

# Phase I Environmental Site Assessment

REPORT DATE: February 16, 2023

PROPERTY INFORMATION:

3001 West Empire Avenue  
Burbank, Los Angeles County, California 91504

PROJECT INFORMATION:

AEI Project No. 474750  
Site Assessment Date: February 9, 2023

PREPARED FOR:

ABS Burbank, LLC  
5500 Hollywood Boulevard, 4th  
Floor  
Los Angeles, California 90028

PREPARED BY:

AEI Consultants - Corporate Headquarters  
2500 Camino Diablo  
Walnut Creek, California 94597

February 16, 2023

Samir Srivastava

Subject: Phase I Environmental Site Assessment  
3001 West Empire Avenue  
Burbank, California 91504  
AEI Project No. 474750

Dear Samir Srivastava:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (925) 746-6000 or [cmonheit@aeiconsultants.com](mailto:cmonheit@aeiconsultants.com).

Sincerely,  
DRAFT  
Courtney Monheit  
Senior Vice President  
AEI Consultants

## PROJECT SUMMARY

3001 West Empire Avenue, Burbank, Los Angeles County, California 91504

## EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by ABS Burbank, LLC to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 3001 West Empire Avenue, Burbank, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

Property Information	
Site Address(es)	3001 West Empire Avenue, Burbank, Los Angeles County, California 91504
Property ID (APN or Block/Lot)	2464-006-045
Location	North side of West Empire Avenue
Property Type	Parking Lot
Site and Building Information	
Approximate Site Acreage/Source	0.6869/Assessor
Number of Buildings	Zero
Building Construction Date(s)/Source	N/A
Building Square Footage (SF)/Source	N/A
Number of Floors/Stories	N/A
Basement or Subgrade Area(s)	None identified
Number of Units	N/A
Additional Improvements	Asphalt-paved parking areas and associated landscaping
On-site Occupant(s)	N/A
Current On-site Operations/Use	Off-street parking
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	None identified

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1928	Unknown use/Data failure; refer to <a href="#">Section 1.6.1</a>	Aerial photographs, Sanborn maps, agency records
1928-1938	Vacant and/or agricultural land	Aerial photographs
1939-1947	Unknown use/Data failure; refer to <a href="#">Section 1.6.1</a>	Aerial photographs, Sanborn maps, agency records
N/A	Current parking lot constructed	Agency records
1948-Present	Current parking lot (2200 North Ontario Avenue)	Aerial photographs, Sanborn maps, agency records, site observation

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Alleyway followed by:	None identified

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
	<ul style="list-style-type: none"> <li>• Apartment building (2214 North Ontario Street)</li> <li>• Residential triplex (2215 North Fairview Street)</li> </ul>	
East	North Fairview Street followed by: <ul style="list-style-type: none"> <li>• Parking lot (2212 North Fairview Street)</li> <li>• Office building (2919 West Empire Avenue)</li> </ul>	Yes; refer to Section 5.1
South	West Empire Avenue followed by: <ul style="list-style-type: none"> <li>• Mixed use industrial building with the following tenants: 1928 Jewelry/jewelry manufacturer, Film Play/video production, Enchanted Art/art gallery, Collectible Wizard/retail, Ron Lee Inc/ sculptures (3000 West Empire Avenue)</li> <li>• All-Phase Electrical Supply (3020 West Empire Avenue)</li> <li>• Specialty Lighting Distributors (3030 West Empire Avenue)</li> <li>• Lawyers' Mutual Insurance Company/ office building (3110 West Empire Avenue)</li> </ul>	Yes; refer to Section 5.1
West	North Ontario Street followed by: <ul style="list-style-type: none"> <li>• Parking lot (no address provided)</li> </ul>	None identified

#### FINDINGS AND OPINIONS

Significant Data Gap(s) is defined by the current ASTM Standard E1527 as a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

AEI did not identify significant data gaps which affected our ability to identify RECs.

Recognized Environmental Condition (REC) is defined by the current ASTM Standard E1527 as the (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- The subject property is located inside the San Fernando Valley Area 1 Superfund Site. This site is listed in the National Priorities List (NPL) database. Also known as Superfund sites, the NPL lists sites that have known releases or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States and its territories.

This site is listed in multiple databases, all relating to the NPL listing. Based on information obtained from the EPA's Third Five Year Review (TFYR) dated September 21, 2018, The San Fernando Valley Area 1 Superfund Site (SFV Area 1) consists primarily of two large plumes from multiple sources in the San Fernando Valley. Site contaminant sources include, but are not limited to, the former Bendix Aviation and Allied Signal-Aerospace Company facilities in North Hollywood (successor cooperation is now Honeywell International), the former Lockheed Martin Corporation facilities near the Burbank Airport, and many other known sources throughout Area 1.

Trichloroethene (TCE) and tetrachloroethene (PCE) were widely used in the San Fernando Valley starting in the 1940s for dry cleaning and for degreasing machinery. Disposal was not well-regulated at that time, and releases from a large number of facilities throughout the eastern SFV Area 1 have resulted in the large plume of VOC-contaminated groundwater that starts in the Area 1 Site and extends southeast, down-gradient, through the San Fernando Valley Superfund, Area 2, Site and through the San Fernando Valley Superfund, Area 4, Site.

Based on an examination of the concentration maps in the TFYR, the subject property is located in a PCE groundwater contamination plume as indicated on the 2017 Contamination in Groundwater Eastern San Fernando Valley Map with concentrations of 50 up to 499 micrograms per liter ( $\mu\text{g}/\text{L}$ ). The 2019 PCE concentration map indicated estimated concentrations of 50-99  $\mu\text{g}/\text{L}$ . Based on the depth of groundwater in the vicinity of the subject property, vapor intrusion does not appear to be a concern.

The documented groundwater contamination associated with SFV Area 1 represents a REC; however, based on the identification of responsible parties for this NPL site and the fact that the subject property has no history of this type of hazardous materials usage on site, it is unlikely that the owner of the subject property would be financially responsible for the remediation of any contamination associated with this NPL site. Therefore, no further investigation is recommended at this time.

Controlled Recognized Environmental Condition (CREC) is defined by the current ASTM Standard E1527 as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the current ASTM Standard E1527 as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the current ASTM Standard E1527. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- Based on a review of historical aerials, the subject property may have historically been used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site, and that the subject property has been impacted by the use of such agricultural chemicals. In general, historical agricultural use is not the subject of environmental enforcement actions by regulatory agencies, and therefore, could be considered a de minimis condition. However, AEI understands that the subject property is slated for redevelopment. Consequently, it would be prudent for the owner of the subject property to determine whether sampling relating to the former agricultural use of the subject property is required by the local planning department or other applicable oversight agency prior to the commencement of redevelopment activities.
- According to historical and regulatory resources, the subject property resides in the vicinity of various industrial facilities within the San Fernando Valley Area 1 Superfund Site. Based on the location, the subsurface of the subject property may have also been impacted; however, groundwater is anticipated to reside approximately 180-feet bgs. Assessment of the subject property does not indicate that the subject property would be investigated as a source of potential contamination, and therefore, it is unlikely that the subject property owner would be responsible for any cleanup costs associated with a potential release. AEI understands the subject property is slated for

redevelopment for multifamily residential use. Should the User of this report desire a greater degree of certainty regarding the potential for vapor-phase contamination to the subject property, further investigation would be required.

- According to the regulatory database, Mel & Co Inc, adjoining the subject property to the south beyond West Empire Avenue, is listed on the PFAS ECHO database for operations that included metal plating. According to the National Association of Surface Finishing (NASF), beginning in 1995, the U.S. Environmental Protection Agency recommended the use of Perfluorooctanesulfonic acid (PFOS) as a fume/mist suppressant in the chromium electroplating process. The surface finishing industry voluntarily phased out the use of PFOS as a fume suppressant. The NASF proactively approached EPA and began a process that led to the industry itself requesting a national, industry-wide ban from EPA on the use of PFOS in chromium plating operations, which was finalized under a new federal Clean Air Act rule in 2012. The ban came into full effect in 2015. Although not currently classified as a hazardous substance, PFOS has been identified in waste streams at plating facilities (particularly chromium plating facilities).

The Burbank Airport is located approximately 1,450-feet west from the subject property. Airports have been identified as sources of perfluoroalkyl and polyfluoroalkyl substances (PFAS) contamination. Fire training areas in airports historically utilized aqueous film forming foam (AFFF) for fire training purposes. AFFF is a highly efficient type of fire suppressant agent, used by itself to attack flammable liquid pool fires. AFFF is usually created by combining foaming agents with fluorinated surfactants. PFAS are the active ingredient in these fluorinated surfactants. Based on GeoTracker, fire training areas were identified at this airport that may have utilized AFFF, or alcohol resistant AR-AFFF. Lockheed Martin facilities were formerly located adjoining the subject property to the west beyond North Ontario Street. This company was a manufacturer of aerospace, arms, defense, information security, and technology. It is possible that, due to operations associated with aircrafts and military defense that AFFF could have also been used.

PFAS are not currently classified by CERCLA as a hazardous substance and thus the potential presence of PFAS does not represent a REC at this time. However, the report User should be aware that regulatory criteria and classifications are subject to change. Based on the distance, AEI cannot rule out the potential that PFAS are present in groundwater beneath the subject property. If the groundwater beneath the subject property is slated for beneficial uses, additional investigations may be deemed warranted at that time. However, the subject property does not currently utilize groundwater beneath the subject property for beneficial uses. As such, additional investigations do not appear warranted at this time.

## CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and E1527-21, of 3001 West Empire Avenue, Burbank, Los Angeles County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

As listed in the Findings section above, this assessment has revealed recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps in connection with the subject property.

## RECOMMENDATIONS

AEI recommends no further investigation for the subject property at this time.

DRAFT

## 1.0 INTRODUCTION

---

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 3001 West Empire Avenue, Burbank, Los Angeles County, California ([Appendix A: Figures](#) and [Appendix B: Property Photographs](#)).

### 1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with the most current ASTM E1527 Standard associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

### 1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by the current ASTM Standard E1527. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

### 1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

## 1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under the current ASTM Standard E1527.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. The current ASTM Standard E1527 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the current ASTM Standard E1527.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

#### 1.5 LIMITING CONDITIONS/DEVIATIONS

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to [Section 6.3](#) for a summary of previous reports and other documentation provided to AEI during this assessment.
- Due to the large volume of vehicles within the parking areas of the subject property, direct visual observation of the ground in many areas was not possible. Features may be present that were not observed during AEI's site inspection.

#### 1.6 DATA FAILURE AND DATA GAPS

According to the current ASTM Standard E1527, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to the current ASTM Standard E1527, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to the current ASTM Standard E1527, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to the current ASTM Standard E1527, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

### 1.6.1 DATA FAILURE

The following data failure was identified during the course of this assessment:

Data Failure	The earliest historical resource obtained during this assessment was an aerial photograph from 1928 indicating that the subject property was developed agriculturally or vacant. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for agricultural purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, city directories, Sanborn fire insurance maps, agency records, previous report, interviews

Data Failure	Historical sources were not obtained at five-year intervals dating back to first developed use. Specifically, AEI was not able to track the history of the subject property between the years 1939 and 1947 as none of the historical sources utilized as part of this assessment covered this time period. In the 1938 aerial photograph, the subject property appears vacant and/or agriculturally developed. According to the Assessor's records, the subject property was developed with a parking lot in 1948. Thus, it is assumed that during this time period the subject property would have been vacant or agricultural, if not developed with a parking lot. Therefore, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, city directories, Sanborn fire insurance maps, agency records, previous report, interviews

### 1.6.2 SIGNIFICANT DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

### 1.7 RELIANCE

All reports, both verbal and written, are for the benefit of ABS Burbank, LLC. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by ABS Burbank, LLC on February 2, 2023. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

## 2.0 SITE AND VICINITY DESCRIPTION

### 2.1 SITE LOCATION AND DESCRIPTION

Property Information	
Site Address(es)	3001 West Empire Avenue, Burbank, Los Angeles County, California 91504
Property ID (APN or Block/Lot)	2464-006-045
Location	North side of West Empire Avenue
Property Type	Parking Lot
Site and Building Information	
Approximate Site Acreage/Source	0.6869/Assessor
Number of Buildings	Zero
Building Construction Date(s)/Source	N/A
Building Square Footage (SF)/Source	N/A
Number of Floors/Stories	N/A
Basement or Subgrade Area(s)	None identified
Number of Units	N/A
Additional Improvements	Asphalt-paved parking areas and associated landscaping
On-site Occupant(s)	N/A
Current On-site Operations/Use	Off-street parking
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	None identified

### 2.2 ON-SITE UTILITIES

The subject property is currently vacant land or lacks structures. Consequently, there are no on-site heating or cooling systems, or potable water or sewage disposal/treatment services.

### 2.3 SITE AND VICINITY CHARACTERISTICS

The subject property is located in a mixed residential and commercial area of Burbank, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Alleyway followed by: <ul style="list-style-type: none"> <li>Apartment building (2214 North Ontario Street)</li> <li>Residential triplex (2215 North Fairview Street)</li> </ul>	None identified
East	North Fairview Street followed by: <ul style="list-style-type: none"> <li>Parking lot (2212 North Fairview Street)</li> <li>Office building (2919 West Empire Avenue)</li> </ul>	Yes; refer to Section 5.1
South	West Empire Avenue followed by:	Yes; refer to Section 5.1

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
	<ul style="list-style-type: none"> <li>Mixed use industrial building with the following tenants: 1928 Jewelry/jewelry manufacturer, Film Play/video production, Enchanted Art/art gallery, Collectible Wizard/retail, Ron Lee Inc/ sculptures (3000 West Empire Avenue)</li> <li>All-Phase Electrical Supply (3020 West Empire Avenue)</li> <li>Specialty Lighting Distributors (3030 West Empire Avenue)</li> <li>Lawyers' Mutual Insurance Company/ office building (3110 West Empire Avenue)</li> </ul>	
West	North Ontario Street followed by: <ul style="list-style-type: none"> <li>Parking lot (no address provided)</li> </ul>	None identified

## 2.4 PHYSICAL SETTING

Geologic Unit: Description/Source	Q: Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated; from the Pleistocene-Holocene age/USGS and California Department of Conservation
Soil Series: Description/Source	1002: Urban land-Palmview-Tujunga complex, zero to five percent slopes. Consists of Urban land; Palmview and similar soils; Tujunga and similar soils; and the following minor components: Typic xerorthents, sandy substratum; and San emigdio. Urban land is noted to have a very high runoff class. The drainage class for Palmview is noted to be well drained with a very low runoff class. The drainage class for Tujunga is noted to be somewhat excessively drained with a negligible runoff class. The depth to water table and depth to restrictive feature are both listed as more than 80 inches for each soil composition. /USDA Soil Survey
Groundwater Flow Direction/Source	Southeast/Topographic map interpretation
Estimated Depth to Groundwater/Source	Estimated 180-feet bgs/ <i>No Further Requirements - Sierracin Corporation, 3020 Empire Avenue, Burbank, prepared by - California Regional Water Quality Control Board, Los Angeles Region (July 24, 1996)</i> ; located approximately 85-feet south of the subject property  /obtained from GeoTracker
Surface waters on the subject property or adjoining sites	None
Additional notes	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

### 3.0 HISTORICAL RECORDS REVIEW

Reasonably ascertainable standard historical sources as outlined in the current ASTM Standard E1527 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1928	Unknown use/Data failure; refer to <a href="#">Section 1.6.1</a>	Aerial photographs, Sanborn maps, agency records
1928-1938	Vacant and/or agricultural land	Aerial photographs
1939-1947	Unknown use/Data failure; refer to <a href="#">Section 1.6.1</a>	Aerial photographs, Sanborn maps, agency records
N/A	Current parking lot constructed	Agency records
1948-Present	Current parking lot (2200 North Ontario Avenue)	Aerial photographs, Sanborn maps, agency records, site observation

The following historical address was associated with the subject property: 2200 North Ontario Avenue. This address was also researched as part of this assessment.

Based on a review of historical aerials, the subject property may have historically been used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site, and that the subject property has been impacted by the use of such agricultural chemicals. In general, historical agricultural use is not the subject of environmental enforcement actions by regulatory agencies, and therefore, could be considered a de minimis condition. However, AEI understands that the subject property is slated for redevelopment. Consequently, it would be prudent for the owner of the subject property to determine whether sampling relating to the former agricultural use of the subject property is required by the local planning department or other applicable oversight agency prior to the commencement of redevelopment activities.

According to historical and regulatory resources, the subject property resides in the vicinity of various industrial facilities within the San Fernando Valley Area 1 Superfund Site (refer to Section 5.1 for additional discussion). Based on the location, the subsurface of the subject property may have also been impacted; however, groundwater is anticipated to reside approximately 180-feet bgs. Assessment of the subject property does not indicate that the subject property would be investigated as a source of potential contamination, and therefore, it is unlikely that the subject property owner would be responsible for any cleanup costs associated with a potential release. AEI understands the subject property is slated for redevelopment for multifamily residential use. Should the User of this report desire a greater degree of certainty regarding the potential for vapor-phase contamination to the subject property, further investigation would be required.

If available, copies of historical sources are provided in [Appendix D](#).

### 3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years (1928-2020, non-inclusive):

Year(s)	Subject Property Description	Adjoining Site Descriptions
1928	Appears to be vacant and/or agricultural land	NORTH: Vacant and/or agricultural land EAST: Roadway followed by vacant and/or agricultural land SOUTH: Roadway followed by vacant and/or agricultural land WEST: Roadway followed by vacant and/or agricultural land
1938	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: Roadway followed by commercial structures and vacant land WEST: No significant changes
1948*	Features not distinguishable due to poor image quality	Features not distinguishable due to poor image quality
1952, 1954	Appears developed with currently paved parking lot	NORTH: Roadway followed by residential structures to the east; followed by vacant lot to the west EAST: Roadway followed by residential building to the north; followed by alleyway and commercial building to the south SOUTH: Roadway followed by large commercial building and several smaller commercial structures WEST: Roadway followed by commercial structures and storage yard
1964	No significant changes	NORTH: Alleyway followed by current multi-family residential structures to the west; no significant changes to the east EAST: No significant changes SOUTH: Additional large commercial building; no other significant changes WEST: No significant changes
1970	No significant changes	NORTH: No significant changes EAST: Roadway followed by current parking lot to the north; no significant changes to the south SOUTH: Roadway followed by several small commercial buildings to the east; followed by large parking lot; followed by two current commercial buildings to the west WEST: Roadway followed by several large commercial structures
1977	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: Roadway followed by portion of large, current commercial building to the east; no significant changes to the west WEST: Roadway followed by what appears to be a storage yard

Year(s)	Subject Property Description	Adjoining Site Descriptions
1983	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: Additional developed to commercial structure to the east; no other significant changes WEST: No significant changes
1989	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: Additional development to commercial building to the east; no other significant changes WEST: Roadway followed by vacant lot
1994	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: Current commercial building to the far west; no other significant changes WEST: No significant changes
2002, 2005, 2009, 2012, 2016, 2020	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: No other significant changes WEST: Roadway followed by current parking lot

Subject property:

- Agricultural land - Refer to [Section 3.0](#)

Adjoining Site(s):

- Industrial facilities - Refer to [Section 5.1](#)

\*Due to poor image quality and/or scale, detailed observation of site features was not possible.

### 3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

The following maps were reviewed (1953-1969, non-inclusive):

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
1953, 1954	Auto parking lot (2200 North Ontario)	NORTH: Alleyway followed by vacant lot to the west and residential dwelling to the east EAST: North Fairview followed by residential triplex to the north; followed by alleyway and machine shop to the south SOUTH: West Empire Avenue followed by office buildings, Chair Manufacturer, Foundry to the east; followed by Tractor and

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
		Equipment Repair & Welding shop with gas & oil in yard, machine shop, and office; followed by vacant lot to the west WEST: North Ontario followed by steel storage yard, sheet metal storage building, steel cuttings, outbuildings, and building labeled "oxygraphy" potentially associated with the Lockheed Aircraft Corporation to the north
1956	No significant changes	NORTH: Alleyway followed by 10-unit flat with pool to the west; no significant changes to the east EAST: No significant changes SOUTH: West Empire Avenue followed by offices, machine shops, and a shed to the east; no significant changes to the west WEST: No significant changes other than sheet metal storage building no longer present and oxygraphy building now labeled as an office
1960	No significant changes	NORTH: No significant changes EAST: North Fairview followed by office building to the south; no significant changes to the north SOUTH: No significant changes WEST: No significant changes
1966	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: West Empire Avenue followed by machines shops, office, and Metal and Molding to the east; followed by Tractor Equipment Repair and offices; followed by Machinery Warehouse, office, and Machine Shop; followed by Airfield Equipment Storage Yard to the west WEST: No significant changes
1968	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes other than machine shop toward the west labeled as Metal Products Assembly building WEST: No significant changes
1969	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: Tractor Equipment Repair building replaced by parking lot; no other significant changes WEST: No significant changes

Subject property:

- No potential environmental concerns identified

Adjoining Site(s):

- Multiple industrial facilities - Refer to [Section 5.1](#)

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. No potential tenants of concern were identified based on AEI's review of the historical city directories. Directories were reviewed in approximate five-year increments from 1920-2014, non-inclusive. There were no listings identified for the subject property.

A search of historical city directories was also conducted for the adjoining sites noted below utilizing EDR. Please refer to the appendices for a complete list of historical adjoining site tenants identified by EDR. The table below summarizes the potential tenants of concern based on AEI's review of the historical city directories.

*Adjoining Site Addresses*

Direction	Address(es)
North	2214-2216 North Ontario Street, inclusive 2215 North Fairview Street
East	2200-2216 North Fairview Street 2917-2919 West Empire Avenue
South	2910-3110 West Empire Avenue
West	No address identified

*Adjoining Properties*

Year(s)	Address - Tenant/Use of Concern
EAST	
1962-1976	2919 Empire Avenue - Products Research & Chemical Corp
1980	2919 Empire Avenue - Sunbank Corporate Headquarters
SOUTH	
1942-1958	3020 Empire Avenue - Barber & Bridge Drilling Corp
1942-1962	2910 Empire Avenue - Wagner Permant Mold Co/iron foundry
1980	2928 West Empire Avenue - Chemstop Mfg Corp Paint Mfr (Sealants)
1970-2006	3020 Empire Avenue - Harrison Manufacturing Division/Sierracin Corp
1950	3010 Empire Avenue - Masonry Contractors
1980-1985	3030 Empire Avenue - Temcom Inc
1980-1991	3000 West Empire Avenue - Accessory Plating
1980-2006	3000 West Empire Avenue - 1928 Jewelry Co
1995-2010	3030 Empire Avenue - Associated Components Manufacturing Inc.
2010-2014	3000 West Empire Avenue - Mel Bernie and Company Inc

Subject property:

- No potential environmental concerns identified

Adjoining Site(s):

- Plating facility, industrial facilities, and other facilities of concern - Refer to [Section 5.1](#)

#### 3.4 HISTORICAL TOPOGRAPHIC MAPS

The subject property is located in a historically urban area. Due to the lack of additional pertinent information typically obtained during review of topographic maps in such areas, historical topographic maps were not reviewed as part of this assessment.

#### 3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

DRAFT

## 4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

### 4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles County Public Health Investigation (LA PHICOR)	February 3, 2023	Email	Ms. Na'Keya Haslett, Deputy Health Officer	No records on file

### 4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Burbank Fire Department (BFD)	February 3, 2023	Email	Mr. Eric Ortega, Engineering Technician - Wastewater Systems	No records on file

### 4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
City of Burbank Building & Safety Division (BBSD)	February 3, 2023	Email	Ms. Sona Ovayan, Permit Technician	Records discussed below

#### Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
No date provided	Golden State Redevelopment Project	Document that notes property to be vacant and paved for parking for 2919 Empire

Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the BBSD.

### 4.4 PLANNING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
City of Burbank Planning Department (BPD)	February 3, 2023	Email	Ms. Karen Chavez, Assistant Planner	No evidence indicating the existence of AULs on file for the subject property

#### 4.5 ASSESSOR'S OFFICE

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles County Assessor's Office	February 3, 2023	Online	N/A	Information obtained is discussed below

#### Records Summary

APN	2464-006-045
Acreage	0.6869 acres
Construction Date	N/A
Building Square Footage	N/A
Current Owner	Not provided
Additional Information	N/A

#### 4.6 OTHER AGENCIES SEARCHED

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	February 10, 2023	Online	N/A	No records on file
SWRCB GeoTracker Historical Hazardous Substance Storage Information	February 10, 2023	Online	N/A	No records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	February 10, 2023	Online	N/A	No records on file
CA DTSC EnviroStor	February 10, 2023	Online	N/A	No records on file
CalEPA Regulated Site Portal	February 10, 2023	Online	N/A	No records on file
South Coast Air Quality Management District (SCAQMD)	February 10, 2023	Online	N/A	No records on file

#### 4.7 OIL AND GAS WELLS

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Geologic Energy Management Division (CalGEM)	February 10, 2023	CalGEM Map	No

#### 4.8 OIL AND GAS PIPELINES

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	February 10, 2023	NPMS Public Map Viewer	No

#### 4.9 STATE ENVIRONMENTAL SUPERLIENS

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

#### 4.10 STATE PROPERTY TRANSFER LAWS

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

## 5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The minimum search distance from the federal and state environmental records database listings specified in the current ASTM Standard E1527 is included in Section 5.1. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below as well as the total number of sites identified, is included in [Appendix C](#) of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

### 5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern
Federal NPL (Superfund) sites	1.0			✓
Federal Delisted NPL sites	0.5			
Federal CERCLA removals/orders sites	0.5			✓
Federal CERCLA sites with NFRAP	0.5			✓
Federal RCRA facilities undergoing Corrective Action	1.0			
Federal RCRA TSD facilities	0.5			
Federal RCRA generators (LQG, SQG, VSQG)	SP/ADJ		✓	
Federal RCRA NonGen/NLR sites	SP/ADJ			
Federal IC/EC sites	SP			
Federal ERNS sites	SP			
State- and tribal "Superfund" equivalent sites	1.0			
State- and tribal hazardous waste facilities	0.5		✓	
State/Tribal landfill and solid waste disposal facilities	0.5			
State/Tribal leaking storage tanks	0.5		✓	✓
State/Tribal registered storage tanks	SP/ADJ			
State/Tribal voluntary cleanup sites	0.5			

Database	Search Distance (Miles)	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern
State/Tribal EC/IC registries	SP			
State/Tribal brownfield sites	0.5			
Orphans	N/A			✓
Additional Environmental Record lists	SP/ADJ		✓	

Facility Name	Mel Bernie & Co Inc; 1928 Jewelry Company; Accessory Plating
Address	3000 West Empire Avenue; 34.19195/-118.34349
Distance & Direction	Adjoining to the south beyond West Empire Avenue (approximately 90-feet away)
Hydrologic Position	Down-gradient
Databases Listed	RCRA-LQG, FINDS, HWTS, ENVIROSTOR, HIST UST (2), EMI, ENF, HAZNET, WIP, CPS-SLIC, NPDES, WDS, CIWQS, CERS, PFAS ECHO
Comments	<p>Mel Bernie &amp; Co. Inc. was listed as a RCRA LQG for the generation of hazardous wastes in the years 1980, 1990, 1992, 1994, 1996, 1999, 2000, 2002, 2004, 2006, 2008, 2010, 2012, and 2016. The following types of hazardous wastes were identified: Ignitable Waste, Corrosive Waste, Reactive Waste, Lead, Silver, Spent Nonhalogenated Solvents, Sludges from Electroplating Operations, Spent Cyanide Plating, Plating Bath Residues, and Spent Stripping and Cleaning Bath Solutions from Electroplating Operations. The following NAICS Descriptions are provided: "Electroplating, Plating, Polishing, Anodizing, and Coloring", "Carbon and Graphite Product Manufacturing", and "Costume Jewelry and Novelty Manufacturing". The following violations were listed:</p> <ul style="list-style-type: none"> <li>• 2001 - Generators - General</li> <li>• 2001 - TSD - General Facility Standards</li> <li>• 2001 - TSD - Tank System Standards</li> </ul> <p>This site is listed twice in the Historical Underground Storage Tank (HIST UST) database with three (3) underground storage tanks. All three tanks were reportedly installed in 1977 and each is listed as a 2,000-gallon sump-containing plating effluent. No further information was available in this database.</p> <p>This site is identified as an Envirostor site on the regulatory database. The Envirostor database is maintained by the Department of Toxic Substances Control (DTSC) and identifies sites that have known contamination or sites for which further investigation is warranted. The status of the site is listed as "Refer: Other Agency". No further information was available in this database.</p> <p>This site is listed in the Emissions Inventory Data (EMI) database. Toxics and criteria pollutant emissions data are collected by the ARB and local air pollution agencies. Emissions generated by this facility were reported to the AQMD from 1987 until 2005. No further information was provided in the database.</p>

"Accessories Plating" was listed in the Spills, Leaks, Investigations and Cleanup (SLIC) database. The database and GeoTracker indicate a status of "Completed - Case Closed" as of December 23, 2014. Copies of documents available from the RWQCB were dated February 22 and September 15, 2006. The No Further Requirements for Chromium VI investigation letter dated September 15, 2006 referred to the Board's heavy metals investigation in the San Fernando Valley. The board included the statement that it should be noted that this letter in no way releases this site from responsibility regarding other chemicals or release to the environment. No further information was available in this database.

The WIP (Well Investigation Program) database lists "1928 Jewelry Company" with a "Backlog" status. The Los Angeles Regional Water Quality Control Board (LARWQCB) has been investigating sources of groundwater contamination in the San Fernando Valley under its Underground Tank and Well Investigation Programs since 1984 in an attempt to identify sources contributing to groundwater pollution. No further information is provided in the database. Please see the San Fernando Valley Area 1 discussion below for further details.

"Accessory Plating" was identified in the PRP database in relation to the San Fernando Valley Superfund site. PRP is a list of verified Potentially Responsible Parties. The Data Type is listed as "General Notice" with an Action Date of 4/13/1989. No additional information was provided.

This site is listed in the Enforcement Action Listing (ENF) database. This is a listing of Water Board Enforcement Actions. On November 9, 2000, a 13267 Letter was issued regarding the WIP program. No further information was available in this database.

This site is listed in the National Pollutant Discharge Elimination System (NPDES) database as well as the Waste Discharge System (WDS) database. Listings in this database indicate that the site has been issued waste discharge requirements. This site is listed as a minor threat to water quality.

This site is listed in the California Integrated Water Quality System (CIWQS) database. The CIWQS is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections and manage violations and enforcement activities. According to the CERS database, violations were issued to Mel Bernie Company in 2015 and 2016 for failure to submit stormwater samples and failure to submit missing annual reports. These violations were subsequently corrected.

The Hazardous Waste Tracking System (HWTS) created a temporary listing for "Mel Bernie & Company, Inc DBA" in February 2017 with an inactive status as of May 2017. An associated listing in the Facility and Manifest Data (HAZNET) database notes a manifest of 0.125 tons of "141 - Off-specification, aged, or surplus inorganics" in 2017.

This property is listed as a FINDS site in association with the Mel Bernie & Co. Inc. listing. Based on the nature of this listing, it is not expected to represent a significant environmental concern.

This site is also listed in the PFAS ECHO database, please refer to [Section 8.5](#) for further discussion of emerging contaminants.

Based on the current regulatory status, the depth of groundwater, and inferred direction of groundwater, these listings are not expected to represent a significant environmental concern at this time.

Facility Name	Sierracin-Harrison
Address	3020 Empire Avenue
Distance & Direction	Adjoining to the south beyond West Empire Avenue (approximately 90-feet away)
Hydrologic Position	Down-gradient
Databases Listed	CPS-SLIC, EMI, ENF, WIP, CERS
Comments	<p>This site is listed in the Emissions Inventory Data (EMI) database. Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies. Emissions from this site were reported to AQMD from 1987 until 2004. No further information was provided in the database.</p> <p>The CERS database provides the following CERS Descriptions for this site: "Cleanup Program Site" and "US EPA Air Emission Inventory System (EIS)". No further information is provided in this database.</p> <p>This site was listed in the Spills, Leaks, Investigations and Cleanup (SLIC) database. The database indicates a status of "Open-Inactive" as of October 29, 2014. The potential contaminants of concern were listed as Chromium and VOCs. Online records reviewed on GeoTracker included a No Further Requirements Letter issued by RWQCB on July 24, 1996 after reviewing a Soil Gas Investigation and a No Further Requirements Letter issued on July 6, 2005 indicating that no further requirements with respect to the RWQCB heavy metals investigation in the San Fernando Valley was complete, however, it should be noted that the letter in no way releases this site from responsibility regarding other chemicals or releases to the environment.</p> <p>This site is listed in the Well Investigation Program (CA WIP) database. The Los Angeles Regional Water Quality Control Board (LARWQCB) has been investigating sources of groundwater contamination in the San Fernando Valley under its Underground Tank and Well Investigation Programs since 1984 in an attempt to identify sources contributing to groundwater pollution. The file status is listed as "Backlog". No further information is provided in the database.</p> <p>This site is listed in the Enforcement Action Listing (ENF) database. This is a listing of Water Board Enforcement Actions. On November 9, 2000 a 13267 Letter was issued regarding the WIP program. No further information was available in this database.</p> <p>Based on the issued NFRs, the inactive status, depth of groundwater, and the inferred direction of groundwater, the review of regulatory files for this adjacent site was not deemed necessary and the listings are not expected to represent a significant environmental concern at this time.</p>

Facility Name	Associated Components Mfg. Inc.
Address	3030 Empire Avenue
Distance & Direction	Adjoining to the south beyond West Empire Avenue (approximately 90-feet away)
Hydrologic Position	Down-gradient
Databases Listed	CPS-SLIC, WIP

Comments	<p>This site was listed in the Spills, Leaks, Investigations and Cleanup (SLIC) database as part of a Well Investigation Program. The database indicates a status of "Completed - Case Closed as of 4/19/1998". No further information is provided in the database.</p> <p>This site is listed in the Well Investigation Program (CA WIP) database. The Los Angeles Regional Water Quality Control Board (LARWQCB) has been investigating sources of groundwater contamination in the San Fernando Valley under its Underground Tank and Well Investigation Programs since 1984 in an attempt to identify sources contributing to groundwater pollution. The file status is listed as "Historical". No further information is provided in the database.</p> <p>Based on the regulatory status, depth of groundwater, and inferred direction of groundwater, the review of regulatory files for this adjacent site was not deemed necessary and the listings are not expected to represent a significant environmental concern at this time.</p>
----------	---

Facility Name	Cadam; I K Curtis Services Inc; I K Curtis Svcs Inc
Address	2907 Empire Avenue; 2919 Empire Avenue
Distance & Direction	Adjoining to the east beyond North Fairview Street (approximately 60-feet away)
Hydrologic Position	Down-gradient
Databases Listed	CPS-SLIC (2), HIST UST (2), WIP (2), RCRA-SQG, FINDS, ECHO, HWTS, HAZNET
Comments	<p>This site is listed in the Historical Underground Storage Tank (HIST UST) database. One UST is listed that reportedly contained photographic chemicals. Details regarding installation date, capacity or status were not reported in this database.</p> <p>This site was listed in the Spills, Leaks, Investigations and Cleanup (SLIC) database twice as part of a Well Investigation Program. The database indicates a status of "completed-case closed" as of April 12 and 19, 1988. No further information was provided.</p> <p>This site is listed twice in the Well Investigation Program (CA WIP) database. The Los Angeles Regional Water Quality Control Board (LARWQCB) has been investigating sources of groundwater contamination in the San Fernando Valley under its Underground Tank and Well Investigation Programs since 1984 in an attempt to identify sources contributing to groundwater pollution. The file status is listed as "Historical" for each. No further information is provided in the database.</p> <p>"I K Curtis Svcs Inc" was listed as a RCRA-SQG for the generation of hazardous wastes in the year 1992. Hazardous wastes were not identified in this listing. The NAICS Description provided is "All Other Business Support Services". No violations were identified in connection with the RCRA listing.</p> <p>The Hazardous Waste Tracking System (HWTS) created a permanent listing for "I K Curtis Services Inc" in March 1992 with an inactive date as of June 1998. An associated listing in the Facility and Manifest Data (HAZNET) database notes a manifest of the following wastes: "Photochemicals/photoprocessing waste", "Other inorganic solid waste", "Metal sludge", and "Unspecified aqueous solution" from 1993-1997.</p>

	<p>This property is listed as a FINDS and ECHO site in association with the "I K Curtis Svcs Inc" listing. No violations or enforcement actions were identified on the EPA websites Envirofacts and ECHO.</p> <p>Based on the closed regulatory status, non-release nature of the other listings, and the depth of groundwater, the review of regulatory files for this adjacent site was not deemed necessary and the listings are not expected to represent a significant environmental concern at this time.</p>
--	---

Facility Name	San Fernando Valley (Area 1)
Address	North Hollywood Wellfield
Distance & Direction	Immediate vicinity of the subject property
Hydrologic Position	N/A
Databases Listed	NPL, SEMS, PRP, ORPHAN (CHMIRS, CA BOND EXP. PLAN)
Comments	<p>The subject property is located inside the San Fernando Valley Area 1 Superfund Site. This site is listed in the National Priorities List (NPL) database. Also known as Superfund sites, the NPL lists sites that have known releases or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States and its territories.</p> <p>This site is listed in multiple databases, all relating to the NPL listing. Based on information obtained from the EPA's Third Five Year Review (TFYR) dated September 21, 2018, The San Fernando Valley Area 1 Superfund Site (SFV Area 1) consists primarily of two large plumes from multiple sources in the San Fernando Valley. Site contaminant sources include, but are not limited to, the former Bendix Aviation and Allied Signal-Aerospace Company facilities in North Hollywood (successor cooperation is now Honeywell International), the former Lockheed Martin Corporation facilities near the Burbank Airport, and many other known sources throughout Area 1.</p> <p>Trichloroethene (TCE) and tetrachloroethene (PCE) were widely used in the San Fernando Valley starting in the 1940s for dry cleaning and for degreasing machinery. Disposal was not well-regulated at that time, and releases from a large number of facilities throughout the eastern SFV Area 1 have resulted in the large plume of VOC-contaminated groundwater that starts in the Area 1 Site and extends southeast, down-gradient, through the San Fernando Valley Superfund, Area 2, Site and through the San Fernando Valley Superfund, Area 4, Site.</p> <p>Based on an examination of the concentration maps in the TFYR, the subject property is located in a PCE groundwater contamination plume as indicated on the 2017 Contamination in Groundwater Eastern San Fernando Valley Map with concentrations of 50 up to 499 micrograms per liter (µg/L). The 2019 PCE concentration map indicated estimated concentrations of 50-99 µg/L. Based on the depth of groundwater in the vicinity of the subject property, vapor intrusion does not appear to be a concern.</p> <p>The documented groundwater contamination associated with SFV Area 1 represents a REC; however, based on the identification of responsible parties for this NPL site and the fact that the subject property has no history of this type of hazardous materials usage on-site, it is unlikely that the owner of the subject property would be financially responsible for the remediation of any contamination associated with this NPL site. Therefore, no further investigation is recommended at this time.</p>

Additional listings: This facility was also listed on other databases as noted above; however, as these listings are not associated with a release, the radii prescribed by the current ASTM Standard E1527 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.

Facility Name	Lockhead A-1 East, Bldg 90
Address	3110 West Thornton Avenue
Distance & Direction	1,200-feet northwest
Hydrologic Position	Up-gradient
Databases Listed	CPS-SLIC, WIP, CERS
Comments	<p>Based on the CPS-SLIC database and GeoTracker, Lockheed Martin occupied a 9-acre site from 1942 through 1994. This property was used for various chemical storage, equipment storage, and support operations from 1943 to 1968. A 15,000-gallon aboveground storage tank which contained tetrachloroethene (PCE) and trichloroethene (TCE) was previously located at the northwest corner of the site. In 1969, Lockheed Martin built the present Building 90, a four-story office building. The property was sold and remodeled in 1996.</p> <p>From May 1994 to 1995, Lockheed Martin conducted multi-phase soil gas and soil assessments to locate potential sources of contamination (VOCs and non-VOCs), and remediate them, if warranted. The investigation indicated that subsurface sediments beneath the site consisted primarily of sand and gravelly sands with minor silt and silty sand. Elevated concentrations of PCE and TCE were detected at maximum concentrations of 28,100 micrograms per liter (<math>\mu\text{g}/\text{L}</math>) (140-feet below ground surface [bgs]) and 501 <math>\mu\text{g}/\text{L}</math> (130-feet bgs), respectively in the northwest part of the site near the former PCE/TCE aboveground tank. VOC concentrations generally increased with depth from approximately 100-feet to 170-feet bgs. The remainder of the site had low to nondetectable concentrations of contaminants in soil matrix and soil gas samples. On November 16, 1995, Regional Board staff issued a no further investigation letter, except the VOC-contamination in the northwest part of the site.</p> <p>On March 7, 1996, Regional Board staff approved Lockheed Martin's proposed remediation program to remediate VOCs beneath the northwest part of the site using VES technology. Lockheed Martin operated the VES from January 1997 through December 1997. The VES was shut down based on monitoring probes that showed VOC concentrations below the calculated soil screening concentration or reaching asymptotic condition. After the VES shutdown, rebound testing was conducted from January 1998 to December 1998. Rebound test results indicated that PCE, TCE and 1,1-dichloroethene (1,1-DCE) concentrations in some monitoring probes exceeded 50% of the calculated VOC screening level (Tier 1 criteria for closure) based on the Regional Board's Interim Site Assessment and Cleanup Guidebook (May 1996). On July 11, 2000, Regional Board staff required Lockheed Martin to restart the VES to remove additional VOC mass. Two rounds of short-term VES pulsing and rebound testing activities were conducted from September 2000 to January 2001 and from February 2002 to April 2002. The VES was shut down for a year between the two pulsing events to evaluate VOC rebound. Approximately 5,277 pounds of total VOC mass was removed during the full-scale operation and two pulsing events of the VES. Following the final VES shutdown on April 2002, the monitoring probes were sampled one month and six months after the pulsing</p>

event. PCE, TCE and 1,1-DCE rebound concentrations detected from the monitoring probes during the VES pulsing and rebound testing activities meet the Tier 1 criteria for closure, except VOC concentrations from the deepest probe (170 feet bgs). PCE, TCE and 1,1-DCE rebound concentrations are below the U. S. Environmental Agency's (USEPA) Region 9 Preliminary Remediation Goals (PRG) for residential and industrial land use (2002).

PCE, TCE, and 1,1-DCE were significantly reduced compared to baseline concentrations and asymptotic conditions were attained. VLEACH modeling indicated that residual VOCs will not further degrade groundwater quality beneath the site.

Lockheed Martin currently monitors and treats the groundwater in the Burbank Operable Unit (BOU), including the subject site. In February 2003, they received "soil only" closure from the Regional Board. The case is listed as "Completed - Case Closed as of 8/31/2016". Please refer to the San Fernando Valley NPL discussion above for more information.

Additional listings: This facility was also listed on other databases as noted above; however, as these listings are not associated with a release, the radii prescribed by the current ASTM Standard E1527 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.

Facility Name	Lockheed A-1, B85, Lots 16, 16A
Address	3220 West Thornton Avenue
Distance & Direction	1,275-feet northwest
Hydrologic Position	Up-gradient
Databases Listed	CPS-SLIC, WIP, CERS
Comments	<p>According to the CPS-SLIC database and GeoTracker, this site was listed with potential contaminants of concern which include chromium and volatile organic compounds (VOCs). These had the potential to affect an aquifer used for drinking water supply.</p> <p>An SVE system has operated at this site to remove VOCs. The case status is listed as "Open - Site Assessment as of 1/3/1990". No further information is provided for this listing. Please refer to the San Fernando Valley NPL discussion above for more information.</p> <p>Additional listings: This facility was also listed on other databases as noted above; however, as these listings are not associated with a release, the radii prescribed by the current ASTM Standard E1527 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.</p>

Facility Name	Lockheed Martin Plant A-1 North
Address	2555 North Hollywood Way
Distance & Direction	1,515-feet northwest
Hydrologic Position	Up-gradient
Databases Listed	SEMS-ARCHIVE, RCRA-SQG, CA BOND EXP. PLAN, ENVIROSTOR, CPS-SLIC, CERS (2), LUST (2), Cortese (2), ENF HIST Cortese, CIWQS, CERS, SWEEPS UST, CA FID UST, Los Angeles Co. HMS, WIP
Comments	<p>Based on the regulatory database, this site was listed as a SEMS-ARCHIVE site with the following non-NPL status: "NFRAP - Site does not qualify for the NPL based on existing information". A finish date is listed in November 1992. Please refer to the San Fernando Valley NPL discussion above for more information.</p> <p>Additional listings: This facility was also listed on other databases as noted above; however, as these listings are not associated with a release, the radii prescribed by the current ASTM Standard E1527 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.</p>

## 5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

## 6.0 INTERVIEWS AND USER PROVIDED INFORMATION

### 6.1 INTERVIEWS

Pursuant to the current ASTM Standard E1527, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

#### 6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner Representative	Mr. Gary C. Arian, CFO, 1928 Jewelry Company	February 8, 2023	Email	2014	Interviewed; see Interview Summary table below
Key Site Manager	Ms. Maribel Pacheco, Office Administrator, 1928 Jewelry Company	February 8, 2023	Email	1977	Interviewed; see Interview Summary table below

#### INTERVIEW SUMMARY

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	No	No
Do you have any knowledge of previous environmental investigations conducted on site?	No	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	No	No
Are you aware of any known plans for site redevelopment or change in site use?	No	No
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	No	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	No	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	No	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	No	No

#### 6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

### 6.1.3 INTERVIEW WITH OTHERS

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

### 6.2 USER PROVIDED INFORMATION

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to the current ASTM Standard E1527 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User Questionnaire was completed by Mr. Samir Srivastava, Managing Member of ABS Burbank LLC, User. The following table represents information contained therein.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)  Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	No
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi).  Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	No
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).  Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	No
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).  Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Yes
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).  Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the	No

Question	Response/ Comment
property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).  Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	No

### 6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION

Documentation was provided to AEI by the User during this assessment. A summary of this information follows:

*Phase I Environmental Site Assessment (3001 West Empire Avenue; Burbank, Los Angeles County, California 91504), prepared by - AEI Consultants (March 20, 2019)*

This report describes the subject property generally consistent with current conditions with the following exceptions:

- The groundwater was interpreted to flow in a southerly direction as opposed to the southeasterly direction identified in the current report.
- Due to the difference in gradient, the previous report identified additional nearby sites in Section 5.1; however, are not expected to represent a significant environmental concern.

#### Conclusions:

- REC based on historical agricultural use and understanding that the subject property was slated for residential and commercial redevelopment
- REC based on the location of the subject property inside the San Fernando Valley Area 1 Superfund Site
- Recommendation for on-site sampling to determine if the subject property had been significantly impacted in connection with the historical agricultural use for the protection of the construction workers and future occupants of the subject property

A copy of the report is included in the appendices.

### 6.4 ENVIRONMENTAL LIEN SEARCH

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

## 7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	February 9, 2023
AEI Site Assessor(s)	Jay Cudmore
Property Escort(s)/ Relationship(s) to Property	No property escort was present during site reconnaissance
Units/Areas Observed	Buildings: N/A Exterior areas: All
Area(s) not accessed and reason(s)	N/A
Other Physical Constraints	<ul style="list-style-type: none"> <li>Large volume of parked vehicles</li> </ul> <p>Refer to <a href="#">Section 1.5</a> for discussion of limiting conditions</p>
General Observations	The property includes a parking lot.

### Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids	✓	✓
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers	✓	✓
Pits, Ponds, and Lagoons		
Stained Soil or Pavement	✓	
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems or Cesspools		
Biomedical Wastes		
Other		

### 7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

### 7.1.1 ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

#### *Transformers*

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/No)	Non-PCB Label (Yes/No)
Pole-Mounted	One (1)	Burbank Power and Water	Unknown	No	No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the transformer. Based on the good condition of the equipment, the transformer is not expected to represent a significant environmental concern.

### 7.1.2 DRAINS, SUMPS, AND CLARIFIERS

Storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

### 7.1.3 STAINED SOIL AND PAVEMENT

Minor amounts of oily surface staining were observed in the parking area. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not expected to represent a significant environmental concern.

## 7.2 ADJOINING PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

### 7.2.1 ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

One pole-mounted transformer was observed on an adjoining site during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformer. Based on the good condition of the equipment, the transformer is not expected to represent a significant environmental concern.

### 7.2.2 DRAINS, SUMPS, AND CLARIFIERS

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

## 8.0 NON-ASTM SERVICES

---

### 8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

The subject property is currently vacant land or lacks structures. Consequently, no building components containing suspect asbestos containing materials were identified during the site inspection.

### 8.2 LEAD-BASED PAINT

The subject property is currently vacant land or lacks structures. Consequently, AEI did not observe building components likely to contain suspect LBP during the site reconnaissance.

### 8.3 NATURALLY-OCCURRING RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

Radon sampling was not requested as part of this assessment. According to the California Department of Health Services Radon Database, 47 tests were conducted for radon levels in the subject property zip code (91504) in 2016. All of these tests indicated that radon levels were below the action level of 4.0 pCi/L set forth by the United States EPA. Therefore, radon is not expected to represent a significant environmental concern.

### 8.4 SUSPECT MOLD OR MICROBIAL GROWTH CONDITIONS

The subject property is currently vacant land or lacks structures. Consequently, mold was not addressed as part of this assessment.

### 8.5 EMERGING CONTAMINANTS

As defined in Section 3.2.36 the ASTM Standard, hazardous substance means “those substances defined as a hazardous substance pursuant to CERCLA 42 USC § 9601(14), as interpreted by EPA regulations and the courts.” There are some substances that non-environmental professionals and others may assume to be hazardous substances that are not defined (or not yet defined) as hazardous substances under CERCLA, through interpretation by EPA regulations and the courts. These substances may include: (i) some substances that occur naturally or through biological digestion (for example, methane), and (ii) substances about which human understanding is evolving (for example, per- and polyfluoroalkyl substances, also known as “PFAS”). These and any other “emerging contaminants,” where they are not identified as a hazardous substance by CERCLA, as interpreted by EPA regulations and the courts, are not included in the scope of this standard. Some of these substances may be considered a “hazardous substance” (or equivalent) under applicable state laws. In those instances, where a Phase I Environmental Site Assessment is performed to satisfy both federal and state requirements, or as directed by the user of the report, it is permissible to include analysis and/or discussion of these substances, in the same manner as any other Non-Scope Consideration. If and when such emerging contaminants are defined to be a hazardous substance under CERCLA, as interpreted by EPA regulations and the courts, such substances shall be evaluated within the scope of this standard.

Based on AEI's historical research of the subject property, the subject property does not appear to be a potential source of PFAS contamination.

According to the regulatory database, Mel & Co Inc, adjoining the subject property to the south beyond West Empire Avenue, is listed on the PFAS ECHO database for operations that included metal plating. According to the National Association of Surface Finishing (NASF), beginning in 1995, the U.S. Environmental Protection Agency recommended the use of Perfluorooctanesulfonic acid (PFOS) as a fume/mist suppressant in the chromium electroplating process. The surface finishing industry voluntarily phased out the use of PFOS as a fume suppressant. The NASF proactively approached EPA and began a process that led to the industry itself requesting a national, industry-wide ban from EPA on the use of PFOS in chromium plating operations, which was finalized under a new federal Clean Air Act rule in 2012. The ban came into full effect in 2015. Although not currently classified as a hazardous substance, PFOS has been identified in waste streams at plating facilities (particularly chromium plating facilities).

The Burbank Airport is located approximately 1,450-feet west from the subject property. Airports have been identified as sources of perfluoroalkyl and polyfluoroalkyl substances (PFAS) contamination. Fire training areas in airports historically utilized aqueous film forming foam (AFFF) for fire training purposes. AFFF is a highly efficient type of fire suppressant agent, used by itself to attack flammable liquid pool fires. AFFF is usually created by combining foaming agents with fluorinated surfactants. PFAS are the active ingredient in these fluorinated surfactants. Based on GeoTracker, fire training areas were identified at this airport that may have utilized AFFF, or alcohol resistant AR-AFFF. Lockheed Martin facilities were formerly located adjoining the subject property to the west beyond North Ontario Street. This company was a manufacturer of aerospace, arms, defense, information security, and technology. It is possible that, due to operations associated with aircrafts and military defense that AFFF could have also been used.

PFAS are not currently classified by CERCLA as a hazardous substance and thus the potential presence of PFAS does not represent a REC at this time. However, the report User should be aware that regulatory criteria and classifications are subject to change. Based on the distance, AEI cannot rule out the potential that PFAS are present in groundwater beneath the subject property. If the groundwater beneath the subject property is slated for beneficial uses, additional investigations may be deemed warranted at that time. However, the subject property does not currently utilize groundwater beneath the subject property for beneficial uses. As such, additional investigations do not appear warranted at this time.

## 9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

---

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

3001 W EMPIRE AVE AND 2220 N FAIRVIEW ST  
BURBANK, CA 91504

#### COORDINATES

Latitude (North): 34.1923560 - 34° 11' 32.48"  
Longitude (West): 118.3435880 - 118° 20' 36.91"  
Universal Transverse Mercator: Zone 11  
UTM X (Meters): 376195.9  
UTM Y (Meters): 3784105.2  
Elevation: 659 ft. above sea level

### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property Map: 5630791 BURBANK, CA

# EXECUTIVE SUMMARY

## **TARGET PROPERTY SEARCH RESULTS**

The target property was identified in the following records. For more information on this property see page 9 of the attached EDR Radius Map report:

<u>Site</u>	<u>Database(s)</u>	<u>EPA ID</u>
SAN FERNANDO VALLEY POLLOCK WELLFIELD LOS ANGELES, CA 90086	NPL Cerclis ID:: 902253 EPA Id: CAD980894976  SEMS Site ID: 0902253 EPA Id: CAD980894976  PRP	CAD980894976

## **DATABASES WITH NO MAPPED SITES**

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

Proposed NPL..... Proposed National Priority List Sites  
NPL LIENS..... Federal Superfund Liens

### ***Lists of Federal Delisted NPL sites***

Delisted NPL..... National Priority List Deletions

### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY..... Federal Facility Site Information listing

### ***Federal institutional controls / engineering controls registries***

LUCIS..... Land Use Control Information System

### ***Federal ERNS list***

ERNS..... Emergency Response Notification System

### ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF..... Solid Waste Information System

### ***Lists of state and tribal leaking storage tanks***

INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land

## EXECUTIVE SUMMARY

### ***Lists of state and tribal registered storage tanks***

FEMA UST..... Underground Storage Tank Listing  
INDIAN UST..... Underground Storage Tanks on Indian Land

### ***Lists of state and tribal voluntary cleanup sites***

VCP..... Voluntary Cleanup Program Properties  
INDIAN VCP..... Voluntary Cleanup Priority Listing

### ***Lists of state and tribal brownfield sites***

BROWNFIELDS..... Considered Brownfields Sites Listing

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Local Brownfield lists***

US BROWNFIELDS..... A Listing of Brownfields Sites

#### ***Local Lists of Landfill / Solid Waste Disposal Sites***

WMUDS/SWAT..... Waste Management Unit Database  
SWRCY..... Recycler Database  
HAULERS..... Registered Waste Tire Haulers Listing  
INDIAN ODI..... Report on the Status of Open Dumps on Indian Lands  
DEBRIS REGION 9..... Torres Martinez Reservation Illegal Dump Site Locations  
ODI..... Open Dump Inventory  
IHS OPEN DUMPS..... Open Dumps on Indian Land

#### ***Local Lists of Hazardous waste / Contaminated Sites***

US HIST CDL..... Delisted National Clandestine Laboratory Register  
AOCONCERN..... Key Areas of Concerns in Los Angeles County  
SCH..... School Property Evaluation Program  
CDL..... Clandestine Drug Labs  
Toxic Pits..... Toxic Pits Cleanup Act Sites  
US CDL..... National Clandestine Laboratory Register

#### ***Local Land Records***

LIENS..... Environmental Liens Listing  
LIENS 2..... CERCLA Lien Information

#### ***Records of Emergency Release Reports***

HMIRS..... Hazardous Materials Information Reporting System  
CHMIRS..... California Hazardous Material Incident Report System  
LDS..... Land Disposal Sites Listing  
MCS..... Military Cleanup Sites Listing  
SPILLS 90..... SPILLS 90 data from FirstSearch

#### ***Other Ascertainable Records***

DOD..... Department of Defense Sites

## EXECUTIVE SUMMARY

SCRD DRYCLEANERS.....	State Coalition for Remediation of Drycleaners Listing

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

# EXECUTIVE SUMMARY

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of Federal NPL (Superfund) sites***

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/27/2022 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>SAN FERNANDO VALLEY</b> Cerclis ID:: 902251 EPA Id: CAD980894893	<b>NORTH HOLLYWOOD WELL</b>	<b>WSW 1/4 - 1/2 (0.421 mi.)</b>	<b>AM200</b>	<b>1172</b>

### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/27/2022 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/27/2022 has revealed that there

## EXECUTIVE SUMMARY

are 4 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

### ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 11/21/2022 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

### ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 11/21/2022 has revealed that there are 2 RCRA-TSDF sites within approximately 0.5 miles of the target property.

### ***Lists of Federal RCRA generators***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 15 RCRA-SQG sites within approximately 0.25 miles of the target property.

EPA ID:: CAD980894893				

## EXECUTIVE SUMMARY

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 08/15/2022 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/24/2022 has revealed that there are 20 ENVIROSTOR sites within approximately 1 mile of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 154 CPS-SLIC sites

## EXECUTIVE SUMMARY

within approximately 0.5 miles of the target property.

### **Lists of state and tribal registered storage tanks**

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 6 UST sites within approximately 0.25 miles of the target property.

### ADDITIONAL ENVIRONMENTAL RECORDS

#### **Local Lists of Hazardous waste / Contaminated Sites**

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 HIST Cal-Sites site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

#### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 5 SWEEPS UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### ***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/21/2022 has revealed that there are 16 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 08/11/2022 has revealed that there are 2 FUDS sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
VEGA AIRCRAFT		W 1/4 - 1/2 (0.319 mi.)	136	884
WEST LA AREA STATION		WNW 1/2 - 1 (0.951 mi.)	AW261	1752

ROD: Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid the cleanup.

A review of the ROD list, as provided by EDR, and dated 10/27/2022 has revealed that there is 1 ROD site within approximately 1 mile of the target property.

CONSENT: Major Legal settlements that establish responsibility and standards for cleanup at NPL (superfund) sites. Released periodically by U.S. District Courts after settlement by parties to litigation matters.

A review of the CONSENT list, as provided by EDR, and dated 09/30/2022 has revealed that there is 1 CONSENT site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>SAN FERNANDO VALLEY</b>	<b>NORTH HOLLYWOOD WELL</b>	<b>WSW 1/4 - 1/2 (0.421 mi.)</b>	<b>AM200</b>	<b>1172</b>

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 01/03/2022 has revealed that there are 3 PFAS ECHO sites within approximately 0.25 miles of the target property.

LOS ANGELES CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the LOS ANGELES CO LF METHANE list, as provided by EDR, and dated 01/10/2022 has revealed

## EXECUTIVE SUMMARY

that there is 1 LOS ANGELES CO LF METHANE site within approximately 0.5 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Summary Details:

Conditions at proposal October 15, 1984): San Fernando Valley Area 4) is an area of contaminated ground water in the Pollock Well Field area in the City of Los Angeles, Los Angeles County, California. The area is part of the San Fernando Valley Basin, a natural underground reservoir that represents an important source of drinking water for at least 3 million people in the Los Angeles metropolitan area. The contaminated ground water, which underlies an area of approximately 5,860 acres, contains perchloroethylene (PCE), according to tests conducted by the California Department of Health Services, as well as numerous local government agencies. The State s recommended drinking water

guideline for PCE 4 parts per billion)is exceeded in a number of public wells in this area. To alleviate this contamination, wells are either taken out of service or blended with water from clean sources to ensure that the public receives water with concentrations below the State guideline. Status June 10, 1986): EPA and the Los Angeles Department of Water and Power are entering into a cooperative agreement for a remedial investigation of the San Fernando Valley Basin and a feasibility study targeted at Area 1,the most contaminated area. The RI is scheduled to begin in early 1986.

**Environmental Interest/Information System:**

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**HAZARDOUS AIR POLLUTANT MAJOR**

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

**STATE MASTER**

**HAZARDOUS WASTE BIENNIAL REPORTER**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Baseline Flow: 0  
Reclamation: Not reported  
POTW: Not reported  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Waste Code: D038  
Waste Description: PYRIDINE

Waste Code: D039  
Waste Description: TETRACHLOROETHYLENE

Waste Code: D040  
Waste Description: TRICHLORETHYLENE

Waste Code: F001  
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002  
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003  
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005  
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F007  
Waste Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Waste Code: F024  
Waste Description: PROCESS WASTES INCLUDING, BUT NOT LIMITED TO, DISTILLATION RESIDUES, HEAVY ENDS, TARS, AND REACTOR CLEAN-OUT WASTES FROM THE PRODUCTION OF

CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO, AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION. (THIS LISTING DOES NOT INCLUDE WASTEWATERS, WASTEWATER TREATMENT SLUDGE, SPENT CATALYSTS, AND WASTES LISTED IN SECTIONS 261.31. OR 261.32)

Waste Code:	P028
Waste Description:	BENZENE, (CHLOROMETHYL)- (OR) BENZYL CHLORIDE
Waste Code:	U008
Waste Description:	2-PROPENOIC ACID (I) (OR) ACRYLIC ACID (I)
Waste Code:	U024
Waste Description:	DICHLOROMETHOXY ETHANE (OR) ETHANE, 1,1'-[METHYLENEBIS(OXY)]BIS[2-CHLORO-
Waste Code:	U056
Waste Description:	BENZENE, HEXAHYDRO- (I) (OR) CYCLOHEXANE (I)
Waste Code:	U080
Waste Description:	METHANE, DICHLORO- (OR) METHYLENE CHLORIDE
Waste Code:	U112
Waste Description:	ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)
Waste Code:	U122
Waste Description:	FORMALDEHYDE
Waste Code:	U123
Waste Description:	FORMIC ACID (C,T)
Waste Code:	U124
Waste Description:	FURAN (I) (OR) FURFURAN (I)
Waste Code:	U134
Waste Description:	HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)
Waste Code:	U154
Waste Description:	METHANOL (I) (OR) METHYL ALCOHOL (I)
Waste Code:	U159
Waste Description:	2-BUTANONE (I,T) (OR) METHYL ETHYL KETONE (MEK) (I,T)
Waste Code:	U188
Waste Description:	PHENOL
Waste Code:	U190
Waste Description:	1,3-ISOBENZOFURANDIONE (OR) PHTHALIC ANHYDRIDE
Waste Code:	U213
Waste Description:	FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER  
STATE MASTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

**Violations:**

Site ID: 144654  
Site Name: PRC-DE SOTO INTERNATIONAL  
Violation Date: 07-10-2019  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
Violation Notes: Returned to compliance on 07/10/2019. OBSERVATION: 1x55 gal pail of waste solvent located in the hazardous waste storage room was observed without a hazardous waste label. CORRECTIVE ACTION: Submit a photo to the CUPA demonstrating that the container listed above has been properly labeled. COS.  
Violation Division: Los Angeles County Fire Department

Site ID: 144654  
Site Name: PRC-DE SOTO INTERNATIONAL  
Violation Date: 07-10-2019  
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)  
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite

accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

Violation Notes: Returned to compliance on 07/10/2019. OBSERVATION: Failure of the Owner/Operator to comply with one or more satellite accumulation requirements. Missing accumulation start date. CORRECTIVE ACTION: Ensure that all hazardous wastes being accumulated pursuant to satellite accumulation meet all applicable requirements and submit documentation of compliance to the CUPA. Place a numerical date on the label. COS.

**Environmental Interest/Information System:**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

**1001959810**

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN  
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click Here for FRS Facility Detail Report:](#)

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**CERS HAZ WASTE:**

Name: BUDDYS ALL STAR SPORTING GOODS  
Address: 3216 VALHALLA DR  
City,State,Zip: BURBANK, CA 91505  
Site ID: 100419  
CERS ID: 10229935  
CERS Description: Hazardous Waste Generator

**Violations:**

Site ID: 100419  
Site Name: BUDDYS ALL STAR SPORTING GOODS  
Violation Date: 07-05-2017  
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)  
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.  
Violation Notes: Returned to compliance on 03/13/2018. OBSERVATION: 1x55 gal plastisol in located in the back lot was observed WITHOUT AN ACCUMULATION START DATE and a manifest/receipt demonstrating disposal within the past 180 days was not available. CORRECTIVE ACTION: Dispose of Non-RCRA Hazardous waste liquid, plastisol ink and submit a copy of the manifest/receipt to the CUPA.  
Violation Division: Los Angeles County Fire Department  
Violation Program: HW  
Violation Source: CERS,

Site ID: 100419  
Site Name: BUDDYS ALL STAR SPORTING GOODS  
Violation Date: 07-05-2017  
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)  
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.  
Violation Notes: Returned to compliance on 03/13/2018. OBSERVATION: Uniform Hazardous Waste Manifests for waste ink were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for waste ink and submit copies to the CUPA.  
Violation Division: Los Angeles County Fire Department  
Violation Program: HW  
Violation Source: CERS,

Violation Description: Failure to report, and report accurately, program data (such as hazardous waste generation activities) electronically.

Violation Notes: Returned to compliance on 12/09/2022. OBSERVATION: Owner/Operator failed to report program data electronically into CERS, or reported information incorrectly. CORRECTIVE ACTION: Complete all required reporting into CERS. Owner/Operator shall submit a hazardous waste notification per HSC 25158 by submitting the Facility Information (Business Activity and Business Owner/Operator identification sections) electronically to CERS.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Media Affected: Aquifer used for drinking water supply  
Potential Contaminants of Concern: Not reported  
Site History: Site assessments indicated elevated concentrations of PCE and TCE in the vadose zone in the northwest portion of the site near a former AST. An NFR letter was issued on November 16, 1995 excluding the VOC-contaminated northwest area. An SVE system operated intermittently between 1997 and 2002. PCE, TCE, and 1,1-DCE were significantly reduced compared to baseline concentrations and asymptotic conditions were attained. VLEACH modeling indicated that residual VOCs will not further degrade groundwater quality beneath the site. The Regional Board issued an NFR for soils letter on February 7, 2003. LMC monitors and treats the groundwater in the BOU on an ongoing basis with oversight by USEPA.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

City,State,Zip: BURBANK, CA  
Region: STATE  
**Facility Status: Open - Eligible for Closure**  
Status Date: 09/27/2016  
Global Id: SL603798649  
Lead Agency: LOS ANGELES RWQCB (REGION 4)  
Lead Agency Case Number: Not reported  
Latitude: 34.195182  
Longitude: -118.348014  
Case Type: Cleanup Program Site  
Case Worker: JVS  
Local Agency: Not reported  
RB Case Number: 104.5152  
File Location: Regional Board  
Potential Media Affected: Aquifer used for drinking water supply  
Potential Contaminants of Concern: Not reported  
Site History: An SVE system operated at the site from 2003 - 2008 and removed approximately 28,000 lbs of VOCs, particularly PCE. Historical metals investigation data shows CrVI was removed during remedial excavation activities. This site is being reviewed for a soils-only closure. No monitoring wells are located on site.

N/A**

**Site 5 of 7 in cluster T**

**Relative:  
Higher  
Actual:  
679 ft.**

**CA BOND EXP. PLAN:**

Responsible Party: RWQCB REFERRAL SITE  
Project Revenue Source Company: Not reported  
Project Revenue Source Addr: Not reported  
Project Revenue Source City,St,Zip: Not reported  
Project Revenue Source Desc: The PRP is providing for the remediation of the site under RWQCB lead and will pay all costs associated with site cleanup. There are no current plans for expenditure of Bond funds for the site.

Site Description: The site is the location of an aircraft manufacturing facility constructed in the late 1930's and early 1940's. Operational activities include aircraft research, manufacturing and maintenance. Hazardous materials which are used at the facility include plating solutions, acids, fuels, and solvents.

Hazardous Waste Desc: The facility overlies the San Fernando Valley Ground Water Basin. Analysis of monitoring wells on the facility and downgradient has revealed contamination of the ground water by perchloroethylene (PCE) and trichloroethylene (TCE). Concentrations of PCE vary from approximately 20 to 12,000 parts per billion (ppb) and from approximately 20 to 1,600 ppb for TCE. Other compounds detected at low levels are acetone, chloroform, methyl ethyl ketone, chlorobenzene, ethylbenzene, and benzene.

Threat To Public Health & Env: The contaminated aquifer is a major source of drinking water for the city. Wells downgradient have been shut down due to contamination from this or other sources. If the contamination migrates further offsite, additional wells may become contaminated, thus leading to a reduction in water quality and potential long-term loss of water supply.

Site Activity Status: The potentially responsible party (PRP) has installed ground water monitoring wells and is currently working under the direction of the Regional Water Quality Control Board to determine the nature and extent of the contamination.

Quarterly Update:

Treatment & Storage Closure: The Crane Company/Hydro-Aire Division facility is located approximately one quarter mile east of the Burbank airport at 3000 Winona Avenue in an industrial area of Burbank, California. Aviation and aeronautical equipment have been manufactured at the facility since 1946. Electroplating operations began in 1951 and in February 1985, an automated wastewater treatment system was installed as an integral part of the plating line. The plating and wastewater treatment operations were discontinued in February 1991. The former plating room and the former wastewater treatment system were located at the south end of Building 1, which is located in the northwest quadrant of the facility. Several office and manufacturing buildings occupy the central and northern portions of the 11-acre facility and paved parking areas are located in the eastern and southern portions. The former plating room was approximately 66 feet

by 26 feet and contained tanks for electroplating of nickel, cadmium, and chromium. There were additional tanks for cleaning and rinsing the surfaces of metal being plated. All storage tanks associated with the former plating operations were above ground and were removed in 1983 and during the plating room demolition in 1991 and 2001. The components of the wastewater treatment system have also been removed. In 2001, stained concrete and shallow soil were removed and clean fill soil was placed in the former plating room. The concentrations of cadmium in soil samples from beneath the former plating room are comparable to health risk screening criteria for industrial use of the property. Low concentrations of volatile organic compounds (VOCs) were detected in two soil samples collected in 2004. The draft Closure Plan for Former Plating Room and Wastewater Treatment System Areas, dated May 21, 2010, provides information about the facility and a plan for collection and analysis of soil and soil gas samples to determine VOC concentrations. Evaluation of the new VOC data in conjunction with

Potential Media Affected: Aquifer used for drinking water supply  
Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Dichloroethene (DCE), Tetrachloroethylene (PCE), Trichloroethylene (TCE), Freon, Other CFCs, Chromium, Chromium VI, Other Metal

Site History: The Hydro-Aire facility is a subsidiary of Crane, a diversified manufacturer of engineered industrial products with operations worldwide. Hydro-Aire has been in operation at this location since 1946 (Hydro-Aire, 1987). Hydro-Aire manufactures aviation and aeronautical equipment at the site. The site encompasses approximately 11 acres in an industrial area of the City of Burbank (Figure 1). Kerr Canning Company used to occupy the site and the adjacent properties were used for agricultural purposes (grape growing). Pursuant to the California Environmental Quality Act (CEQA), the DTSC has prepared a Notice of Exemption (NOE) dated August 15, 2011, which concludes that the project will not have significant effect on the environment and a Land Use Covenant is to be recorded to restrict the property to current industrial/commercial use. Currently, several office and manufacturing buildings occupy the central and northern portions of the property, and paved parking areas are located in the eastern and southern portions of the site. The former plating room and the former wastewater treatment system were located at the south end of Building 1 (Figure 2). Hydro-Aire began electroplating operations at this location in 1951. In February 1985, an automated wastewater treatment system was installed as an integral part of the plating line (Hydro-Aire, 1986). The plating and wastewater treatment operations were discontinued in February 1991. Demolishing of the former plating room and wastewater treatment system components was conducted in 1991 and 2001. The California Regional Water Quality Control Board Los Angeles Region (RWQCB) has been the lead agency for the Hydro-Aire site investigation and remediation work since the 1980s. Significant investigation and remediation work at the site have been completed under the RWQCBs oversight including the former plating room assessments and soil remediation and groundwater monitoring. Concurrently with the RWQCB, the DTSC and City of Burbank have also provided oversight for this project. Detailed descriptions of the former plating room and operations have been provided in reports submitted to the Regional Board.

Federal Waste Generator Description: Large Quantity Generator  
State District Owner: CA  
Large Quantity Handler of Universal Waste: No  
Recognized Trader Importer: No  
Recognized Trader Exporter: No  
Spent Lead Acid Battery Importer: No  
Spent Lead Acid Battery Exporter: No  
Current Record: No  
Non Storage Recycler Activity: Not reported  
Electronic Manifest Broker: Not reported

List of NAICS Codes and Descriptions:

NAICS Code: 33991  
NAICS Description: JEWELRY AND SILVERWARE MANUFACTURING

Facility Has Received Notices of Violations:

Violations: No Violations Found

Evaluation Action Summary:

Evaluations: No Evaluations Found

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Status: Properties without projects  
Current Owner: Not reported  
EMS Map Link: <https://fudsportal.usace.army.mil/ems/inventory/map?id=54255>  
Eligibility: Ineligible  
Has Projects: No  
NPL Status: Not on the NPL  
Property History: DOD is not known to have used this site nor to have constructed any facilities on it. There were other Vega Aircraft sites in Burbank. In 1942, this site was known as Vega Aircraft Corporation Plant 1. This manufacturing facility was adjacent to the southeast corner of the Lockheed Air Terminal (DERP-FUDS J09CA044700), and in 1954 Lockheed Air Terminal became part of Air Force Plant 14 (DERPFUDS J09CA009800). Vega Aircraft Corporation Plant 1 eventually became Lockheed Aircraft Corporation Plant A-1, but it was not a part of either of the above-mentioned formerly used defense sites.

Project Required: No
