each of the Sites.

### 3. DISCUSSION

#### *North Hollywood Treatment Plant/North Hollywood Operable Unit*

The North Hollywood Treatment Plant is not currently operating and has been shut down since November 13, 2107, due to declining water levels and maintenance issues. When the extraction wells and treatment system were operating, the treatment system had maintenance issues primarily related to an inadequate power supply to the Site, as well as inadequate spare parts supply. The treatment plant was in good condition with no obvious signs of damage or issues. The operator of the Site noted they have had problems with the inlet valve to the system not closing all the way when the system shuts down, causing a pressure buildup in the treatment system. Overall, the treatment system and extraction wells need to be updated to meet the requirements of the remedy.

#### *Burbank Treatment Plant/Burbank Operable Unit*

The BTP is operating as intended by the current remedy. The conference building and storage buildings have been updated in the last 5 years, and the method for storing contaminants removed from the treatment system has changed. They are still configuring the final method for storing the contaminants until they are picked up. The site currently blends the water from the treatment plant to meet the requirements for 1,4 dioxane and hexavalent chromium. The distribution system does not have enough capacity to accept all the water from the plant, so they are limited to 6,000 gallons per minute discharge rate. However, an interconnect with LADWP is under construction, which will provide enough capacity to discharge up to 9,000 gallons per minute, the current capacity of the treatment system. There were no signs of damage or issues with the treatment plant.

#### *Well Heads*

EPA and USACE visited three extraction wells locations within the SFV Area 1; one of the Sites was for the BTP, and the other two were for the North Hollywood Treatment Plant. The BTP well head was in good condition with no signs of damage. The two North Hollywood Treatment Plant well heads were not operational, because the treatment system was not operating. There were no signs of damage at the North Hollywood Treatment Plant well heads.

### 4. ACTIONS

USACE will incorporate information obtained from the site visit into the Five-Year Review report.

RPD	relative percent difference
TCE	trichloroethene
1,2,3-TCP	1,2,3-trichloropropane
USEPA	United States Environmental Protection Agency
VOCs	volatile organic compounds

## SECTION 1 INTRODUCTION

On behalf of Lockheed Martin Corporation (Lockheed Martin), Tetra Tech has prepared this report to present the results of the seventh of eight-quarterly groundwater-quality monitoring events for the new monitoring wells installed at Lockheed Martin’s former Plant B-1 facility. The former Plant B-1 facility (Figure 1) is located within the Burbank Operable Unit (BOU) of the San Fernando Valley Superfund Area 1. The groundwater monitoring was performed in compliance with the following:

- Los Angeles Regional Water Quality Control Board (Regional Board)-approved *Supplemental Work Plan – Additional Site Investigation, Former Lockheed Martin Plant B-1, Burbank, California* (Tetra Tech, 2015).
- Recommendations for additional monitoring presented in *Quarterly Groundwater Monitoring Report Fourth Quarter 2017 Former Lockheed Martin Plant B-1 Burbank, California* (Tetra Tech, 2018a).

### 1.1 BACKGROUND

The following Regional Board documents provide regulatory background for the groundwater monitoring described herein:

- “Requirement for Technical Report Pursuant to California Water Code Section 13267 Order No. R4-2013-0063 (Regional Board, 2013)”, issued to Lockheed Martin on 18 April 2013 requesting investigation of 20 areas of concern (AOCs) within Lockheed Martin’s former plants in Burbank, California.
- “Comments Response Letter for The Report Entitled Additional Site Investigation Report Pursuant to California Water Code Section 13267 Order No. R4-2013-0063” (Regional Board, 2015a) addressing the report *Additional Site Investigation Report – Former Lockheed Martin Plants A-1 North, B-1, B-6, and C-1, Burbank, California* dated 29 December 2014 (Tetra Tech, 2014).
- “Review of Technical Report Pursuant to California Water Code Section 13267 Order R4-2013-0063 Dated 04 August 2014” (Regional Board, 2015b) issued to Lockheed Martin on 11 December 2015 addressing Lockheed Martin’s Response to Comments Letter dated 19 September 2015.

- “Approval of the Work Plan to Complete Site Investigation Pursuant to California Water Code Section 13267 Order No. R4-2013-0063” (Regional Board, 2016) issued to Lockheed Martin on 10 May 2016.
- Comments and Requirements on Quarterly Groundwater Monitoring Report Pursuant to California Water Code Section 13267 Order No. R4-2013-0063. April 11 (Regional Board, 2018).

Lockheed Martin constructed five new groundwater monitoring wells (B-1-CW30 through B-1-CW34) within the former Plant B-1 facility in October to November 2016, as described in the *Supplemental Site Investigation Report, Former Lockheed Martin Plant B-1, Burbank, California* (Tetra Tech, 2017b). The locations of the groundwater monitoring wells are shown on Figure 2. As required by the Regional Board, the groundwater monitoring wells were monitored quarterly for one year for total chromium, hexavalent chromium, volatile organic compounds, and the emerging contaminants 1,4-dioxane and 1,2,3 trichloropropane (1,2,3-TCP). In the fourth of the quarterly reports *Quarterly Groundwater Monitoring Report Fourth Quarter 2017 Former Lockheed Martin Plant B-1 Burbank, California* (Tetra Tech, 2018a) it was recommended that the monitoring wells be monitored quarterly for another year and a review of the historical operations and remediation history near monitoring wells B-1-CW31 and 33 be conducted to evaluate if further groundwater assessment for VOCs and/or chromium is necessary. After another year, the wells will be included in the routine BOU groundwater monitoring program and the constituents to be tested for and the frequency of groundwater monitoring will be reevaluated. The Water Board concurred with the recommendation. The review of the historical operations and remediation history near monitoring wells B-1-CW31 and 33 was submitted to the Water Board *Groundwater Monitoring Wells B-1-CW-31 And 33, Summary of Historical Operations, Investigations, And Cleanup in Vicinity, Former Lockheed Martin Plant B-1 Burbank, California* (Tetra Tech 1018b).

## 1.2 REPORT ORGANIZATION

This report is organized into the following sections:

- Section 1 – Introduction: This section presents the regulatory background for the quarterly groundwater monitoring of the former Plant B-1 wells.
- Section 2 – Summary of Groundwater Monitoring: This section provides a description of groundwater monitoring, measurements, and quality assurance (QA) and quality control (QC) procedures.
- Section 3 – Groundwater Monitoring Results: This section presents the analytical results of the groundwater monitoring activities.

- 
- Section 4 – Groundwater Sampling Data Validation: This section summarizes compliance with the data quality objectives and requirements.
  - Section 5 – Recommendations: This section presents recommendations for future sampling and reporting.
  - Section 6 – References: This section provides a list of documents referenced in this report.

Tables, figures, and appendices are presented at the conclusion of the report, and in the order in which they are introduced in the text.

DRAFT

---

## SECTION 2 SUMMARY OF GROUNDWATER MONITORING

This section summarizes the fourth quarter 2018 groundwater monitoring and QA/QC procedures conducted at the former Lockheed Martin Plant B-1. The results from this monitoring event are discussed in Section 4. The well locations are shown on Figure 2.

### 2.1 GROUNDWATER SAMPLING

Groundwater samples were collected from five monitoring wells during the fourth quarter 2018 groundwater monitoring event. Samples were collected in accordance with the procedures specified in the *Supplemental Work Plan – Additional Site Investigation, Former Lockheed Martin Plant B-1, Burbank, California* (Tetra Tech, 2015), the *Revised Operational Sampling Plan, Burbank Operable Unit, Burbank, California* (Arcadis, 2014), and the *Revised Operational Sampling Plan – Addendum, Burbank Operable Unit, Burbank, California* (Tetra Tech, 2017a). Field purge logs are presented in Appendix A.

Dedicated dual-valve pumps were used for sampling the monitoring wells. Pump intake depths are provided in Table 1. The depths were selected to be at approximately the midpoint of the wetted screened interval based on groundwater levels at the time of well installation.

The *Revised Operational Sampling Plan – Addendum, Burbank Operable Unit, Burbank, California* (Tetra Tech, 2017a) does not indicate that dissolved chromium samples should be collected. However, a comparison of total chrome to dissolved chrome will indicate the amount of chromium existing in an aqueous state. Therefore, to better understand the state of chromium in the groundwater at the BOU, dissolved chromium samples should be collected during the Q1 2019 sampling event.

### 2.2 QUALITY ASSURANCE AND QUALITY CONTROL

In accordance with the QA/QC guidance presented in the *Revised Operational Sampling Plan, Burbank Operable Unit, Burbank, California* (Arcadis, 2014) and the *Revised Operational Sampling Plan – Addendum, Burbank Operable Unit, Burbank, California* (Tetra Tech, 2017a), duplicate samples and trip blanks were collected for each applicable analytical method to assess

---

reproducibility and whether cross-contamination of the environmental samples occurred during sampling and handling or while in transit. Duplicate samples were collected at a frequency of 10% to assess sampling and analytical precision. Trip blanks for volatile organic compound (VOC) and 1,2,3-trichloropropane (1,2,3-TCP) analyses were provided by the laboratory and placed inside each cooler containing groundwater samples to be analyzed for VOCs and/or 1,2,3-TCP. Equipment blanks were not collected since all sampling equipment was dedicated. The data validation findings are discussed in Section 4.

DRAFT

---

## SECTION 3

# GROUNDWATER MONITORING RESULTS

This section provides the results of the groundwater monitoring event.

### 3.1 GROUNDWATER ELEVATIONS

Groundwater elevations for the fourth quarter 2018 Plant B-1 monitoring event are presented in Table 2 and are shown on Figure 3. Potentiometric surface maps were not generated since the data collected would not reflect the influence of the adjacent BOU extraction wells, which have a significant effect on the geometry of the potentiometric surface. The data from these wells will be included in the 2019 annual BOU groundwater monitoring report.

### 3.2 ANALYTICAL DATA SUMMARY

Five groundwater monitoring wells were sampled during the fourth quarter 2018 Plant B-1 monitoring event. The samples collected were tested for VOCs, 1,2,3-TCP, 1,4-dioxane, total chromium, and hexavalent chromium. Fifteen organic and two inorganic analytes were detected. A summary by monitoring well of the validated laboratory analytical results for the analytes detected during the water quality monitoring event is presented in Table 3. Only results for analytes that were detected at concentrations above their respective method detection limits are shown in Table 3. Analytical results that were above a regulatory threshold (i.e., California Department of Public Health maximum contaminant level [MCL] or California Department of Public Health drinking water notification level [DWNL]) are shown in bold type and the cell is highlighted in Table 3.

Figures 4 through 9 show the concentrations of tetrachloroethene (PCE), trichloroethene (TCE), 1,2,3-TCP, 1,4-dioxane, total chromium, and hexavalent chromium, respectively, based on the analytical results from the fourth quarter 2018 sampling event. These six compounds were selected for graphical presentation because they are considered either primary or emerging chemicals of concern. The data from these wells will be included in the BOU groundwater monitoring program.

The laboratory analytical data packages, which include all environmental, field QC, and laboratory QC results, are provided in Appendix B.

### 3.2.1 Tetrachloroethene

The analyte PCE has an MCL of 5 µg/L. It was detected in all five of the samples, four of which exceeded the MCL. The detected concentrations ranged from 3.7 µg/L (monitoring well B-1-CW32) to 1,900 µg/L (monitoring well B-1-CW33). The PCE concentrations are shown on Figure 4.

### 3.2.2 Trichloroethene

The analyte TCE has an MCL of 5 µg/L. It was detected in all five of the samples, all of which exceeded the MCL. The detected concentrations ranged from 21 µg/L (monitoring well B-1-CW34) to 290 µg/L (monitoring well B-1-CW30). The TCE concentrations are shown on Figure 5.

### 3.2.3 1,2,3-Trichloropropane

The analyte 1,2,3-TCP has a DWNL of 0.005 µg/L. It was detected in two of the samples, one of which exceeded the DWNL. The detected concentrations ranged from 0.0048 Jq µg/L (monitoring well B-1-CW32) to 0.98 J+c µg/L (monitoring well B-1-CW33). The 1,2,3-TCP concentrations are shown on Figure 6.

### 3.2.4 1,4-Dioxane

The analyte 1,4-dioxane has a DWNL of 1.0 µg/L. It was detected in two of the samples, all of which exceeded the DWNL. The detected concentration ranged from 1.4 µg/L (monitoring well B-1-CW33) to 3.6 µg/L (monitoring well B-1-CW31). The 1,4-dioxane concentrations are shown on Figure 7.

### 3.2.5 Total Chromium

Total chromium has an MCL of 50 µg/L. It was detected in all five of the samples, none of which exceeded the MCL. The detected concentrations ranged from 13.3 µg/L (monitoring well B-1-CW33) to 43 µg/L (monitoring well B-1-CW30). The total chromium concentrations are shown on Figure 8.

### 3.2.6 Hexavalent Chromium

Hexavalent chromium was detected in all five of the samples. The detected concentrations ranged from 0.63 µg/L (monitoring well B-1-CW30) to 13 µg/L (monitoring well B-1-CW34). The hexavalent chromium concentrations are shown on Figure 9.

---

## SECTION 4

# GROUNDWATER SAMPLING DATA VALIDATION

The objective of data validation is to identify any questionable or invalid laboratory measurements. Data validation entails a review of the QC data and the raw data or summary data to verify that the laboratory was operating within required limits and that the analytical results were correctly transcribed from the instrument readouts. In addition, data validation indicates which, if any, environmental samples were related to out-of-control QC samples.

The data were validated using the most recent versions of the United States Environmental Protection Agency's (USEPA's) National Functional Guidelines for data validation available at the time of project initiation, where appropriate (USEPA, 2016a and 2016b). These procedures and criteria may be modified, as necessary, to address project-specific and method-specific criteria, control limits, and procedures. Data validation consists of data screening, checking, reviewing, editing, and interpretation to document analytical data quality and to determine whether the quality is sufficient to meet the data quality objectives (DQOs).

The data validator verifies that reduction of laboratory measurements and laboratory reporting of analytical parameters is in accordance with the procedures specified for each analytical method and/or as specified in the *Revised Operational Sampling Plan, Burbank Operable Unit, Burbank, California* (Arcadis, 2014) and the *Revised Operational Sampling Plan – Addendum, Burbank Operable Unit, Burbank, California* (Tetra Tech, 2017a).

To assess the suitability of analytical results to support groundwater monitoring decisions, the BOU groundwater monitoring program QC manager undertook the following procedures:

- Checked extraction and analysis holding time
- Reviewed laboratory reports and chain-of-custody documentation for errors and omissions
- Checked laboratory reports for correct reporting limits and units
- Checked surrogate, laboratory control sample (LCS), laboratory control sample duplicate (LCSD), and matrix spike (MS), and matrix spike duplicate (MSD) results

- 
- Assessed blank results and noted any detected analytes, their respective concentrations, and any impact to associated samples
  - Assessed sample internal standard responses and surrogate recoveries
  - Reviewed instrument calibrations
  - Compared laboratory and field duplicate sample results and noted any significant variations

Specific QA indicators were evaluated to assess the overall usability of the data. These indicators included accuracy, precision, representativeness, comparability, and completeness. The parameters are described below.

- Accuracy is established by reviewing spiked sample analysis. The LCS measures the accuracy of the instrument, and the LCS results for this dataset were all found to be within control limits. Therefore, the accuracy for the sampling event was satisfactory.
- Precision is established by calculating the relative percent difference (RPD) values for MS/MSD pairs and field duplicates. The RPD values calculated for the sampling event show that greater than >95% of the RPDs calculated were within control limits. Therefore, the precision for the sampling event was satisfactory.
- Representativeness is established by using standard field sampling techniques. Because the field sampling was conducted in accordance with the *Revised Operational Sampling Plan, Burbank Operable Unit, Burbank, California* (Tetra Tech, 2017a) and by following established standard operating procedures, the sampling is judged to have adequate representativeness. Therefore, the representativeness for the sampling event was satisfactory.
- Comparability of the data is preserved if the analytical analyses are conducted under approved and vetted USEPA analytical methods. Because the USEPA methods are constructed with comparability built into the methods, by using approved analytical methods for the BOU project, the BOU data are comparable. Therefore, the comparability for the sampling event was satisfactory.
- Completeness is measured by determining the amount of valid data produced by the laboratory as compared to the total possible data from the chain. This dataset had no rejected data, and all samples were analyzed as per the chains. The data completeness is 100%, which exceeds the 90% criterion. Therefore, the completeness for the sampling event was satisfactory.

Based upon the data review, the data are considered usable as qualified. A QA/QC summary is presented in Appendix C. All testing was provided by the Eurofins Calscience, a California Department of Public Health-accredited environmental laboratory. The laboratory analytical data packages, which include all environmental, field QC, and laboratory QC results, are provided in Appendix B. Appendix D contains an analytical data summary table showing all analytical data collected to date as well as a complete list of validation qualifiers and their definitions.

---

## SECTION 5 RECOMMENDATIONS

The fourth quarter 2018 Plant B-1 groundwater monitoring event was implemented in accordance with the *Supplemental Work Plan – Additional Site Investigation, Former Lockheed Martin Plant B-1, Burbank, California* (Tetra Tech, 2015), the *Revised Operational Sampling Plan, Burbank Operable Unit, Burbank, California* (Arcadis, 2014), and the *Revised Operational Sampling Plan – Addendum, Burbank Operable Unit, Burbank, California* (Tetra Tech, 2017a). The following recommendations are proposed for the Plant B-1 groundwater monitoring program:

- Continue groundwater monitoring for an additional quarter at Plant B-1 (January 2019).
- At the end of the additional year of quarterly monitoring the results will be presented in an annual summary for former Lockheed Martin Plant B-1. The report will be submitted to the Water Board no later than 01 April 2019. This document will include an evaluation of the constituents tested for and will discuss the recommendations for inclusion of these wells in the wider BOU groundwater monitoring program.
- Because of the potential interference from suspended particles or colloidal material entrained in the groundwater samples during the sampling process, a side by side comparison of filtered and non-filtered chromium samples will be included in the January 2019 sampling event.

## Laboratory Analytical Reports

---

Quarterly Groundwater Monitoring Report, Third Quarter 2018

Former Lockheed Martin Plant B-1

Burbank, California

Calscience

**WORK ORDER NUMBER: 18-10-0597**

*The difference is service*

AIR | SOIL | WATER | MARINE CHEMISTRY

**Analytical Report For**

**Client:** Tetra Tech, Inc.

**Client Project Name:** B-1 Chrome Investigation / 100-SBO-T36323-05

**Attention:** Robert Sabater  
301 E. Vanderbilt Way, Suite 450  
San Bernardino, CA 92408-3562

Approved for release on 10/17/2018 by:  
Vikas Patel  
Project Manager

Eurofins Calscience (Calscience) certifies that the test results provided in this report meet all NELAC Institute requirements for parameters for which accreditation is required or available. Any exceptions to NELAC Institute requirements are noted in the case narrative. The original report of subcontracted analyses, if any, is attached to this report. The results in this report are limited to the sample(s) tested and any reproduction thereof must be made in its entirety. The client or recipient of this report is specifically prohibited from making material changes to said report and, to the extent that such changes are made, Calscience is not responsible, legally or otherwise. The client or recipient agrees to indemnify Calscience for any defense to any litigation which may arise.

	6.3 LCS/LCSD. . . . .	57
7	Sample Analysis Summary. . . . .	71
8	Glossary of Terms and Qualifiers. . . . .	72
9	Chain-of-Custody/Sample Receipt Form. . . . .	73

**Condition Upon Receipt:**

Samples were received under Chain-of-Custody (COC) on 10/08/18. They were assigned to Work Order 18-10-0597.

Unless otherwise noted on the Sample Receiving forms all samples were received in good condition and within the recommended EPA temperature criteria for the methods noted on the COC. The COC and Sample Receiving Documents are integral elements of the analytical report and are presented at the back of the report.

**Holding Times:**

All samples were analyzed within prescribed holding times (HT) and/or in accordance with the Calscience Sample Acceptance Policy unless otherwise noted in the analytical report and/or comprehensive case narrative, if required.

Any parameter identified in 40CFR Part 136.3 Table II that is designated as "analyze immediately" with a holding time of  $\leq 15$  minutes (40CFR-136.3 Table II, footnote 4), is considered a "field" test and the reported results will be qualified as being received outside of the stated holding time unless received at the laboratory within 15 minutes of the collection time.

**Quality Control:**

All quality control parameters (QC) were within established control limits except where noted in the QC summary forms or described further within this report.

**Subcontractor Information:**

Unless otherwise noted below (or on the subcontract form), no samples were subcontracted.

**Additional Comments:**

Air - Sorbent-extracted air methods (EPA TO-4A, EPA TO-10, EPA TO-13A, EPA TO-17): Analytical results are converted from mass/sample basis to mass/volume basis using client-supplied air volumes.

Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture. All QC results are always reported on a wet weight basis.

**DoD Projects:**

The test results contained in this report are accredited under the laboratory's ISO/IEC 17025:2005 and DoD-ELAP accreditation issued by the ANSI-ASQ National Accreditation Board. Refer to certificate and scope of accreditation ADE-1864.

## Detections Summary

Client: Tetra Tech, Inc.  
 301 E. Vanderbilt Way, Suite 450  
 San Bernardino, CA 92408-3562

Work Order: 18-10-0597  
 Project Name: B-1 Chrome Investigation / 100-SBO-T36323-05  
 Received: 10/08/18

Attn: Robert Sabater

## Glossary of Terms and Qualifiers

Work Order: 18-10-0597

Page 1 of 1

<u>Qualifiers</u>	<u>Definition</u>
*	See applicable analysis comment.
<	Less than the indicated value.
>	Greater than the indicated value.
1	Surrogate compound recovery was out of control due to a required sample dilution. Therefore, the sample data was reported without further clarification.
2	Surrogate compound recovery was out of control due to matrix interference. The associated method blank surrogate spike compound was in control and, therefore, the sample data was reported without further clarification.
3	Recovery of the Matrix Spike (MS) or Matrix Spike Duplicate (MSD) compound was out of control due to suspected matrix interference. The associated LCS recovery was in control.
4	The MS/MSD RPD was out of control due to suspected matrix interference.
5	The PDS/PDS or PES/PESD associated with this batch of samples was out of control due to suspected matrix interference.
6	Surrogate recovery below the acceptance limit.
7	Surrogate recovery above the acceptance limit.
B	Analyte was present in the associated method blank.
BU	Sample analyzed after holding time expired.
BV	Sample received after holding time expired.
CI	See case narrative.
E	Concentration exceeds the calibration range.
ET	Sample was extracted past end of recommended max. holding time.
HD	The chromatographic pattern was inconsistent with the profile of the reference fuel standard.
HDH	The sample chromatographic pattern for TPH matches the chromatographic pattern of the specified standard but heavier hydrocarbons were also present (or detected).
HDL	The sample chromatographic pattern for TPH matches the chromatographic pattern of the specified standard but lighter hydrocarbons were also present (or detected).
J	Analyte was detected at a concentration below the reporting limit and above the laboratory method detection limit. Reported value is estimated.
JA	Analyte positively identified but quantitation is an estimate.
ME	LCS Recovery Percentage is within Marginal Exceedance (ME) Control Limit range (+/- 4 SD from the mean).
ND	Parameter not detected at the indicated reporting limit.
Q	Spike recovery and RPD control limits do not apply resulting from the parameter concentration in the sample exceeding the spike concentration by a factor of four or greater.
SG	The sample extract was subjected to Silica Gel treatment prior to analysis.
X	% Recovery and/or RPD out-of-range.
Z	Analyte presence was not confirmed by second column or GC/MS analysis.
	Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture. All QC results are reported on a wet weight basis.
	Any parameter identified in 40CFR Part 136.3 Table II that is designated as "analyze immediately" with a holding time of <= 15 minutes (40CFR-136.3 Table II, footnote 4), is considered a "field" test and the reported results will be qualified as being received outside of the stated holding time unless received at the laboratory within 15 minutes of the collection time.
	A calculated total result (Example: Total Pesticides) is the summation of each component concentration and/or, if "J" flags are reported, estimated concentration. Component concentrations showing not detected (ND) are summed into the calculated total result as zero concentrations.

## Data Validation Summary

---

Quarterly Groundwater Monitoring Report, Third Quarter 2018  
Former Lockheed Martin Plant B-1  
Burbank, California

# TETRA TECH, INC. DATA VALIDATION SUMMARY REPORT

**TO:** Peter Jimenez, Project Manager

**FROM:** Michael Wilson, Senior Chemist

**DATE:** November 9, 2018

**SUBJECT:** One Hundred Percent Data Validation Review for the Burbank Operational Unit (BOU) Groundwater Sample Analyses Data Results from Five Wells Analyzed by Eurofins Calscience Laboratory in Garden Grove, CA.

## Introduction

This report summarizes the findings from data validation efforts conducted on one hundred percent of the sample data results for Lockheed Martin Corporation's (LMC) BOU project. The validation guidance used in evaluating the data is presented in the current versions of *USEPA National Functional Guidelines for Inorganic Data Review* and *USEPA National Functional Guidelines for Organic Data Review*. The data were audited at a Level II effort. The Level II effort requires review of all applicable Quality Control (QC) sample results as it relates to the field data under review. Level II effort also determines the usability of the data based on the Data Quality Objectives (DQOs) for the project.

## Executive Summary

The Eurofins Calscience data for the project were contained in one Sample Delivery Group (SDG) designated as 18-10-0597. There were five total new wells with sample names B-1-CW30-N-18Q4, B-1-CW31-N-18Q4, B-1-CW32-N-18Q4, B-1-CW33-N-18Q4, and B-1-CW34-N-1-18Q4.

The total data set for this report consisted of the data results for the five samples listed above. The methods used to analyze these five samples are denoted below.

1. Hexavalent Chromium by Method E218.6
2. Total Chromium by Method SW6020
3. VOCs by Method SW8260B
4. 1,2,3-Trichloropropane by Method SW8260B SIM
5. 1,4-Dioxane by Method SW8270M

The samples were logged into the lab under compliant Chain of Custody documentation with no significant exceptions noted. The samples were analyzed in one or two preparation batch per analytical method per SDG. All QC samples were reviewed and if the QC result caused the data to be qualified the reason for the qualification was identified.

The data showed the laboratory analyzed all samples in accordance with method guidelines. The instances where qualification was required are listed below and explained under individual method sections. All other data is of known precision and accuracy and did not require any qualification and can be used as stated.

All data for this BOU sampling event were usable for their intended purpose.

### **Evaluation Criteria**

The data were evaluated by results from the following Quality Control (QC) entities.

- Method/Field Blanks
- Laboratory Control Samples
- Holding Times
- Surrogate Recovery (Organic Methods)
- Spiked and Field Duplicate Compliance
- Calibration Compliance
- Compound Identification
- Analytical Method Compliance

Chain-of-Custody (COC) forms were reviewed and no unresolved discrepancies were noted.

### **Evaluation of Accuracy, Precision, Representativeness, Comparability, and Completeness**

1. Accuracy is established by reviewing spiked sample analysis. A blank spike (LCS) measures the accuracy of the instrument and the LCS results for this data set were all found to be within control limits. Therefore, accuracy for the BOU project meets the Data Quality Objectives (DQO).
2. Precision is established by calculating the RPD values for MS/MSD pairs and field duplicates. The RPD values calculated for the BOU project show that >95% of the RPD calculated were within control limits. Therefore, the precision for the BOU projects meets the DQO.
3. Representativeness is established by using standard field sampling techniques. Because the field sampling was conducted under approved work plans and by following an established SOP, the sampling is judged to have adequate representativeness. The DQO was met.
4. Comparability of the data is preserved if the analytical analyses are conducted under approved and vetted EPA analytical methods. Because the EPA methods are constructed with comparability built into the methods. By using approved analytical methods for the BOU project, the BOU data is comparable. The DQO was met.
5. Completeness is measured by determine the amount of valid data produced by the laboratory as compared to the total possible data from the chain. This data set had no rejected data and all samples were analyzed as per the chains. Therefore, the data completeness is 100% which is above the 90% criterion. The DQO was met.

### **Validation Qualifiers and Comment Descriptors Definitions**

#### **Qualifier Definitions**

The upper-case letters are used to denote NFG allowed qualifiers.

- J- Estimated. The associated numerical value is an estimated quantity with a negative bias. The analyte was detected but the reported value may not be accurate or precise. The data are usable as estimated values.
- J+ Estimated. The associated numerical value is an estimated quantity with a positive bias. The analyte was detected but the reported value may not be accurate or precise. The data are usable as estimated values.
- J Estimated. The associated numerical value is an estimated quantity. It is not possible to assess the direction of the potential bias. The analyte was detected but the reported value may not be accurate or precise. The "J" qualification indicates the data fell outside the QC limits, but the exceedance was not sufficient to cause rejection of the data. The data the data are usable as estimated values.
- R Rejected. The data is unusable (the compound or analyte may or may not be present). Use of the "R" qualifier indicates a significant variance from functional guideline acceptance criteria. Either resampling or reanalysis is necessary to determine the presence or absence of the rejected analyte.
- U Not detected. Analyses were performed for the compound or analyte, but it was not detected. The "U" designation is also applied to suspected blank contamination. The "U" flag is used to qualify any result that is detected in an environmental sample and associated blank at less than the PQL. For example, when any blank has a detection of the analyte that is below the PQL, and any associated field samples to that blank that also has detections of analytes below the PQL, then the samples are qualified as not detected at the PQL level. However, the data result is not censored by using the default PQL level and instead have the blank level reported in the sample qualified as not detected.
- UJ Estimated/Not detected. Analyses were performed for the compound or analyte, but it was not detected and the sample quantitation or detection limit is an estimated quantity due to poor accuracy or precision. This qualification is also used to flag possible false negative results in the case where low bias in the analytical system is indicated by low calibration response, surrogate, or another spike recovery.

#### Qualifier Descriptor Comments

- a: The analyte was found in the method blank.
- b: The surrogate spike recovery was outside control limits.
- c: The Matrix Spike and/or Matrix Spike Duplicate recoveries were outside control limits.
- d: The Laboratory Control Sample (LCS) recovery was outside control limits.
- e: A holding time violation occurred.
- f: The duplicate samples Relative Percent Difference (RPD) was outside the control limit.
- g: The datum met prescribed method criteria.
- h: The method requires a confirmation result, but none was performed.
- k: The analyte was found in a field blank.

- l: The second column confirmation result indicates the analyte was not confirmed.
- p: The result was qualified based on professional judgment.
- q: The analyte detection was below the Practical Quantitation Limit (PQL).
- r: The result is above the instrument's calibration range.
- t: The sample temperature was outside acceptance criteria.
- n: The laboratory case narrative indicated a QC problem.

## **1.0 Hexavalent Chromium by Method E218.6**

### **1.1 Method/Field Blanks**

The method blanks and field blanks reported no detections of target analytes above the detection limit. One method blank was extracted for each preparation batch. The method blanks were compliant with the analytical method.

### **1.2 Laboratory Control Samples**

The laboratory control sample (LCS) analysis showed the method required spiked analytes were recovered within control limits. One LCS was extracted for each preparation batch. The LCSs were compliant with the analytical method.

### **1.3 Holding Times**

All extraction and analysis holding times were in compliance.

### **1.4 Surrogate Recovery**

Surrogates do not apply to method E218.6

### **1.5 Spiked and Field Duplicate Compliance**

The matrix spike/matrix spike and field duplicate analyses were performed and found to follow the control limits.

### **1.6 Calibration Compliance**

The calibration of the analytical instrument met criteria.

### **1.7 Compound Identification**

All reported compound detections were identified by the correct retention time.

### **1.8 Analytical Method Compliance**

The Level II data review showed the data to be method compliant.

## **1.9 Conclusions**

Based on the results of this Level II Data Validation effort, it is concluded that the data for method E218.6 are usable as reported and qualified. The target analyte identifications are considered correct and reliable. The DQOs were satisfied as per the Work Plan and the data is usable for its intended purpose. The DQOs were satisfied as per the Work Plan and the data is usable for its intended purpose.

## **2.0 Total Chromium by Method SW6020**

### **2.1 Method/Field Blanks**

The method and field blanks showed no Chromium detections.

### **2.2 Laboratory Control Samples**

The laboratory control sample (LCS) analysis showed the method required spiked analytes were recovered within control limits. One LCS was extracted for each preparation batch. The LCSs were compliant with the analytical method.

### **2.3 Holding Times**

All extraction and analysis holding times were met.

### **2.4 Surrogate Recovery**

This method does not use surrogates.

### **2.5 Spiked and Field Duplicate Compliance**

The matrix spike/matrix spike duplicate analyses and field duplicates were performed and found to follow control limits.

### **2.6 Calibration Compliance**

The calibration of the analytical instrument met criteria.

### **2.7 Compound Identification**

Compound identification meet method guidelines.

### **2.8 Analytical Method Compliance**

The Level II data review showed the data to be method compliant.

## **2.9 Conclusions**

Based on the results of this Level II Data Validation effort, it is concluded that the data for method SW6020 are usable as reported and qualified. The target analyte identifications are considered correct and reliable. The DQOs were satisfied as per the Work Plan and the data is usable for its intended purpose.

### **3.0 Volatile Organic Compounds (VOCs) by Method SW8260B**

#### **3.1 Method/Field Blanks**

The method blanks and field blanks reported no detection of a target analyte. One method blank was extracted for each preparation batch.

#### **3.2 Laboratory Control Samples**

The laboratory control sample (LCS) analysis showed the method required spiked analytes were recovered within control limits. One LCS was extracted for each preparation batch. The LCSs were compliant with the analytical method.

#### **3.3 Holding Times**

All extraction and analysis holding times were met.

#### **3.4 Surrogate Recovery**

All surrogates were within limits.

#### **3.5 Spiked and Field Duplicate Compliance**

The matrix spike/matrix spike and field duplicate analyses were performed and found to comply with the control limit except as denoted below.

Sample B-1-CW33-18Q4's 1,1-DCE results was qualified as estimated for MS/MSD recovery below control limits and assigned a "J-" qualifier. The data is usable as estimated data.

#### **3.6 Calibration Compliance**

The calibration of the analytical instrument met criteria.

#### **3.7 Compound Identification**

All compounds were correctly identified.

#### **3.8 Analytical Method Compliance**

The Level II data review showed the data to be method compliant.

#### **3.9 Conclusions**

Based on the results of this Level II Data Validation effort, it is concluded that the data for method SW8260B are usable as reported and qualified. The target analyte identifications are considered correct and reliable. The DQOs were satisfied as per the Work Plan and the data is usable for its intended purpose.

#### **4.0 Low Level 1,2,3-Trichloropropane by Method SW8260B SIM**

##### **4.1 Method/Field Blanks**

The method blanks and field blanks reported no detection of a target analyte. One method blank was extracted for each preparation batch.

##### **4.2 Laboratory Control Samples**

The laboratory control sample (LCS) analysis showed the method required spiked analytes were recovered within control limits. One LCS was extracted for each preparation batch. The LCSs were compliant with the analytical method.

##### **4.3 Holding Times**

All extraction and analysis holding times were met.

##### **4.4 Surrogate Recovery**

All surrogates were within limits except as denoted below.

Sample B-1-CW34-N-18Q4 surrogate recovery was below the lower limit and the results was qualified as estimated. Since the results was not detected the applied qualified is "UJ".

##### **4.5 Spiked and Field Duplicate Compliance**

The matrix spike/matrix spike duplicate analyses and field duplicates were performed and found they followed the control limits.

Sample B-1-CW33-18Q4's 1,2,3-Trichloropropane results was qualified as estimated for MS/MSD recovery above control limits and assigned a "J+" qualifier. The data is usable as estimated data.

##### **4.6 Calibration Compliance**

The calibration of the analytical instrument met criteria.

##### **4.7 Compound Identification**

All compounds were correctly identified.

##### **4.8 Analytical Method Compliance**

The Level II data review showed the data to be method compliant.

##### **4.9 Conclusions**

Based on the results of this Level II Data Validation effort, it is concluded that the data for method SW8260B SIM are usable as reported and qualified. The target analyte identifications are considered correct and reliable. The DQOs were satisfied as per the Work Plan and the data is usable for its intended purpose.

## **5.0 Low level 1,4-Dioxane by Method SW8270C ID**

### **5.1 Method/Field Blanks**

The method blanks and field blanks reported no detection of a target analyte. One method blank was extracted for each preparation batch.

### **5.2 Laboratory Control Samples**

The laboratory control sample (LCS) analysis showed the method required spiked analytes were recovered within control limits. One LCS was extracted for each preparation batch. The LCSs were compliant with the analytical method.

### **5.3 Holding Times**

All extraction and analysis holding times were met.

### **5.4 Surrogate Recovery**

All surrogates were within limits.

### **5.5 Spiked and Field Duplicate Compliance**

The matrix spike/matrix spike duplicate analyses and field duplicates were performed and found there were no results outside control limits

### **5.6 Calibration Compliance**

The calibration of the analytical instrument met criteria.

### **5.7 Compound Identification**

All compounds were correctly identified.

### **5.8 Analytical Method Compliance**

The Level II data review showed the data to be method compliant.

### **5.9 Conclusions**

Based on the results of this Level II Data Validation effort, it is concluded that the data for method SW8270C ID are usable as reported and qualified. The target analyte identifications are considered correct and reliable. The DQOs were satisfied as per the Work Plan and the data is usable for its intended purpose.

### **Overall Conclusion**

Samples B-1-CW30-N-18Q4, B-1-CW31-N-18Q4, B-1-CW32-N-18Q4, B-1-CW33-N-18Q4, and B-1-CW34-N-1-18Q4 were examined and validated. All the samples are usable as stated and qualified.

# Appendix D

## Consolidated Groundwater Analytical Data Summary Table

---

Quarterly Groundwater Monitoring Report, Third Quarter 2018  
Former Lockheed Martin Plant B-1  
Burbank, California

## Validation Qualifier Definitions

- J- Estimated. The associated numerical value is an estimated quantity with a negative bias. The analyte was detected but the reported value may not be accurate or precise. The data are usable as estimated values.
- J+ Estimated. The associated numerical value is an estimated quantity with a positive bias. The analyte was detected but the reported value may not be accurate or precise. The data are usable as estimated values.
- J Estimated. The associated numerical value is an estimated quantity. It is not possible to assess the direction of the potential bias. The analyte was detected but the reported value may not be accurate or precise. The "J" qualification indicates the data fell outside the QC limits, but the exceedance was not sufficient to cause rejection of the data. The data the data are usable as estimated values.
- R Rejected. The data is unusable (the compound or analyte may or may not be present). Use of the "R" qualifier indicates a significant variance from functional guideline acceptance criteria. Either resampling or reanalysis is necessary to determine the presence or absence of the rejected analyte.
- U Not detected. Analyses were performed for the compound or analyte, but it was not detected. The "U" designation is also applied to suspected blank contamination. The "U" flag is used to qualify any result that is detected in an environmental sample and associated blank at less than the PQL. However, the data result is not censored by using the default PQL level.
- UJ Estimated/Not detected. Analyses were performed for the compound or analyte, but it was not detected and the sample quantitation or detection limit is an estimated quantity due to poor accuracy or precision. This qualification is also used to flag possible false negative results in the case where low bias in the analytical system is indicated by low calibration response, surrogate, or other spike recovery.

## Qualifier Comment Descriptors

- a: The analyte was found in the method blank.
- b: The surrogate spike recovery was outside control limits.
- c: The Matrix Spike and/or Matrix Spike Duplicate recoveries were outside control limits.
- d: The Laboratory Control Sample (LCS) recovery was outside control limits.
- e: A holding time violation occurred.

- f: The duplicate samples Relative Percent Difference (RPD) was outside the control limit.
- g: The datum met prescribed method criteria.
- h: The method requires a confirmation result, but none was performed..
- k: The analyte was found in a field blank.
- l: The second column confirmation result indicates the analyte was not confirmed.
- p: The result was qualified based on professional judgement.
- q: The analyte detection was below the Practical Quantitation Limit (PQL).
- r: The result is above the instrument's calibration range.
- t: The sample temperature was outside acceptance criteria.
- n: The laboratory case narrative indicated a QC problem.

APPENDIX G  
QUALIFICATIONS

DRAFT

Education:

BS Physics, University of California, Irvine  
BA Business Administration, University of California, Irvine

Training/Licenses/Registrations:

Radon Measurement Specialist, National Radon Safety Board # NRSB 12SS030  
Asbestos Building Inspector (AHERA)

Summary of Professional Experience:

Mr. McNeil has performed due diligence services on all commercial property types including but not limited to, multi-family, multi-tenant, single-tenant, retail shopping centers, industrial facilities, gasoline servicing stations, nursing/assisted living facilities and mobile home parks. He has performed thousands of Phase I Environmental Site Assessments (ESAs), Property Condition Assessments (PCAs), and Physical Needs Assessments (PNAs) in accordance with Fannie Mae, Freddie Mac, and HUD guidelines on multi-family housing, and in accordance with client specific scopes of work for all other commercial property types.

Select project experience for Mr. McNeil includes:

- Freddie Mac scope combination ESA/PCA, 140-unit multi-family, San Bernardino County, California
- Freddie Mac Small Balance Loan report, 66 Unit multi-family, Kern County, California
- Combination ESA/PCA, 585,147 square foot office complex, Orange County, California
- ESA, industrial facility, steel fabrication and machine shop, Los Angeles County, California
- ESA, 171,330 square foot research and development laboratory, Orange County, California
- ESA, 420-unit multifamily property, San Bernardino County, California
- PCA, 125,333 square foot retail shopping center, Los Angeles County, California
- PCA, 78,388 square foot medical office building, Los Angeles County, California
- PCA, 7,320 square foot office building, Honolulu, Hawaii

Mr. McNeil has over 35 years' experience in hazardous materials handling, storage, and transportation; over 30 years' experience in construction, remodeling, and renovation of residential and non-residential use properties; and over 20 years' experience in direct report preparation of commercial due diligence reports.

## Marsha Thompson – National Client Manger

---

B.S. – Bachelor of Science, Environmental Science, Barry University

Ms. Thompson has been in the environmental service and due diligence industry since 2007. Her AEI project management experience includes Phase I Environmental Site Assessments, Environmental Transaction Screens, Regulatory Database Reviews, Historical Records Reviews, and Limited Environmental Site Assessments. Ms. Thompson has successfully completed assessments on a variety of properties including: industrial, commercial, agricultural, residential, and vacant sites and has managed multi-site portfolios of properties spread across various states. Ms. Thompson is accustomed to the needs and requirements of a variety of reporting standards including Freddie Mac, Fannie Mae, and customized client formats.

Project experience for Ms. Thompson includes:

- Phase I Environmental Site Assessments
- Environmental Transaction Screens
- Regulatory Database Reviews
- Historical Records Reviews
- Limited Environmental Site Assessments
- Project coordination and setup

As a National Client Manager, Ms. Thompson provides in-house technical guidance and review to ensure all projects meet client's goals and scope expectations and develops an understanding of client's goals to facilitate the delivery of consulting to meet those needs.

PROJECT NO.:

SCALE: 1/32" = 1'-0"

SHEET NAME/NUMBER:

**AREA  
CALCULATIONS  
A-0.02**

**CONDITIONS PER PUBLIC WORKS TRAFFIC ENGINEERING SECTION**

No visual obstruction shall be erected or maintained above 3' high or below 10' high in a 5' by 5' visibility cut-off at intersection of street and driveway. [BMC 10-1-1303(C)]

Driveway apron shall be constructed per Burbank Standard Plan BS-102. Driveway slope and transition shall be constructed per Burbank Standard Plan BT-406.

All driveways and access road leading to parking areas shall be designed to accommodate turn path of Passenger Car (P) design vehicle per the AASHTO Greenbook with minimum 24' outer turning radius and 15' inner turning radius.

Parking spaces shall be constructed per BMC 10-1-1401, 10-1-1403, 10-1-1417, 10-1-1606.

Parking shall be arranged so that vehicles do not back onto major or secondary highway to exit from the parking area. [BMC 10-1-1403]

Parking spaces for residential use shall have a minimum width of 8'-6" and a minimum length of 18' per BMC 10-1-1401.

Access aisle width for standard spaces shall be per Burbank Standard Plan BT-401 as follows:

STANDARD SIZE AUTOMOBILE SPACES ADJOINING ACCESS AISLE	BASIC STALL WIDTH	ACCESS AISLE WIDTH
8'-6"	27'-4"	
8'-8"	26'-8"	
9'-0"	25'-4"	
9'-4"	24'-0"	

This project is anticipated to increase the volume of pedestrians that will cross Empire Avenue to access the transit stops near Niagara Street/Empire Avenue and Catalina Street/Empire Avenue. Developer shall install either a High Intensity Activated Crosswalk (HAWK) beacon or a conventional traffic control signal at the intersection of Empire Avenue and Catalina Street.

The HAWK beacon and traffic control signal are intended to

- 1) improve accessibility for the residents of the project to transit stop located on the north side of Empire Avenue and
- 2) reduce the chance of vehicle vs. pedestrian conflicts due to uncontrolled pedestrian crossing at the intersection. Developer shall provide documentation that the signal meets the one of the traffic control signal warrants per the 2014 California Manual on Traffic Control Devices Chapter 4C.

The HAWK beacon or traffic control signal shall meet the following requirements: All improvements shall be subject to the approval of the Public Works Director or his/her designee. Developer shall coordinate with the Public Works Department for the installation of a traffic control signal at the intersection.

Developer shall submit traffic signal installation and striping plans to the Public Works Department, for review and acceptance. These plans shall be submitted with a Public Work Excavation Permit application.

High-visibility crosswalks shall be installed at the intersection to provide a clear and accessible pedestrian path across Empire Avenue.

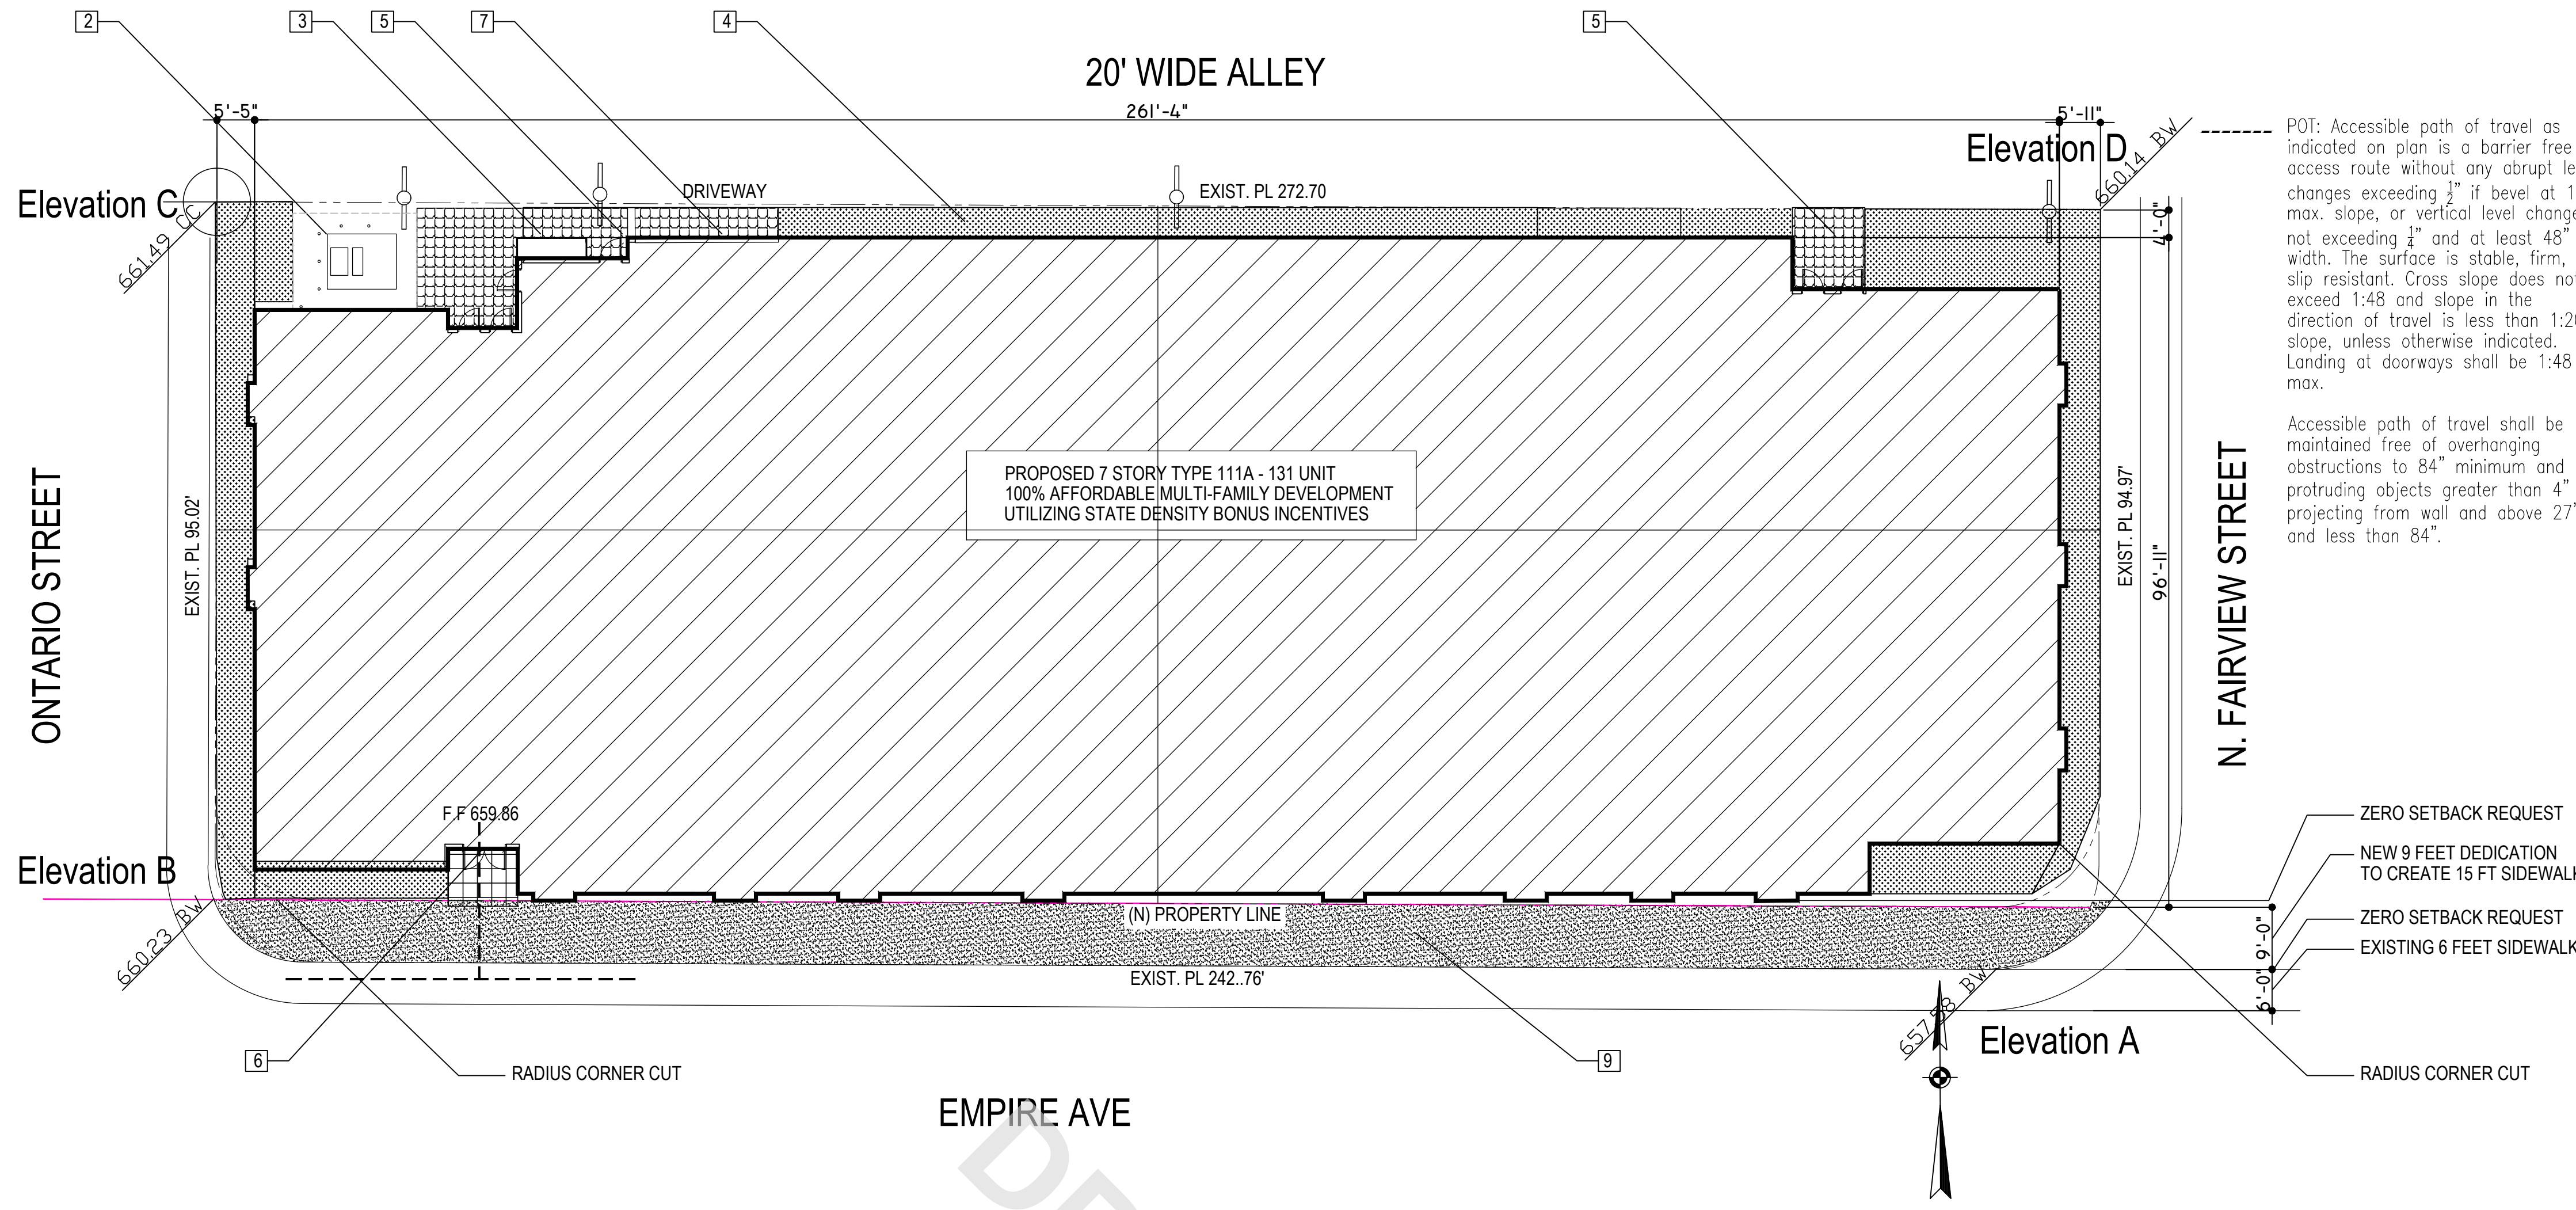

The crosswalks shall be installed per City of Burbank Standard Plan BT-409A-1. New ADA ramp(s) shall be installed at the intersection to provide accessible pedestrian path across Empire Avenue.

The HAWK beacon shall meet the requirements of Chapter 4F "Pedestrian Hybrid Beacons" of the 2014 California Manual on Uniform Traffic Control Devices.

The HAWK beacon or traffic control signal shall have Caltrans signal and safety lighting standards, 3-inch conduit, a Caltrans 332L controller cabinet, and a Myers USPA service cabinet.

The signing and striping shall be in accordance with 2014 California Manual on Uniform Traffic Control Devices.

Investigate the need to relocate transit stop on the south side of Empire at Empire/Catalina to Empire/Niagara to improve transit accessibility.

- 1 No fence proposed
- 2 Pad mounted transformer vault
- 3 Electrical switch gear
- 4 Landscape buffer per landscape plans
- 5 Permeable Pavers
- 6 5 feet recessed pedestrian entry with 1/4" thick tinted glazing
- 7 Construct new 20 feet wide driveway
- 8 Provide site lighting per electrical drawings. All lighting shall be arranged to prevent glare or direct illumination on adjoining properties and streets.
- 9 Construct sidewalk per City of Burbank standards

POT: Accessible path of travel as indicated on plan is a barrier free access route without any abrupt level changes exceeding 1/4" if bevel at 1:2 max. slope, or vertical level changes not exceeding 1/4" and at least 48" in width. The surface is stable, firm, and slip resistant. Cross slope does not exceed 1:48 and slope in the direction of travel is less than 1:20 slope, unless otherwise indicated. Landing at doorways shall be 1:48 max.

Accessible path of travel shall be maintained free of overhanging obstructions to 84" minimum and protruding objects greater than 4" projecting from wall and above 27" and less than 84".

Utility Poles: There are no Utility Poles on site. It is in the Alley 10-1-1602: CURB CUTS  
No vehicular access way shall be located nearer than 30 feet to the ultimate curb lines of an intersecting street, nor be provided with a curb cut of more than 18 feet in residential zones and 30 feet in other zones. The Public Works Director may permit a curb cut of not more than 38 feet in nonresidential zones if the adjacent parking area is provided with an internal circulation pattern requiring two (2)-way vehicular movement in the driveway. Curb cuts on the same lot shall be separated by at least 20 feet of uncut curb. In residential zones, each lot is limited to one curb cut for each 100 feet of street frontage along any one street except that lots with less than 100 feet of street frontage may provide one curb cut. Minor deviations from the foregoing standards may be authorized by the Public Works Director to accommodate the safe ingress and egress of vehicles.

Curb cut will be constructed per City of Burbank Standard plans

SHEET NAME/NUMBER:

**1ST & 2ND FLOOR PLAN**  
**A-2.1**

FIRST FLOOR PLAN

SECOND FLOOR PLAN

10-1-1417: PARKING LOT DESIGN STANDARDS  
A. All off-street parking areas and accessways shall be graded, paved, and marked as follows:  
1. All paved areas used for parking, loading, or vehicle circulation shall be designed consistent with accepted engineering principles for the largest type of anticipated vehicle loading in order to minimize future maintenance and safety hazards.  
2. Surfaces shall be paved with concrete or suitable asphaltic surfacing to prevent the emanation of dust.  
3. Surfaces shall be graded and drained in accordance with standards prescribed by the Public Works Director.  
4. Parking spaces and access lanes shall be clearly marked including the use of directional arrows when necessary to guide internal movements.  
B. The Public Works Director, Community Development Director, and/or the Planning Board may place special requirements on an individual site to reduce or increase the number, width, and location of driveways in order to reduce traffic hazards, decrease paved area, or mitigate on-street parking problems. The Public Works Director, Community Development Director, and/or the Planning Board may require that access, either primary or secondary, take advantage of existing public alleys.  
C. Parking and directional signs shall be provided in accordance with the Burbank Municipal Code or when required by the Public Works Director.  
D. Barriers shall be provided as follows:

1. Safety barriers, protective bumpers, or curbing and directional markers shall be provided to ensure pedestrian and vehicular safety and efficient utilization and protection of landscaping, and to prevent encroachment onto adjoining public or private property.  
2. Concrete curbs at least six inches high shall be installed to serve as wheelstops for cars next to streets, sidewalks, buildings, or other structures, and as protective edging for planting areas.  
E. All open space areas designed for active or passive recreation purposes shall be physically separated from parking areas and driveways in a fashion necessary to protect the safety of all pedestrians.  
F. Visibility of pedestrians, bicyclists, and motorists shall be ensured when entering individual parking spaces, when circulating within a parking facility, and when entering and exiting a parking facility.  
G. Internal circulation patterns and the location and traffic direction of all access drives shall be designed and maintained in accordance with accepted principles of traffic engineering and traffic safety. All vehicle movements involved in loading, parking, or turning around shall occur on-site.

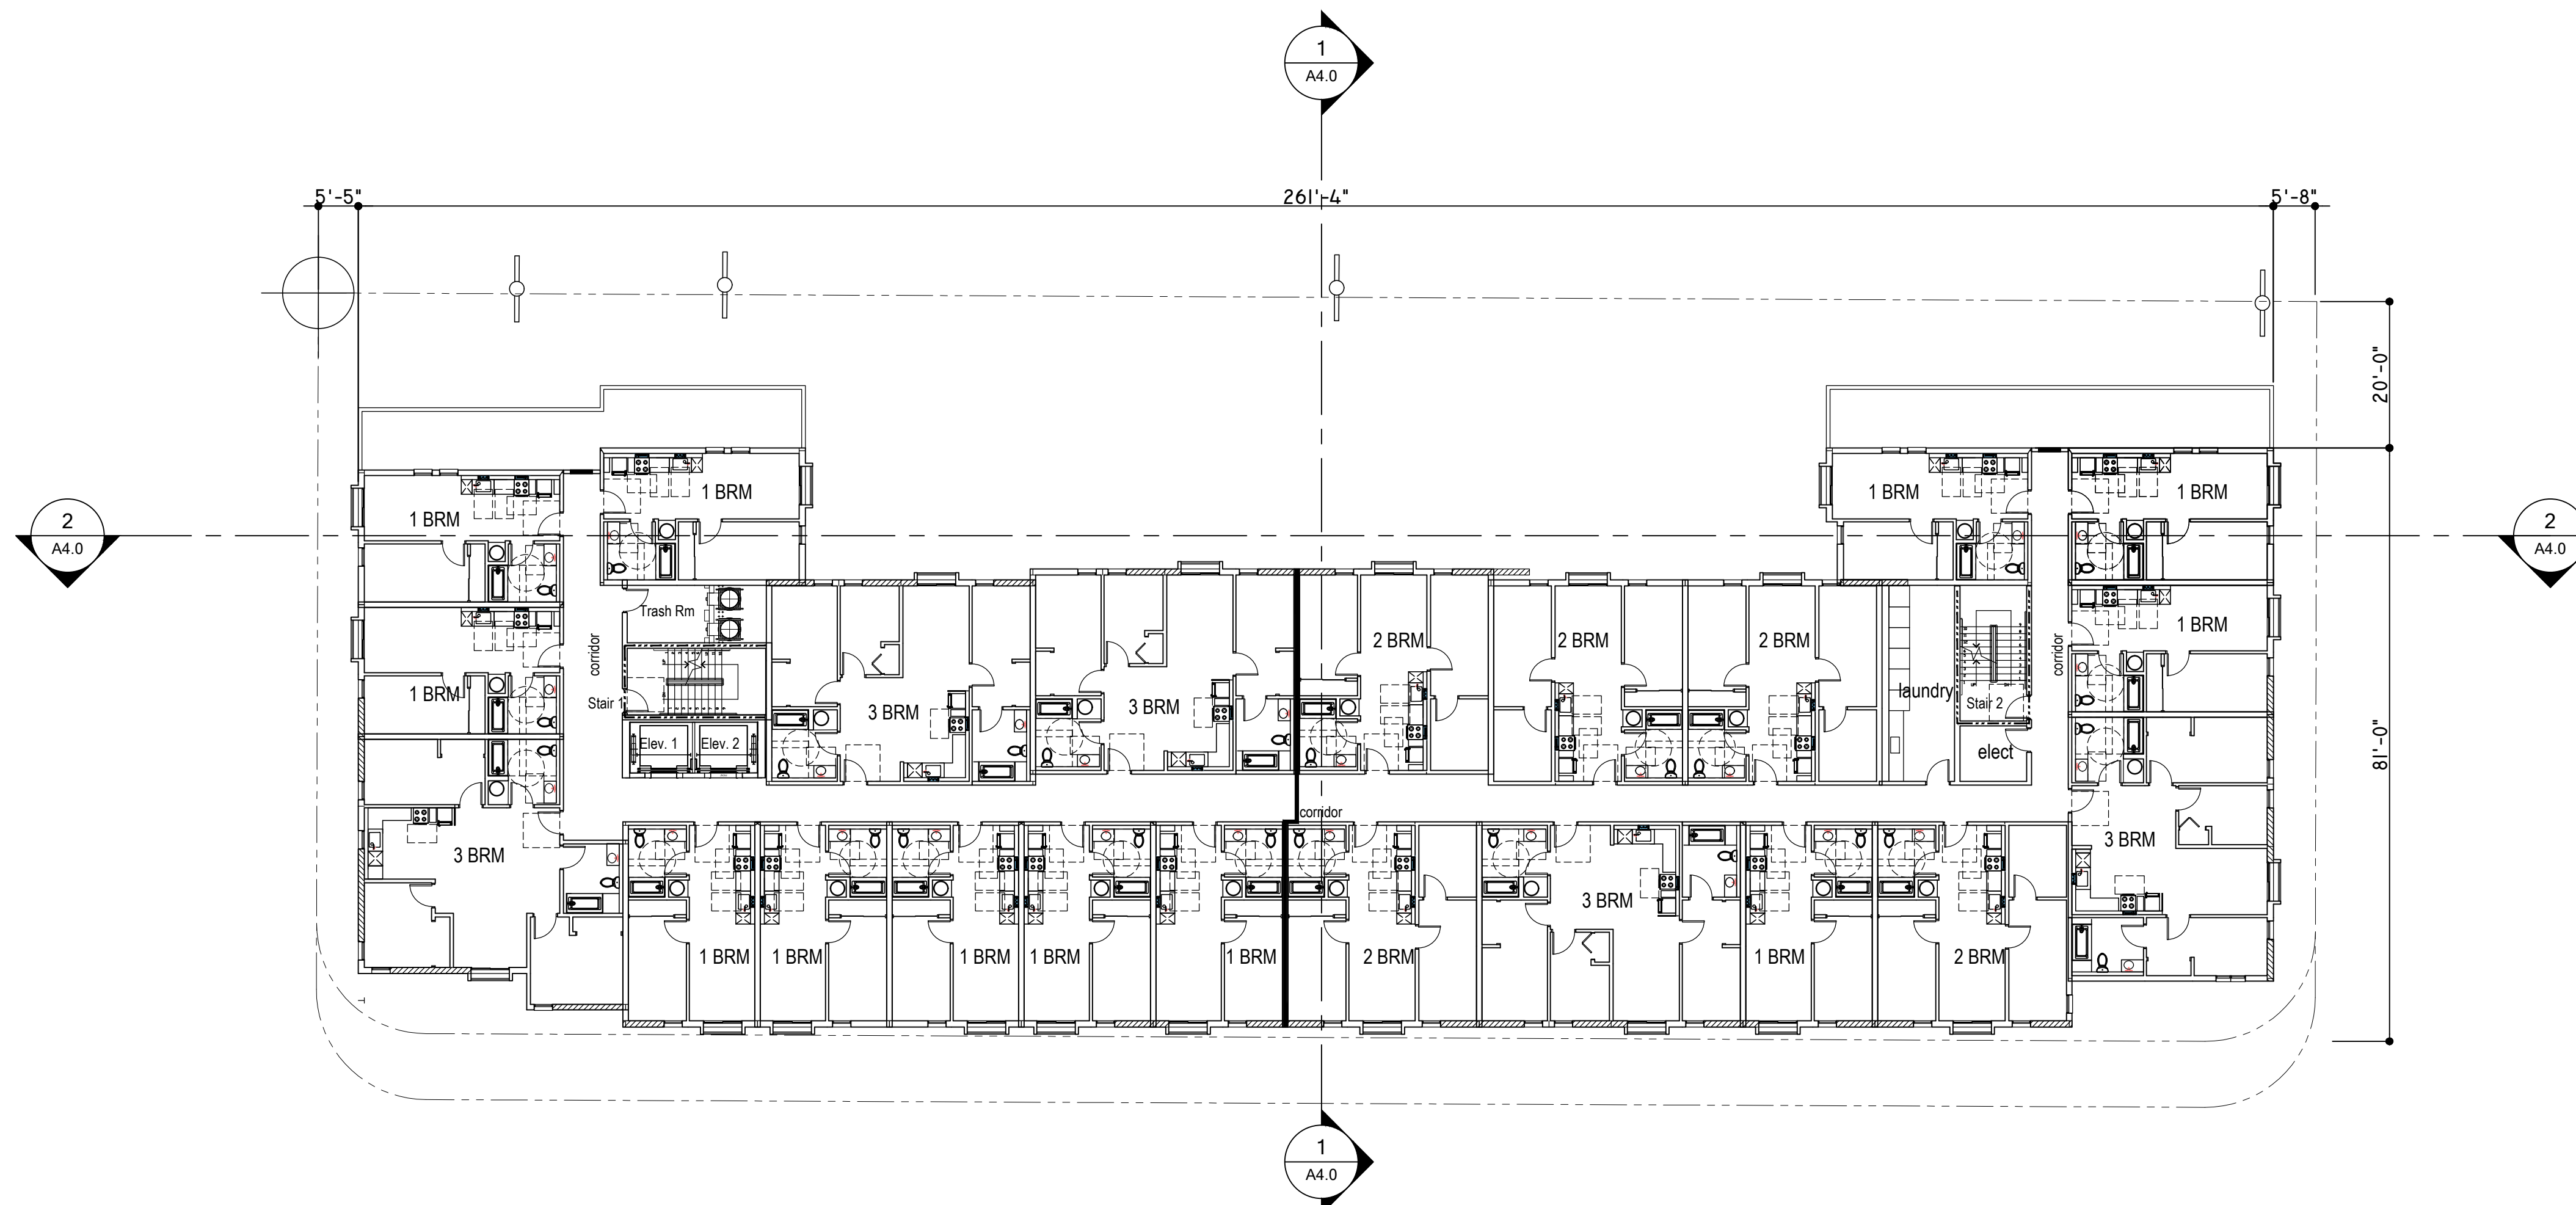

LIGHTING:  
A lighting and photometric plan that includes a lighting schedule for the proposed parking including the driveway area will be provided. Compliance with BMC Section 10-1-1420 will be included in the final Conditions of Approval for the Project.

POT: Accessible path of travel as indicated on plan is a barrier free access route without any abrupt level changes exceeding 1/4" if bevel at 1:2 max. slope, or vertical level changes not exceeding 1/4" and at least 48" in width. The surface is stable, firm, and slip resistant. Cross slope does not exceed 1:48 and slope in the direction of travel is less than 1:20 slope, unless otherwise indicated. Landing at doorways shall be 1:48 max.

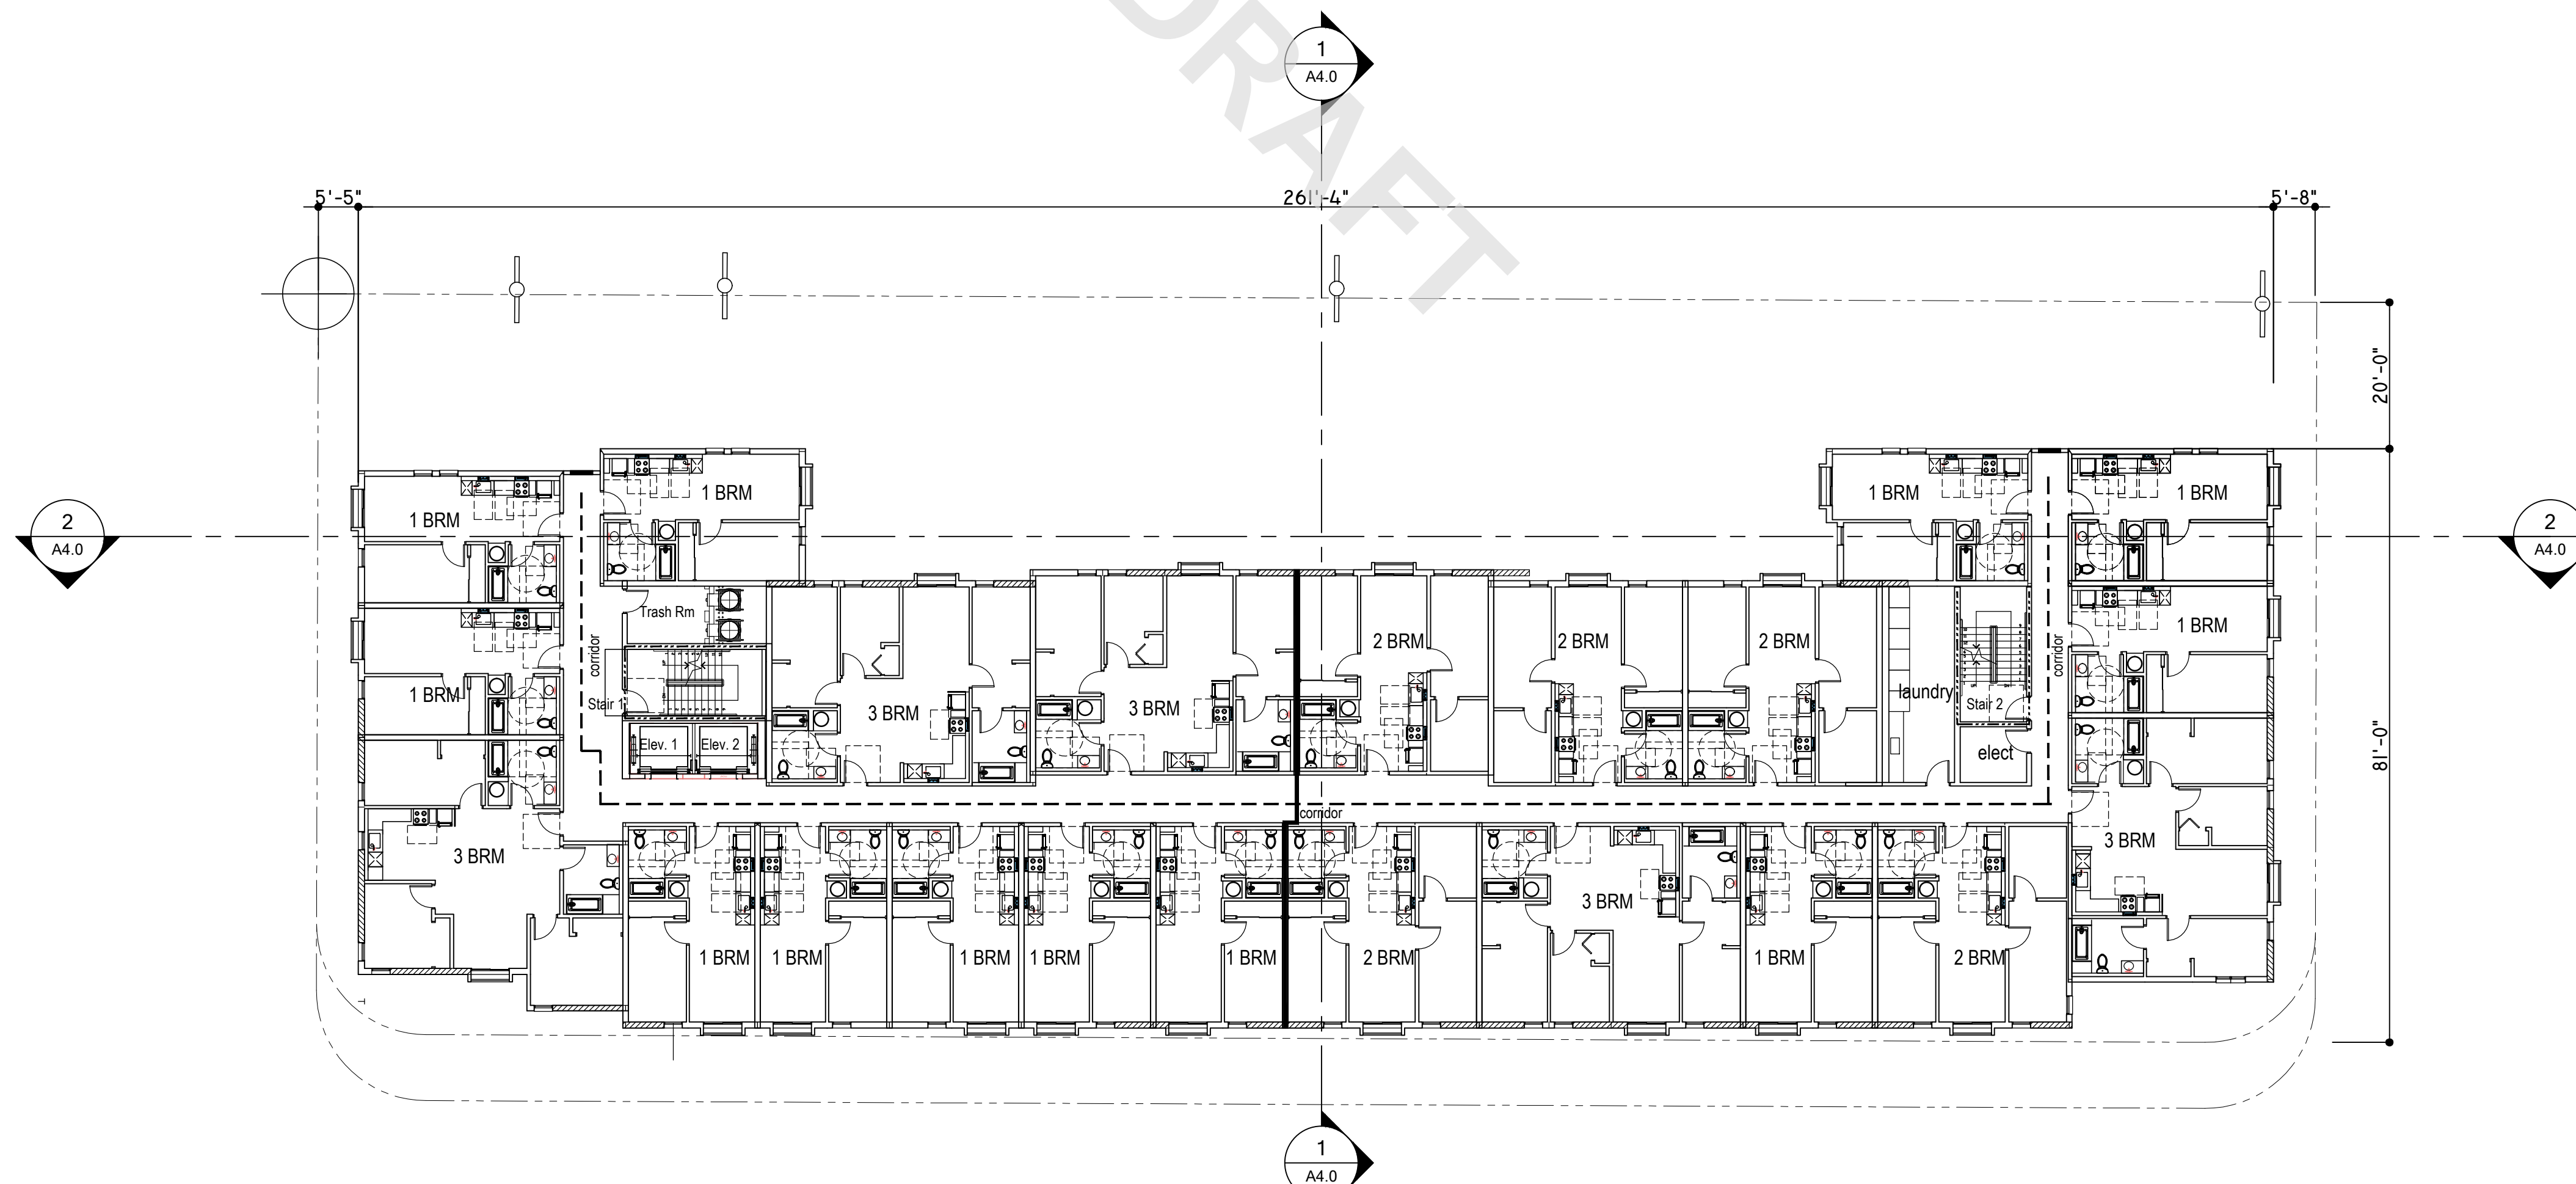

Accessible path of travel shall be maintained free of overhanging obstructions to 84" minimum and protruding objects greater than 4" projecting from wall and above 27" and less than 84".

Indicates 8"-2" minimum clear headroom to bottom of all obstructions including pipes, ducts etc.

## BUILDING SECTIONS A-4.0

BUILDING SECTION 1

BUILDING SECTION 2

- 1 Fiber Cement Base - Red Brown
  - 2 Horizontal metal panel - Dark Gray
  - 3 Stucco or fiber cement panel - off white/two tones
  - 4 Wood look fiber cement panels
  - 5 Metal mesh balcony railing
  - 6 Metal trellis with wood members
  - 7 Metal mesh security grille at opening - parking level
  - 8 Stucco or cement panel at privacy screen along alley
- 9 Provide site lighting per electrical drawings  
All lighting shall be arranged to prevent glare or direct illumination on adjoining properties and streets.

## MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

**Warning:** Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service  
Web Soil Survey URL:  
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Los Angeles County, California, Southeastern Part  
Survey Area Data: Version 9, Sep 1, 2022

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Apr 14, 2022—Apr 23, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

## Los Angeles County, California, Southeastern Part

### 1002—Urban land-Palmview-Tujunga complex, 0 to 5 percent slopes

#### Map Unit Setting

*National map unit symbol:* 2pt3t  
*Elevation:* 240 to 1,990 feet  
*Mean annual precipitation:* 15 to 30 inches  
*Mean annual air temperature:* 63 to 66 degrees F  
*Frost-free period:* 350 to 365 days  
*Farmland classification:* Prime farmland if irrigated

#### Map Unit Composition

*Urban land:* 45 percent  
*Palmview and similar soils:* 25 percent  
*Tujunga and similar soils:* 20 percent  
*Minor components:* 10 percent  
*Estimates are based on observations, descriptions, and transects of the mapunit.*

#### Description of Urban Land

##### Setting

*Landform:* Alluvial fans

##### Properties and qualities

*Slope:* 0 to 5 percent  
*Depth to restrictive feature:* 0 inches to manufactured layer  
*Runoff class:* Very high

##### Interpretive groups

*Land capability classification (irrigated):* None specified  
*Land capability classification (nonirrigated):* 8  
*Ecological site:* R019XG911CA - Loamy Fan  
*Hydric soil rating:* No

#### Description of Palmview

##### Setting

*Landform:* Alluvial fans  
*Landform position (three-dimensional):* Tread  
*Down-slope shape:* Linear  
*Across-slope shape:* Linear  
*Parent material:* Discontinuous human-transported material over alluvium derived from granite

##### Typical profile

*^A - 0 to 5 inches:* fine sandy loam  
*^Au - 5 to 15 inches:* fine sandy loam  
*2C1 - 15 to 45 inches:* fine sandy loam  
*2C2 - 45 to 55 inches:* fine sandy loam  
*2C3 - 55 to 79 inches:* fine sandy loam

### Properties and qualities

*Slope*: 0 to 5 percent  
*Depth to restrictive feature*: More than 80 inches  
*Drainage class*: Well drained  
*Runoff class*: Very low  
*Capacity of the most limiting layer to transmit water (Ksat)*: Moderately high to high (0.57 to 1.98 in/hr)  
*Depth to water table*: More than 80 inches  
*Frequency of flooding*: NoneRare  
*Frequency of ponding*: None  
*Maximum salinity*: Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)  
*Available water supply, 0 to 60 inches*: Moderate (about 8.4 inches)

### Interpretive groups

*Land capability classification (irrigated)*: None specified  
*Land capability classification (nonirrigated)*: 3e  
*Hydrologic Soil Group*: B  
*Ecological site*: R019XG911CA - Loamy Fan  
*Hydric soil rating*: No

### Description of Tujunga

#### Setting

*Landform*: Alluvial fans  
*Landform position (three-dimensional)*: Tread  
*Down-slope shape*: Linear  
*Across-slope shape*: Linear  
*Parent material*: Discontinuous human-transported material over alluvium derived from granite

#### Typical profile

*^Au - 0 to 6 inches*: sandy loam  
*2C1 - 6 to 35 inches*: loamy sand  
*2C2 - 35 to 72 inches*: loamy sand

### Properties and qualities

*Slope*: 0 to 5 percent  
*Depth to restrictive feature*: More than 80 inches  
*Drainage class*: Somewhat excessively drained  
*Runoff class*: Negligible  
*Capacity of the most limiting layer to transmit water (Ksat)*: High (1.98 to 5.95 in/hr)  
*Depth to water table*: More than 80 inches  
*Frequency of flooding*: NoneRare  
*Frequency of ponding*: None  
*Maximum salinity*: Nonsaline (0.0 to 1.0 mmhos/cm)  
*Available water supply, 0 to 60 inches*: Low (about 4.0 inches)

### Interpretive groups

*Land capability classification (irrigated)*: None specified  
*Land capability classification (nonirrigated)*: 3e

*Hydrologic Soil Group:* A  
*Ecological site:* R019XG911CA - Loamy Fan  
*Hydric soil rating:* No

### **Minor Components**

#### **Typic xerorthents, sandy substratum**

*Percent of map unit:* 5 percent  
*Landform:* Alluvial fans  
*Landform position (three-dimensional):* Tread  
*Down-slope shape:* Linear  
*Across-slope shape:* Linear  
*Hydric soil rating:* No

#### **San emigdio**

*Percent of map unit:* 5 percent  
*Landform:* Flood plains  
*Landform position (three-dimensional):* Tread  
*Down-slope shape:* Linear  
*Across-slope shape:* Linear  
*Hydric soil rating:* No

Patricia Sprouse  
Sierracin Corporation  
3020 Empire Avenue  
Burbank, CA 91504NO FURTHER REQUIREMENTS - SIERRACIN CORPORATION, 3020 EMPIRE AVENUE, BURBANK (FILE No. 104.0986)

We have received the report "Soil Gas Investigation" prepared by your consultant, Delta Environmental Consultants, Inc., dated April 11, 1996 (received April 19, 1996). This report presents results of a supplemental soil gas investigation conducted at the subject facility and is in general compliance with requirements in our letter of May 16, 1995. Upon review of the subject report, information contained in our files and other information, Board staff have the following comments with respect to the Well Investigation Program:

1. According to our records, the subject facility has been used for manufacturing metal fittings and seals for the aerospace industry since 1966. During an initial inspection on April 4, 1988, Board staff noted potential sources of liquid wastes on the subject site that may have impacted soil and ground water, including the chemical storage area. The subject facility was subsequently required to conduct subsurface assessment to determine if soil had been impacted by unregulated releases from on-site sources.
2. Laboratory analysis of soil matrix samples collected from a total of 11 soil boreholes drilled to a maximum depth of 73' bgs detected maximum concentrations of 890 ppb 1,1-DCE in a surface sample, 110,000  $\mu\text{g}/\text{kg}$  1,1,1-TCA in a surface sample (ND at 40' bgs), 18,000  $\mu\text{g}/\text{kg}$  PCE in a surface sample (ND  $\mu\text{g}/\text{kg}$  at 5' bgs), 36,000  $\mu\text{g}/\text{kg}$  TCE at 1' bgs (ND at 25' bgs), 6,300  $\mu\text{g}/\text{kg}$  Methylene Chloride at 10' bgs (ND at 15' bgs), 2,800  $\mu\text{g}/\text{kg}$  Toluene at 10' bgs (ND at 15' bgs), 650  $\mu\text{g}/\text{kg}$  Xylenes at 10' bgs (ND at 15' bgs), and 41,000  $\text{mg}/\text{kg}$  TPH in a surface sample (ND at 20' bgs). Reportedly, approximately 1' of the upper contaminated soil layer has been removed during subsequent construction. Ground water is estimated to be approximately 180' bgs.
3. The subject soil gas survey consisted of collecting and analyzing soil vapor samples from 8 soil gas probes that were advanced to a maximum depth of 35' bgs. Laboratory analysis of these soil vapor samples detected maximum concentrations of approximately 3  $\mu\text{g}/\text{l}$  PCE at 5' bgs (ND at 35' bgs), 3  $\mu\text{g}/\text{l}$

Ms. Patricia Sprouse  
Sierracin Corporation  
Page 2

1,1-DCA at 5' bgs (ND at 35' bgs), 3  $\mu\text{g}/\text{l}$  1,1-DCE at 35' bgs,  
and 105  $\mu\text{g}/\text{l}$  1,1,1-TCA at 5' bgs (7  $\mu\text{g}/\text{kg}$  at 35' bgs).

Based on the information submitted and our inspections, we have no further requirements with respect to the Well Investigation Program. The remaining hydrocarbon soil contamination is not a continuing threat to ground water quality and therefore cleanup is not required. However, some of the metal concentrations in the soil samples appear to be above allowable levels and may require additional assessment and cleanup. The Department of Toxic Substance Control (DTSC) should be contacted for more information concerning this issue.

The jurisdiction requirements of other agencies, such as the U.S. Environmental Protection Agency (USEPA), are not affected by the Board's "no further requirement" determination. Such agencies may choose to make their own determination concerning the site.

If you have any questions, please contact Walter Salas at (213) 266-7542, and address all correspondence to his attention.

DRAFT

# Executive Summary

This is the third combined Five-Year Review of the San Fernando Valley Area 1 Superfund Site located in North Hollywood and Burbank, Los Angeles County, California. The purpose of this Five-Year Review is to review information to determine if the remedy is and will continue to be protective of human health and the environment.

The San Fernando Valley Area 1 Site has two groundwater operable units, the North Hollywood Operable Unit and the Burbank Operable Unit, located within its boundaries. This Five-Year Review represents the sixth Five-Year Review for the North Hollywood Operable Unit and the fourth Five-Year Review for the Burbank Operable Unit. The triggering action for this statutory review is the previous Five-Year Review. The Five-Year Review is required due to the fact that hazardous substances, pollutants, or contaminants remain at the Site at levels above those that would allow for unlimited use and unrestricted exposure.

In September 2009, EPA selected the following interim remedy for the North Hollywood Operable Unit: construction of new extraction wells; modification/rehabilitation of several existing extraction wells; expanded treatment; chromium treatment for NHE-1, NHE-2 and two of the new extraction wells; 1,4-dioxane treatment for NHE-2; installation of additional monitoring wells; institutional controls; and, use of the treated water in Los Angeles Department of Water and Power's water supply system. EPA subsequently amended this remedy in 2014 via a Record of Decision Amendment to add reinjection as an end use, and in 2017 via a Memorandum to File to add more extraction wells targeting 1,4 dioxane contamination. EPA recently issued an Explanation of Significant Differences in February 2018, which increases the groundwater extraction rate by adding new extraction wells and expanding the treatment system to accommodate the higher flow from the new wells. EPA determined that increased groundwater extraction would be required to achieve containment. None of these remedy enhancements have yet been implemented.

For the Burbank Operable Unit, EPA's selected remedy in the June 1989 Record of Decision included: extraction of contaminated groundwater, treatment by stripping, and reuse of the water by the City of Burbank for drinking water. Subsequently, EPA signed two Explanation of Significant Differences: November 1990 and February 1997. The 1990 Explanation of Significant Differences included blending of the extracted and treated groundwater with a water supply lower in nitrate, reinjection of excess water, and a clarification that the interim remedy could be designed, constructed, and operated in phases. In the second Explanation of Significant Differences, EPA eliminated the reinjection requirement and suspended the extraction rate requirement when nitrate levels in the extracted groundwater exceed 50 milligrams per liter (mg/l) as nitrate. The City of Burbank committed to accept an annual average of 9,000 gallons per minute (gpm) from interim remedy facilities.

For the Burbank Operable Unit, the results of the data review and the 2015 capture analysis indicate the remedy functions as intended, by meeting the Remedial Action Objectives specified in the Record of Decision; however, the treatment system continued to operate below the interim Record of Decision specified extraction rate of 9,000 gpm. Capture of the contaminated plume is occurring, and the appropriate extraction rate is being evaluated in a new focused feasibility study. An interconnect with Los Angeles Department of Water and Power (LADWP) is under construction, which will provide enough capacity to discharge up to 9,000 gpm, the current capacity of the treatment system. A Focused Feasibility Study is currently underway to address emerging contaminants and to optimize the remedy.

The North Hollywood Operable Unit is not currently operating, and is therefore not achieving capture. EPA recently revised the remedy, and expects capture will be achieved when the revised remedy is implemented.

Exposure assumptions, toxicity data, and Remedial Action Objectives used at the time of remedy selection are still valid for both remedies. Applicable or relevant and appropriate requirements identified in the Record of Decision have not changed since the last Five-Year Review. Toxicity values for Site contaminants of concern have not changed. Risk assessment methodologies have not changed in a way that could affect the protectiveness of the remedy. There are no changes in exposure pathways. The combined remedial action objectives are still valid.

The remedy at the North Hollywood Operable Unit is currently protective of human health and the environment because there is no exposure to untreated groundwater. Despite the fact that the extraction and treatment system is not currently operating, the public is not exposed to untreated groundwater because LADWP is not extracting groundwater from the areas of high contaminant concentrations and governmental controls prevent other extraction of the groundwater. When the system was operational, the treatment system effluent contaminant concentrations were less than their regulatory cleanup goals. Once the new remedy is implemented, EPA expects that all Remedial Action Objectives will be achieved.

The remedy at the Burbank Operable Unit is currently protective of human health and the environment. The treatment system effluent contaminant concentrations are less than their regulatory cleanup goals and there are governmental controls in place that prevent exposure to untreated groundwater.

# 1. Introduction

The purpose of a Five-Year Review (FYR) is to evaluate the implementation and performance of a remedy in order to determine if the remedy will continue to be protective of human health and the environment. The methods, findings, and conclusions of reviews are documented in FYR reports. In addition, FYR reports identify any issues found and document recommendations to address them.

The U.S. Environmental Protection Agency (EPA) is preparing this FYR pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act Section 121, 40 Code of Federal Regulation (CFR) Section 300.430(f)(4)(ii) of the National Contingency Plan and EPA policy.

This is the third FYR for the San Fernando Valley (Area 1) Superfund Site (Site). The triggering action for this statutory review is the signing of the previous FYR on September 30, 2013. The FYR has been prepared due to the fact that hazardous substances, pollutants, or contaminants at the Site remain above levels that allow for unlimited use and unrestricted exposure.

The Site consists of two operable units<sup>1</sup> (OUs): the North Hollywood Operable Unit (NHOU) and the Burbank Operable Unit (BOU). Both will be addressed in this FYR. Volatile organic compound (VOC)-contaminated groundwater in the North Hollywood area is addressed for the NHOU. The VOC-contaminated groundwater plume in the Burbank area is addressed for the BOU.

Kelly Manheimer and Gary Riley, Remedial Project Managers from EPA, led the Site FYR. Alison Burcham (environmental engineer) and Jeffrey Weiss (hydrogeologist), from the U.S. Army Corps of Engineers (USACE), participated.

---

<sup>1</sup> During cleanup, a site can be divided into a number of distinct areas depending on its complexity. These areas, called operable units (OUs), may address geographic areas, specific problems, or media where a specific action is required.

## 1.1. Background

The San Fernando Valley Area 1 Superfund Site (SFV Area 1) consists primarily of two large plumes from multiple sources in the San Fernando Valley. Site contaminant sources include, but are not limited to, the former Bendix Aviation and Allied Signal-Aerospace Company facilities in North Hollywood (successor cooperation is now Honeywell International), the former Lockheed Martin Corporation facilities near the Burbank Airport, and many other known sources throughout Area 1. Trichloroethene (TCE) and tetrachloroethene (PCE) were widely used in the San Fernando Valley starting in the 1940s for dry cleaning and for degreasing machinery. Disposal was not well-regulated at that time, and releases from a large number of facilities throughout the eastern SFV Area 1 have resulted in the large plume of VOC-contaminated groundwater that starts in the Area 1 Site and extends southeast, down-gradient, through the San Fernando Valley Superfund, Area 2 Site and through the San Fernando Valley Superfund, Area 4 Site.

Further investigation to define other sources is ongoing. SFV Area 1 is in a populated urban area, and does not affect any environmentally sensitive areas.

## 1.2. Physical Characteristics

The Site is an area of VOC-contaminated groundwater that encompasses approximately 13 square miles beneath the Cities of North Hollywood and Burbank in the eastern San Fernando Valley, within the Upper Los Angeles River area.

The San Fernando Valley is a 122,800-acre alluvial basin in the south-central portion of the Transverse Ranges. The San Fernando Valley is bordered on the northeast by the San Gabriel Mountains with the Verdugo Mountains to the southeast, on the north and northwest by the Santa Susana Mountains, on the west by the Simi Hills, and on the south by the Santa Monica Mountains. Average annual precipitation in the San Fernando Valley is approximately 15 inches per year. However, during water years 2006 to 2007 and 2013 to 2014 (October 1 to September 30), precipitation was well below average, at less than 5 inches.

The two OUs located within the Site, North Hollywood Operable Unit (NHOU) and Burbank Operable Unit (BOU), each have a groundwater extraction and treatment system (Figure 2). The treatment facility for the NHOU is located west of Lankershim Boulevard in North Hollywood. There are eight extraction wells associated with the treatment system. The NHOU treatment facility is approximately 3.8 miles north of the Los Angeles River.

The treatment facility for the BOU is located southeast of the airport in Burbank. There are eight extraction wells associated with the BOU treatment facility located approximately half a mile north of the BOU. The BOU treatment facility is located approximately 3.5 miles north of the Los Angeles River.

Figure 1. Location Map for the San Fernando Valley (Area 1) Superfund Site

Figure 2. Location of Wells and Treatment Plants

### 1.3. Hydrology

Alluvial deposits in the San Fernando Basin contain groundwater. Geologic investigations at the Site have defined several hydrostratigraphic units within these alluvial deposits. The primary contaminated units at the Site are the Water Table aquifer and the B-zone aquifer. The Water Table aquifer is an unconfined aquifer within the coarse-grained sands and gravels present up to 350 feet below ground surface, and overlies a leaky aquitard consisting of interbedded sands, silts, and clays. Beneath the aquitard is the B-zone aquifer, which consists of coarse-grained sands and gravels from about 350 to 425 feet below ground surface. The depth to groundwater ranges from approximately 120 to 425 feet below ground surface.

**Table 2. Comparison of stratigraphic and hydrostratigraphic units in the SFV Area 1**

Approx. Depth (feet)	Geologic Age	JMM (1992) Zone Designation	ULARA Watermaster Units	Oberlander, et al. (1993) units	Depth Region	NHOU Hydrostratigraphic Units <sup>1</sup>
100	Holocene	Upper	A - eluvial sand, gravel, and rocks		1	A Zone (Water Table)
200			L - gravel			
300			K, J - fine grained	A' - coarse sands, gravel, cobbles		
300	Pleistocene	Middle	I - sand and brown clay	X - sand, silty sand, sandy silt, silty clay	2	B Zone
400			AA - sand and gravel	A - coarse sands, gravel, cobbles		
400		Lower	BB - sand, gravel, rocks	Y - sand, silty sand, sandy silt, silty clay	3	Deeper Units
500			E - clay and gravel, very hard clay	B - coarse sand, gravel, cobbles		
600			M - sand and gravel			
700	Blue Star - marker bed					
700	Q - brown clay, gravel, rocks					
800	Upper Pliocene	Deeper Units			4	
900						
1000						

Natural horizontal hydraulic gradients in the eastern San Fernando Valley generally run south and east, toward the Los Angeles River Narrows. However, extraction and production wells in the NHOU and BOU affect the gradient, and draw the flow of groundwater toward these wells. Figure 3 is a recent groundwater elevation map that shows the gradient in the Water Table aquifer within the BOU. Groundwater gradients in the SFV Area 1 were estimated during the Remedial Investigation to range from approximately 0.001 to 0.021. The 2016 Groundwater Elevation Memorandum (Tetra Tech, 2016) for the Burbank Operable Unit reported the groundwater gradient near the BOU extraction wells between 0.0023 and 0.0139.

Figure 3. Burbank Operable Unit Groundwater Elevations in the Water Table Aquifer

## 2. Remedial Actions Summary

### 2.1. *Basis for Taking Action*

The presence of TCE and PCE in Site groundwater, at concentrations above their respective maximum contaminant levels (MCLs), provided the basis for taking action. The risk is to human health from potential ingestion of drinking water. TCE and PCE are probable human carcinogens. Carbon tetrachloride, 1,2-Dichloroethane, and arsenic are also found in Site groundwater, and contribute to carcinogenic risk. The primary threat to human health is ingestion.

Groundwater is at least 120 feet below the ground surface, so contaminated groundwater does not interact with Site surface water. Thus, ecological risk posed by contaminants in groundwater is negligible.

### 2.2. *Remedy Selection*

#### 2.2.1. NHOU

EPA signed the first interim Record of Decision (ROD) for the NHOU in September 1987. The selected interim remedy addressed VOC-contaminated groundwater in the North Hollywood area. Due to the large area and complexity of the Site, EPA and the State of California split responsibility for cleanup, with EPA responsible for oversight of regional groundwater remediation and the State's Los Angeles Regional Water Quality Control Board responsible for source investigation and remediation. The cooperative agreement that formalized this arrangement is still active.

In the 1987 ROD, EPA selected groundwater extraction, treatment of VOCs by air stripping and disinfection with chlorine, and conveyance of the effluent to the North Hollywood Pumping Station Complex as the remedy. The effluent was then blended with water from the Los Angeles Aqueduct Filtration Plant, water purchased from the Metropolitan Water District, and groundwater from other Los Angeles Department of Water and Power (LADWP)-operated pumping fields in the vicinity of the NHOU prior to being served to consumers. VOCs in emissions from the air stripper are treated by vapor phase granular activated carbon (VPGAC) prior to discharge to the atmosphere.

EPA signed a second Interim Action ROD for the NHOU in September 2009. The Remedial Action Objectives (RAOs) are:

- Prevent exposure to contaminated groundwater above acceptable risk levels.
- Contain areas of groundwater with contaminant concentrations that exceed the MCLs and notification levels to the maximum extent practicable.
- Prevent further degradation of water quality at the Rinaldi-Toluca and North Hollywood West production wells fields by preventing the migration toward these well fields of the more highly contaminated areas of the VOC plume located to the east/southeast.

- Achieve improved hydraulic containment to inhibit horizontal and vertical contaminant migration in groundwater from the more highly contaminated areas and depths of the aquifer to the less-contaminated areas and depths of the aquifer, including the southeast portion of the NHOU in the vicinity of the Erwin and Whitnall production well fields.
- Remove contaminant mass from the aquifer.

The second interim remedy for the NHOU requires an extraction well network and above-ground treatment system to contain and remediate contaminated groundwater. The selected remedy includes extraction and treatment of contaminated groundwater at certain locations within the plume, expanded treatment for VOCs, and additional treatment for chromium and 1,4-dioxane. It also includes a groundwater management plan as an institutional control to ensure nearby water supply production well pumping does not negatively impact NHOU remedy performance. Components of the remedy include:

- Construction of new extraction wells.
- Modification/rehabilitation of several existing extraction wells.
- Expanded VOC treatment.
- Chromium treatment for extraction wells NHE-1, NHE-2, and two of the new extraction wells.
- Installation of additional monitoring wells.
- Institutional control (Groundwater management plan)
- Use of the treated water in LADWP's water supply system.

In 2014, EPA issued a ROD amendment allowing re-injection of treated water into the aquifer, in addition to delivering treated water to LADWP. EPA had concluded that re-injection of the treated groundwater might be necessary if LADWP and the NHOU potentially responsible parties are unable to reach an agreement that is acceptable to EPA regarding terms for delivery and acceptance of the treated water. This Amended Remedy ensures that EPA has the flexibility to design the most effective remedy and implement that remedy without significant delay. Although this ROD Amendment allows re-injection as an additional end-use option, it does not specify which end use will be implemented. Consequently, both the drinking water and the re-injection end uses are considered part of EPA's Preferred Alternative in the Amended Remedy.

In 2016, EPA determined that additional extraction wells were necessary to protect the North Hollywood West production wellfield from 1,4-dioxane contamination, and issued a Memorandum to File which clarified that these wells were part of the required remedy.

EPA subsequently issued an Explanation of Significant Differences (ESD) in February 2018, which expanded the amount of water extracted by the remedy. After reviewing additional groundwater data collected since 2009 and securing LADWP's and the City of Burbank's cooperation regarding its planned groundwater extraction rates and potential use of LADWP and Burbank extraction and conveyance infrastructure, EPA determined that increased groundwater extraction in the NHOU could practicably achieve greater containment than the remedy selected in the 2009 ROD. Requirements in the ESD include:

- Addition of new extraction wells.
- Diversion of four wells to the Burbank Operable Unit for treatment.
- Expansion of the NHOU treatment plant to accommodate the additional flow created by the new wells.

### 2.2.2. BOU

EPA signed the interim ROD for the BOU in June 1989. The selected interim remedy addressed the VOC-contaminated groundwater plume in the Burbank area. The two RAOs used to select the remedy are:

- To partially control the movement and spread of groundwater contaminants in the Burbank Operable Unit area, while contributing to aquifer restoration in the San Fernando Valley Basin Area 1 Superfund Site.
- To address the public health threat posed by contamination of the City of Burbank's public water supply wells by providing residents in the area with a water supply that meets state and federal drinking water standards.

The selected remedy includes extraction wells to pump groundwater to the treatment plant for VOC removal by air stripping followed by a liquid phase granular activated carbon (LPGAC) polishing step. The treated water is conveyed to the City of Burbank for municipal supply. The air stream is treated through VPGAC vessels prior to discharge to the atmosphere.

EPA signed an ESD in November 1990. The ESD concluded that, based on information suggesting high nitrate levels in the groundwater, additional measures were required to meet the MCLs for nitrate in the extracted and treated groundwater. EPA required blending of the extracted and treated groundwater with additional water from a water supply lower in nitrate, such that water served to the public would achieve the MCL. The resultant larger quantity of water raised the possibility that the City of Burbank would not have the capacity to accept the quantity of water produced. In the ESD, EPA required reinjection of excess treated water into the aquifer. Finally, the ESD clarified that the interim remedy could be designed, constructed, and operated in phases.

EPA signed a second ESD in February 1997. Based on additional study of the local groundwater system, an extraction rate of 9,000 gallons per minute (gpm) resulted in substantially the same level of groundwater containment as an extraction rate of 12,000 gpm (the rate called for in the 1989 ROD). Therefore, the interim remedy extraction rate was lowered to 9,000 gpm. EPA decided to eliminate the requirement for reinjection based on projections that the revised extraction rate would not produce excess water. In the second ESD, the City of Burbank committed to accepting an annual average of 9,000 gpm from the interim remedy facilities, contingent on water demand. Finally, EPA suspended the 9,000 gpm extraction rate requirement during times when nitrate levels in the extracted groundwater exceed 50 milligrams per liter. In these cases, the quantity of blend water required to meet the nitrate MCL could make extraction at 9,000 gpm infeasible.

## 2.3. *Remedy Implementation*

### 2.3.1. NHOU

Construction of the original NHOU treatment system was completed in March 1989 and operation commenced December 1989. The system consisted of eight groundwater extraction wells (NHE-1 through NHE-8), one air stripping tower to remove VOCs from the extracted groundwater, two vapor-phase granular activated carbon (VPGAC) adsorbers to remove VOCs from the air stream, and ancillary equipment. Each extraction well is approximately 300 feet deep (screened in NHOU Water Table aquifer) and has an approximate capacity of 300 gpm. Extraction well NHE-1 was never operated because of insufficient groundwater yield. A schematic of the NHOU groundwater treatment facility is shown in Figure 4.

Extracted groundwater fed through a 48-foot-tall packed air stripper (packing height of 22 feet) with a capacity of 2,000 gpm. After disinfection, treated groundwater was discharged into an LADWP blending facility where it combined with water from other sources before entering the LADWP municipal supply system. LADWP tests all treated water on a regular basis to ensure it meets all federal and state standards for drinking water. Both EPA and the State Division of Drinking Water oversaw treatment facility operations to ensure compliance with these standards.

This remedy was shut down in November 2017 due to declining water levels and maintenance issues, and will remain shut down until the new remedy can be designed and built.

**Figure 4. Schematic of NHOU groundwater treatment facility**

### 2.3.2. BOU

The treatment system for the BOU was completed in two phases. Construction of Phase I of the BOU treatment system occurred from 1993 to 1994, which included the installation of seven extraction wells capable of producing a combined flow of 6,000 gpm. Operation began in 1996. In Phase II, a new well was added to allow an increase in the groundwater extraction rate from 6,000 gpm to 9,000 gpm. The City's municipal supply well W-10 (also known as WP-180) was modified and incorporated into the interim remedy as BOU extraction well VO-8. Construction of Phase II of the BOU completed in December 1997 and operation commenced in 1998.

The treatment facility for the BOU is located southeast of Bob Hope Airport, and approximately 3.5 miles north of the Los Angeles River. There are eight extraction wells within a half-mile of the treatment facility, VO-1 through VO-8. Wells VO-1 to VO-7 are located north of the treatment plant in an east-west alignment. Well VO-8 is located between the treatment plant and the other wells.

Figure 5 shows a schematic diagram of the BOU groundwater treatment facility. A pipeline conveys the extracted groundwater to the BOU treatment system. The BOU air stripper treats contaminated groundwater and the air-stream then passes through a VPGAC system to remove VOCs prior to release to

the atmosphere. Treated groundwater (effluent from the LPGAC vessels) is then conveyed to the City of Burbank's Valley Forebay for distribution and storage, then to the blending facility. At the blending facility, the groundwater is blended with water from the Metropolitan Water District prior to distribution.

**Figure 5. Schematic of BOU Groundwater Treatment Facility**

### 2.3.3. Institutional Controls, for Both OUs

There are no specific institutional control instruments in place within Area 1, although there is an effective governmental control in place which prevents exposure to untreated contaminated groundwater. This governmental control is the 1979 Final Judgment in *Los Angeles v. San Fernando*, (Superior Court Case No. 65079)(LA v. San Fernando). The 1979 Final Judgment in *LA v. San Fernando* upheld the Pueblo Right of the City of Los Angeles to all groundwater in the ULARA Basin from precipitation within the ULARA and all surface and groundwater flows from the Symar and Verdugo Basins. 14 Cal. 3d 199 (1975). *LA v. San Fernando* also established the water rights of the cities of Los Angeles, Glendale, and Burbank to all water imported from outside the Basin and either spread or delivered within the Basin. With the exception of a few legacy entities including a few cemeteries and a hotel, only the cities that are party to the Judgment have the authority to extract groundwater from the basin.

The Final Judgment created the entity known as "Watermaster" with full authority to administer the adjudication, under the auspices of the Superior Court. Under the final judgment in *LA v. San Fernando*, with the exception of certain minor historical water rights holders, only the cities of Los Angeles, Burbank, and Glendale are permitted to extract groundwater from the Basin. Each of these municipalities administers a public water system, which is regulated by the California State Water Resources Control Board, Division of Drinking Water.

Additional governmental controls on the use of groundwater as drinking water include EPA and State of California-promulgated MCLs and California State Action Levels that require drinking water standards to be met before delivery of the treated water to the potable water supply. These drinking water controls and the Watermaster's authority to regulate and allocate water resources eliminate unregulated use of area groundwater; therefore, the interim remedies are currently protective of human health.

## 2.4. Operation and Maintenance (O&M)

### 2.4.1. NHOU

LADWP has been conducting long-term operations and maintenance of the NHOU extraction and treatment system in accordance with the EPA-approved 1988 O&M plan, and the 2003 preventative maintenance schedule. LADWP provided quarterly reports to EPA detailing the operations and maintenance of the NHOU, and to the California State Water Resources Control Board, Division of Drinking Water on the quality of the water delivered from the system. As of November 2017, the extraction wells ceased to provide sufficient water for the treatment plant to operate, so the system was shut down.

### 2.4.2. BOU

The City of Burbank conducts long-term operations and maintenance activities for the BOU according to the O&M plan provided to EPA in 1998. EPA received a revised Operational Sampling Plan in 2017. This plan presents a treatment plant monitoring program that provides the data necessary to evaluate if the treatment plant is operating within permit conditions. The wider groundwater monitoring program intended to evaluate the near-field and far-field effects of the BOU extraction well field is conducted by the responsible party. The four primary objectives of the long-term groundwater monitoring program are:

- Verify containment of the 5 micrograms per liter ( $\mu\text{g/L}$ ) tetrachloroethene (PCE) and 100  $\mu\text{g/L}$  trichloroethene (TCE) plumes in groundwater.
- Collect sufficient data to evaluate groundwater extraction system performance with respect to mass removal.
- Characterize the nature and extent of emerging compounds.
- Characterize the nature and extent of the primary chemicals of concern (PCE and TCE) to refine and update the conceptual site model.

## 3. Progress Since the Last Five-Year Review

### 3.1. Previous Five-Year Review Protectiveness Statement and Issues

The protectiveness statement from the 2013 FYR for the San Fernando Valley Area 1 Site stated:

*The remedy at the NHOU is currently protective of human health and the environment because there is no exposure to untreated groundwater. The treatment system effluent contaminant concentrations are less than their regulatory cleanup goals and there are governmental controls in place that prevent exposure to untreated groundwater. However, to be protective in the long term, the existing treatment facility needs to be modified consistent with the remedy selected in the 2009 ROD, and chromium and 1,4 dioxane impacts to the remedy need to be addressed. The implementation of the selected remedy is in the design phase.*

*The remedy at the BOU is currently protective of human health and the environment because there is no exposure to untreated groundwater. Their treatment system effluent contaminant concentrations are less than their regulatory cleanup goals and there are governmental controls in place that prevent exposure to untreated groundwater. There is uncertainty as to whether containment capture is being achieved since the BOU pumps at rates less than those prescribed in the 1997 ESD. In order to make a containment determination the facility must operate at an average annual rate of 9,000 gpm, or BOU parties must demonstrate that containment can be achieved at lower pumping rates.*

The 2013 FYR included three issues and recommendations. Each recommendation and the current status is discussed below.

**Table 3. Status of Recommendations from the 2013 FYR**

<b>Operable Unit</b>	<b>Issue</b>	<b>Recommendations</b>	<b>Current Status</b>	<b>Current Implementation Status Description</b>	<b>Completion Date (if applicable)</b>
BOU	According to the 1997 ESD, the City of Burbank is committed to accepting an annual average of 9,000 gpm of water from treatment facility, yet the annual extraction for the BOU is consistently less than 9,000 gpm, at average annual rates at or near 6,500 gpm.	A formal evaluation of pumping rates and contaminant capture should be conducted and presented to EPA if pumping rates less than 9,000 gpm is to be used to meet BOU ROD and ESD objectives.	Completed	Lockheed Martin completed a technical memorandum in 2015. EPA responded to the evaluation on August 9, 2016.	8/9/2016
NHOU	The Second Interim Remedy (2009) for the NHOU does not explicitly address treatment of chromium in well NHE-3. Well NHE-3 remains off-line pending an evaluation on how to best address chromium as part of the remedial design.	Address chromium contamination in well NH-3, and additional wells as needed.	Ongoing	Chromium treatment for NHE-3 was added in the 2018 ESD. The new system is currently in design, and there are agreements in place with the PRPs to construct the remedy once design is completed.	
NHOU	The notification level for 1, 4-dioxane has been exceeded at least once in all of the operating NHOU wells.	Sample the influent and effluent of the NHOU plant for 1, 4-dioxane and take appropriate actions to keep concentrations below the notification level.	Ongoing	The 2009 ROD addresses 1,4 dioxane, and treatment will be included in the new system. In addition, the 2016 Memo to File adds new wells to protect the NH West wellfield from 1,4 dioxane contamination.	

### 3.2. Work Completed at the Site During this Five-Year Review Period

#### 3.2.1. NHOU

During this five-year review period, EPA issued an Explanation of Significant Differences in February 2018 to expand the treatment plant, add additional wells and to divert extracted water from four wells to the Burbank Operable Unit treatment plant. A Memorandum to the File confirmed the need for additional extraction wells to protect the North Hollywood West wellfield from 1,4 dioxane contamination.

In addition, design of the new system is approximately 60% complete. Construction of three new extraction wells has been completed, and construction of the treatment system is expected to be

completed within the next two years. Administrative orders are in place with the potentially responsible parties to complete design, construct and operate the interim extraction and treatment system.

As noted previously, on November 13, 2017, LADWP ceased all operation and maintenance activities in the NHOU First Interim Remedy. When the extraction wells and treatment system operated, the treatment system had significant maintenance issues. These issues are being considered and addressed in the new remedy design.

### 3.2.2. BOU

Since the completion of the last FYR, Lockheed Martin's contractor, Tetra Tech, completed a capture analysis and associated technical memorandum. Further details about this analysis are in the Data Review section. The City of Burbank updated the conference building and storage buildings at the treatment plant in the last five years, and switched the method for storing contaminants removed from the treatment system to allow for more simplified transportation. They are still configuring the final method for storing contaminants awaiting pickup.

In 2018, Lockheed Martin, under EPA oversight, started a Focused Feasibility Study to assess the current nature and extent of contaminants from the 1989 ROD and emerging contaminants identified since that time. The Focused Feasibility Study will evaluate the impact of emerging contaminants and optimize the remedy. The Focused Feasibility Study will also consider the diversion of four wells from the NHOU to the BOU treatment plant.

## 4. Five-Year Review Process

### 4.1. *Community Notification, Involvement and Site Interviews*

On June 27, 2018, a public notice was published in the *Los Angeles Daily News* announcing the commencement of the Five-Year Review process for the San Fernando Valley Area 2 Site, providing contact information for EPA's Remedial Project Managers, Kelly Manheimer and Gary Riley, and inviting community participation. The Five-Year Review report will be made available to the public once it has been finalized. Copies of this document will be placed in the designated public repositories: City of Glendale Public Library, 222 East Harvard St. Glendale, CA or call (818) 548-2021 and Los Angeles Public Library, 630 W. Fifth St., Los Angeles CA 90071 or call (213) 228-7000.

During the FYR process, interviews were conducted to document any perceived problems or successes with the remedy that has been implemented to date. The results of these interviews are summarized below.

During the site visit of the NHOU treatment plant, plant operators, maintenance personnel, and engineers from LADWP were interviewed. Because the treatment plant and extraction wells are not currently operational, most of the discussion focused on the planned upgrades to the system. The plant operators

felt the treatment system was effective when operational, and have relayed operational issues to EPA and other entities in a timely manner.

During the site visit to the BOU treatment plant, plant operators and maintenance personnel from Terranear PMC were interviewed. Overall, the treatment plant and remedy was working well. Within the past five years, two technical memorandums (Tetra Tech 2015 and Tetra Tech 2016) addressing the effectiveness of the capture zone were prepared. The interviewees feel these memorandums address the previous questions regarding the capture zone. Currently, the BOU plant cannot pump at capacity because they do not have sufficient demand in the City of Burbank water system for all of the treated water. However, a new interconnect is being installed between Burbank Water and Power and LADWP conveyance pipelines which will allow the Burbank Water and Power to provide water to LADWP.

Refer to Appendixes F and G for more details from the site inspections and interviews conducted during the site inspections.

## 4.2. Data Review

Data collected during the past five years were used to evaluate if the interim remedies at NHOU and BOU are meeting the RAOs and remain protective of human health and the environment. Data reviewed for this FYR included groundwater quality data from monitoring and extraction wells and groundwater elevation data from wells within SFV Area 1. The groundwater quality data included plume maps, annual monitoring reports, and monthly groundwater quality reports from the NHOU treatment plants. The groundwater elevation data was obtained from a capture zone study completed by Lockheed Martin within the Burbank Operable Unit and annual monitoring reports for the Burbank Operable Unit.

The data review focuses on how the data relates to the current remedy, which includes hydraulic capture, prevention of further groundwater degradation, and contaminant mass removal.

### 4.2.1. NHOU

During the past five years, groundwater extraction and treatment within the NHOU has removed contaminant mass and attained partial hydraulic capture through the use of six North Hollywood East (NHE) extraction wells. Mass removal was estimated using the influent PCE and TCE concentrations from the extraction wells and volume of water extracted. Containment of groundwater with concentrations that exceed the MCLs was evaluated by comparing plume maps from 2014 and 2017 and evaluating PCE and TCE trends at select wells during the past five years. The sections below discuss how data from this review period supports the question of whether RAOs are achievable in a reasonable timeframe. Appendix B includes data and trend analysis used for the evaluation.

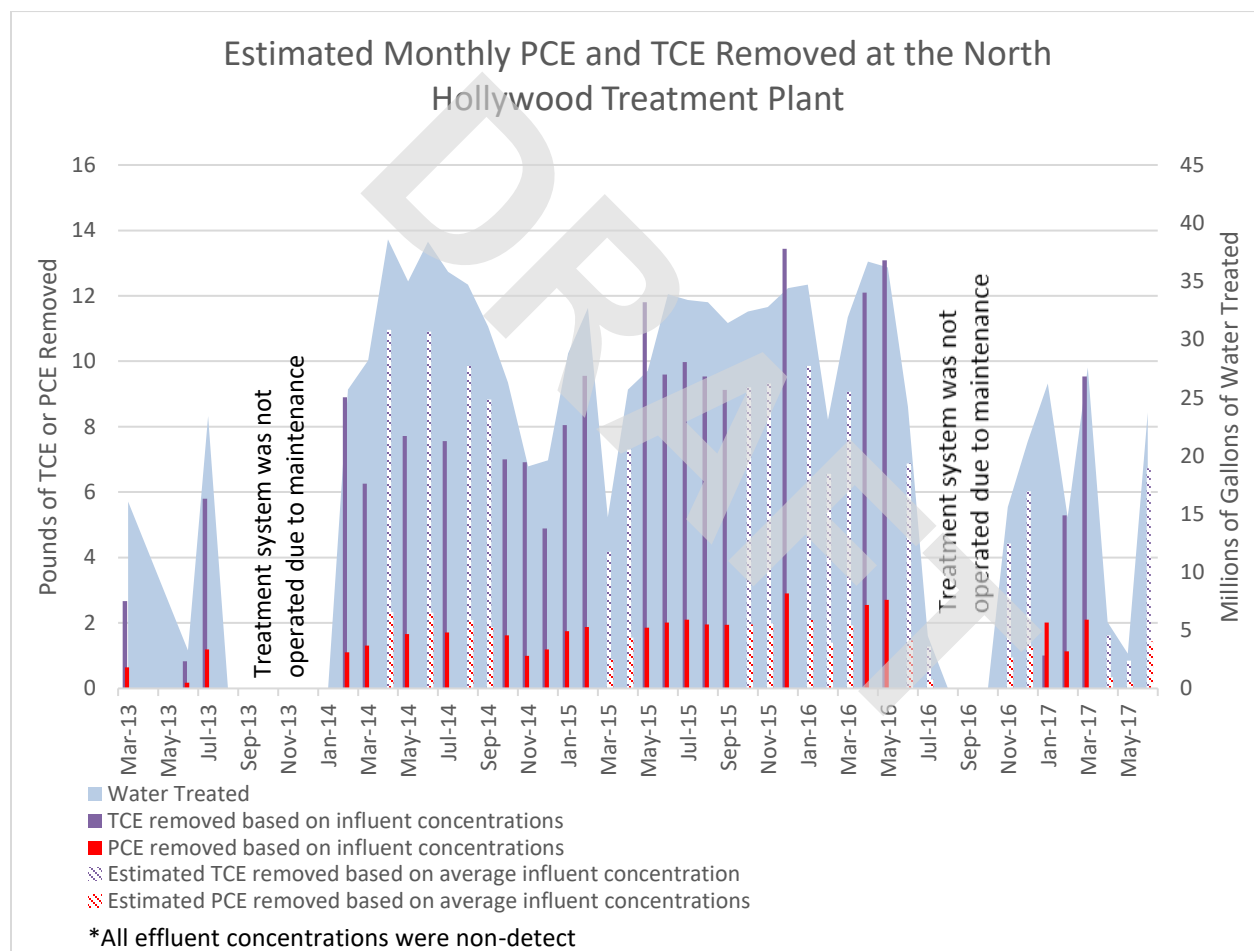

### 4.2.2. NHOU Contaminant Mass Removal

Groundwater extraction and treatment within the NHOU has contributed to contaminant mass removal of VOCs, including PCE and TCE, during the past five years. Groundwater was extracted from six wells<sup>2</sup> in

---

<sup>2</sup> NHE-1 and NHE-5 are not used due to declining groundwater levels.

the North Hollywood East well field, including NHE-2, 3, 4, 6, 7 and 8. Groundwater from NHE-4, 6, 7 and 8 was treated at the North Hollywood Treatment Plant and delivered to the public water supply and groundwater from NHE-2 and NHE-3<sup>3</sup> was discharged to the sanitary sewer due to elevated chromium concentrations. Figure 8 presents the total volume of water treated each month at the North Hollywood Treatment Plant and the estimated mass of PCE and TCE removed each month. Between March 2013 and June 2017, approximately 1.069 billion gallons of groundwater was treated for VOCs at the North Hollywood Treatment Plant and it was estimated that approximately 305 pounds of TCE and 65 pounds of PCE were removed from the treated water.

Estimated TCE/PCE removal was calculated by multiplying the average influent PCE and TCE concentrations for the past five years by the monthly volume of groundwater treated for the months where influent concentrations were not provided in the quarterly reports.

**Figure 8. Estimated Mass of TCE and PCE Removed at North Hollywood Treatment Plant**

<sup>3</sup> NHE-2 and NHE-3 are operated by Honeywell and the volume of water extracted was not available when preparing this report.

### 4.2.3. NHOU Hydraulic Containment

A remedial action objective identified for the remedy in the 1997 ROD was to contain high-concentration areas of contaminated groundwater to the maximum extent practicable. The ROD specifically highlighted two areas in the NHOU where the remedy should prevent plume migration: the Rinaldi-Toluca and North Hollywood West production wells fields, and the Erwin and Whitnall production well fields. Hydraulic containment had not been achieved prior to the current five-year review period. Comparison of TCE and PCE plumes from 2014 and 2017 in Figures 8 and 9 indicate the North Hollywood West and Rinaldi-Toluca well fields continue to be impacted by the contaminant plume.

Figure 9. TCE Groundwater Plume above MCL

**Figure 10. PCE Groundwater Plume above MCL**

The contaminant plume for TCE and PCE had migrated into the Rinaldi-Toluca and North Hollywood West well fields prior to 2013. Prior to 2013, monitoring wells located near these well fields that contained TCE and PCE in excess of the 5 micrograms per liter ( $\mu\text{g/L}$ ) MCL include RT-MW-04, RT-MW-06, NH-MW-06 and NH-MW-11. Within this area, it appears that the maximum concentrations of TCE and PCE may have peaked in 2015 at concentrations of 260  $\mu\text{g/L}$  and 140  $\mu\text{g/L}$  respectively. Since the completion of the previous FYR, the TCE and PCE concentration trends have been stable or decreasing in this area.

**Table 4. Concentrations at the Rinaldi-Toluca and North Hollywood West well fields**

Well ID	Date	PCE (µg/L)	TCE (µg/L)
NH-MW-06	5/15/2014	72	98
	12/16/2015	140	290
	12/1/2016	46.1	127
	8/10/2017	27.4	106
	9/14/2017	23.5	93.9
	Mann-Kendall	Decreasing	Stable
NH-MW-11	5/28/2014	52	32
	10/14/2015	17.3	170
	11/15/2016	35.6	104
	8/31/2017	5.3	10.6
	Mann-Kendall	Stable	Stable
RT-MW-06	6/25/2014	1.8	0.43
	10/18/2016	26.4	38.3
	7/25/2017	2.77	7.65
RT-MW-04	7/18/2014	3.1	2.9
	12/8/2015	1.45	3.09
	10/11/2016	0.718	2.45
	6/15/2017	1.11	24.5
	Mann-Kendall	Stable	No-Trend

Contaminant concentrations have not significantly increased near Whitnall production well field in the southeast corner of the NHOU, and remain below their MCL of 5 µg/L. Mann-Kendall trend analysis of the data from NH-C02, located east of the Whitnall Well Field in the southern portion of the NHOU, during the past five years indicates that contaminant concentrations are stable and below the MCL. The Erwin production well field has not been impacted.

**Table 5. PCE and TCE Concentrations at NHOU near the Whitnall production well fields**

Well ID	Date	PCE (µg/L)	TCE (µg/L)
NH-CO2	4/10/2012	2.5	3.1
	10/12/2012	2.9	2.5
	4/11/2014	0.5	0.089
	4/26/2017	0.39	1
	Mann-Kendall	Stable	Stable

Chromium, 1,4-dioxane, 1,2,3-trichloropropane, and nitrate concentrations above their respective MCL do not extend beyond the PCE and TCE plumes. Therefore, conclusions regarding hydraulic capture for PCE and TCE also apply to other contaminants of concern at the Site. Groundwater contamination continues to impact nearby production well fields and extend beyond the boundary of San Fernando Valley Area 1. Additional extraction wells and increased pumping required in the ESD will likely improve the hydraulic containment and prevent further degradation of the aquifer.

#### 4.2.4. BOU

Concentrations of TCE and PCE are declining, hydraulic capture is minimizing groundwater contamination from migrating beyond the BOU, and contaminant mass is being removed. These conclusions were reached after a review of the 2015 capture zone study, an evaluation of groundwater contamination via Mann-Kendall analysis, and the estimation of VOC mass removal from groundwater. The data analysis focused on TCE and PCE, since they are the primary contaminants of concern.

A Mann-Kendall analysis was completed by Tetra Tech using groundwater data from 1996 to 2017, which led to the conclusion that PCE and TCE concentrations at the Site are declining, as presented in the 2017 Annual Groundwater Monitoring Report (Tetra Tech 2017).

USACE also completed Mann-Kendall analysis for select wells, which focused on data from the past five years. The Mann-Kendall analysis<sup>4</sup> using groundwater data from 1996 to 2017 indicates PCE concentrations are declining at all 20 wells within the Water Table Aquifer, and at 7 of the 10 wells within the B-zone aquifer. Wells with increasing PCE concentrations were located between an extraction well and higher contaminant concentration areas, indicating that the extraction wells are pulling contaminant mass towards the extraction wells. It is expected that monitoring wells close to the extraction wells may show a temporary increase in concentration. A similar pattern was observed when analyzing the TCE concentrations from the 39 wells in Water Table aquifer and B-zone aquifer. Of these 39 wells, only two had increasing trends.

Only contaminant trends for PCE and TCE were analyzed for this FYR, because they are the primary contaminants of concern for the current remedy and have the highest concentrations at the Site. The declining trends for PCE and TCE indicate that water quality is improving and the remedy is moving towards meeting state and federal drinking water standards.

#### 4.2.5. BOU Capture Zone

Hydraulic capture is occurring at the Site based on multiple evaluations presented in a 2015 technical memorandum (Tetra Tech 2015), which used numerical modelling to assess the groundwater capture zones of extraction wells within the BOU. The model indicated the highest concentrations of TCE (above 500 µg/L) are within the BOU capture zone. The memo also included a triangular irregular network analysis to estimate groundwater gradients, which indicated that groundwater down-gradient from the

---

<sup>4</sup> Mann-Kendall analysis was completed using contaminant concentrations from wells with at least four values above the detection limit.

extraction wells primarily flows towards the extraction wells. Groundwater plume maps generated using 2014 data and 2017 groundwater data indicate the PCE and TCE plumes are not expanding between 2014 and 2017. Figures 11 and 12 are the PCE plumes from 2014 and 2017, and Figures 13 and 14 are the TCE plumes from 2014 and 2017.

After reviewing the 2015 technical memorandum (Tetra Tech 2015), EPA concluded that a “A sustained long-term flow rate of 9,000 gpm would provide increased capture of the southernmost plume, where PCE and TCE concentrations are well above the 100 ppb and 5 ppb concentration thresholds, respectively. The increased capture would better achieve the ROD’s remedial action objective to “partially control the movement and spread of ground water contaminants in the Burbank OU area, while contributing to aquifer restoration at the SFV Area 1 Site. It would provide for correspondingly higher mass removal, decreased overall cleanup time, and reduced potential for further downgradient migration which may threaten water supply wells.” (EPA, 2016). EPA recommended to increase the average, sustained extraction rate to 9,000 gpm providing increased capture until a second interim remedy is in place. An interconnect with LADWP is under construction, which will provide enough capacity to discharge up to 9,000 gallons per minute, the current capacity of the treatment system. A Focused Feasibility Study is also currently underway, which will result in a second interim remedy.

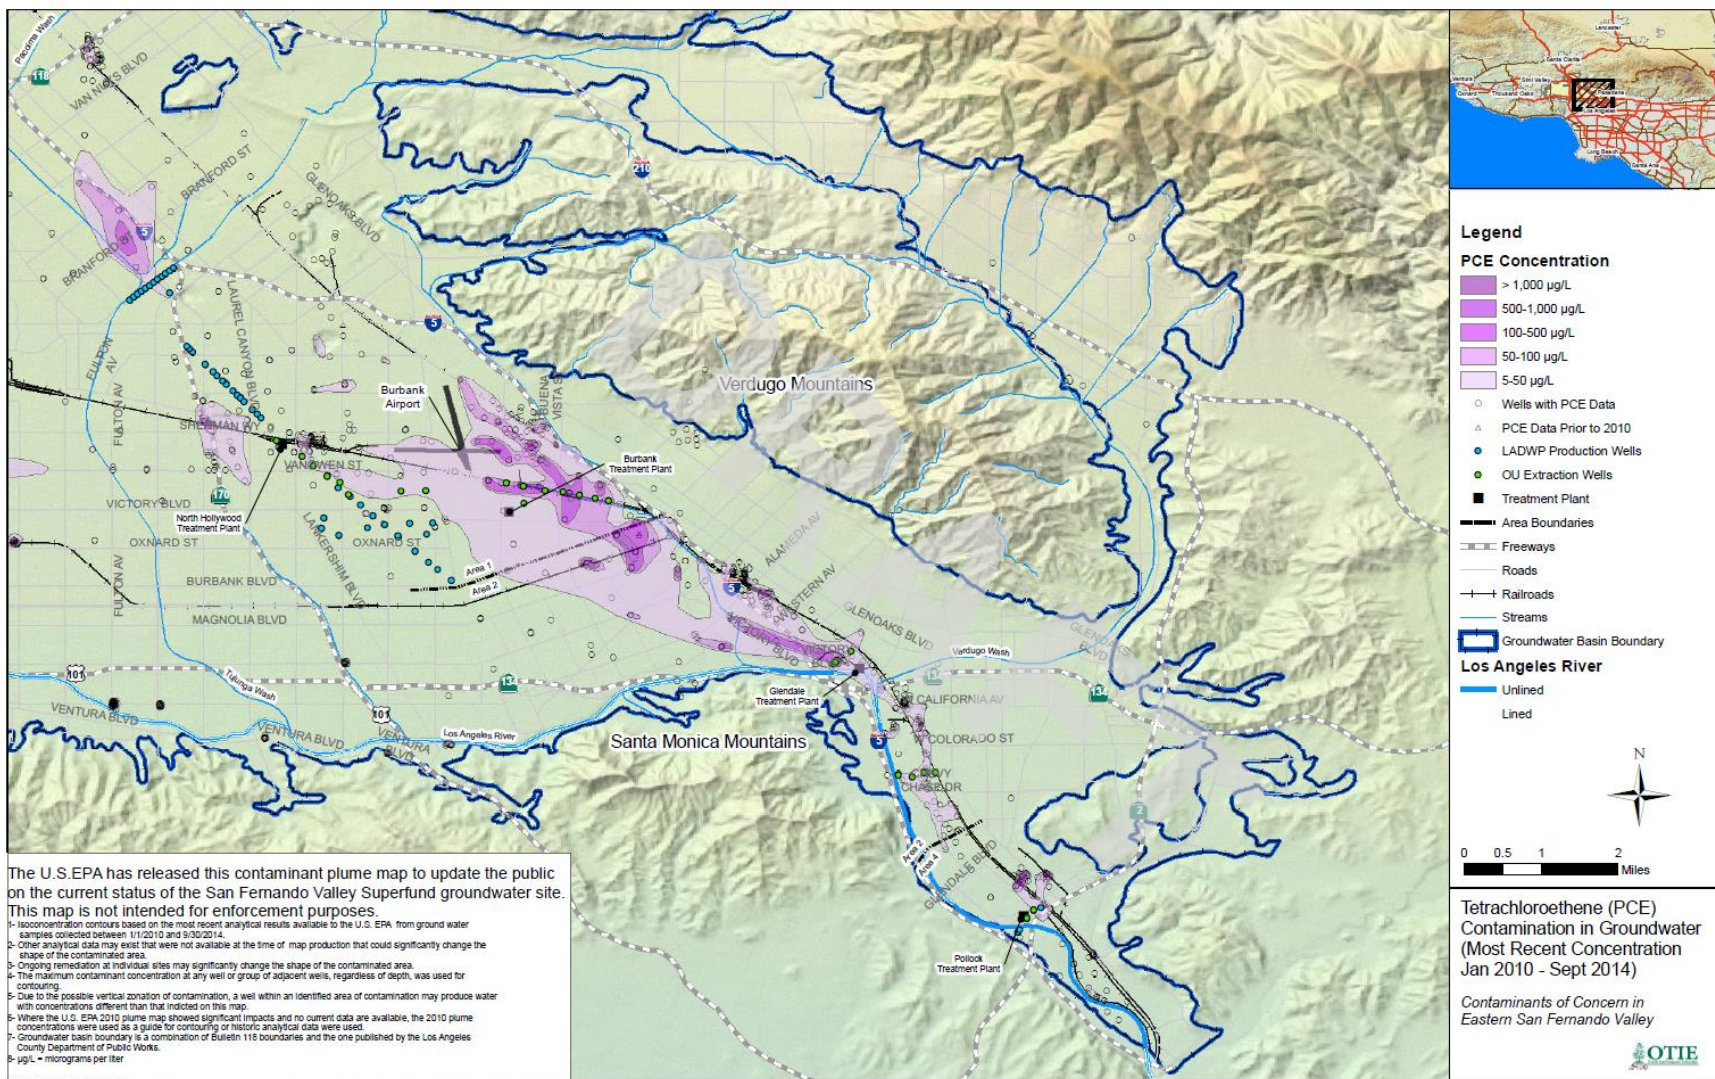

Figure 11. 2014 PCE Concentrations

Figure 12. 2017 PCE Concentrations

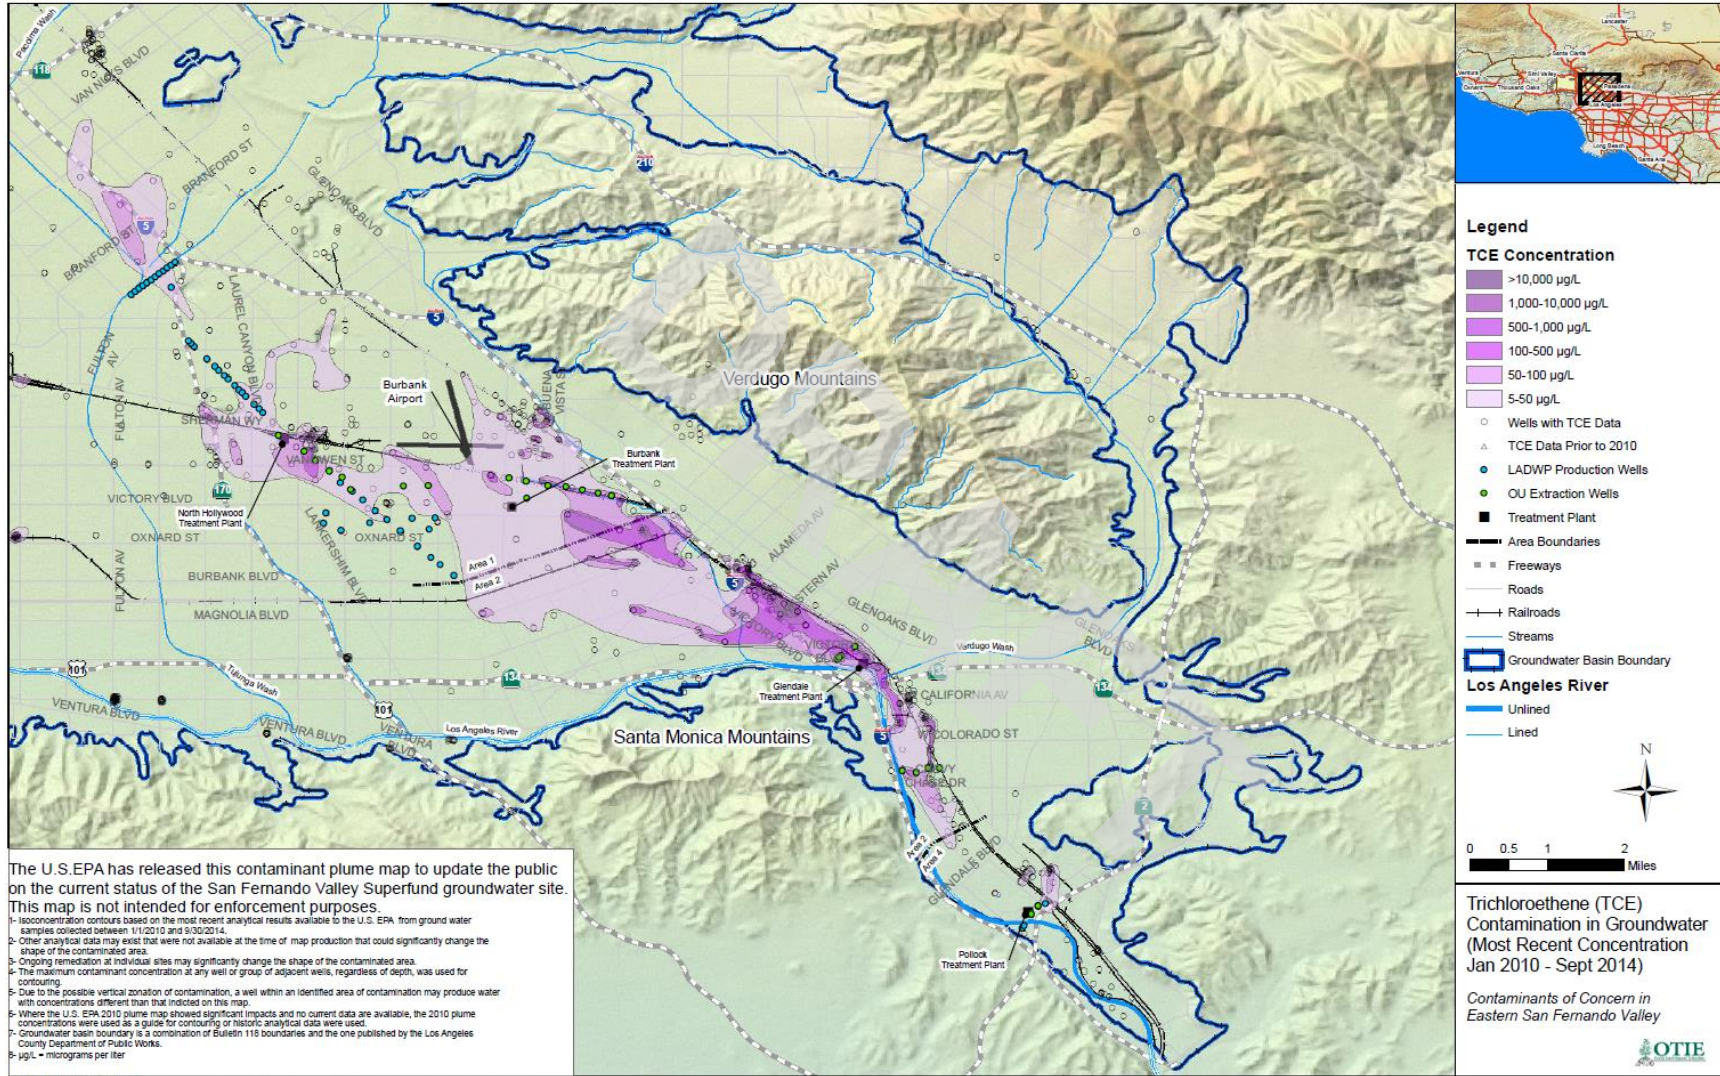

Figure 13. 2014 TCE Concentrations

Figure 14. 2017 TCE Concentrations

#### 4.2.6. BOU Contaminant Mass Removal

The remedy continues to contribute to aquifer restoration, a key RAO for the remedy, by removing mass from the aquifer. The Burbank Treatment Plant has removed 17,901 pounds of VOCs from January 2013 to April 2017, which demonstrates that contaminant mass is continuing to be removed from groundwater. Table 5 presents the contaminant mass removed and volume of water treated for each of the past five years. The rate of contaminant mass removal has declined over the past five years, which is typical of an aging groundwater extraction system.

**Table 6. Burbank Treatment Plant Contaminant Mass Removal**

<b>Year</b>	<b>Total Flow Treated (gallons)</b>	<b>Cumulative Flow Treated (gallons)</b>	<b>Total VOC Mass Removed (pounds)</b>	<b>Cumulative VOC Mass Removed (pounds)</b>
2013	3,637,576,057	54,002,901,370	5,164	246,686
2014	3,114,113,237	57,117,014,607	3,707	250,393
2015	3,365,140,780	60,482,155,387	4,368	254,761
2016	3,133,756,552	63,615,911,939	3,789	285,550
2017 (Jan-April)	771,530,941	64,387,442,880	873	255,634

#### 4.3. Site Inspection for Both OUs

Site inspections of the North Hollywood treatment plant and the Burbank treatment plant were completed on January 24, 2018. The purpose of the inspections was to assess the protectiveness of the remedy. Kelly Manheimer, Gary Riley and Rusty Harris-Bishop from EPA, and Jeffrey Weiss from USACE attended the site inspections. Hector Santiago, Matt Qassis, Mark Hazschuh, Gonzolo Reyes, and Vahe Dabbaghian of LADWP were at the North Hollywood treatment plant inspection. Charles Grace, Richard Salazar, and Jennifer Wehner of Terranear PMC were at the Burbank treatment plant. The interviews were completed as a group at the site visit, and pertinent information from the interviews is included in the site inspection and trip report.

The North Hollywood treatment plant was not operating. The Burbank treatment plant was operating as intended.

## 5. Technical Assessment

### *5.1. Question A: Is the remedy functioning as intended by the decision documents?*

For NHOU, the remedy was not functioning as intended when it was in operation before the fall of 2017, and did not contain the plume, prevent further degradation of water quality at the Rinaldi-Toluca and North Hollywood West production wells, nor inhibit migration in groundwater to the vicinity of the Erwin and Whitnall production well fields. EPA has updated the remedy to address shortcomings, and the responsible parties are in the process of designing and implementing the updated remedy.

For BOU, the treatment system continued to operate below the interim ROD specified extraction rate of 9,000 gpm. However, the results of the data review and the 2015 capture analysis indicate the remedy is achieving its objectives of partially controlling the movement and spread of groundwater contaminants in the Burbank OU area, and removing mass, even at the reduced flowrate. An interconnect with LADWP is under construction, which will provide enough capacity to discharge up to 9,000 gpm, the current capacity of the treatment system. A Focused Feasibility Study is currently underway to address emerging contaminants and to optimize the remedy.

For both OUs, the governmental controls in place at the site are effective in preventing exposure to contaminated groundwater.

### *5.2. Question B: Are the exposure assumptions, toxicity data, cleanup levels, and Remedial Action Objectives (RAOs) used at the time of remedy selection still valid?*

Yes, exposure assumptions, toxicity data, and RAOs used at the time of remedy selection are still valid. Applicable or relevant and appropriate requirements (ARARs) identified in the RODs, as amended, have not changed since the last FYR. Although the toxicity data for some VOCs have changed, the remedy remains protective because VOC levels in treated water are non-detect. Cleanup levels for groundwater were not established at the time of remedy selection.

Vapor intrusion is not a significant pathway because the depth to groundwater exceeds 120 feet. There are no changes in exposure pathways. The combined RAOs are still valid.

### *5.3. Question C: Has any other information come to light that could call into question the protectiveness of the remedy?*

No other information has come to light that calls into question the protectiveness of the remedy.

## 6. Issues/Recommendation

There are no issues that affect protectiveness at the North Hollywood or the Burbank Operable Units. The remedy for North Hollywood OU has recently been modified to increase pumping rates and add new wells. The North Hollywood remedy is not operating at this time while the upgrades are constructed.

## 7. Protectiveness Statement

**Table 7. Protectiveness Statement NHOU**

Protectiveness Statement(s)	
<i>Operable Unit: NHOU</i>	<i>Protectiveness Determination:</i> <b>Protective</b>
<i>Protectiveness Statement:</i> The remedy at the North Hollywood Operable Unit is currently protective of human health and the environment because there is no exposure to untreated groundwater. Despite the fact that the extraction and treatment system is not currently operating, the public is not exposed to untreated groundwater because LADWP is not currently extracting groundwater from the areas of high contaminant concentrations and governmental controls prevent other extraction of the groundwater. The remedy for North Hollywood OU has recently been modified to increase pumping rates and add new wells. Once these improvements have been implemented, EPA expects that all Remedial Action Objectives will be achieved.	

**Table 8. Protectiveness Statement BOU**

Protectiveness Statement(s)	
<i>Operable Unit: BOU</i>	<i>Protectiveness Determination:</i> Protective
<i>Protectiveness Statement:</i> The remedy at the Burbank Operable Unit is currently protective of human health and the environment. The treatment system effluent contaminant concentrations are less than their regulatory cleanup goals and there are governmental controls in place that prevent exposure to untreated groundwater.	

## 8. Next Review

The next FYR report for the Site is required five years from the completion date of this review.

DRAFT

## Appendix B: Data Review

Appendix B includes figures used for the data review. The results from the data review are in section 4.2.

Figures B-1 through B-4 are Mann-Kendall results for PCE and TCE in the BOU monitoring wells. The Mann-Kendall results indicate contaminant concentrations are generally decreasing or stable in the BOU. Figures B-5 and B-6 are results from Triangular Irregular Network analysis used to calculate the groundwater gradients within the BOU. The gradients indicate groundwater is primarily flowing towards the extraction wells. Figures B-7 and B-8 are results of a numeric model used to calculate the radial influence of the extraction wells. The results of the model indicate extraction wells are preventing migration of contaminants beyond the BOU.

# Appendix C: ARAR Assessment

## ARAR Analysis Appendix

The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Section 121(d)(1)(A) requires that remedial actions at CERCLA sites attain (or justify the waiver of) any federal or state environmental standards, requirements, criteria, or limitations that are determined to be legally applicable or relevant and appropriate requirements (ARARs). federal ARARs may include requirements promulgated under any federal environmental laws. State ARARs may only include promulgated, enforceable environmental or facility-siting laws of general application that are more stringent or broader in scope than federal requirements and that are identified by the state in a timely manner. ARARs are identified on a Site-specific basis from information about the chemicals at the Site, the remedial actions contemplated, the physical characteristics of the Site, and other appropriate factors. ARARs include only substantive, not administrative, requirements and pertain only to onsite activities. There are three general categories of ARARs: chemical-specific, location-specific, and action-specific.

Because these were interim actions for containment of groundwater contamination, EPA has not established chemical-specific ARARs for restoration of groundwater remaining onsite. EPA is waiving this ARAR pursuant to CERCLA Section 121(d) (4) (A), 42 U.S.C. § 9621(d) (4) (A), and 40 CFR § 300.430(f) (1) (ii) (C), which allows EPA to select a remedy that does not achieve an ARAR when the remedial alternative selected is an interim measure that will become part of a final remedial action that will attain ARARs. EPA's waiver of the aquifer cleanup standard does not apply to water extracted from the aquifer and delivered to municipalities for use as drinking water. All extracted and treated water complies with maximum contaminant level (MCL) ARARs.

The current regulatory standards for trichloroethene (TCE), tetrachloroethene (PCE), and the other volatile organic compound (VOC) contaminants of concern are the state and federal MCLs. No revisions to these MCLs occurred during the five-year review period.

Hexavalent chromium is not regulated, but currently addressed by both federal and state MCLs for total chromium. In October 2014, the California Office of Administrative Law approved a regulation enacting an MCL for hexavalent chromium. However, due to a judgment issued by the California State Superior Court, the CA MCL for hexavalent chromium is no longer in effect.

federal and state laws and regulations, other than the chemical-specific ARARs that have been promulgated or changed over the past five years, are described in Table C-1. The table does not include those ARARs identified that are no longer pertinent. For example, ARARs related to remedial design and construction are not included in the table if they do not continue into long-term O&M. There have been no revisions to laws or regulations that affect the protectiveness of the remedy.

The following ARARs have not changed since the last Five-Year Review; and therefore, do not affect protectiveness:

- Clean Air Act SCAQMD, Rule 1401
- California Water Code and State Water Resources Control Board Model Well Standards Ordinance (1989), Division 7, Chapter 10, Section 13700 et seq.
- California Hazardous Waste Regulations, Generator Requirements, 22 CCR 66262.10, 22 CCR 66262.11, 22 CCR 66262.34(a)(1)(A), 22 CCR 66265.170 et seq. (Article 9), 22 CCR 66265.190 et seq. (Article 10)
- California Land Disposal Restrictions, Requirements for Generators, 22 CCR 66268.3, 22 CCR 66268.7, 22 CCR 66268.9, 22 CCR 66268.50
- California Land Disposal Restrictions, Requirements for Generators, 22 CCR 66268.1 et seq. (Article 1)
- Spent Carbon Disposal, 40 CFR 268.40
- Groundwater Reinjection, State Water Resources Control Board Resolution 68-16
- Groundwater Reinjection, RCRA Section 3020

**Table C-1. Applicable or Relevant and Appropriate Requirements Evaluation**

Original ARAR	Document	Original ARAR requirement	Revised requirement	Revision Date (between Sept. 2013-present)	Effect on Protectiveness
Clean Air Act SCAQMD, Regulation XIII		Regulation XIII requires that stationary sources of air emissions meet best available technology standards.	Rule 1309 Rule 1325	February 5, 2013 November 4, 2016	Rules 1309 (Emission Reduction Credits and Short-Term Credits), 1315 (federal New Source Tracking System), and 1325 (federal PM2.5 New Source Review Program) of Regulation XIII have been amended or adopted since the previous FYR, but none of the changes affect protectiveness.

# High court rules against crisis pregnancy center law

By Maria Sherman and Jessica Gordon  
 The Associated Press

WASHINGTON — The Supreme Court on Tuesday effectively put an end to a California law that forces anti-abortion crisis pregnancy centers to provide information about abortion.

The 5-4 ruling came down on similar laws in Hawaii and Illinois.

The California law took effect in 2010. It requires centers that are licensed by the state to disclose about the availability of abortion, abortion counseling, and other services, at little or no cost. Centers that do not are not required to post a sign that said so. The court struck down that portion of the law.

The justices said they were split 5-4 on whether to deliver a message with which they disagreed. California said the law was needed to let poor women know all their options.

Justice Clarence Thomas, in his majority opinion, said the centers "are unlikely to succeed" in their constitutional challenge to the portion of the law involving licensed centers. That means that while the law is currently on the books, its challengers can go back to court to get an order halting its enforcement. An attorney for the challenger said Tuesday that they expect to be able to do that quickly. California had not been enforcing the law, however.

"California cannot opt-out the message for it," Thomas wrote for himself, Chief Justice John Roberts and Justice Anthony Kennedy. Samuel Alito and Neil Gorsuch also called the requirement for an unlicensed center "unjustified and unduly burdensome."

Justice Stephen Breyer said among the reasons the law could be upheld is that the high court has previously upheld similar laws requiring doctors to tell women seeking abortions about abortion services. "In that case, the law must be upheld," Breyer said in a dissenting opinion, joined by his liberal colleagues, Justice Sotomayor and Justice Kagan.

Visitors depart the Supreme Court on Monday in Washington, D.C. The Supreme Court on Tuesday effectively put an end to a California law that forces anti-abortion crisis pregnancy centers to provide information about abortion. Anti-abortion groups cheered the decision.

and anti-abortion groups were among those cheering the decision. The Trump administration had argued that California law violates their right of licensed centers but had no objection to the requirement for the unlicensed centers. "If people would not be forced by their government to promote a message with which they disagree, and provide pregnancy centers in California should not be forced to advertise about one and condemn the very reason they exist," Justice said in a statement. "The day California Attorney General Xavier Becerra, a Democratic, called the decision "unfortunate" but said "our work is not over."

California's health care information about their health care options will continue.

The abortion rights group NARAL Pro-choice California was a prime sponsor of the California law. NARAL can testify that the centers misled women about their options and try to persuade them to forgo abortion. Statistics of the number of crisis pregnancy centers in the U.S. run from 1,100 to over 2,000, compared with fewer than 1,000 abortion providers, a women's rights group said in a separate court filing.

NARAL president Ryan Sigurd said in a statement after Tuesday's decision that the Supreme Court had "put the lie back on women and continued the deceptive tactics used by fake women's health centers."

California lawyers challenged by the National Institute of Family and Life Advocacy, an organization with ties to 1,000 pregnancy centers nationwide, said they were not in California. The group was represented at the Supreme Court by Alliance Defending Freedom, a Christian law firm. ADFA president Thomas G. Cooney applauded the court's decision Tuesday. He said the decision "accomplished" what he said was a "great day for pro-life pregnancy centers" and for the people.

Other state laws that regulate doctors' speech in the abortion context. In Louisiana, Texas and Wisconsin, doctors must display a sonogram and describe the fetus to a pregnant woman on a computer screen before an abortion, according to the Guttmacher Institute, which supports abortion rights. Similar laws have been blocked in Kentucky, North Carolina and Oklahoma.

**Public Notice**

U.S. Environmental Protection Agency (EPA) Conducts Third Five-Year Review of Cleanup at the San Fernando Valley, Area 1, Superfund Site in Los Angeles, CA

The U.S. Environmental Protection Agency (EPA) is conducting the 2018 Five-Year Review of the cleanup at the San Fernando Valley, Area 1, Superfund site in Los Angeles and Burbank, CA. The Five-Year Review is being conducted to determine whether the groundwater pump and treat systems are adequately protecting human health and the environment. The systems are designed to capture and contain the contaminated groundwater and prevent it from moving into clean groundwater areas. The primary contaminants of concern in the groundwater are volatile organic compounds (VOCs), including trichloroethylene (TCE) and perchloroethylene (PCE).

EPA offer cleanup logs, complete data and another manageable process called operate until 2018, 2017 Area 1 is divided into two cells, the Burbank operating cell (BOPU) and the North Hollywood operating cell (NHOC). Each cell has its own groundwater pump and treat system and cleanup plan. Both pump and treat systems and related plans will be evaluated in the Five-Year Review. The previous Five-Year Review for the SVV Area 1 found the cleanup plans for both cells are adequately protecting human health and the environment.

The SVV Area 1 site, approximately 20 square miles, was placed, ready to commence and paying indirect operating in the site from the 1960s to 1980s.

EPA invites the community to sign up now about the review process and provide input to the Agency. You may contact Judy Maravilla, Remedial Project Manager (RPM) for the SVV, at (415) 953-3306 or maravilla.judy@epa.gov, or Cheryl Hines, RPM for the SVV, at (415) 953-3300 or hines.cheryl@epa.gov.

The 2018 Five Year Review report will be completed by September 30, 2018 and available shortly after this date at the following locations and websites. The next review will be in 2023.

Groundwater monitoring wells sampled by other entities.</u>
8.	<b>Leachate Extraction Records</b> <input type="checkbox"/> Readily available <input type="checkbox"/> Up to date <input checked="" type="checkbox"/> N/A Remarks <u>None</u>
9.	<b>Discharge Compliance Records</b> <input checked="" type="checkbox"/> Air <input type="checkbox"/> Readily available <input type="checkbox"/> Up to date <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Water (effluent) <input type="checkbox"/> Readily available <input type="checkbox"/> Up to date <input type="checkbox"/> N/A Remarks <u>Discharge Compliance Monitoring Records provided with Quarterly Reports</u>
10.	<b>Daily Access/Security Logs</b> <input checked="" type="checkbox"/> Readily available <input checked="" type="checkbox"/> Up to date <input type="checkbox"/> N/A Remarks <u>Access and maintenance are recorded on paper and at LADWP Sylmar facility.</u>
<b>IV. O&amp;M COSTS</b>	
1.	<b>O&amp;M Organization</b> <input type="checkbox"/> State in-house <input type="checkbox"/> Contractor for State <input type="checkbox"/> PRP in-house <input type="checkbox"/> Contractor for PRP <input type="checkbox"/> federal Facility in-house <input type="checkbox"/> Contractor for federal Facility <input checked="" type="checkbox"/> Other <u>Los Angeles Department of Water and Power (LADWP)</u>
2.	<b>Unanticipated or Unusually High O&amp;M Costs During Review Period</b> Describe costs and reasons: <u>Issues with the heater for the air stripper and power supply to the plant has been a big problem that has caused shut downs, LADWP looking at improving power supply when plant is upgraded.</u>

<b>V. ACCESS AND INSTITUTIONAL CONTROLS</b> <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A			
<b>A. Fencing</b>			
1.	<b>Fencing damaged</b>	<input type="checkbox"/> Location shown on site map	<input checked="" type="checkbox"/> Gates secured <input type="checkbox"/> N/A
Remarks: <u>No Fencing Damage</u> ; treatment system is double fenced and fairly isolated.			
<b>B. Other Access Restrictions</b>			
1.	<b>Signs and other security measures</b>	<input type="checkbox"/> Location shown on site map	<input type="checkbox"/> N/A
Remarks <u>Security cameras on both sides of air stripper, alarms on doors that notify LADWP when door is opened.</u>			
<b>C. Institutional Controls (ICs)</b>			
1.	<b>Implementation and enforcement</b>		
	Site conditions imply ICs not properly implemented	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> N/A
	Site conditions imply ICs not being fully enforced	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> N/A
	Type of monitoring (e.g., self-reporting, drive by)	<u>N/A</u>	
	Frequency	<u>N/A</u>	
	Responsible party/agency	<u>N/A</u>	
	Reporting is up-to-date	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> N/A
	Reports are verified by the lead agency	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> N/A
	Specific requirements in deed or decision documents have been met	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> N/A
	Violations have been reported	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> N/A
	Other problems or suggestions:	<input type="checkbox"/> Report attached	
<u>An IC is not necessary since the basin has a moratorium on installation of new wells.</u>			
2.	<b>Adequacy</b>	<input checked="" type="checkbox"/> ICs are adequate	<input type="checkbox"/> ICs are inadequate <input type="checkbox"/> N/A
Remarks <u>None</u>			
<b>D. General</b>			
1.	<b>Vandalism/trespassing</b>	<input type="checkbox"/> Location shown on site map	<input checked="" type="checkbox"/> No vandalism evident
Remarks			
2.	<b>Land use changes on site</b>	<input checked="" type="checkbox"/> N/A	
Remarks <u>None</u>			
3.	<b>Land use changes off site</b>	<input checked="" type="checkbox"/> N/A	
Remarks <u>None</u>			
<b>VI. GENERAL SITE CONDITIONS</b>			
<b>A. Roads</b> <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A			
1.	<b>Roads damaged</b>	<input type="checkbox"/> Location shown on site map	<input checked="" type="checkbox"/> Roads adequate <input type="checkbox"/> N/A
Remarks <u>None</u>			
<b>B. Other Site Conditions</b>			
Remarks <u>None</u>			
<b>VII. LANDFILL COVERS</b> <input type="checkbox"/> Applicable <input checked="" type="checkbox"/> N/A			
<b>VIII. VERTICAL BARRIER WALLS</b> <input type="checkbox"/> Applicable <input checked="" type="checkbox"/> N/A			

<b>IX. GROUNDWATER/SURFACE WATER REMEDIES</b> <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
<b>A. Groundwater Extraction Wells, Pumps, and Pipelines</b> <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
1.	<b>Pumps, Wellhead Plumbing, and Electrical</b> <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> All required wells properly operating <input type="checkbox"/> Needs Maintenance <input type="checkbox"/> N/A Remarks <u>Only visited one extraction well that was not operating due to plant shut down.</u>
2.	<b>Extraction System Pipelines, Valves, Valve Boxes, and Other Appurtenances</b> <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks <u>None</u>
3.	<b>Spare Parts and Equipment</b> <input checked="" type="checkbox"/> Readily available <input type="checkbox"/> Good condition <input type="checkbox"/> Requires upgrade <input type="checkbox"/> Needs to be provided Remarks <u>Parts are stored offsite in a nearby warehouse, which was not visited during the site inspection.</u>
<b>B. Surface Water Collection Structures, Pumps, and Pipelines</b> <input type="checkbox"/> Applicable <input checked="" type="checkbox"/> N/A	
<b>C. Treatment System</b> <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
1.	<b>Treatment Train</b> (Check components that apply) <input type="checkbox"/> Metals removal <input type="checkbox"/> Oil/water separation <input type="checkbox"/> Bioremediation <input checked="" type="checkbox"/> Air stripping <input checked="" type="checkbox"/> Carbon adsorbers <input type="checkbox"/> Filters _____ <input checked="" type="checkbox"/> Additive (e.g., chelation agent, flocculent) <u>Hexametaphosphate descalant</u> <input type="checkbox"/> Others _____ <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance <input checked="" type="checkbox"/> Sampling ports properly marked and functional <input checked="" type="checkbox"/> Sampling/maintenance log displayed and up to date <input checked="" type="checkbox"/> Equipment properly identified <input type="checkbox"/> Quantity of groundwater treated annually _____ <input type="checkbox"/> Quantity of surface water treated annually <u>None</u> Remarks <u>None</u>
2.	<b>Electrical Enclosures and Panels</b> (properly rated and functional) <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks <u>The electrical system is antiquated and often requires the attention of technicians.</u>
3.	<b>Tanks, Vaults, Storage Vessels</b> <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Proper secondary containment <input type="checkbox"/> Needs Maintenance Remarks <u>None</u>
4.	<b>Discharge Structure and Appurtenances</b> <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks _____
5.	<b>Treatment Building(s)</b> <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition (esp. roof and doorways) <input type="checkbox"/> Needs repair <input type="checkbox"/> Chemicals and equipment properly stored Remarks _____
6.	<b>Monitoring Wells</b> (pump and treatment remedy) <input type="checkbox"/> Properly secured/locked <input type="checkbox"/> Functioning <input checked="" type="checkbox"/> Routinely sampled <input type="checkbox"/> Good condition <input type="checkbox"/> All required wells located <input type="checkbox"/> Needs Maintenance <input type="checkbox"/> N/A Remarks <u>Monitoring Wells were not visited on the site inspection.</u>

<b>D. Monitoring Data</b>	
1.	Monitoring Data <input checked="" type="checkbox"/> Is routinely submitted on time <input checked="" type="checkbox"/> Is of acceptable quality
2.	Monitoring data suggests: <input type="checkbox"/> Groundwater plume is effectively contained <input type="checkbox"/> Contaminant concentrations are declining
<b>E. Monitored Natural Attenuation</b>	
1.	<b>Monitoring Wells</b> (natural attenuation remedy) <input type="checkbox"/> Properly secured/locked <input type="checkbox"/> Functioning <input type="checkbox"/> Routinely sampled <input type="checkbox"/> Good condition <input type="checkbox"/> All required wells located <input type="checkbox"/> Needs Maintenance <input type="checkbox"/> N/A Remarks <u>This is not an MNA remedy, it is a containment remedy.</u>
<b>3.X. OTHER REMEDIES</b>	
N/A	
<b>XI. OVERALL OBSERVATIONS</b>	
<b>A.</b>	<b>Implementation of the Remedy</b>
Describe issues and observations relating to whether the remedy is effective and functioning as designed. Begin with a brief statement of what the remedy is to accomplish (i.e., to contain contaminant plume, minimize infiltration and gas emission, etc.). <u>The extraction wells and treatment system need to be updated to prevent further migration of the contamination. The treatment system has not been operating since November 2017 due to issues with the wells. A new treatment system and new wells will be installed to improve the remedy. .</u>	
<b>B.</b>	<b>Adequacy of O&amp;M</b>
Describe issues and observations related to the implementation and scope of O&M procedures. In particular, discuss their relationship to the current and long-term protectiveness of the remedy. <u>The treatment system is scheduled to be update.</u>	
<b>C.</b>	<b>Early Indicators of Potential Remedy Problems</b>
Describe issues and observations such as unexpected changes in the cost or scope of O&M or a high frequency of unscheduled repairs that suggest that the protectiveness of the remedy may be compromised in the future. .	
<b>4.D.</b>	<b>Opportunities for Optimization</b>
Describe possible opportunities for optimization in monitoring tasks or the operation of the remedy. <u>The new remedial design will optimize the system. The existing extraction wells could be deepened or new extraction wells could be drilled.</u>

2.	<b>Electrical Enclosures and Panels</b> (properly rated and functional) <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks <u>None</u>
3.	<b>Tanks, Vaults, Storage Vessels</b> <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Proper secondary containment <input type="checkbox"/> Needs Maintenance Remarks: Consider lining pipes that transfer waste to prevent pin holes.
4.	<b>Discharge Structure and Appurtenances</b> <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks <u>None</u>
5.	<b>Treatment Building(s)</b> <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition (esp. roof and doorways) <input type="checkbox"/> Needs repair <input checked="" type="checkbox"/> Chemicals and equipment properly stored Remarks <u>None</u>
6.	<b>Monitoring Wells</b> (pump and treatment remedy) <input type="checkbox"/> Properly secured/locked <input type="checkbox"/> Functioning <input checked="" type="checkbox"/> Routinely sampled <input type="checkbox"/> Good condition <input type="checkbox"/> All required wells located <input type="checkbox"/> Needs Maintenance <input type="checkbox"/> N/A Remarks <u>Monitoring Wells were not visited on the Site Inspection</u>

<b>D. Monitoring Data</b>	
5.	Monitoring Data <input type="checkbox"/> Is routinely submitted on time <input checked="" type="checkbox"/> Is of acceptable quality
6.	Monitoring data suggests: <input type="checkbox"/> Groundwater plume is effectively contained <input type="checkbox"/> Contaminant concentrations are declining
<b>D. Monitored Natural Attenuation</b>	
1.	<b>Monitoring Wells</b> (natural attenuation remedy) <input type="checkbox"/> Properly secured/locked <input type="checkbox"/> Functioning <input type="checkbox"/> Routinely sampled <input type="checkbox"/> Good condition <input type="checkbox"/> All required wells located <input type="checkbox"/> Needs Maintenance <input checked="" type="checkbox"/> N/A Remarks <u>This is a containment remedy, not an MNA remedy.</u>
<b>7.X. OTHER REMEDIES</b>	
N/A	
<b>XI. OVERALL OBSERVATIONS</b>	
<b>A. Implementation of the Remedy</b>	
Describe issues and observations relating to whether the remedy is effective and functioning as designed. Begin with a brief statement of what the remedy is to accomplish (i.e., to contain contaminant plume, minimize infiltration and gas emission, etc.). <u>The remedy functions very well. Contaminants are being removed from the aquifer, but levels appear to be consistent.</u>	
<b>B. Adequacy of O&amp;M</b>	
Describe issues and observations related to the implementation and scope of O&M procedures. In particular, discuss their relationship to the current and long-term protectiveness of the remedy. <u>None</u>	
<b>C. Early Indicators of Potential Remedy Problems</b>	
Describe issues and observations such as unexpected changes in the cost or scope of O&M or a high frequency of unscheduled repairs, that suggest that the protectiveness of the remedy may be compromised in the future. <u>None</u>	
<b>8.D. Opportunities for Optimization</b>	
Describe possible opportunities for optimization in monitoring tasks or the operation of the remedy. 1) <u>A new interconnect will be built between LADWP to allow for more water to be blended and increase the efficiency of the plant. Currently the production wells that supply water to the plant have packers installed to reduce the production rate due to not having enough water to blend with.</u> 2) <u>Variable frequency drive pump may help increase energy efficiency.</u> 3) <u>Allow the use of recirculated water for the vapor phase carbon bed regeneration which would reduce the amount of water discharged to the sewer.</u>	

# Appendix F: Trip Report and Photographs from Site Inspection Visit

## Trip Report

San Fernando Valley Area 1 Superfund Site, Glendale, CA

---

### INTRODUCTION

- a. Date of Visit: January 24, 2018
- b. Location: Burbank, CA
- c. Purpose: A site visit was conducted to visually inspect and document the conditions of the remedy, the Site, and the surrounding area for inclusion into the Five-Year Review Report.
- d. Participants: *List all attendees:*

<u>NAME</u>	<u>ORGANIZATION</u>	<u>SITE</u>
Kelly Manheimer	EPA – RPM	
Rusty Harris-Bishop	EPA – RPM	
Gary Riley	EPA – RPM

Matt Qassis	LADWP – Junior Associate	NHOU
Mark Hazschuh	LADWP – Pump Operator	NHOU
Gonzolo Reyes	LADWP – Well Maintenance	NHOU
Vahe Dabbaghian	LADWP PM	NHOU
Jeffrey Weiss		USACE

### 2. SUMMARY

Site visits were completed at the North Hollywood Treatment Plant (North Hollywood Treatment Plant – North Hollywood Operable Unit [NHOU]) and Burbank Treatment Plant (BTP – Burbank Operable Unit [BOU]) on January 24, 2018 as part of the San Fernando Valley Area 1 Superfund Site (Site) Five-Year Review. The participants listed attended the Site listed next to their name. EPA and USACE personnel attended both site visits. The weather was sunny and in the 60s. The site visit at North Hollywood Treatment Plant lasted from approximately 8:00 to 9:30 a.m., and the BTP from

approximately 10:00 to 11:30 a.m. That afternoon, EPA and USACE also visited three of the extraction well locations to observe the condition of the well heads. The sections below describe the conditions at each Site and Appendix F of the Five-Year Review includes a Site Inspection Checklist completed by Jeffrey Weiss for each of the Sites.

### 3. DISCUSSION

#### *North Hollywood Treatment Plant/North Hollywood Operable Unit*

The North Hollywood Treatment Plant is not currently operating and has been shut down since November 13, 2107, due to declining water levels and maintenance issues. When the extraction wells and treatment system were operating, the treatment system had maintenance issues primarily related to an inadequate power supply to the Site, as well as inadequate spare parts supply. The treatment plant was in good condition with no obvious signs of damage or issues. The operator of the Site noted they have had problems with the inlet valve to the system not closing all the way when the system shuts down, causing a pressure buildup in the treatment system. Overall, the treatment system and extraction wells need to be updated to meet the requirements of the remedy.

#### *Burbank Treatment Plant/Burbank Operable Unit*

The BTP is operating as intended by the current remedy. The conference building and storage buildings have been updated in the last 5 years, and the method for storing contaminants removed from the treatment system has changed. They are still configuring the final method for storing the contaminants until they are picked up. The site currently blends the water from the treatment plant to meet the requirements for 1,4 dioxane and hexavalent chromium. The distribution system does not have enough capacity to accept all the water from the plant, so they are limited to 6,000 gallons per minute discharge rate. However, an interconnect with LADWP is under construction, which will provide enough capacity to discharge up to 9,000 gallons per minute, the current capacity of the treatment system. There were no signs of damage or issues with the treatment plant.

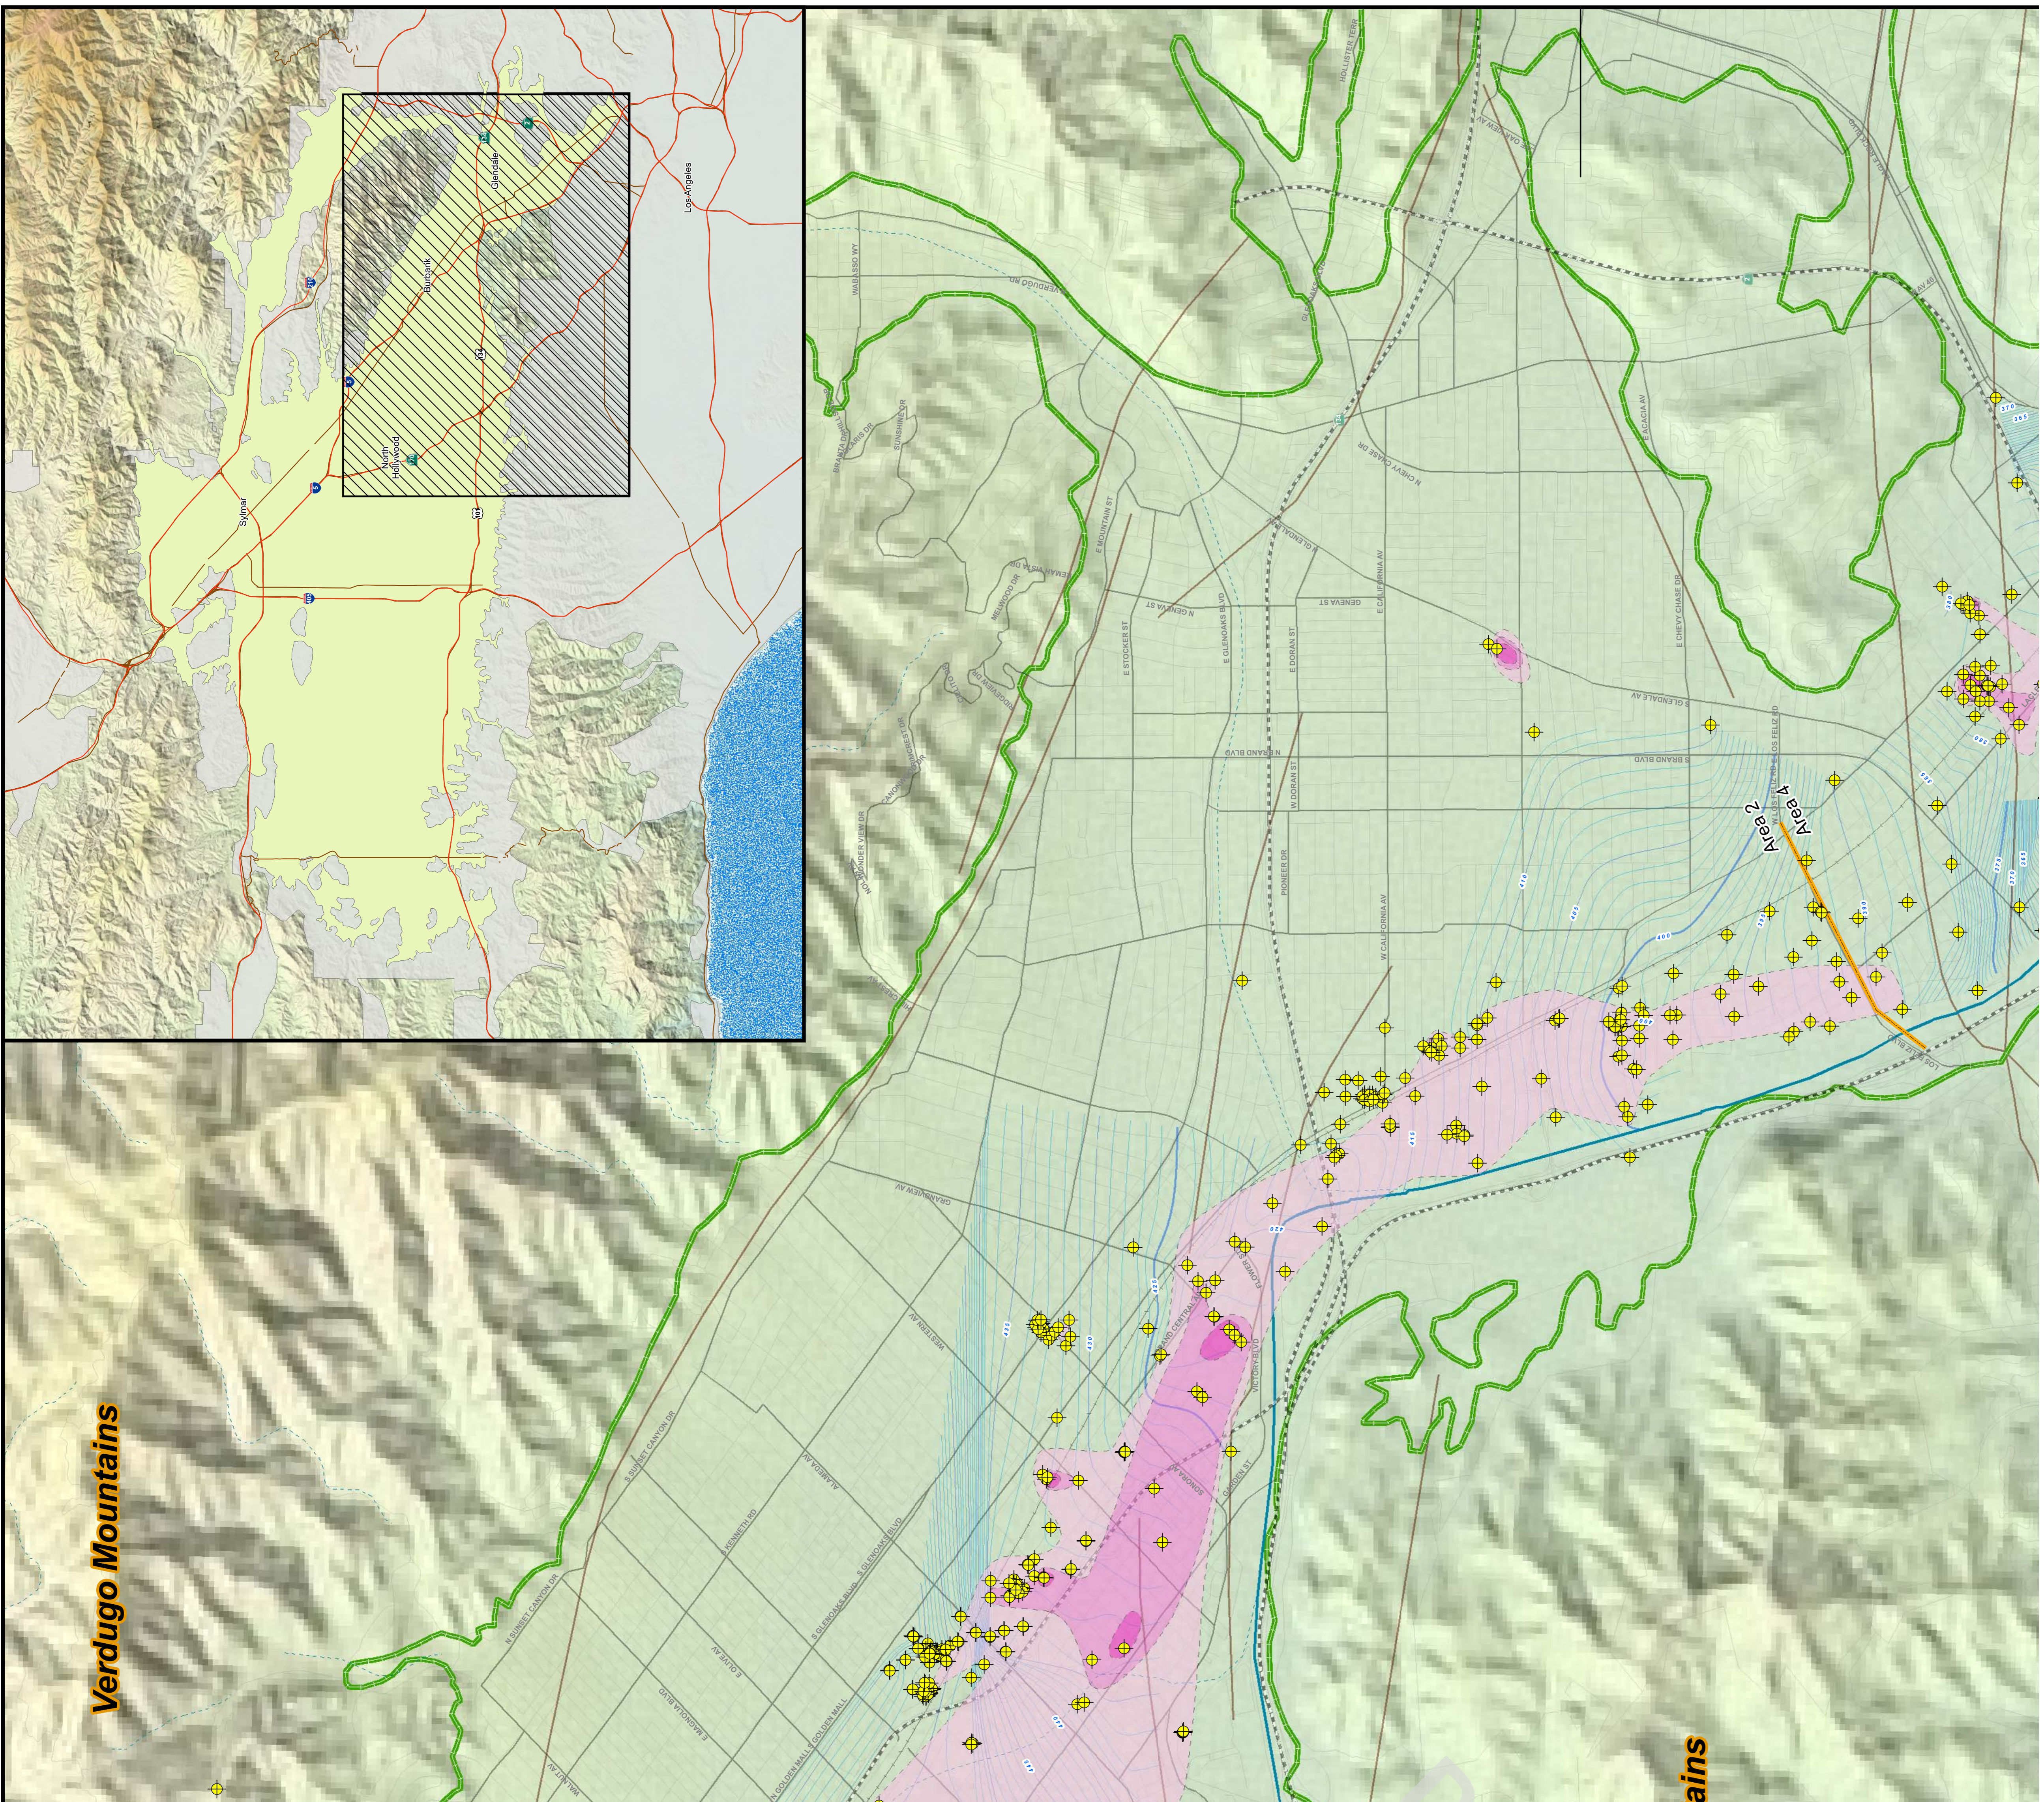

#### *Well Heads*

EPA and USACE visited three extraction wells locations within the SFV Area 1; one of the Sites was for the BTP, and the other two were for the North Hollywood Treatment Plant. The BTP well head was in good condition with no signs of damage. The two North Hollywood Treatment Plant well heads were not operational, because the treatment system was not operating. There were no signs of damage at the North Hollywood Treatment Plant well heads.

### 4. ACTIONS

USACE will incorporate information obtained from the site visit into the Five-Year Review report.

Jeffrey Weiss  
Geologist, Seattle District

# Jay Cudmore

## Project Manager, Due Diligence

---

### EDUCATION

- B.S. - Biology (Minor in Music), University of California, Riverside

### CERTIFICATIONS

- National Registry of Environmental Professionals - Associate Environmental Professional (AEP)
- OSHA Hazardous Waste Operations and Emergency Response Standard (HAZWOPER), 40-hour and 8-hour refresher

### SUMMARY OF PROFESSIONAL EXPERIENCE

Mr. Cudmore provides expertise in environmental project management, consulting, and due diligence services to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Environmental Transaction Screens, Regulatory Database and Historical Records Reviews for large- and small-scale industrial, commercial, multi-tenant residential, and rural properties.

### PROJECT EXPERIENCE

Project experience for Mr. Cudmore includes:

- Phase I Environmental Site Assessments (PHI ESAs)
- Limited Environmental Site Assessments (LESAs)
- Environmental Transaction Screens (ETs)
- Records Research with Risk Assessments (RSRAs)
- Regulatory Database Reviews
- Historical Records Reviews

As a Due Diligence Project Manager, Mr. Cudmore provides project management and technical expertise to ensure ASTM compliance and satisfaction of client requirements in states including California, Nevada, and Hawaii.

In addition, prior to joining the environmental consulting industry, Mr. Cudmore spent four years studying a diverse range of environmental disciplines including: environmental health, coastal ecology and conservation, conservation biology, and environmental law and policy. Additionally, Mr. Cudmore worked as an Environmental Scientist and Crew Lead during disaster response for California's wildfires.

# Abraham Serrato

## National Client Manager, Due Diligence

---

### EDUCATION

- B.S. - Chemistry, UC Davis, CA

### CERTIFICATIONS

- Certified Environmental Manager (EM2487) - NV
- 40-Hour HAZWOPER with Annual Refresher
- Asbestos Building Inspector with Annual Refresher

### SUMMARY OF PROFESSIONAL EXPERIENCE

Mr. Abraham Serrato has more than 6 years of experience in the environmental due diligence and consulting space. He has performed Phase I Environmental Site Assessments on sites ranging from new commercial developments to large industrial facilities. Additionally, he has conducted indoor air quality assessments as well as subsurface investigations at automotive repair, fueling stations, and dry-cleaning facilities.

### PROJECT EXPERIENCE

Project experience for Mr. Serrato includes:

- Phase I Environmental Site Assessments (Phase I ESAs)
- Environmental Transaction Screens (ETSs/TSAs)
- Record Search with Risk Assessments (RSRAs)
- Limited Subsurface Investigations (LSIs)
- Phase II Environmental Site Assessments (Phase II ESAs)
- Property Condition Assessments (PCAs)

Currently Mr. Serrato is a National Client Manager serving as the environmental lead responsible for managing and technical review of Phase I Site Assessments throughout the U.S.

Prior to joining AEI Consultants, Mr. Serrato conducted Phase I and Phase II ESAs/LSIs, throughout the country. He has experience developing scopes of work, sample collection, interpretation of analytical results, and working with regulatory agencies.
