Overview and Research Objectives

- The City of Burbank commissioned Godbe Research to conduct a survey of residents to assess overall perceptions of living in Burbank and to gauge satisfaction with the City's performance in providing services.
- The survey also gathered resident feedback on specific issues in Burbank, including:
 - disaster preparedness,
 - proposed transportation improvements,
 - potential recreation projects,
 - preferred information sources,
 - and household contributions to local non-profit organizations.
- Additionally, the study was designed to track the results of a survey conducted in March 2001, and to identify any differences in opinions due to demographic and/or geographic characteristics.

- Data Collection Telephone Interviewing
- Universe Approximately 82,328 adult residents in the City of Burbank, sampling from the subset of 54,678 registered voters
- Fielding Dates September 15 to September 22, 2010
- Interview Length 20 minutes
- Sample Size 400 registered voters
- Margin of Error $\pm 4.9\%$

CITY OF
Burbank

**CITIZEN
SURVEY
2010**

GODBE RESEARCH
Gain Insight

Executive Summary

Executive Summary

Living in Burbank

- The survey found that Burbank residents are highly satisfied with overall quality of life in the city.
 - More than 9 out of 10 residents reported that they are “very satisfied” (78%) or “somewhat satisfied” (18%) with the quality of life.
 - Further, residents were consistently satisfied with the quality of life regardless of their age, ethnicity, household income, or area of residence.
 - Godbe Research has asked this question in surveys for a number of California cities, and the overall satisfaction level exhibited by Burbank residents is among the highest to date.
- Residents’ concerns largely reflect current events and community issues, and these have changed significantly from the 2001 survey.
 - Regarding the most important issue facing the City of Burbank, residents most frequently cited school quality (14%), the economy or unemployment (13%), and traffic conditions (13%).
 - Residents currently are more concerned with the economy and traffic conditions than they were in 2001, and less concerned with airport expansion and utilities. In particular airport expansion was mentioned by only 3 percent of residents in the current survey versus 34 percent in 2001.

Executive Summary

Ratings of City Services

- Residents are also highly satisfied with the job the City of Burbank is doing to provide services.
 - Overall, more than 9 out of 10 residents are satisfied with City services as a whole, with 59 percent “very satisfied” and 35 percent “somewhat satisfied” responses.
 - Total satisfaction with City services in the 2010 survey (94%) is consistent with the results of the 2001 survey (95%). As might be expected given the economic downturn since the 2001 survey, there was a 9 percent decrease in “very satisfied” responses from 2001 (68%) to 2010 (59%).
 - It is important to note that the overall satisfaction level exhibited by Burbank residents remains among the highest to date in our studies across California.
 - Satisfaction with City services as a whole was particularly high among Asian residents. Otherwise, it was consistently high across demographic groups, including gender, age, household income, and area of residence.
- Further, residents reported high satisfaction with a wide range of City services.
 - The survey assessed 43 specific City services that were grouped into six topic areas: (a) Public Safety; (b) Community Planning and Development; (c) Utility Services; (d) Public Works; (e) Parks and Recreation; and (f) Public Library. Each topic area was represented among the top-rated services, with 80 percent or higher satisfaction ratings.

Executive Summary

Public Safety Services

- Public safety services continue to receive high satisfaction ratings, and, on average, residents were between “somewhat” and “very satisfied” with 8 of the 11 services assessed in the survey.
 - When compared to 2001, residents currently are more satisfied with the job the City is doing to provide rapid response times to fire and paramedic emergency calls (90% satisfied), and to provide animal control services (81% satisfied).
 - However, residents are slightly less satisfied with the City’s efforts to prepare for emergencies (61% satisfied), and to provide school resource officers and other juvenile based services (54% satisfied) than in the 2001 survey.
 - In addition to maintaining these high satisfaction ratings, the results also recommend that the City increase residents’ awareness of several public safety services. More specifically, one-quarter of residents or more had no opinion of the City’s efforts to provide community outreach services, juvenile based services, fire prevention, and prepare for emergencies.
- Residents also are highly satisfied with the job the Burbank Police Department is doing to address neighborhood concerns.
 - Fully 85 percent are “very satisfied” (56%) or “somewhat satisfied” (29%).
 - Additionally, satisfaction was consistently high across demographic groups, including household income and area of residence.

Executive Summary

Community Planning and Development

- Similar to the 2001 survey, satisfaction with Community Planning and Development varied according to the specific service. At the same time, satisfied residents significantly outnumbered dissatisfied residents for each of the eight services tested.
 - In particular, 4 out of 5 residents were satisfied with the City's efforts to provide additional shopping opportunities and preserve Burbank's small-town character. Further, residents are more satisfied than in 2001 with the job the City is doing to provide additional shopping opportunities.
 - When compared to 2001, residents currently are slightly less satisfied with the City's efforts to provide additional parking in residential areas (62% satisfied), increase the availability of affordable housing (44% satisfied), and provide assistance for affordable homeownership (38% satisfied).
 - Here as well, the results recommend that the City increase residents' awareness of several services, including efforts to provide assistance for affordable homeownership (41% no opinion), increase the availability of affordable housing (29% no opinion), and enforce safety, building, and business licensing requirements (29% no opinion).

- Satisfaction with utility services was particularly high, and, on average, residents were between “somewhat satisfied” and “very satisfied” with each of the five services tested.
 - Consistent with the 2001 survey, residents expressed the highest satisfaction with the City’s efforts to provide reliable electric and water services, with 4 out of 5 residents being “very satisfied.”
 - Some of the largest gains in satisfaction from the 2001 survey were observed for the City’s efforts to offer water and electric conservation programs and information. For these two services, the percentage of “very satisfied” responses increased by roughly 25 percent. A decrease in “no opinion” responses largely accounts for these findings, which suggest that the community is significantly more aware of these programs and overwhelmingly satisfied.
 - Additionally, no utility services showed a decline in satisfaction ratings from the 2001 survey.
 - As might be expected, awareness of the City’s efforts to provide utility services was quite high, and less than 10 percent of residents indicated that they had no opinion of the City’s performance in these areas.

- Residents as a whole were close to “somewhat satisfied” with the six public works services. Additionally, these high levels of satisfaction are consistent with 2001 ratings.
 - In particular, roughly 9 out of 10 residents were satisfied with the City’s efforts to street sweep in their neighborhood and provide trash and recycling services.
 - Although maintenance of City alleys earned a relatively lower score, fully 7 out of 10 residents reported being satisfied with the City’s efforts in this area.
 - Public works services received high scores across areas of the City; however, residents in zip code 91501 were just slightly less satisfied overall.
- Ratings of proposed transportation improvements largely reflect residents’ current transportation habits, but also suggest an interest in alternative transportation.
 - According to 2006-2008 Census data, 80 percent of Burbank residents drive alone to work and another 7 percent carpool. In line with these characteristics, an overwhelming majority of residents felt that improving major intersections and streets for traffic flow would be “very useful” (77%) or “somewhat useful” (14%).
 - Interestingly, improving sidewalks and crosswalks to make Burbank more pedestrian friendly earned similarly high ratings.
 - At the same time, two-thirds of residents rated improving the City’s bicycle route system and public transportation as “very” or “somewhat useful.”

- There are several indicators that the City's efforts to communicate with residents have improved since the 2001 survey.
 - Almost 9 out of 10 residents are satisfied with the City's efforts to communicate with residents through newsletters, the City of Burbank website, and other means.
 - Overall satisfaction in the 2010 survey (87%) is slightly higher than that observed in the 2001 survey (81%). Most notably, the proportion of "very satisfied" responses increased by 6 percent in the current survey.
 - Reliance on the City website for local news and information increased from 3 percent in 2001 to 20 percent in the current survey.
 - Further, awareness of the City website increased significantly – 4 out of 5 residents are aware of the official website, which represents a 32 percent increase from 2001.
 - The results also show potential to share information on City services and programs through social networking websites, as roughly two-thirds of households are members of Facebook.
 - In addition, if the City of Burbank were to offer information through social networking websites, roughly 7 out of 10 members would be likely to use the information.

Executive Summary

Parks and Recreation

- Use of parks and recreation remains high among Burbank households.
 - In the current survey, two-thirds of residents reported that their household had used a Burbank park, recreational facility, or recreation program during the past 12 months.
 - Additionally, use of parks and recreation did not differ from the 2001 survey.
 - Use of parks and recreation was particularly high among younger residents, those with higher household income, households with children, and residents of 91506.
- Park and recreation services continue to receive high satisfaction ratings, and, on average, residents were at least “somewhat satisfied” with each service.
 - In line with the high ratings of public safety services, more than 9 out of 10 residents reported being satisfied with the City’s efforts to provide safe public park and recreation areas.
 - Awareness of several services was relatively low, including the City’s efforts to provide recreation programs for youth (19% no opinion), adults (22% no opinion), and seniors (35% no opinion), as well as transportation services for seniors and the disabled (28% no opinion).
- The five potential recreation projects earned moderate scores, with approximately two-thirds of residents rating each as a “medium” or “high priority.”

Executive Summary

Burbank Public Library

- A majority of households have visited a Burbank Public Library within the past 12 months, and library patrons are currently more satisfied with programs and services than in 2001.
 - Consistent with the 2001 survey, 3 out of 4 households had visited a local public library in the past year.
 - As with parks and recreation services, library use was higher among younger residents and households with children.
 - Library patrons rely most heavily on the Buena Vista Branch (75%), followed by the Central Library (43%) and Northwest Branch (18%). In keeping with the recent improvements, use of the Buena Vista Branch increase from 41 percent in 2001 to 75 percent in the current survey.
 - Satisfaction with the five library programs and services increased significantly from 2001. More specifically, the results suggest that library patrons are currently more aware of library programs and services, as indicated by a decrease in “no opinion” responses from 2001 to 2010. Further, residents almost entirely expressed satisfaction with the programs and services tested in the survey.
 - The results recommend that the Public Library increase awareness of efforts to offer adult literacy programs and assistance (41% no opinion).

Executive Summary

Contribution to Local Non-Profit Organizations

- A majority of residents contributed to non-profit organizations in Burbank in the past year, and the results suggest that a lack of information is a key barrier to contributing.
 - Fully 53 percent of residents reported contributing to local non-profit agencies.
 - Among the households that had contributed, the most common donations were clothes or household items (59%), and money (38%). In comparison, 15 percent had volunteered with a local non-profit organization.
 - These households also most frequently reported making contributions to homeless services or food banks (44%) and services for families (18%).
 - Interestingly, the households that had not contributed most frequently mentioned that they did not know of any local non-profits (23%) or that they needed more information on how to contribute (9%). These results suggest that increasing awareness of local organizations will be a first step toward encouraging community involvement.
 - Further, 18 percent reported that they could not afford to give money or other items. As such, encouraging residents to volunteer their time may overcome monetary barriers to contributing.

Executive Summary

Emergency and Disaster Preparedness

- Although emergency and disaster preparedness are highly important to residents, many households are unprepared or underprepared for an emergency.
 - Overall, each of the public education programs that the Burbank Fire Prevention Bureau may offer in the future would be close to “very important” to residents and the members of their household.
 - Residents considered disaster preparedness and First Aid/CPR education programs to be the highest priority.
 - Perhaps illustrating the need for these programs, just over half of the households had an emergency supply kit with food, water and other supplies in sufficient quantity. Additionally, one-third of residents had no opinion of the City’s efforts to prepare for emergencies such as earthquakes.
 - Further, only 37 percent of Hispanic residents reported having an emergency supply kit, which suggests that outreach to the Hispanic community is particularly important with regards to this issue.
 - Finally, the results suggest that a variety of information sources should be used to communicate with residents in an emergency, focusing on phone calls with a recorded message (36% prefer) and the City of Burbank AM Radio Station (27% prefer).

CITY OF
Burbank

**CITIZEN
SURVEY
2010**

GODBE RESEARCH
Gain Insight

Living in Burbank

Satisfaction with Quality of Life

The survey revealed that residents are highly satisfied with the overall quality of life in the City of Burbank. More than 9 out of 10 residents reported being “very satisfied” (78%) or “somewhat satisfied” (18%), and just 3 percent of the residents indicated that they are dissatisfied with the overall quality of life. The remaining one percent of residents did not express an opinion (DK/NA). Godbe Research has asked this question in surveys for a number of California cities in recent years, and the overall satisfaction level exhibited by Burbank residents is among the highest to date.

Satisfaction with Quality of Life

Highest Rated Cities

Satisfaction with Quality of Life

Subgroup Comparisons

Approximately 9 out of 10 residents or more indicated that they are satisfied with the quality of life in Burbank regardless of their gender. However, as shown in the following table, a higher proportion of women indicated being “very satisfied” with the quality of life, whereas a higher proportion of men indicated being “somewhat satisfied.” No other statistically significant differences emerged between key demographic groups. In other words, residents were consistently satisfied with quality of life regardless of their age, ethnicity, household income, and area of residence.

	Gender	
	Male	Female
Sample size	193	207
Very satisfied	71.3%	84.6%
Somewhat satisfied	24.8%	11.6%
Somewhat dissatisfied	3.4%	2.3%
Very dissatisfied	.0%	.8%
DK/NA	.5%	.7%

Most Important Issue Facing Burbank

The next question asked residents to name the most important issue facing the City of Burbank. They were free to mention any issue that came to mind, and they were not prompted by the interviewer with a list of responses or categories. In a top-tier of important issues in the 2010 survey were quality of schools (14%), the economy and unemployment (13%), and traffic conditions (13%). Interestingly, close to 1 out of 4 residents did not have an opinion (DK/NA). A comparison the 2010 and 2001 survey results shows that residents' attitudes toward certain issues have changed significantly. More specifically, residents currently are more concerned with the economy and traffic conditions, and less concerned with airport expansion and utilities.

Most Important Issue Facing Burbank

Subgroup Comparisons

Shown in the following table are differences between demographic subgroups for the five most-frequently mentioned issues overall. A higher percentage of women than men mentioned crime as the most important issue facing Burbank. Regarding differences as a factor of age, a higher proportion of residents ages 25 to 34 and 45 to 54 mentioned school quality, whereas a higher proportion of their older counterparts ages 65 and over mentioned that Burbank is getting too crowded. Finally, the respondents belonging to other ethnicities more often mentioned that Burbank is getting too crowded in comparison to their Caucasian, Hispanic and Asian counterparts.

	Gender		Age						Ethnicity			
	Male	Female	18 to 24	25 to 34	35 to 44	45 to 54	55 to 64	65 and over	Caucasian	Hispanic	Asian	Other

Ratings of City Services

Overall Satisfaction with City Services

More than 9 out of 10 residents are “very satisfied” (59%) or “somewhat satisfied” (35%) with the job the City of Burbank is doing to provide services. Overall satisfaction with City services in the 2010 survey (94%) is consistent with the results of the 2001 survey (95%). However, there was a 9 percent decrease in “very satisfied” responses from 2001 to 2010, which likely reflects the downturn in the economy. Godbe Research has asked this question in surveys for dozens of California cities in recent years, and the overall satisfaction level exhibited by Burbank residents remains among the highest to date.

Very satisfied

Somewhat satisfied

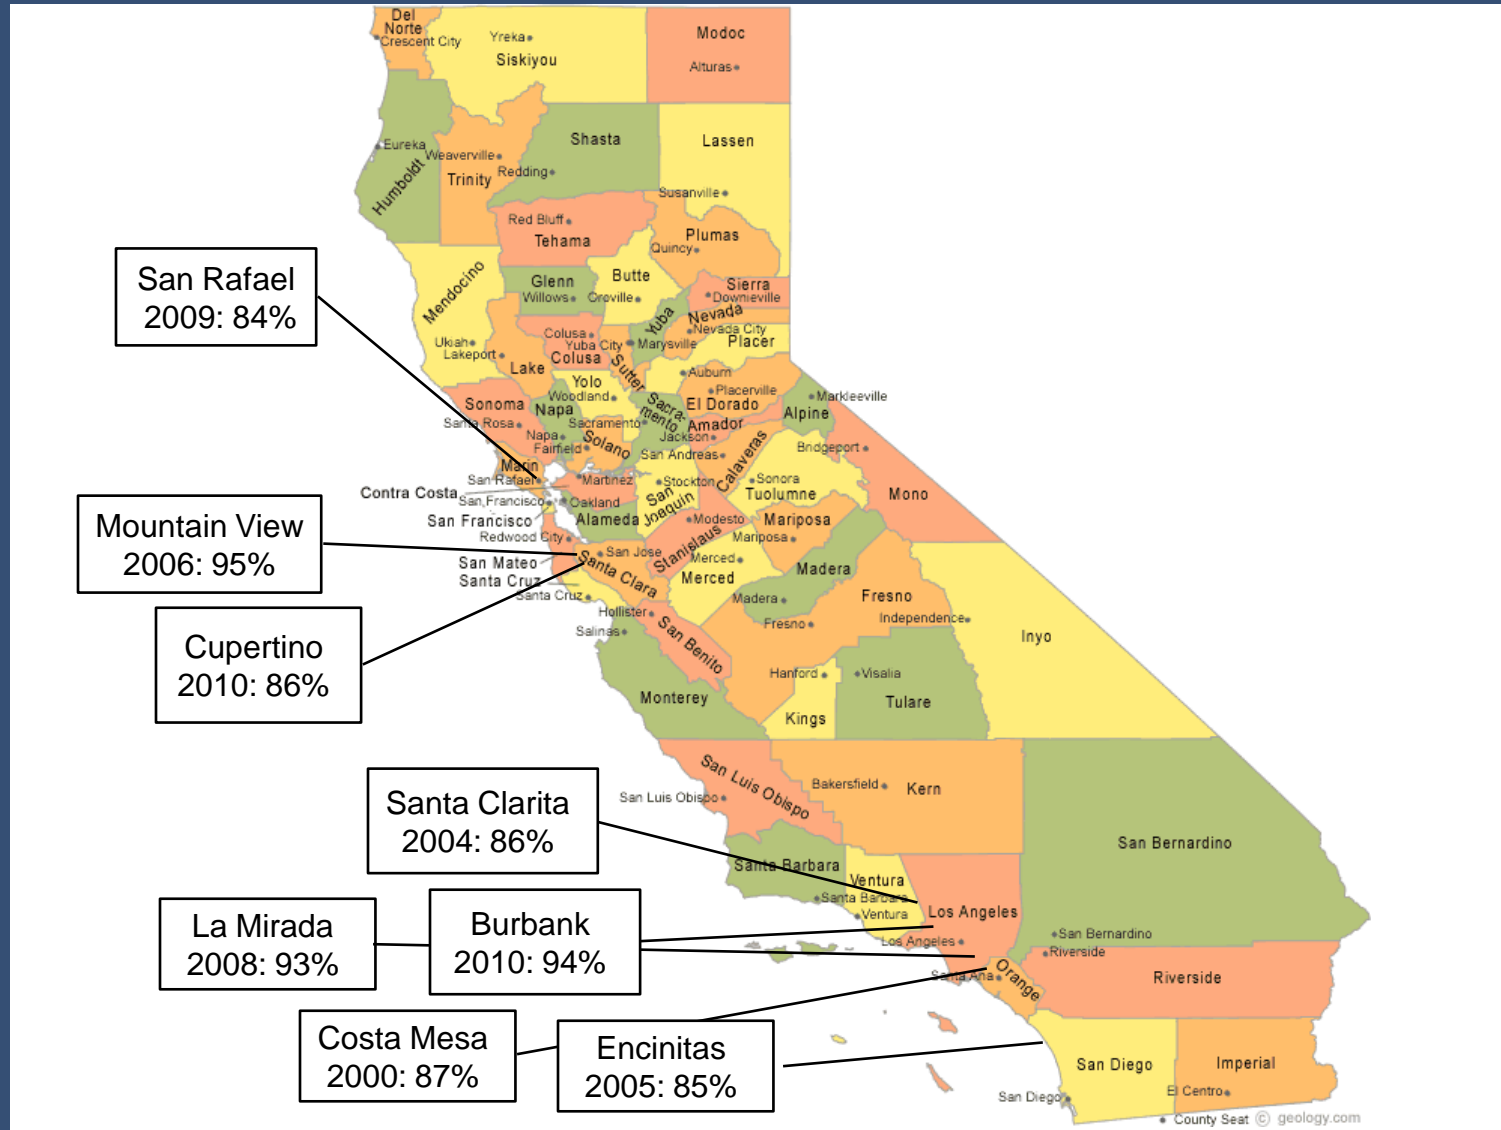

Somewhat dissatisfied

Very dissatisfied

DK/NA

Overall Satisfaction with City Services

Comparison of Satisfaction

Overall Satisfaction with City Services

Subgroup Comparisons

Overall satisfaction with City services was largely consistent across demographic groups, including gender, age, household income, and area of residence. However, Asian residents were more likely to be “very satisfied” with the job the City of Burbank is doing to provide City services, in comparison with Caucasian and Hispanic residents. On the other hand, a higher percentage of respondents of other ethnicities indicated “somewhat dissatisfied” than Caucasian residents.

	Ethnicity			
	Caucasian	Hispanic	Asian	Other
Sample size	229	99	38	19
Very satisfied	<u>57.6%</u>	<u>58.8%</u>	<u>81.8%</u>	38.7%
Somewhat satisfied	37.1%	34.7%	18.2%	46.7%
Somewhat dissatisfied	<u>1.9%</u>	1.6%	.0%	<u>12.1%</u>
Very dissatisfied	.7%	1.6%	.0%	.0%
DK/NA	2.6%	3.4%	.0%	2.5%

Public Safety Services

Residents were next read a list of 11 public safety services and asked to rate their satisfaction with each. On average, the residents were at least “somewhat satisfied” with 8 of the 11 services (mean scores over 1.0). Specifically, residents expressed the highest satisfaction with the job the City is doing to provide rapid response times to fire and paramedic emergency calls, with 4 out of 5 residents reporting “very satisfied.” Residents’ satisfaction was similarly high with the City’s efforts to provide fire protection services, maintain a low crime rate, and provide paramedic services (mean scores of 1.6). In comparison, residents were relatively less satisfied with the City’s efforts to provide school resource officers and other juvenile based services – overall, 54 percent of residents were satisfied, 10 percent were dissatisfied, and 37 percent had no opinion.

Public Safety Services

Tracking Results

Residents' satisfaction with four public safety services differed from the 2001 survey. As shown in the following table, residents currently are more satisfied with the job the City is doing to provide rapid response times to fire and paramedic emergency calls, and animal control services. Conversely, residents currently are less satisfied with the City's efforts to prepare for emergencies, and provide school resource officers and other juvenile based services.

	Year	Mean Score	Very Satisfied	Somewhat Satisfied	Somewhat Dissatisfied	Very Dissatisfied	No Opinion
Provide rapid response times to fire and paramedic emergency calls	2010	1.7	<u>80%</u>	10%	<1%	0%	10%
	2001	1.5	<u>71%</u>	9%	1%	<1%	20%

Provide school resource officers and other juvenile based services	2010	0.7	31%	23%	7%	3%	37%
	2001	0.9	35%	27%	3%	1%	34%

Public Safety Services

Subgroup Comparisons

The average 18-to-24-year-old respondent was significantly more satisfied with the job the City is doing to provide animal control services. Additionally, residents ages 65 and over were significantly more satisfied with the City's efforts to provide paramedic services and offer fire prevention programs than their younger counterparts. Finally, satisfaction with providing animal control services was higher among residents of zip codes 91505 and 91506 than those who reside in zip code 91502.

	Age						Residence Zip Code				
	18 to 24	25 to 34	35 to 44	45 to 54	55 to 64	65 and over	91501	91502	91504	91505	91506
Provide rapid response times to fire and paramedic emergency calls	1.9	1.6	1.7	1.6	1.7	1.8	1.8	1.6	1.6	1.7	1.7
Provide fire protection services	1.7	1.6	1.6	1.6	1.7	1.8	1.7	1.7	1.6	1.6	1.7
Maintain a low crime rate	1.6	1.8	1.5	1.6	1.6	1.7	1.6	1.6	1.4	1.7	1.7
Provide paramedic services	1.7	<u>1.4</u>	<u>1.5</u>	<u>1.4</u>	1.7	<u>1.9</u>	1.8	1.5	1.4	1.5	1.6
Provide rapid response times to police emergency calls	1.2	1.5	1.5	1.4	1.6	1.7	1.4	1.4	1.3	1.7	1.5
Provide animal control services	<u>1.7</u>	<u>1.1</u>	1.4	1.3	1.4	1.4	1.4	<u>.9</u>	1.3	<u>1.4</u>	<u>1.5</u>
Offer fire prevention programs	1.4	.9	<u>.9</u>	1.1	1.2	<u>1.4</u>	1.3	1.0	1.3	1.1	1.0
Ensure pedestrian and bicycle safety	1.1	1.1	1.2	1.1	1.0	1.2	1.2	.8	.9	1.3	1.1

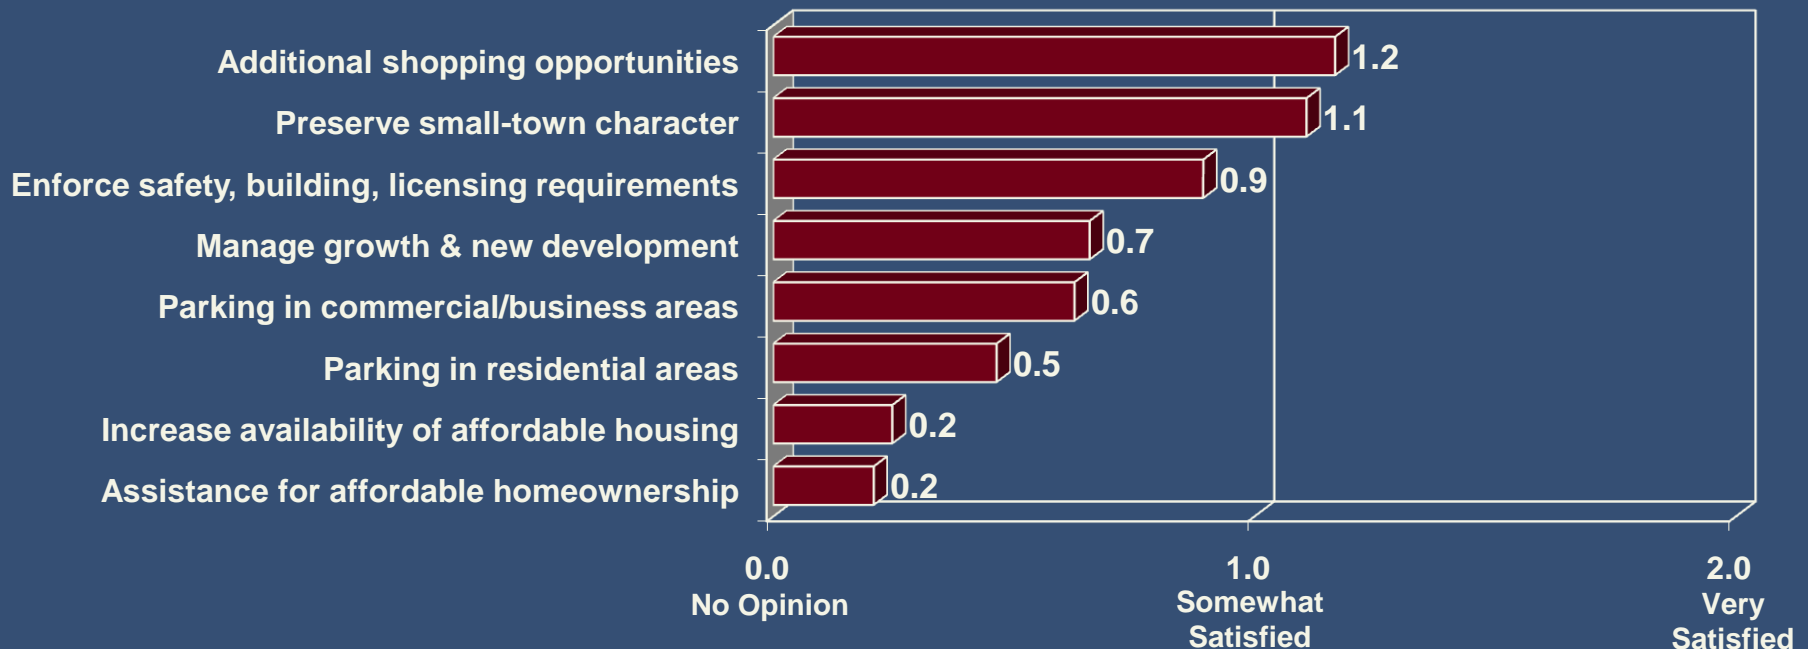

Burbank Police Department

Fully 85 percent of residents reported that they are “very satisfied” (56%) or “somewhat satisfied” (29%) with the job the Burbank Police Department is doing to address neighborhood concerns. In contrast, just 10 percent of residents indicated dissatisfaction, and the remaining 5 percent did not have an opinion (DK/NA). A higher percentage of women than men indicated “very satisfied” (63% versus 50%); otherwise, satisfaction was consistently high across demographic groups, including household income and area of residence.

Community Planning and Development

On average, residents were close to “somewhat satisfied” with 3 of the 8 community planning and development services tested in the survey (mean score near 1.0). In particular, 4 out of 5 residents were satisfied with the City’s efforts to provide additional shopping opportunities and preserve Burbank’s small-town character. Note that each of the eight services earned a positive mean score, which indicates that satisfied residents outnumbered dissatisfied residents. However, satisfaction was relatively lower with the City’s efforts to increase the availability of affordable housing (44% satisfied, 27% dissatisfied, and 29% no opinion) and provide assistance for affordable homeownership (38% satisfied, 22% dissatisfied, and 41% no opinion).

Community Planning and Development

Tracking Results

Satisfaction with the City’s efforts to provide additional shopping opportunities to residents increased from the previous survey – 82% of residents were satisfied in the 2010 survey versus 74% in the 2001 survey. However, satisfaction with three other services declined slightly: provide additional parking in residential areas, increase the availability of affordable housing, and provide assistance for affordable homeownership. It is important to note that the percentage of satisfied responses from 2001 to 2010 was roughly consistent for the City’s efforts to provide additional parking in residential areas and increase the availability of affordable housing. The difference in average satisfaction with these two services represents a decrease in “no opinion” responses and an increase in dissatisfied responses.

	Year	Mean Score	Very Satisfied	Somewhat Satisfied	Somewhat Dissatisfied	Very Dissatisfied	No Opinion
Provide additional shopping opportunities to residents	2010	1.2	<u>48%</u>	34%	7%	3%	8%
	2001	1.0	39%	35%	4%	3%	19%
Provide additional parking in residential areas	2010	0.5	27%	35%	15%	14%	<u>9%</u>
	2001	0.6	27%	33%	9%	7%	<u>24%</u>
Increase the availability of affordable housing	2010	0.2	19%	25%	16%	11%	<u>29%</u>
	2001	0.4	18%	26%	12%	7%	<u>37%</u>
Provide assistance for affordable homeownership	2010	0.2	15%	23%	13%	9%	41%
	2001	0.4	19%	24%	8%	5%	45%

Community Planning and Development

Subgroup Comparisons

The average homeowner was more satisfied with the City's efforts to increase the availability of affordable housing and provide assistance for affordable homeownership when compared to respondents who rent their place of residence. In contrast, the average renter was more satisfied with the job the City is doing to preserve Burbank's small-town character, and manage growth and development.

	Homeownership	
	Own	Rent
Provide additional shopping opportunities to residents	1.1	1.2
Preserve Burbank's small-town character	<u>1.0</u>	<u>1.3</u>
Enforce safety, building, and business licensing requirements	.8	1.0
Manage growth and new development	<u>.5</u>	<u>.9</u>
Provide additional parking in commercial and business areas	.6	.7
Provide additional parking in residential areas	.5	.4
Increase the availability of affordable housing	<u>.5</u>	<u>.0</u>
Provide assistance for affordable homeownership	<u>.4</u>	<u>-.1</u>

Utility Services

Satisfaction with utility services was particularly high, and, on average, residents were between “somewhat” and “very satisfied” with each of the five services tested in the 2010 survey. Residents expressed the highest satisfaction with the City’s efforts to provide reliable electric and water services. Fully 4 out of 5 residents reported that they were “very satisfied” with these two utility services. Well-over half of residents also reported being “very satisfied” with conservation programs and information.

Utility Services Tracking Results

Some of the largest gains in satisfaction from the 2001 survey were observed for two utility services. More specifically, from 2001 to 2010 the percent of “very satisfied” responses increased by 25 percent and 21 percent for water conservation and electric conservation programs, respectively. A decrease in the percentage of residents who had “no opinion” largely accounts for these findings, which suggests that the community is significantly more aware of these programs and overwhelmingly satisfied.

	Year	Mean Score	Very Satisfied	Somewhat Satisfied	Somewhat Dissatisfied	Very Dissatisfied	No Opinion
Offer water conservation programs and information	2010	1.4	<u>65%</u>	22%	4%	2%	7%
	2001	1.0	<u>40%</u>	28%	6%	2%	25%

Provide reliable water service	1.7	1.8
Provide sufficient street lighting	1.5	1.4
Offer water conservation programs and information	<u>1.3</u>	<u>1.5</u>
Offer electric conservation programs and information	<u>1.2</u>	<u>1.4</u>

Public Works Services

On average, residents were at least “somewhat satisfied” with 5 of the 6 public works services tested in the survey. Within this category, residents indicated the highest satisfaction with the City’s efforts to street sweep neighborhoods and provide trash and recycling services. Roughly 9 out of 10 residents indicated being “very” or “somewhat satisfied” with these two services. Although maintenance of City alleys earned a relatively lower score, fully 7 out of 10 residents reported being satisfied with the City’s efforts in this area. Further, there were no changes in residents’ satisfaction with public works services from the 2001 survey.

Public Works Services

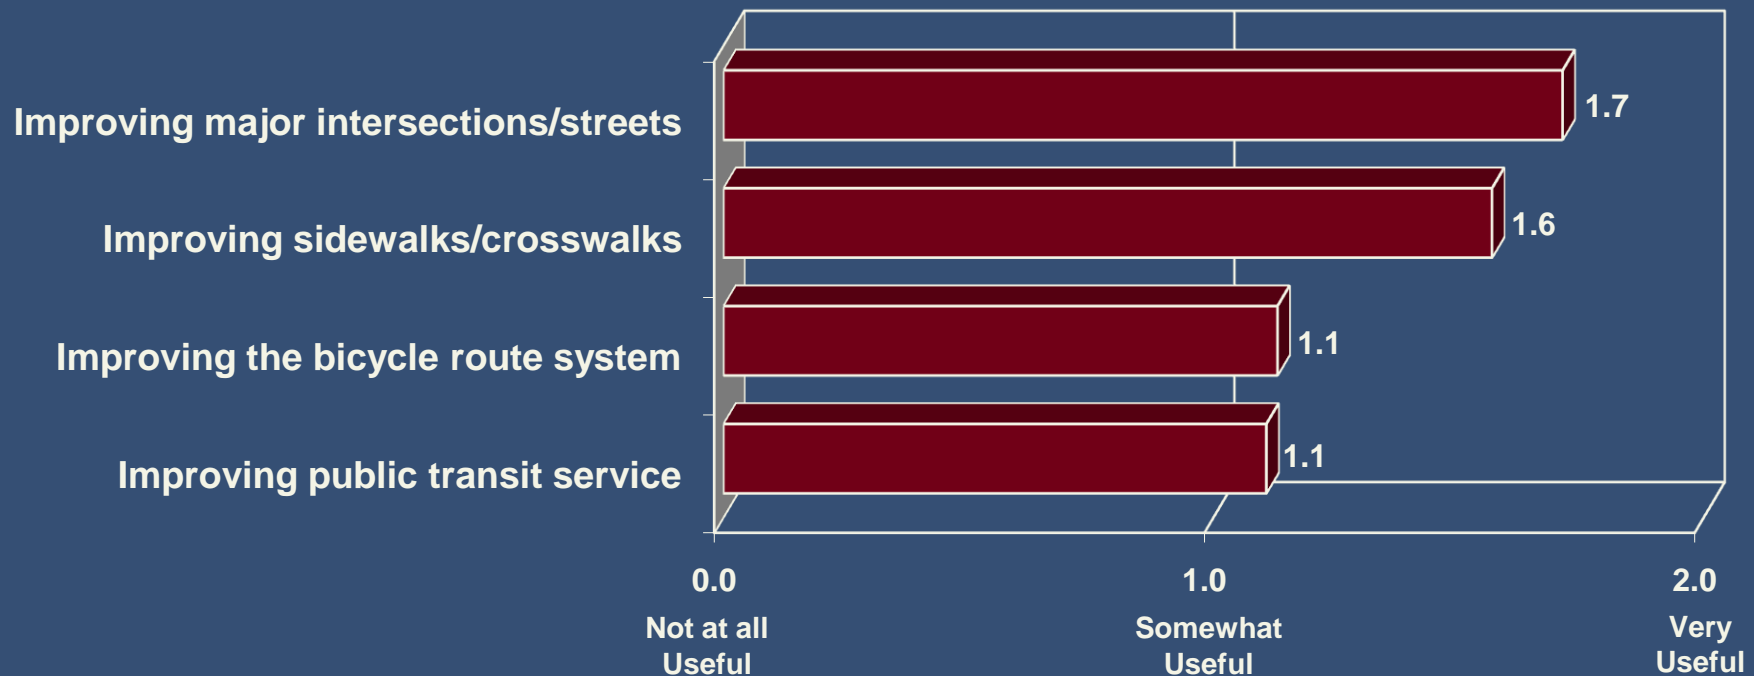

Subgroup Comparisons

On average, 55-to-64-year-old residents were more satisfied with trash and recycling service, whereas 25-to-34-year-old residents were more satisfied with maintenance and repair of sidewalks. Additionally, the residents of zip code 91501 were less satisfied with four services than those who reside in zip codes 91504 and 91505: trash and recycling service, maintenance of City streets, maintenance and repair of sidewalks, and maintenance of City alleys.

	Age						Residence Zip Code				
	18 to 24	25 to 34	35 to 44	45 to 54	55 to 64	65 and over	91501	91502	91504	91505	91506
Street sweep in your neighborhood	1.7	1.7	1.7	1.5	1.8	1.7	1.7	1.6	1.6	1.7	1.6
Provide trash and recycling service	1.7	1.5	1.4	1.7	<u>1.9</u>	<u>1.3</u>	<u>1.3</u>	1.5	<u>1.8</u>	1.6	1.7

Maintain City alleys	1.0	1.1	1.0	.7	.6	.7	<u>.6</u>	1.1	.7	<u>1.1</u>	.9

Transportation Improvements

Respondents were read a list of four proposed transportation improvements and asked how useful each would be to them personally. Each of the tested improvements was rated as at least “somewhat useful” (mean score over 1.0). On average, residents rated the improvement of major intersections and streets for traffic flow as the most useful, and this was closely followed by improvements to sidewalks and crosswalks to make the city more pedestrian friendly. In response to these two proposed improvements, 9 out of 10 residents indicated a rating of “very” or “somewhat useful.”

Transportation Improvements

Subgroup Comparisons

Hispanic residents rated improving sidewalks and crosswalks as significantly more useful than Caucasian residents and residents of other ethnicities. At the same time, Hispanic and Asian residents considered improving the City's bicycle route system to be more useful when compared to Caucasian residents.

	Ethnicity			
	Caucasian	Hispanic	Asian	Other
Improving major intersections and streets for traffic flow	1.7	1.8	1.7	1.5
Improving sidewalks and crosswalks to make the City more pedestrian friendly	<u>1.5</u>	<u>1.8</u>	1.6	<u>1.3</u>

City Communications

City Communications

Approximately 9 out of 10 residents reported that they are “very satisfied” (53%) or “somewhat satisfied” (34%) with the City’s efforts to communicate through newsletters, the new City of Burbank website, and other means. In comparison, just 8 percent of residents indicated dissatisfaction, and the remaining 5 percent did not have an opinion (DK/NA). Overall satisfaction with City communications in the 2010 survey (87%) is slightly higher than that observed in the 2001 survey (81%). Most notably, the proportion of “very satisfied” responses increased by 6 percent from 2001 to 2010.

Very satisfied

Somewhat satisfied

Somewhat dissatisfied

Very dissatisfied

DK/NA

City Communications

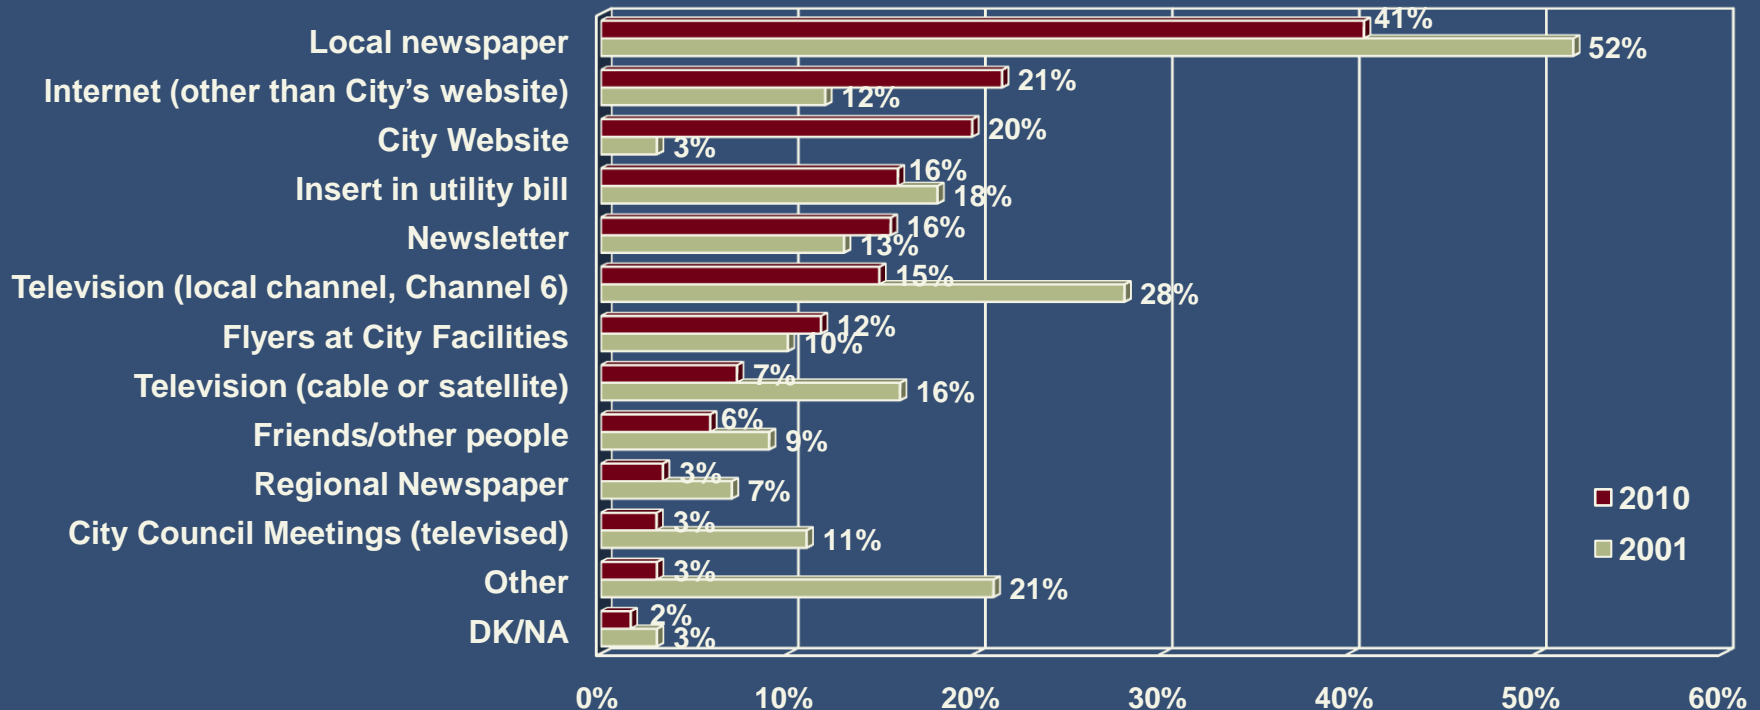

Subgroup Comparisons

Satisfaction with the City’s efforts to communicate with residents was high across demographic subgroups. However, women were more likely to be “very satisfied” in comparison with men, more of whom were “somewhat satisfied.” In addition, residents ages 65 and over were more likely to be “very satisfied,” whereas a higher percentage of residents ages 18 to 24 reported being “somewhat satisfied.”

	Gender		Age					
	Male	Female	18 to 24	25 to 34	35 to 44	45 to 54	55 to 64	65 and over

Preferred Information Sources

When asked what information sources they use to find out about Burbank news, local information and programming, residents most frequently cited a local newspaper (41%). In a second tier of responses were the Internet (21%) and the City of Burbank website (20%). As might be expected, residents' reliance on online sources has increased from 2001, whereas reliance on local newspapers and television has decreased.

Note: Information sources mentioned by less than 3 percent of residents were added to the "Other" category for charting purposes.

Preferred Information Sources

Subgroup Comparisons

With respect to age differences, the 25-to-54-year-old residents were more likely to prefer online news sources (other than the City's official website) in comparison with their counterparts ages 55 and over. These older respondents were more likely to mention a local newspaper or utility bill inserts.

	Age					
	18 to 24	25 to 34	35 to 44	45 to 54	55 to 64	65 and over
Sample size	48	60	96	77	50	56
Local newspaper (Leader, Daily News)	30.7%	<u>22.6%</u>	37.1%	<u>47.5%</u>	43.1%	<u>58.2%</u>
Internet (other than City's official website)	17.3%	<u>36.0%</u>	<u>27.2%</u>	<u>26.8%</u>	<u>8.8%</u>	<u>5.9%</u>
City Website	25.1%	14.9%	27.0%	21.0%	15.7%	15.3%
Insert in utility bill	<u>8.6%</u>	<u>8.5%</u>	<u>13.4%</u>	17.7%	<u>36.9%</u>	13.8%

Awareness of City Website

Residents' awareness of the official City of Burbank website has increased significantly since the 2001 survey. Approximately 4 out of 5 residents currently are aware of the City website, which represents a 32 percent increase from the 2001 survey.

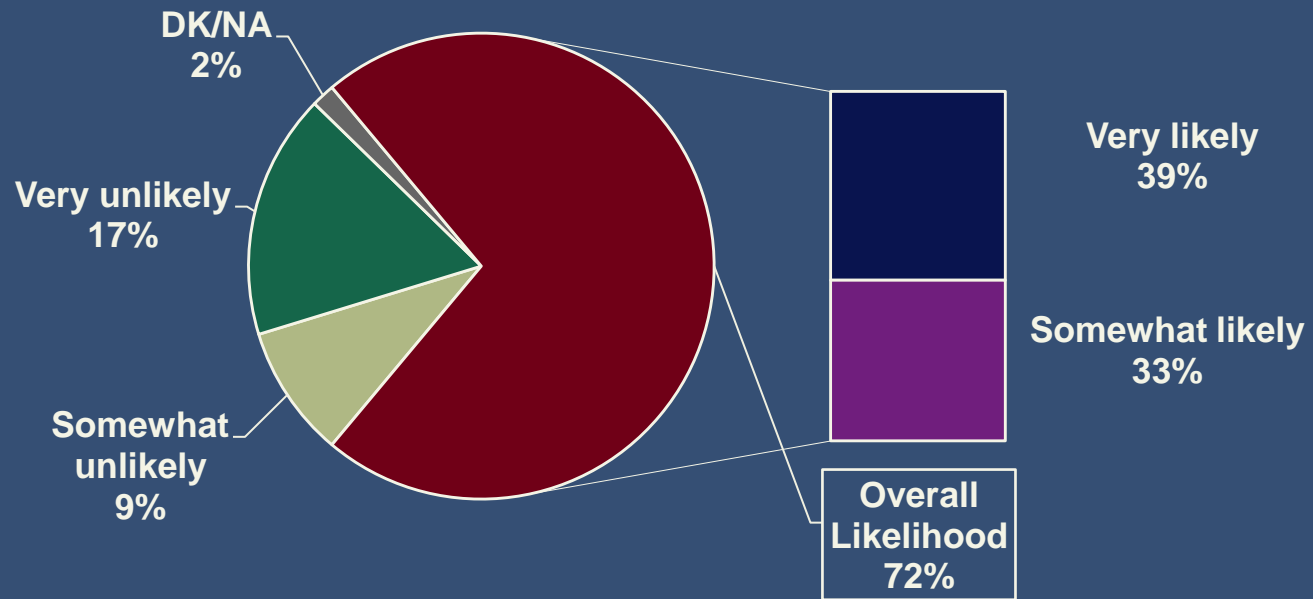

Social Networking Websites

Approximately 2 out of 3 residents reported that they, or a member of their household, are a member of social networking websites, predominantly Facebook (66%).

Communicating through Networking Websites

The results suggest that social networking members (n = 266) would be likely to use information from the City on services and programs if it were offered through these websites. Overall, 3 out of 4 respondents would be “very likely” (39%) or “somewhat likely” (33%) to use such information. In comparison, 26 percent of these respondents would be unlikely to use such information, and the remaining 2 percent did not provide an opinion.

Ratings of Parks and Recreation

Use of Parks and Recreation

Approximately two-thirds of residents reported that their household had used a Burbank park, recreational facility, or recreation program during the past 12 months. Use of parks and recreation has not changed from the 2001 survey.

Use of Parks and Recreation

Subgroup Comparisons

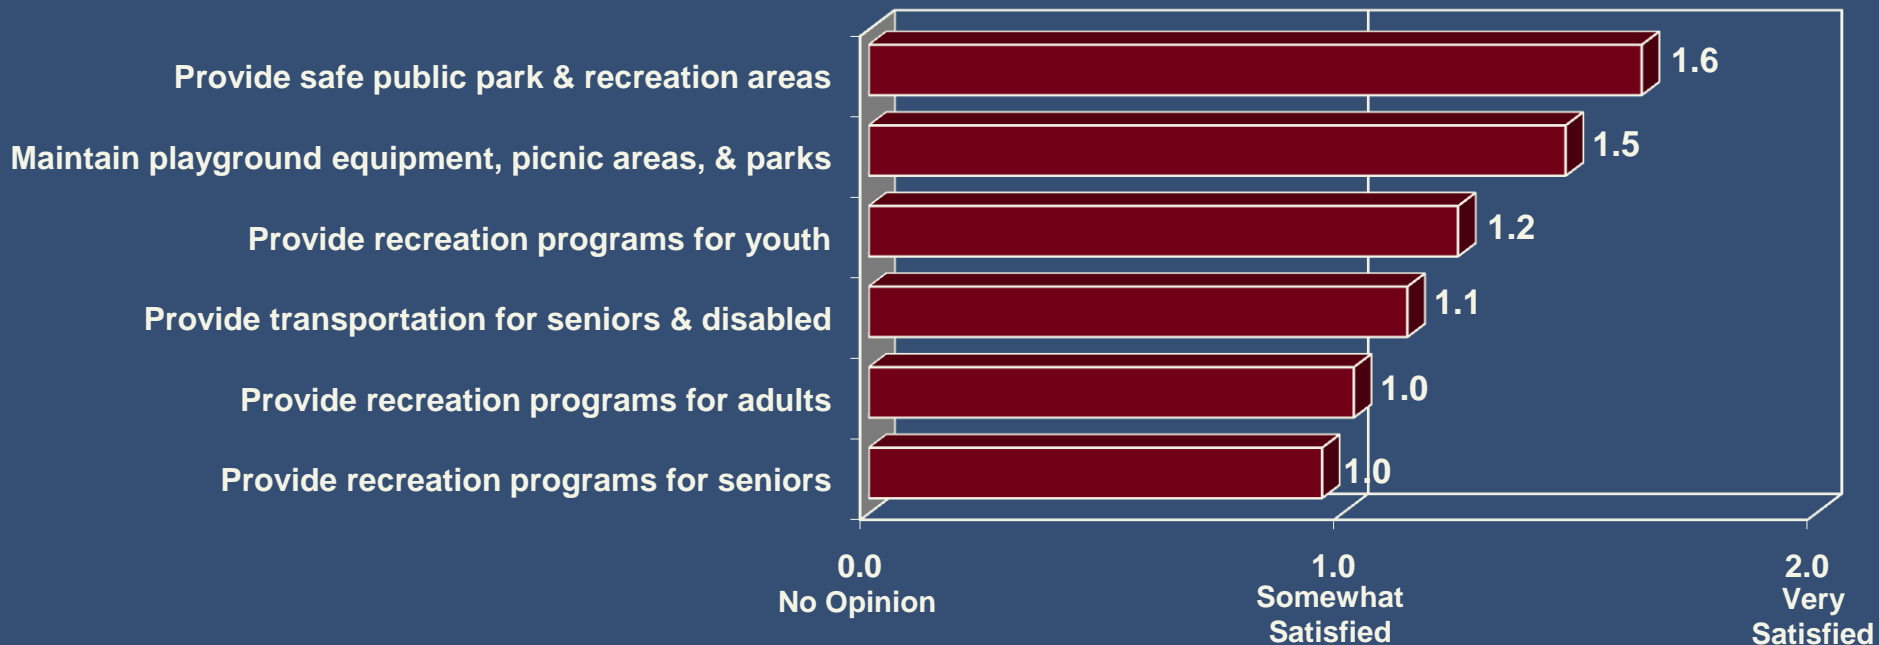

A higher proportion of residents ages 18 to 54, those with annual household income of \$50,000 or more, and households with children reported using City parks, recreational facilities or recreation programs during the past 12 months. Further, the residents of zip code 91506 were significantly more likely to use parks and recreation, in comparison with their counterparts who reside in zip code 91502.

	Age						Annual Household Income

Park and Recreation Services

Residents, on average, were at least “somewhat satisfied” with all of the tested park and recreation services (mean score of 1.0 or higher). Within this category, the City’s efforts to provide safe public park and recreation areas earned the relatively highest satisfaction score, closely followed by maintenance of playground equipment, picnic areas and parks. Approximately 9 out of 10 residents reported being satisfied with these two services. Although residents were relatively less satisfied with the City’s efforts to provide recreation programs for adults and seniors, approximately two-thirds of residents indicated that they are satisfied. Here as well, satisfaction with park and recreation services has not changed from the 2001 survey.

Park and Recreation Services

Subgroup Comparisons

Several subgroup differences emerged in residents' satisfaction with park and recreation services. Women tended to be more satisfied with the City's efforts to provide recreation programs for youth and seniors. As a factor of annual household income, residents with income less than \$50,000 were more satisfied with transportation for seniors and the disabled. Finally, satisfaction with four of the tested park and recreation services was higher among the residents who reported that their household had used parks or recreation during the past 12 months.

	Gender		Annual Household Income			Use of Parks and Recreation	
	Male	Female	Less than \$50,000	\$50,000 to \$100,000	\$100,000 or more	Yes	No

Provide recreation programs for seniors	<u>.8</u>	<u>1.1</u>	1.1	1.0	.9	1.0	.9

Potential Recreation Projects

Residents rated the priority of five potential recreation projects that could be funded by the City of Burbank. Their responses were recoded such that a higher score indicates a higher priority project. On average, the potential projects earned moderate scores, with approximately two-thirds of residents rating each as a “medium” or “high” priority.

Potential Recreation Projects

Subgroup Comparisons

A Splash Pad, community garden, and soccer fields were a higher priority among women than men. Additionally, Hispanic residents attributed higher priority to a Splash Pad and soccer fields. Finally, local hillside hiking and overnight camping was a higher priority for the residents of 91504 and 91506 in comparison with their counterparts living in 91505.

	Gender		Ethnicity				Residence Zip Code				
	Male	Female	Caucasian	Hispanic	Asian	Other	91501	91502	91504	91505	91506
Building a Splash Pad, an interactive aquatic play area for children of all ages	<u>2.0</u>	<u>2.1</u>	2.0	<u>2.2</u>	2.0	<u>1.6</u>	2.1	1.8	2.1	2.0	2.1

Burbank Public Library Ratings

Visited Burbank Public Library

A majority of households have visited a Burbank Public Library in the past 12 months. In particular, almost 3 out of 4 residents reported that they or a member of their household had visited. These results are consistent with the 2001 survey which found that 75 percent of households has visited.

Visited Burbank Public Library

Subgroup Comparisons

Similar to the results on use of parks and recreation, the younger residents and those with children in their household were more likely to report having visited a Burbank Public Library in the past 12 months. Additionally, a higher percentage of women than men reported library use.

	Gender		Age						Household Composition		
	Male	Female	18 to 24	25 to 34	35 to 44	45 to 54	55 to 64	65 and over	Children	Seniors	Neither
Sample size	193	207	48	60	96	77	50	56	153	126	140
Yes	<u>66.8%</u>	<u>81.2%</u>	<u>79.7%</u>	68.7%	<u>78.3%</u>	<u>87.3%</u>	74.5%	<u>51.2%</u>	<u>95.9%</u>	<u>65.2%</u>	<u>63.8%</u>
No	<u>32.0%</u>	<u>18.8%</u>	20.3%	31.3%	<u>21.7%</u>	<u>12.7%</u>	25.5%	<u>44.6%</u>	<u>4.1%</u>	<u>34.8%</u>	<u>36.2%</u>

Burbank Library Branches Visited (297 residents)

The 297 residents who had visited a local public library within the past 12 months were asked to indicate the specific libraries. Buena Vista Branch was the most visited library by a wide margin – 3 out of 4 library users who participated in the 2010 survey had visited this branch. In comparison, 43 percent had visited the Central Library, and 18 percent had visited the Northwest Branch. Further, use of the Buena Vista Branch significantly increased from 2001 to 2010 (41% versus 75%), which likely reflects the improvements at this branch. Conversely, there was a decline in use of the Central Library from 2001 to 2010 (64% versus 43%).

Burbank Library Branches Visited

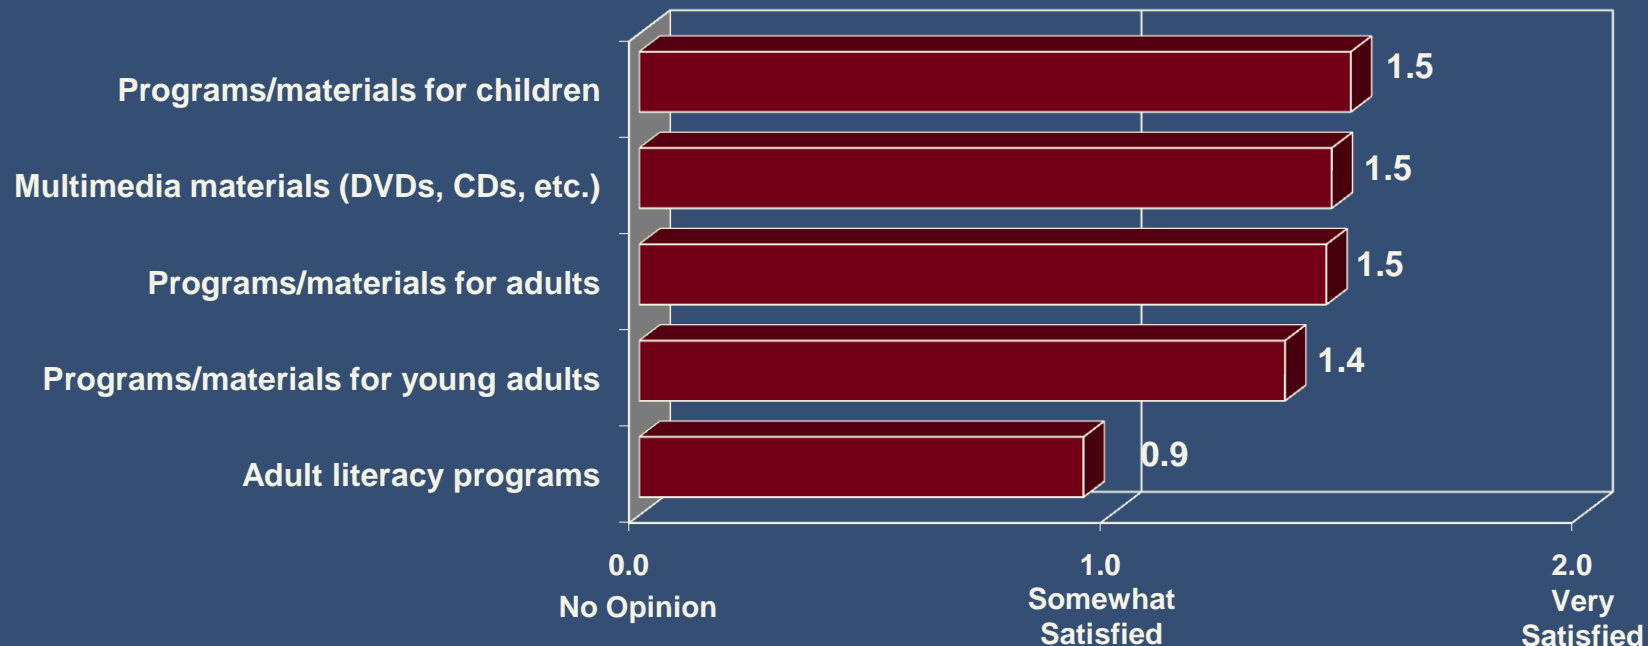

Subgroup Comparisons

As might be expected, use of public library branches tended to reflect respondents' areas of residence. More specifically, use of the Central Library was higher among library patrons who reside in zip codes 91501 and 91504, whereas use of the Buena Vista Branch was higher among those who reside in zip codes 91505 and 91506.

	Residence Zip Code				
	91501	91502	91504	91505	91506
Sample size	54	18	55	99	71
Buena Vista Branch	<u>41.5%</u>	<u>59.1%</u>	<u>61.6%</u>	<u>93.2%</u>	<u>90.5%</u>
Central Library	<u>82.4%</u>	52.0%	<u>57.1%</u>	<u>21.4%</u>	<u>29.5%</u>
Northwest Branch	13.0%	22.3%	14.0%	23.7%	14.2%
DK/NA	6.6%	5.1%	5.0%	2.1%	.0%

Library Services (297 residents)

The residents who reported visiting a Burbank Public Library (n = 297) rated their satisfaction with five library programs and services. At least 4 out of 5 respondents expressed their satisfaction with the four top-rated services: the Public Library's efforts to provide programs and materials for children; multimedia materials such as DVDs, music CDs, and audio books; and programs and materials for adults and young adults. In comparison, 58 percent of library users were satisfied with the Public Library's efforts to offer adult literacy programs and assistance, whereas 41 percent had "no opinion."

Library Services Tracking Results

Some of the largest gains in satisfaction from the 2001 survey were observed for library services. Overall, the results suggest that library users currently are more aware of the Public Library's efforts to provide various programs and services than in 2001, as indicated by a decrease in "no opinion" responses. Further, residents almost entirely expressed satisfaction with the five library services tested in the survey. Note that in the current survey resident dissatisfaction with these services has remained at the low levels observed in the 2001 survey.

	Year	Mean Score	Very Satisfied	Somewhat Satisfied	Somewhat Dissatisfied	Very Dissatisfied	No Opinion
Provide programs and materials for children	2010	1.5	<u>68%</u>	16%	1%	<1%	15%
	2001	1.2	<u>53%</u>	17%	3%	1%	27%
Provide multimedia materials such as DVDs, music CDs, and audio books	2010	1.5	<u>66%</u>	19%	3%	1%	12%
	2001	1.1	<u>46%</u>	23%	3%	2%	26%
Provide programs and materials for adults	2010	1.5	<u>65%</u>	20%	1%	1%	13%
	2001	1.2	<u>49%</u>	25%	3%	2%	21%
Provide programs and materials for young adults	2010	1.4	<u>58%</u>	22%	1%	<1%	19%
	2001	1.0	<u>43%</u>	21%	3%	1%	33%

	2001	.8	<u>30%</u>	18%	1%	<1%	50%

Library Services

Subgroup Comparisons

As shown in the table below, satisfaction with library services was consistently high across the specific branches that patrons had visited. No differences in ratings reached a statistically significant level, which suggests that the Public Library maintains high-quality services across the system.

	Library Branch Visited		
	Central Library	Buena Vista Branch	Northwest Branch
Provide programs and materials for children	1.5	1.6	1.5
Provide multimedia materials such as DVDs, music CDs, and audio books	1.5	1.5	1.7
Provide programs and materials for adults	1.4	1.5	1.7

Contribution to Local Non-Profit Organizations

Contribution to Local Non-Profit Organizations

Just over half of the households reported that they had contributed to a non-profit organization in Burbank in the past year. In comparison, approximately 2 out of 5 had not contributed, and the remaining 8 percent did not provide a response (DK/NA).

Next, I'd like to ask you about local charities and other non-profit organizations. For these questions, we are not including hospitals, universities, government agencies, churches, or service clubs such as Rotary. For these questions, please consider only the organizations in Burbank that offer housing, shelter, or food; family or youth services; services for the disabled and the elderly; or environmental and arts organizations.

People contribute to non-profit organizations in many ways, such as donating money, household items, or their time, or buying products or tickets to an event.

In the past year, have you or a member of your household contributed to a non-profit organization in Burbank?

Contribution to Local Non-Profit Organizations

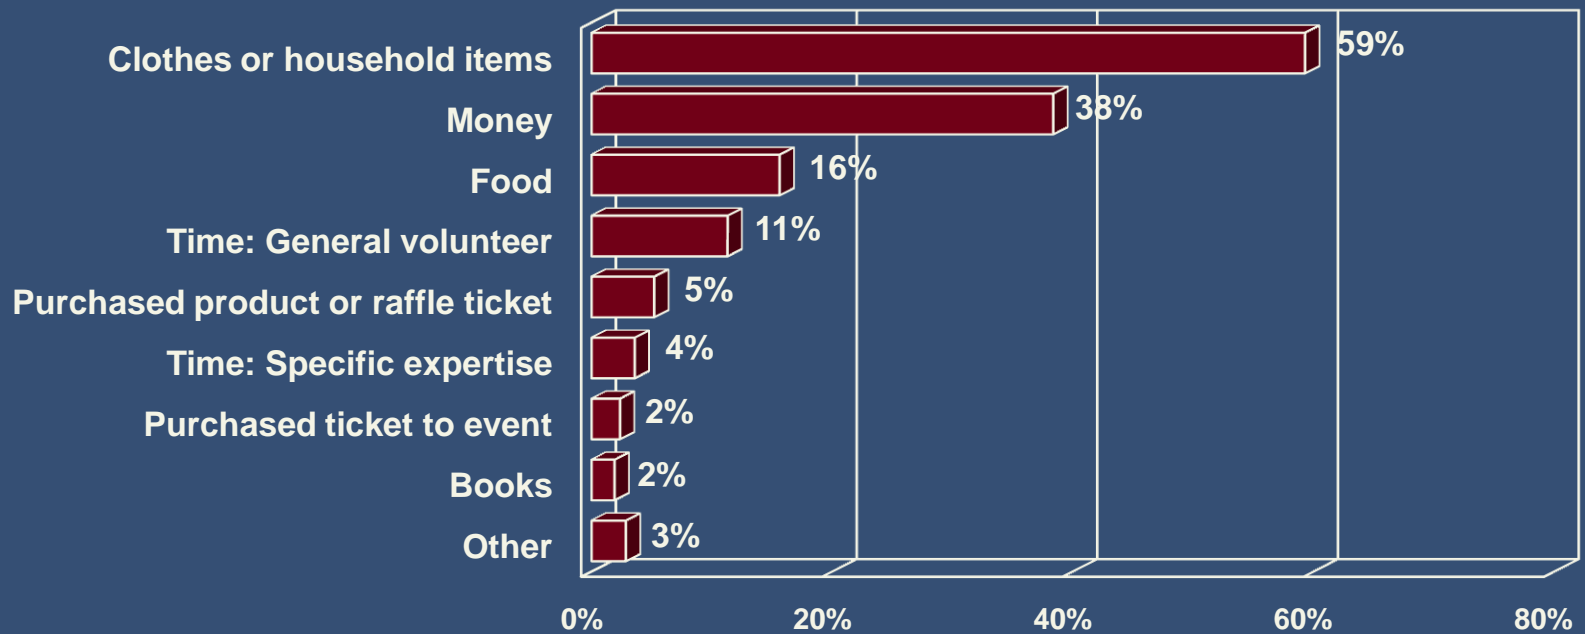

Subgroup Comparisons

A higher proportion of women than men reported making a contribution to a non-profit organization in Burbank. Across age groups, a higher proportion of residents ages 65 and over had made a contribution in comparison with their younger counterparts ages 25 to 34.

	Gender		Age					
	Male	Female	18 to 24	25 to 34	35 to 44	45 to 54	55 to 64	65 and over
Sample size	193	207	48	60	96	77	50	56
Yes	<u>44.1%</u>	<u>60.3%</u>	44.6%	<u>35.1%</u>	55.8%	58.0%	54.4%	<u>65.8%</u>
No	<u>45.2%</u>	<u>34.0%</u>	35.5%	<u>56.1%</u>	41.9%	31.7%	44.0%	<u>25.1%</u>
DK/NA	10.7%	5.7%	<u>19.9%</u>	8.8%	<u>2.2%</u>	10.3%	<u>1.6%</u>	9.1%

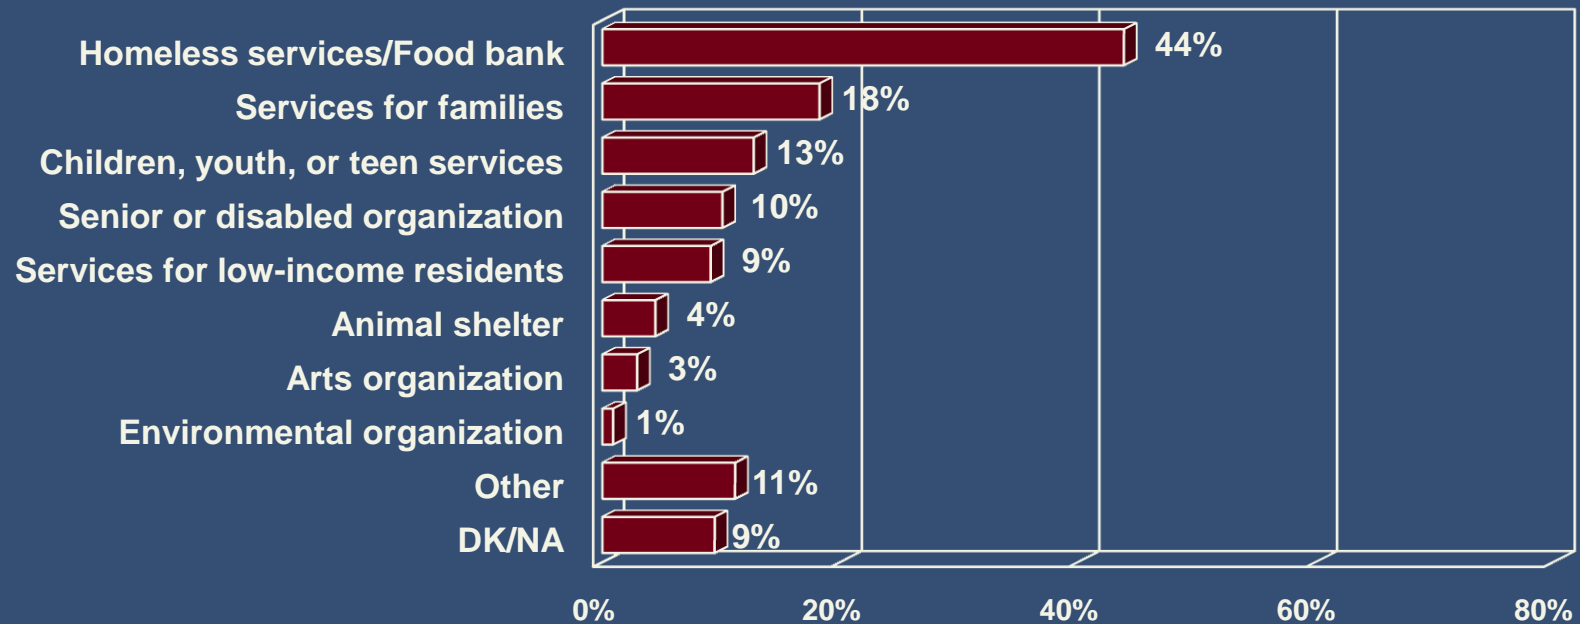

Type of Contribution (210 residents)

Among the households that had contributed to a non-profit organization in Burbank (n = 210), 3 out of 5 residents had donated clothes or household items. The next-most frequently cited contribution was money (38%). Rounding out the top three responses was food (16%).

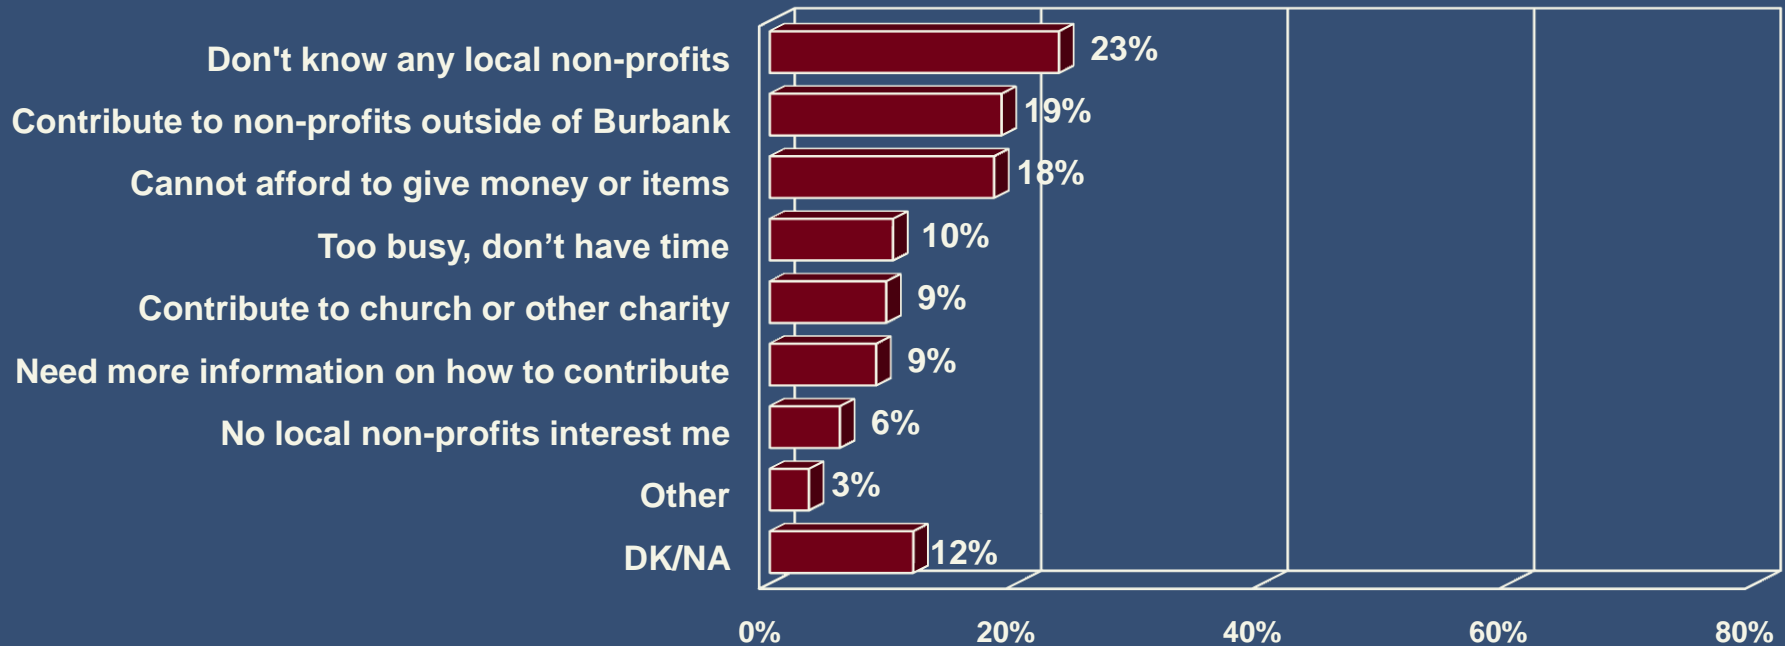

Type of Organization (210 residents)

The 210 residents who had contributed to a local non-profit were asked to indicate the type of organization. By a wide margin, these respondents most frequently reported making a contribution to homeless services or food banks (44%). Following this, approximately 18 percent cited services for families.

Barrier to Contributing (157 residents)

The 157 residents who had not contributed to a local non-profit organization were asked the main reason why. Approximately 23 percent of the respondents did not know of any local non-profits, and another 9 percent mentioned that they need more information on how to contribute. In the next tier of responses were reasons such as donations to non-profits outside the city (19%) and an inability to afford such contributions (18%).

Emergency and Disaster Preparedness

Importance of Public Education Programs

On average, each of the public education programs that the Burbank Fire Prevention Bureau may offer in the future would be between “somewhat important” and “very important” to residents and members of their household. Residents rated Disaster Preparedness and First Aid/CPR programs as the highest in importance, followed by Child Safety programs. Specifically, roughly 7 out of 10 residents rated these three programs as at least “very important.” In comparison, programs on “Fire Prevention and Exit Drills in the Home” were just slightly less important, with roughly half of residents indicating a rating of at least “very important.”

Importance of Public Education Programs

Subgroup Comparisons

On average, women and Hispanic residents attributed significantly higher importance to the public education programs that the Burbank Fire Prevention Bureau may offer in the future. With respect to age differences, the average 35-to-44-year-old resident attributed higher importance to three programs. In addition, programs for First Aid/CPR and “Fire Prevention and Exit Drills in the Home” were rated as more important by the average 18-to-24-year-old resident.

	Gender		Age						Ethnicity			
	Male	Female	18 to 24	25 to 34	35 to 44	45 to 54	55 to 64	65 and over	Caucasian	Hispanic	Asian	Other

Emergency Supply Kit

Just over half of the residents stated that their household has an emergency supply kit with food, water and other supplies in sufficient quantity to last for at least three days in the event of a natural disaster or emergency. These results suggest that a considerable number of Burbank households are unprepared or underprepared for an emergency.

Emergency Supply Kit

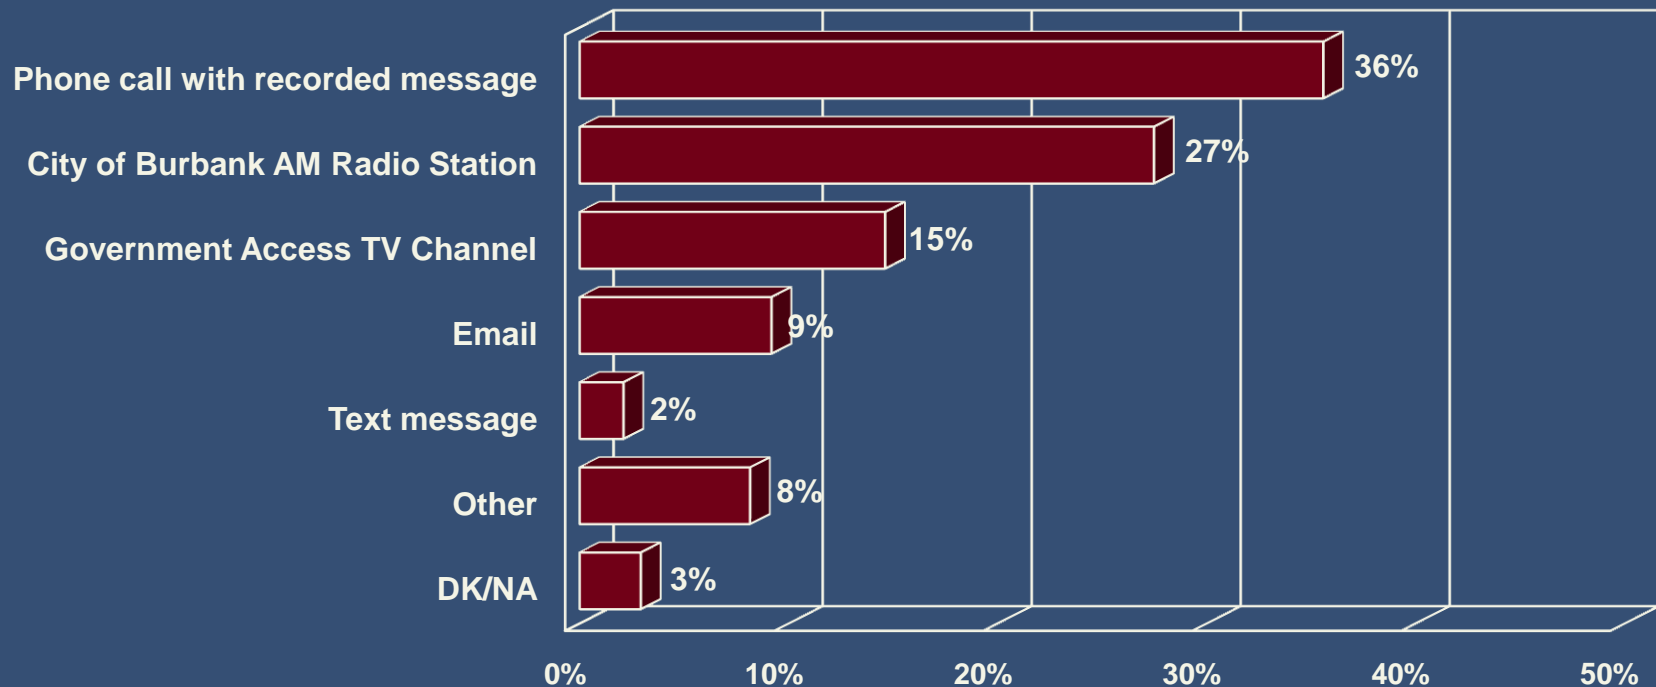

Subgroup Comparisons

Men were significantly more likely to report having a household emergency supply kit than women. With respect to age differences, the residents ages 25 to 44 were less likely to have an emergency supply kit than their younger and older counterparts. Finally, only 37 percent of Hispanic residents have a household emergency supply kit versus 61 percent of Caucasian residents, which suggests that community outreach to the Hispanic community is particularly important with regards to this issue.

	Gender		Age						Ethnicity			
	Male	Female	18 to 24	25 to 34	35 to 44	45 to 54	55 to 64	65 and over	Caucasian	Hispanic	Asian	Other

Preferred Emergency Information Source

In the event of a natural disaster or emergency, residents would most prefer to receive information from the City of Burbank through a phone call with a recorded message (36%) or the City of Burbank AM Radio Station (27%). Another 15 percent of residents would prefer to receive information on the Government Access TV Channel and 9 percent indicated a preference for email. Overall, these results suggest that a variety of information sources should be used by the City to communicate with residents in emergencies.

Preferred Emergency Information Source

Subgroup Comparisons

During an emergency a significantly higher percentage of women would prefer to receive information through a phone call with a recorded message. In contrast, a higher percentage of the men would prefer to receive information through the City of Burbank AM Radio Station. Finally, residents ages 65 and over showed a stronger preference for the Government Access TV Channel, whereas their counterparts ages 18 to 24 showed a stronger preference for email.

	Gender		Age					
	Male	Female	18 to 24	25 to 34	35 to 44	45 to 54	55 to 64	65 and over

Appendix B: Methodology

Survey Parameters

Overall, 400 residents of the City of Burbank completed the telephone survey, representing a total universe of approximately 82,328 adult residents. The study parameters resulted in a margin of error of plus or minus 4.9 percent for the overall sample. Interviews were conducted from September 15 through September 22, 2010, and the average interview length was approximately 20 minutes.

Sample and Weighting

Once collected, the sample of 400 residents was compared with the adult population of the City of Burbank, based on 2006-2008 Census estimates, to examine possible differences between the demographics of the sample of respondents and the actual City population. The data were weighted to correct differences, and the results presented are representative of the adult population of the City of Burbank in terms of gender, age and ethnicity.

Questionnaire Methodology

To avoid the problem of systematic position bias, where the order in which a series of questions is asked systematically influences the answers, several questions in the survey were randomized such that the respondents were not consistently asked the questions in the same order. The series of items in Questions 4, 6, 9 to 13, 15, and 18 were randomized to avoid such position bias.

Questions 2, 17, 20, 22, 25, 26, 27, and C allowed the residents surveyed to mention multiple responses. For this reason, the response percentages may sum to more than 100, and these represent the percentage of residents who mentioned a particular response, rather than the percentage of total responses.

Because a survey typically involves a limited number of people who are part of a larger population group, by mere chance alone there will almost always be some differences between a sample and the population from which it was drawn. These differences are known as “sampling error” and they are expected to occur regardless of how scientifically the sample has been selected. The advantage of a scientific sample is that we are able to calculate the sampling error. Sampling error is determined by four factors: the population size, the sample size, a confidence level, and the dispersion of responses.

The following table shows the possible sampling variation that applies to a percent result reported from a probability type sample. Because the sample of 400 residents was drawn from the estimated population of approximately 82,328 adult residents in the City of Burbank, one can be 95 percent confident that the margin of error will not vary, plus or minus, by more than the indicated number of percent points from the result that would have been obtained if the interviews had been conducted with all persons in the universe. As the table on the next page indicates, the margin of error for the aggregate responses of the sample of 400 residents is between 2.9 and 4.9 percent.

This means that, for a given question with dichotomous response options (e.g., Yes/No) answered by all 400 residents, one can be 95 percent confident that the difference between the percent breakdowns of the sample and those of the total population is no greater than 4.9 percent. The percent margin of error applies to both sides of the answer, so that for a question in which 50 percent of the respondents said yes, one can be 95 percent confident that the actual percent of the population that would say yes is between 45 (50 minus 4.9) percent and 55 (50 plus 4.9) percent.

The margin of error for a given question also depends on the distribution of responses to the question. The 4.9 percent refers to dichotomous questions where opinions are evenly split in the sample with 50 percent of respondents saying yes and 50 percent saying no. If that same question were to receive a response in which 10 percent of the respondents say yes and 90 percent say no, then the margin of error would be no greater than plus or minus 2.9 percent. As the number of respondents in a particular subgroup (e.g., age) is smaller than the number of total respondents, the margin of error associated with estimating a given subgroup’s response will be higher. Due to the high margin of error, Godbe Research cautions against generalizing the results for subgroups that are comprised of 25 or fewer respondents.

Margin of Error II

<i>n</i>	Distribution of Responses				
	90% / 10%	80% / 20%	70% / 30%	60% / 40%	50% / 50%
800	2.1%	2.8%	3.2%	3.4%	3.4%
700	2.2%	3.0%	3.4%	3.6%	3.7%
600	2.4%	3.2%	3.7%	3.9%	4.0%
500	2.6%	3.5%	4.0%	4.3%	4.4%
400	2.9%	3.9%	4.5%	4.8%	4.9%
300	3.4%	4.5%	5.2%	5.5%	5.6%
200	4.2%	5.5%	6.3%	6.8%	6.9%
100	5.9%	7.8%	9.0%	9.6%	9.8%

Reading Crosstabulation

The questions discussed and analyzed in this report comprise a subset of various crosstabulation tables available for each question. Only those subgroups that are of particular interest or that illustrate particular insights are included in the discussion. Should readers wish to conduct a closer analysis of subgroups for a given question, the complete breakdowns appear in Appendix E. These crosstabulation tables provide detailed information on the responses to each question by demographic and behavioral groups that were assessed in the survey. A typical crosstabulation table is shown here.

A short description of the item appears on the left-hand side of the table. The item sample size (n = 400) is presented in the first column of data under “Total.”

The results to each possible answer choice of all respondents are presented in the first column of data under “Total.” The aggregate number of respondents in each answer category is presented as a whole number, and the percent of the entire sample that this number represents is just below the whole number. In this example, among the total respondents, 313 residents reported “very satisfied,” and this number of respondents equals 78 percent of the total sample size of 400. Next to the “Total” column are the other columns representing responses from male and female residents. The data from these columns are read in exactly the same fashion as the data in the “Total” column, although each group makes up a smaller percent of the entire sample.

		Gender		
		Total	Male	Female
1. In general, are you satisfied or dissatisfied with the overall quality of life in Burbank?	Total	400	193	207
	Very satisfied	313	137	175
		78.2%	71.3%	84.6%
	Somewhat satisfied	72	48	24
		18.0%	24.8%	11.6%
	Somewhat dissatisfied	11	6	5
		2.8%	3.4%	2.3%
Very dissatisfied	2	0	2	
	.4%	.0%	.8%	
DK/NA	2	1	2	
	.6%	.5%	.7%	

Subgroup Comparisons

To test whether or not the differences found in percent results among subgroups are likely due to actual differences in opinions or behaviors – rather than the result of chance due to the random nature of the sampling design – a “z-test” was performed. In the headings of each column are labels, “A,” “B,” “C,” etc. along with a description of the variable. The “z-test” is performed by comparing the percent in each cell with all other cells in the same row within a given variable (within Gender in the pictured table, for example).

The results from the “z-test” are displayed in a separate table below the crosstabulation table. If the percent in one cell is statistically different from the percent in another, the column label will be displayed in the cell from which it varies significantly. For instance, in the adjacent table, a significantly higher percent of the men (25%) reported “somewhat satisfied” than the percent of women (12%). Hence, the letter “B,” which stands for “female” residents, appears under Column “A,” which stands for “male” residents. The letters in the table indicate the differences where one can be 95 percent confident that the results are due to actual differences in opinions or behaviors reported by subgroups of respondents.

It is important to note that the percent difference among subgroups is just one piece in the equation to determine whether or not two percentage figures are significantly different from each other. The variance and sample size associated with each data point are integral to determining significance. Therefore, two calculations may be different from each other, yet the difference may not be statistically significant according to the “z” statistic.

		Gender		
		Total	Male	Female
1. In general, are you satisfied or dissatisfied with the overall quality of life in Burbank?	Total	400	193	207
	Very satisfied	313 78.2%	137 71.3%	175 84.6%
	Somewhat satisfied	72 18.0%	48 24.8%	24 11.6%
	Somewhat dissatisfied	11 2.8%	6 3.4%	5 2.3%
	Very dissatisfied	2 .4%	0 .0%	2 .8%
	DK/NA	2 .6%	1 .5%	2 .7%

		Gender

	Somewhat satisfied	B	
	Somewhat dissatisfied		
	Very dissatisfied		
	DK/NA		

Understanding a Mean

In addition to the analyses of response percentages, some results are discussed with respect to an average score. For example, to derive residents' overall satisfaction with City services, a number value is first assigned to each response category (in this case, "very satisfied" = +2, "somewhat satisfied" = +1, "no opinion" = 0, "somewhat dissatisfied" = -1, and "very dissatisfied" = -2). The individual answer of each respondent is then assigned the corresponding number – from +2 to -2 in this example. Finally, all respondents' answers are averaged to produce a final score that reflects overall satisfaction with that City service. The resulting mean score makes the interpretation of the data considerably easier.

In the crosstabulation tables for Questions 4, 6, 9, 10, 11, 12, 13, 15, and 18 of the survey, the reader will find mean scores. These mean scores represent the average response of each group. The table to the right shows the scales for each corresponding question. Responses of "DK/NA" were not included in the calculations of the means for any question.

Question	Measure	Scale	Values
Q 4, 9, 11 to 13, and 18	Satisfaction Ratings	+2 to -2	+2.0 = "Very Satisfied" +1.0 = "Somewhat Satisfied" 0 = "No Opinion" -1.0 = "Somewhat Dissatisfied" -2.0 = "Very Dissatisfied"
Q6	Importance Ratings	+2 to 0	+3.0 = "Extremely Important" +2.0 = "Very Important" +1.0 = "Somewhat Important" 0 = "Not at all Important"
Q10	Usefulness Ratings	+2 to 0	+2.0 = "Very Useful" +1.0 = "Somewhat Useful" 0 = "Not at all Useful"
Q15	Priority Ratings	+3 to +1	+3.0 = "High" +2.0 = "Medium" +1.0 = "Low"

Means Comparisons

Only those subgroups that are of particular interest, or that illustrate a particular insight, are included in the discussion within the report with regard to mean scores. A typical crosstabulation table of mean scores is shown in the adjacent table.

The aggregate mean score for each item in the question series is presented in the first column of the data under “Total.” For example, among the survey respondents (n = 400), the City’s efforts to provide service 11A, “Street sweep in your neighborhood,” earned a mean score of 1.6. Next to the “Total” column are other columns representing the mean scores assigned by the respondents grouped by Gender.

The data from these columns are read in the same fashion as the data in the “Total” column. To test whether two mean scores are statistically different, a “t-test” is performed. As in the case of the “z-test” for percentage figures, a statistically significant result is indicated by the letter representing the data column.

	Gender		
	Total	Male	Female
11A. Street sweep in your neighborhood	1.6	1.6	1.7
11B. Provide graffiti removal services	1.4	1.3	1.5
11C. Maintain City streets	1.2	1.1	1.3
11D. Maintain and repair sidewalks	1.0	1.0	1.0

	Gender	
	Male	Female
	(A)	(B)
11A. Street sweep in your neighborhood		
11B. Provide graffiti removal services		A
11C. Maintain City streets		A
11D. Maintain and repair sidewalks		

CITY OF
Burbank

**CITIZEN
SURVEY
2010**

GODBE RESEARCH
Gain Insight

Appendix C: Topline Report

**CITY OF BURBANK
2010 Strategic Plan Survey
Topline Report
October 2010**

The City of Burbank commissioned Godbe Research to conduct a survey of residents to assess overall perceptions of living in Burbank and to gauge satisfaction with the City's performance in providing services. The survey also gathered resident feedback on specific issues in Burbank, including disaster preparedness, proposed transportation improvements, potential recreation projects, preferred information sources, and household contributions to local non-profit organizations.

SURVEY METHODOLOGY

Overall, 400 residents of the City of Burbank completed the telephone survey, representing a total universe of approximately 82,328 adult residents. The study parameters resulted in a margin of error of plus or minus 4.9 percent for the overall sample. Interviews were conducted from September 15 through September 22, 2010, and the average interview length was approximately 20 minutes.

Once collected, the sample of 400 residents was compared with the adult population of the City of Burbank, based on 2006-2008 Census estimates¹, to examine possible differences between the demographics of the sample of respondents and the actual City population. The data were weighted to correct differences, and the results presented are representative of the adult population of the City of Burbank in terms of gender, age and ethnicity.

QUESTIONNAIRE METHODOLOGY

To avoid the problem of systematic position bias, where the order in which a series of questions is asked systematically influences the answers, several questions in the survey were randomized such that the respondents were not consistently asked the questions in the same order. The series of items in Questions 4, 6, 9 to 13, 15, and 18 were randomized to avoid such position bias.

Questions 2, 17, 20, 22, 25, 26, 27, and C allowed the residents surveyed to mention multiple responses. For this reason, the response percentages may sum to more than 100, and these represent the percentage of residents who mentioned a particular response, rather than the percentage of total responses.

MEAN SCORES AND ROUNDING

In addition to the percentage breakdown of responses to each question, results for the questions relating to satisfaction with City services (Questions 4, 9, 11 to 13, and 18), importance of fire education programs (Question 6), usefulness of transportation improvements (Question 10), and priority of recreation projects (Question 15) include mean scores. For example, to derive the residents' overall satisfaction with City services, a number value is first assigned to each response category (in this case, "very satisfied" = +2, "somewhat satisfied" = +1, "no opinion" = 0, "somewhat dissatisfied" = -1, and "very dissatisfied" = -2). The individual answer of each respondent is then assigned the corresponding number – from +2 to -2 in this example. Finally, all respondents' answers are averaged to produce a final score that reflects overall satisfaction with that City service. The resulting mean score makes the interpretation of the data considerably easier. Responses of "Don't Know" (DK/NA) were not included in the calculations of the means for questions 6, 10 and 15.

Conventional rounding rules apply to the percentages shown in this report, .5 or above is rounded up to the next number, and .4 or below is rounded down to the previous number. As a result, the percentages may not add up to 100 percent.

¹ U.S. Census Bureau 2006-2008 American Community Survey data for the City of Burbank are available at <http://factfinder.census.gov/>.

Burbank is turning 100 this year, and the City commissioned this survey to gather resident feedback which will help shape its future. I'd like to begin by getting your overall opinion of living in Burbank.

1. In general, are you satisfied or dissatisfied with the overall quality of life in Burbank? [GET ANSWER, THEN ASK]: Is that very or somewhat (satisfied/dissatisfied)?

Very satisfied	78%
Somewhat satisfied	18%
Somewhat dissatisfied	3%
Very dissatisfied	<1%
DK/NA	1%

2. What would you say is the most important issue facing the City of Burbank? [DON'T READ CHOICES; ALLOW MULTIPLE RESPONSES]

School quality	14%
Economy/Unemployment/City budget deficit	13%
Too much traffic	13%
Crime	10%
Getting too crowded	10%
Redevelopment and expansion	8%
Lack of affordable housing	3%
Airport expansion	3%
Utilities	3%
Maintenance of streets	2%
Other	13%
DK/NA	22%

3. Generally speaking, are you satisfied or dissatisfied with the job the City of Burbank is doing to provide city services? [GET ANSWER, THEN ASK:] Would that be very or somewhat (satisfied/dissatisfied)?

Very satisfied	59%
Somewhat satisfied	35%
Somewhat dissatisfied	2%
Very dissatisfied	1%
DK/NA	3%

4. Now, I'm going to ask you about a number of public safety services provided by the City of Burbank, and I would like you to indicate your level of satisfaction with each.

Would you say you are satisfied or dissatisfied with the City's efforts to _____? [GET ANSWER, THEN ASK:] Would that be very or somewhat (satisfied/dissatisfied)?

	Mean Score	Very Satisfied	Somewhat Satisfied	Somewhat Dissatisfied	Very Dissatisfied	No Opinion
4A. Provide community outreach services such as neighborhood watch programs	.9	35%	30%	6%	4%	25%
4B. Provide school resource officers and other juvenile based services	.7	31%	23%	7%	3%	37%
4C. Maintain a low crime rate	1.6	71%	23%	2%	1%	3%
4D. Provide rapid response times to police emergency calls	1.5	71%	14%	3%	1%	10%
4E. Ensure pedestrian and bicycle safety	1.1	51%	29%	7%	6%	7%
4F. Provide animal control services	1.4	62%	19%	2%	2%	15%
4G. Provide paramedic services	1.6	73%	12%	<1%	<1%	15%
4H. Provide fire protection services	1.6	76%	13%	1%	0%	10%
4I. Offer fire prevention programs	1.1	45%	26%	3%	<1%	26%
4J. Prepare for emergencies such as earthquakes	.9	33%	28%	5%	2%	32%
4K. Provide rapid response times to fire and paramedic emergency calls	1.7	80%	10%	<1%	0%	10%

Computation of Mean Scores: "Very Satisfied" = +2, "Somewhat Satisfied" = +1, "No Opinion" = 0, "Somewhat Dissatisfied" = -1, and "Very Dissatisfied" = -2.

5. In general, are you satisfied or dissatisfied with the job the Burbank police department is doing to address neighborhood concerns? [GET ANSWER, THEN ASK:] Would that be very or somewhat (satisfied/dissatisfied)?

Very satisfied	56%
Somewhat satisfied	29%
Somewhat dissatisfied	5%
Very dissatisfied	5%
DK/NA	5%

6. Next, I'm going to read a list of public education programs that the Burbank Fire Prevention Bureau may offer in the future. Please tell me how important each program would be to you and the members of your household.

Would _____ be extremely important, very important, somewhat important, or not at all important?

	Mean Score	Extremely Important	Very Important	Somewhat Important	Not at all Important	DK/NA
6A. "Fire Prevention and Exit Drills in the Home" programs	1.6	15%	37%	35%	11%	2%
6B. Disaster Preparedness programs	1.9	19%	56%	20%	3%	1%
6C. Child Safety programs	1.7	18%	50%	15%	14%	3%
6D. First Aid and CPR programs	1.9	19%	50%	26%	3%	2%

Computation of Mean Scores: "Extremely Important" = +3, "Very Important" = +2, "Somewhat Important" = +1, and "Not at all Important" = 0.

7. Does your household have an emergency supply kit with food, water, and other supplies in sufficient quantity to last for at least three days in the event of a natural disaster or emergency?

Yes	54%
No	45%
DK/NA	<1%

8. In the event of a natural disaster or emergency, how would you prefer to receive information from the City of Burbank?

Phone call with recorded message	36%
City of Burbank AM Radio Station (BAM 1620)	27%
Government Access TV Channel (BTV 6)	15%
Email	9%
Cell phone text message	2%
Other	8%
DK/NA	3%

9. Now, I'm going to ask you about a number of community planning and development services provided by the City, and I would like you to indicate your level of satisfaction with each.

Would you say you are satisfied or dissatisfied with the City's efforts to _____? [GET ANSWER, THEN ASK:] Would that be very or somewhat (satisfied/dissatisfied)?

	Mean Score	Very Satisfied	Somewhat Satisfied	Somewhat Dissatisfied	Very Dissatisfied	No Opinion
9A. Provide additional shopping opportunities to residents	1.2	48%	34%	7%	3%	8%
9B. Provide assistance for affordable homeownership	.2	15%	23%	13%	9%	41%
9C. Increase the availability of affordable housing	.2	19%	25%	16%	11%	29%
9D. Enforce safety, building, and business licensing requirements	.9	37%	27%	4%	3%	29%
9E. Provide additional parking in residential areas	.5	27%	35%	15%	14%	9%
9F. Provide additional parking in commercial and business areas	.6	33%	36%	14%	13%	4%
9G. Manage growth and new development	.7	26%	44%	11%	9%	10%
9H. Preserve Burbank's small-town character	1.1	52%	30%	8%	7%	4%

Computation of Mean Scores: "Very Satisfied" = +2, "Somewhat Satisfied" = +1, "No Opinion" = 0, "Somewhat Dissatisfied" = -1, and "Very Dissatisfied" = -2.

10. Now, for each of the following proposed transportation improvements, please tell me whether it would be very useful, somewhat useful, or not at all useful to you personally.

Here's the (first/next) one: _____. Do you think this improvement would be very useful, somewhat useful, or not at all useful to you?

	Mean Score	Very Useful	Somewhat Useful	Not at all Useful	DK/NA
10A. Improving the City's bicycle route system	1.1	41%	27%	29%	3%
10B. Improving major intersections and streets for traffic flow	1.7	77%	14%	7%	2%
10C. Improving sidewalks and crosswalks to make the City more pedestrian friendly	1.6	65%	26%	8%	1%
10D. Improving public transit service	1.1	38%	30%	28%	5%

Computation of Mean Scores: "Very Useful" = +2, "Somewhat Useful" = +1, and "Not at all Useful" = 0.

11. Next, I'd like to ask you about a few public works services provided by the City. For the following list of services, please tell me about your level of satisfaction.

Would you say you are satisfied or dissatisfied with the City's efforts to _____? [GET ANSWER, THEN ASK:] Would that be very or somewhat (satisfied/dissatisfied)?

	Mean Score	Very Satisfied	Somewhat Satisfied	Somewhat Dissatisfied	Very Dissatisfied	No Opinion
11A. Street sweep in your neighborhood	1.6	76%	18%	2%	2%	2%
11B. Provide graffiti removal services	1.4	61%	22%	3%	2%	11%
11C. Maintain City streets	1.2	56%	29%	8%	7%	1%
11D. Maintain and repair sidewalks	1.0	46%	35%	8%	9%	2%
11E. Provide trash and recycling service	1.6	75%	17%	4%	2%	2%
11F. Maintain City alleys	.9	37%	34%	9%	7%	13%

Computation of Mean Scores: "Very Satisfied" = +2, "Somewhat Satisfied" = +1, "No Opinion" = 0, "Somewhat Dissatisfied" = -1, and "Very Dissatisfied" = -2.

12. Now, I've got a couple questions about utility services provided by the City, and I would like you to indicate your level of satisfaction with each.

Would you say you are satisfied or dissatisfied with the City's efforts to _____? [GET ANSWER, THEN ASK:] Would that be very or somewhat (satisfied/dissatisfied)?

	Mean Score	Very Satisfied	Somewhat Satisfied	Somewhat Dissatisfied	Very Dissatisfied	No Opinion
12A. Provide sufficient street lighting	1.5	62%	31%	3%	2%	1%
12B. Provide reliable electric service	1.7	82%	14%	2%	1%	2%
12C. Provide reliable water service	1.7	80%	15%	1%	<1%	3%
12D. Offer electric conservation programs and information	1.3	58%	25%	5%	3%	8%
12E. Offer water conservation programs and information	1.4	65%	22%	4%	2%	7%

Computation of Mean Scores: "Very Satisfied" = +2, "Somewhat Satisfied" = +1, "No Opinion" = 0, "Somewhat Dissatisfied" = -1, and "Very Dissatisfied" = -2.

13. Now, I have a short list of park and recreation services that I'd like to read, and I would like you to indicate your level of satisfaction with each.

Would you say you are satisfied or dissatisfied with the City's efforts to _____? [GET ANSWER, THEN ASK:] Would that be very or somewhat (satisfied/dissatisfied)?

	Mean Score	Very Satisfied	Somewhat Satisfied	Somewhat Dissatisfied	Very Dissatisfied	No Opinion
13A. Maintain playground equipment, picnic areas, and parks	1.5	65%	22%	2%	2%	10%
13B. Provide safe public park and recreation areas	1.6	74%	18%	1%	1%	6%

2010**

GODBE RESEARCH
Gain Insight

Appendix D: Questionnaire

**City of Burbank
2010 Strategic Plan Survey
Final Draft – Approved 9/9/10 (n = 400; 20 min)**

Hello. May I speak with _____? My name is _____ and I'm calling on behalf of GRA, a public opinion research firm. We're conducting a survey concerning issues that are important to voters in the City of Burbank, and I'd like to ask you a few questions.

[IF NEEDED:] I can assure you that I am not trying to sell you anything – this is a study about local issues and your opinion is extremely valuable.

[IF THE PERSON ASKS WHY YOU ONLY WANT TO TALK TO THE INDIVIDUAL LISTED ON THE SAMPLE, OR ASKS IF THEY ARE ABLE TO PARTICIPATE INSTEAD OF THE INDIVIDUAL, THEN SAY: "I'm sorry, but for statistical purposes, this survey must only be completed by this particular individual."]

[IF THE INDIVIDUAL SAYS THEY ARE ON THE NATIONAL DO NOT CALL LIST, RESPOND BASED ON THE GUIDELINES FROM THE MARKETING RESEARCH ASSOCIATION. FOR EXAMPLE, IF THE INDIVIDUAL SAYS: "There's a law that says you can't call me," RESPOND WITH:] "Most types of opinion research studies are exempt under the law that Congress recently passed. That law was passed to regulate the activities of the telemarketing industry. This is a legitimate research call. Your opinions count!"

Before we get started, I'd like to verify that you are eligible to complete the survey.

- i. Do you work for the City of Burbank or are you appointed to any city or county board, committee or commission?
 Yes ----- 1 [CONTINUE TO Qii TEXT]
 No ----- 2 [GO TO SURVEY]
 [DON'T READ] DK/NA ----- 99 [CONTINUE TO Qii TEXT]

- ii. Thank you for your time, but the focus of this survey is on the general public's opinion of local issues. Due to your response to this question, you are not eligible to complete the survey. Thank you again for your time. [TERMINATE]

- A. To begin, how many years have you lived in Burbank?
 Less than 5 years ----- 1
 5 to 9 years ----- 2
 10 to 14 years ----- 3
 More than 14 years ----- 4
 [DON'T READ] DK/NA ----- 99

Burbank is turning 100 this year, and the City commissioned this survey to gather resident feedback which will help shape its future. I'd like to begin by getting your overall opinion of living in Burbank.

- 1. In general, are you satisfied or dissatisfied with the overall quality of life in Burbank? [GET ANSWER, THEN ASK]: Is that very or somewhat (satisfied/dissatisfied)?

Very satisfied ----- 1
 Somewhat satisfied ----- 2
 Somewhat dissatisfied ----- 3
 Very dissatisfied ----- 4
 [DON'T READ] DK/NA ----- 99

- 2. What would you say is the most important issue facing the City of Burbank? [DON'T READ CHOICES; ALLOW MULTIPLE RESPONSES]

Airport expansion ----- 1
 Crime ----- 2
 Economy ----- 3
 Getting too crowded ----- 4
 Redevelopment and expansion ----- 5
 School quality ----- 6
 Too much traffic ----- 7
 Utilities ----- 8
 Other [SPECIFY:] ----- 98
 DK/NA ----- 99

- 3. Generally speaking, are you satisfied or dissatisfied with the job the City of Burbank is doing to provide city services? [GET ANSWER, THEN ASK:] Would that be very or somewhat (satisfied/dissatisfied)?

Very satisfied ----- 1
 Somewhat satisfied ----- 2
 Somewhat dissatisfied ----- 3
 Very dissatisfied ----- 4
 [DON'T READ] DK/NA ----- 99

4. Now, I'm going to ask you about a number of public safety services provided by the City of Burbank, and I would like you to indicate your level of satisfaction with each.

Would you say you are satisfied or dissatisfied with the City's efforts to _____? [GET ANSWER, THEN ASK:] Would that be very or somewhat (satisfied/dissatisfied)?

[RANDOMIZE]

	Very Sat.	Swt. Sat.	Swt. Dissat.	Very Dissat.	[DON'T READ] DK/NA

24. In the past year, have you or a member of your household contributed to a non-profit organization in Burbank?

- Yes ----- 1 [CONTINUE]
- No ----- 2 [GO TO Q27]
- [DON'T READ] DK/NA ----- 99 [GO TO QB]

25. [IF Q24 = 1, YES] What did you or a member of your household contribute? [DON'T READ CHOICES; ALLOW MULTIPLE RESPONSES]

- Car or vehicle----- 1
- Clothes or household items----- 2
- Money ----- 3
- Time: General volunteer ----- 4
- Time: Specific expertise ----- 5
- Purchased product or raffle ticket ----- 6
- Purchased ticket to event ----- 7
- Other [SPECIFY:] ----- 98
- DK/NA ----- 99

26. What type of non-profit organization did you or a member of your household contribute to? [DON'T READ CHOICES; RECORD MULTIPLE RESPONSES]

- Animal shelter ----- 1
- Arts organization----- 2
- Children, youth, or teen services ----- 3
- Environmental organization----- 4
- Homeless services/Food bank ----- 5
- Senior or disabled organization----- 6
- Services for families ----- 7
- Other [SPECIFY:] ----- 98
- DK/NA ----- 99

27. [IF Q24 = 2, NO] What is the main reason your household has not contributed to a local non-profit organization? [DON'T READ CHOICES; RECORD MULTIPLE RESPONSES]

- Cannot afford to give money or items ----- 1
- Contribute to church or other charity ----- 2
- Contribute to non-profits outside of Burbank ----- 3
- Don't know any local non-profits----- 4
- Need more information on how to contribute----- 5
- No local non-profits interest me----- 6
- Pay taxes ----- 7
- Too busy, don't have time----- 8
- Other [SPECIFY:] ----- 98
- DK/NA ----- 99

To wrap things up, I have just a few background questions for statistical comparison purposes.

B. How many children under the age of 19 live in your household?

- None ----- 0 [GO TO QD]
- One ----- 1 [CONTINUE]
- Two ----- 2 [CONTINUE]
- Three or more ----- 3 [CONTINUE]
- [DON'T READ] DK/NA ----- 99 [GO TO QD]

C. [IF QB = 1 TO 3, CHILDREN IN HOUSEHOLD] What are the ages of these children living in your household? [MULTIPLE RESPONSES PERMITTED. IF NECESSARY, PROMPT WITH GRADE LEVELS]

- 0 to 5 years (pre-school)----- 1
- 6 to 13 years (grade-school or middle-school)----- 2
- 14 to 18 years (high-school) ----- 3
- [DON'T READ] DK/NA ----- 99

D. Including yourself, if applicable, how many adults age 65 and over live in your household?

- None ----- 0
- One ----- 1
- Two ----- 2
- Three or more ----- 3
- [DON'T READ] DK/NA ----- 99

E. What ethnic group do you consider yourself a part of or feel closest to? [IF RESPONDENT HESITATES, READ LIST]

- African-American or Black ----- 1
- American Indian or Alaska Native----- 2
- Asian ----- 3
- Caucasian or White (includes Armenian) ----- 4
- Hispanic or Latino ----- 5
- Native Hawaiian or other Pacific Islander ----- 6
- Two or more races ----- 7
- Some other race ----- 98
- [DON'T READ] DK/NA ----- 99

F. To wrap things up, can you please tell me if your total household income before taxes is more or less than \$60,000 per year?

- Less ----- 1 [GO TO QF1]
- More ----- 2 [GO TO QF2]
- [DON'T READ] DK/NA ----- 99 [GO TO END]

F1. [IF QF = 1] Please stop me when I reach the category that best describes your total household income before taxes in 2009.

- Less than \$30,000 ----- 1 [GO TO END]
- \$30,000 to less than \$40,000 ----- 2 [GO TO END]
- \$40,000 to less than \$50,000 ----- 3 [GO TO END]
- \$50,000 to less than \$60,000 ----- 4 [GO TO END]
- [DON'T READ] DK/NA ----- 99 [GO TO END]

F2. [IF QF = 2] Please stop me when I reach the category that best describes your total household income before taxes in 2009.

- \$60,000 to less than \$80,000 ----- 5
- \$80,000 to less than \$100,000----- 6
- \$100,000 to less than \$120,000 ----- 7
- \$120,000 to less than \$140,000 ----- 8
- More than \$140,000 ----- 9
- [DON'T READ] DK/NA ----- 99

These are all the questions I have for you. Thank you very much for participating!

Appendix E: Crosstabulation Tables

2010 City of Burbank Strategic Plan Survey Crosstabulation Tables

		Gender		
		Total	Male	Female
1. In general, are you satisfied or dissatisfied with the overall quality of life in Burbank?	Total	400	193	207
	Very satisfied	313 78.2%	137 71.3%	175 84.6%
	Somewhat satisfied	72 18.0%	48 24.8%	24 11.6%
	Somewhat dissatisfied	11 2.8%	6 3.4%	5 2.3%
	Very dissatisfied	2 .4%	0 .0%	2 .8%
	DK/NA	2 .6%	1 .5%	2 .7%

Comparisons of Column Proportions ^{b,c}

		Gender	
		Male (A)	Female (B)
1. In general, are you satisfied or dissatisfied with the overall quality of life in Burbank?	Very satisfied		A
	Somewhat satisfied	B	
	Somewhat dissatisfied		
	Very dissatisfied	a	
	DK/NA		

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

b. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

	Getting too crowded			
	Redevelopment and expansion		A	
	School quality			
	Too much traffic			
	Utilities			a
	Maintenance of streets		A	a
	Lack of affordable housing			a
	Other			a
	DK/NA	B		a

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

		(A)	(B)
3. Generally speaking, are you satisfied or dissatisfied with the job the City of Burbank is doing to provide city services?	Very satisfied		
	Somewhat satisfied		
	Somewhat dissatisfied		
	Very dissatisfied		A
	DK/NA		

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- b. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

	DK/NA		

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

4K. Provide rapid response times to fire and paramedic emergency calls	1.7	1.7	1.8

Comparisons of Column Means^{a,b}

	Use of City Parks or Recreation Programs	
	Yes	No
	(A)	(B)
4A. Provide community outreach services such as neighborhood watch programs		
4B. Provide school resource officers and other juvenile based services		
4C. Maintain a low crime rate		
4D. Provide rapid response times to police emergency calls		
4E. Ensure pedestrian and bicycle safety		
4F. Provide animal control services		
4G. Provide paramedic services		A
4H. Provide fire protection services		
4I. Offer fire prevention programs		
4J. Prepare for emergencies such as earthquakes		
4K. Provide rapid response times to fire and paramedic emergency calls		

Results are based on two-sided tests assuming equal variances with significance level 0.05. For each significant pair, the key of the smaller category appears under the category with larger mean.

a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

b. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.

6A. "Fire Prevention and Exit Drills in the Home" programs		
6B. Disaster Preparedness programs		
6C. Child Safety programs		
6D. First Aid and CPR programs		

Results are based on two-sided tests assuming equal variances with significance level 0.05. For each significant pair, the key of the smaller category appears under the category with larger mean.

a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

b. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.

7. Does your household have an emergency supply kit with food, water, and other supplies in sufficient quantity to last for at least three days in the event of a natural disaster or emergency?	Yes			
	No			
	DK/NA			^a

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

a. This category is not used in comparisons because its column proportion is equal to zero or one.

b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

	(A)	(B)	(C)
9F. Provide additional parking in commercial and business areas	B C		
9G. Manage growth and new development	B		
9H. Preserve Burbank's small-town character	B C		

Results are based on two-sided tests assuming equal variances with significance level 0.05. For each significant pair, the key of the smaller category appears under the category with larger mean.

- a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- b. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.

	Use of City Parks or Recreation Programs		
	Total	Yes	No
9A. Provide additional shopping opportunities to residents	1.2	1.1	1.2
9B. Provide assistance for affordable homeownership	.2	.2	.3

Results are based on two-sided tests assuming equal variances with significance level 0.05. For each significant pair, the key of the smaller category appears under the category with larger mean.

- a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- b. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.

	Length of Residence				
	Total	Less than 5 years	5 to 9 years	10 to 14 years	More than 14 years

12E. Offer water conservation programs and information		

Results are based on two-sided tests assuming equal variances with significance level 0.05. For each significant pair, the key of the smaller category appears under the category with larger mean.

a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

b. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

15A. Offering local hillside hiking and overnight camping			
15B. Creating a dog park			
15C. Building soccer fields			
15D. Building a Splash Pad, an interactive aquatic play area for children of all ages			
15E. Creating a Community Garden			

Results are based on two-sided tests assuming equal variances with significance level 0.05. For each significant pair, the key of the smaller category appears under the category with larger mean.

- a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- b. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

18B. Provide programs and materials for children			
18C. Offer adult literacy programs and assistance			
18D. Provide multimedia materials such as DVDs, music CDs, and audio books			
18E. Provide programs and materials for young adults			

Results are based on two-sided tests assuming equal variances with significance level 0.05. For each significant pair, the key of the smaller category appears under the category with larger mean.

- a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.*
- b. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.*

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

b. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

21. Before taking this survey, were you aware that the City of Burbank has its own website?	Yes					
	No					
	DK/NA	a	a	a	a	a

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

a. This category is not used in comparisons because its column proportion is equal to zero or one.

b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

	Facebook	B	
	Twitter		
	Other		
	DK/NA		

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

b. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

24. In the past year, have you or a member of your household contributed to a non-profit organization in Burbank?	Yes						B
	No		F				
	DK/NA	C E					

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

b. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

	Children, youth, or teen services		.	a	.
	Environmental organization		a	a	.
	Homeless services/Food bank		.	.	.
	Senior or disabled organization		.	.	.
	Services for families		.	.	.
	Services for low-income residents of all ages		.	a	.
	Other		.	.	.
	DK/NA		.	A	.

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

a. This category is not used in comparisons because its column proportion is equal to zero or one.

b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

	Contribute to non-profits outside of Burbank		
	Don't know any local non-profits		
	Need more information on how to contribute		
	No local non-profits interest me		
	Too busy, don't have time		
	Other		
	DK/NA		A

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

b. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

18A. Provide programs and materials for adults			
18B. Provide programs and materials for children			
18C. Offer adult literacy programs and assistance			
18D. Provide multimedia materials such as DVDs, music CDs, and audio books			
18E. Provide programs and materials for young adults			

Results are based on two-sided tests assuming equal variances with significance level 0.05. For each significant pair, the key of the smaller category appears under the category with larger mean.

a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

b. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.
