Hazardous Materials Studies

PARTNER

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

Marriott Burbank

2500 North Hollywood Way
Burbank, California 91505

Report Date: March 25, 2021

Revised June 14, 2021

Partner Project No. 21-311212.1

Prepared for:

AWH Partners

1040 Avenue of the Americas, 9th Floor
New York, New York 10018

June 14, 2021

Mr. Timothy Osiecki
AWH Partners
1040 Avenue of the Americas, 9th Floor
New York, New York 10018

**Subject: Phase I Environmental Site Assessment
Marriott Burbank
2500 North Hollywood Way
Burbank, California 91505
Partner Project No. 21-311212.1**

Dear Mr. Osiecki:

Partner Assessment Corporation (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at 561-412-3776 or wmarcus@partneresi.com.

Sincerely,

William F. Marcus
Principal

EXECUTIVE SUMMARY

Partner Assessment Corporation (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by AWH Partners for the property located at 2500 North Hollywood Way in the City of Burbank, Los Angeles County, California (the "subject property"). The Phase I ESA is designed to provide AWH Partners with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the east side of North Hollywood Way south of Thornton Avenue within a mixed commercial, residential, and industrial area of Los Angeles County. Please refer to the table below for further description of the subject property:

Subject Property Data

Address:	2500 North Hollywood Way, Burbank, California
Historical Addresses:	2504-2516 North Hollywood Way 3220 Thornton Avenue 2444-2520 North Avon Street 2441-2521 North Avon Street
Property Use:	Hospitality - hotel
Land Acreage (Ac):	11.72 (Per Assessor)
Number of Buildings:	Three
Number of Floors:	One, eight, and nine
Gross Building Area (SF):	380,530 (approx.)
Net Rentable Area (SF):	380,530 (approx.)
Date of Construction:	1982 (West Tower), 1990 (East Tower and Convention Center)
Assessor's Parcel Number (APN):	2464-004-015
Type of Construction:	Concrete masonry unit (CMU) load bearing walls
Current Tenants:	Burbank Marriott containing 488 guestrooms
Site Assessment Performed By:	Carol Noland of Partner
Site Assessment Conducted On:	March 12, 2021

The subject property is currently occupied by Marriott Burbank for hospitality and hotel use. Onsite operations consist of leasing of rooms to guests in two hotel towers designated as East Tower and West Tower. No environmentally sensitive operations are conducted onsite. In addition to the current structure, the subject property is also improved with a convention center, two restaurants, two swimming pools, and interior amenities including meeting rooms, lounges, and a fitness center.

According to available historical sources, the subject property was undeveloped as early as 1894; developed with what appears to have been a large commercial/industrial building associated with Lockheed Martin Corporation between circa 1952 – circa 1983 (eastern portion); developed with light industrial facilities and auto repair facilities from the 1950s – 1960s (western portion); and developed with the current structures in 1982 and 1990.

The immediately surrounding properties consist of a multi-tenant office building, Thornton Avenue, and an airport parking lot to the north; vacant land and a multi-tenant office building to the south; multi-tenant offices to the east; and Denny's, Del Taco, and McDonald's restaurants to the west across Hollywood Way.

According to information from the California State Water Resources Control Board (SWRQCB) GeoTracker website, as well as information obtained from the EPA website associated with the San Fernando Valley (Area 1) North Hollywood, CA Superfund Site the depth to groundwater in the vicinity of the subject property is inferred to be approximately 200-250 feet below ground surface (bgs). In addition, according to information provided within the regulatory database report and from topographic map interpretation, groundwater flow is inferred to be toward the southeast.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Based on our historical and regulatory review, a portion of the subject property was part of the historical **Lockheed Martin Corporation** facilities. Sanborn Maps between 1953 and 1968 identified the eastern portion of the subject property to be improved with a portion of a larger building, which was identified to be used for assembling, shipping and crating, offices, painting, and a test laboratory (1956, 1960, 1966, and 1968 Sanborns). In addition, what appears to have been a historical subject property address of 3220 West Thornton Avenue, under the name Lockheed A-1, B85, Lots 16, 16A, was identified on the Cleanup Program Sites-Spills, Leaks, Investigations, and Cleanups (CPS-SLIC), and Well Investigation Program (WIP) databases. Specifically, under the CPS-SLIC database, the status for 2500 North Hollywood Way is listed as case closed as of April 27, 1990. A historical address of 3220 Thornton is listed as "Open-Site Assessment", with a release report date of January 2, 1965 and a current status date of January 3, 1990.

Portions of this parcel were investigated with 3110 Thornton Avenue (former Lockheed Building 90). 3110 Thornton Avenue offered soil only closure in 2003 via letter to Lockheed Martin Corporation dated February 7, 2003. The February 7, 2003 RWQCB letter does reference the presence of a former 15,000-gallon above ground storage tank (AST) and it was the location where elevated PCE and TCE concentrations were detected. The remainder of Building 90 Site "had low to nondetectable concentrations of contaminants in soil matrix and soil gas" per the letter. The February 7 letter clearly states that "[c]oncentrations of PCE, TCE and 1,1-DCE in soil gas have been significantly reduced at all vapor monitoring probes....;" "The two VES pulsing and rebound periods were similar, indicating all asymptotic conditions have been attained in all vapor monitoring probes;" and "The concentrations of PCE, TCE and 1,1-DCE in soil vapor...meet the Tier 1 criteria for closure...except for the deepest probe (170 feet bgs)." On that basis, RWQCB exercised its discretion to allow the use of performance-based criteria (Tier 2 evaluation) for VES closure noting that "the residual VOC that remain in the vadose zone do not appear to pose a significant threat to

groundwater quality and human health.” Of note, the WIP listing, identified as active, is a database that is no longer in use and existing WIP cases that are still being assessed or remediated are now overseen under the CPS-SLIC program. According to information obtained from the GeoTracker website, these listings are associated with the San Fernando Valley (Area 1) North Hollywood, CA Superfund Site.

Regarding the potential for vapor encroachment from these former releases prior to their abandonment either on the proposed development site or along the property boundary, as stated above, the February 7, 2003 letter clearly addresses the vapor concerns. The proposed construction involves construction of a new hotel and parking garage. The project will have a Soil Management Plan (SMP) in place which will as needed, adequately characterize the soils to be disturbed during development. The SMP will be implemented by an environmental consultant retained by AWH. Building plans for new hotel construction show a parking garage on the eastern portion of the current parking lot and a hotel on a partially raised platform in the central portion of the existing surface parking. No hotel rooms will be at grade. Based on the subgrade development plans and RWQCB responses, it is Partner conclusion and opinion that soil vapor does not represent a significant environmental concern to subject property and development plans for new hotel.

Based on information obtained on EPA's website, Area 1 is a 20 square mile area of contaminated groundwater located primarily in North Hollywood and Burbank, California and is one of four Superfund sites in the San Fernando Valley. The Area 1 site is divided into two Operable Units; Burbank Operable Unit (primarily in Burbank and south of the Burbank airport) and North Hollywood Operable Unit (west of the Burbank Operable Unit). The subject property is within the Burbank Operable Unit. Site contamination sources include, but are not limited to, the former Lockheed Martin Corporation facilities near Burbank Airport, and many other known sources throughout Area 1. Trichloroethylene (TCE) and tetrachloroethylene (PCE) were reported to be widely used in the San Fernando Valley beginning in the 1940s for dry cleaning and for degreasing machinery. The disposal of these chemicals was not well regulated during this time and as a result, releases from a large number of facilities throughout the eastern San Fernando Valley Area 1 have resulted in a large plume of VOC-contaminated groundwater, which begins in the Area 1 site and extends southeast, down-gradient.

Partner reviewed the most recent *Five-Year Review Report for San Fernando Valley (Area 1) Superfund Site*, dated September 21, 2018. Based on a map depicting former Lockheed Martin Burbank Properties, a majority of the subject property, except for a small area of the southwestern portion, was depicted to be improved with “Building 85” of the former Lockheed Martin properties. Of importance, based on the *Tetrachloroethene (PCE) Contamination in Groundwater Eastern San Fernando Valley* map, the subject property is within an area of the lowest concentrations of PCE (5-49 micrograms per liter (ug/L)). Similar findings were identified in regard to TCE contamination with concentrations ranging between 5-50 ug/L. In addition, PCE and TCE concentration trends between 1996-2017 were either stable or noted to be decreasing or probably decreasing within the subject property area. The well closest to the subject property along Thornton Avenue was depicted to be either stable or had no trend. It should also be noted that both the TCE and PCE concentration

maps identified a well further northwest of the subject property (former Building B-6 located approximately 1,700 feet from the subject property and upgradient) to have had increasing trends between 1996-2017. This status of this location is currently listed as eligible for soil closure on the GeoTracker database.

Based on this data, it appears that this upgradient area is likely a release point for both TCE and PCE in groundwater and that the historical Lockheed Martin building located on the subject property is not a contributor to the source of the groundwater contamination. Further, there was no indication on Sanborn Maps reviewed to indicate that operations conducted in the Lockheed Martin building which encompassed the subject property would have resulted in a significant release of chlorinated solvents. Overall, based on the reviewed data, it is Partner's opinion that the onsite historical Lockheed Martin building improvements were not a contributor to the area-wide subsurface groundwater contamination associated with the San Fernando Valley (Area 1) North Hollywood, California Superfund Site. However, while not believed to be a contributor to the regional groundwater contamination plume, operations at the former Lockheed facility may have resulted in surficial releases to the soil, particularly in areas identified on Sanborn maps as a testing laboratory and painting area with dip tanks. As such, the former operations at the Lockheed facility represent a REC.

Lockheed Martin remains financially responsible for monitoring and treatment of groundwater in the Burbank Operable Unit (this includes the subject property).

- The **San Fernando Valley (Area 1) North Hollywood, CA Superfund Site** is being addressed through federal, state, municipal, and potential responsible party (PRP) actions. The current site status of the Burbank Operable Unit area includes the temporary remedy of extraction and treatment of groundwater. The City of Burbank Public Service Department receives groundwater from the site blended with treated groundwater to reduce nitrate levels and then distributes it to the public water supply system. Operation of this remedy commenced in 1996 and groundwater treatment has since treated approximately 36 billion gallons of VOCs contaminated water. Contaminants of concern are reported to be TCE, PCE, 1,4, dioxane, hexavalent chromium, and 1,2,3-TCP. Although use of contaminated groundwater in this area is considered the greatest human health risk, the extraction of groundwater is strictly regulated, therefore no unauthorized use is anticipated. In addition, no impacts to indoor air (via the vapor intrusion pathway) or inhalation exposures for construction workers are likely due to the depth of contaminated groundwater, which is reported to be at 200-250 feet below ground surface (bgs).

Partner contacted the USEPA for updated information regarding the San Fernando Valley Area 1 Superfund site. Ms. Bianca Handley, Remediation Project Manager, indicated that although impacted water likely flows beneath the subject property, no direct impact to receptors is anticipated due to the depth to groundwater and on-going remediation. Ms. Handley indicated that the presence of the plume should not impact any development in the area, provided no groundwater wells are installed. Based on the above, the area wide confirmed groundwater contamination is not expected to present a risk to health or safety to the subject property occupants

or to impede the current or future use of the subject property. As such, no further investigation related to groundwater is deemed warranted at this time.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify CRECs during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify HRECs during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Based on our review of historical Sanborn Maps from 1960, 1966, and 1968, a lot at 2510 and 2516 Hollywood Way on the western portion of the subject property was improved with a small single-story battery manufacturing facility and a small single-story auto electric repair facility. These types of facilities typically generate various wastes such as chlorinated solvents and lead as part of their operations. However, based on the small size scale of these facilities, it is not suspected that significant manufacturing/generation of hazardous wastes occurred at these locations. Further, this portion of the subject property has since been redeveloped into the existing restaurant portion which is connected to the Western Tower of the hotel property and would have therefore undergone significant grading/excavation activities in order to accommodate the existing improvements. Based on the above, the direct contact to any potential remaining concentrations of contaminants (if any) in the soil is minimized and it is not expected that these historical improvements represent a significant environmental concern at this time.
- Due to the age of the West Tower building, there is a potential that asbestos-containing material (ACM) are present. Readily visible suspect ACMs were observed in generally good condition and do not appear to pose a health and safety concern to the occupants of the subject property at this time. An existing Asbestos Operations & Maintenance Plan, dated November 11, 2014, is currently in place at the subject property.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 of 2500 North Hollywood Way in Burbank, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in **Section 1.5** of this report.

This assessment has revealed evidence of RECs and environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

- Based on the redevelopment plans, a soil management plan will be prepared to characterize soils to be disturbed and to manage soil to be excavated for offsite disposal.

The purpose and scope of Soil Management Plan (SMP) is to establish environmental construction protocols and procedures during redevelopment which differ in detail depending on the nature of construction site's history and current condition. It's fairly typical in a site with a history such as this one to have an environmental professional present to field screen soil being disturbed by grading and excavation work, particularly if it's going to be sent offsite for disposal. Partner has been provided grading and development plans illustrating the locations and areas to be disturbed with grading and/or excavation activities during construction phase of new hotel. In advance of preparation of the SMP, the scope of work summarized below includes soil sampling and analysis to pre-characterize soils in areas to be excavated in order to establish potential soil disposal or reuse options.

The proposed sampling procedures will conform to the requirements of the State Water Resources Control Board (SWRCB), the California Department of Toxic Substances Control (DTSC), and the United States Environmental Protection Agency (EPA) The analytical results will be compared to SWRCB and DTSC Regional Screening Levels (RSLs) for evaluation of disposal options, as warranted based on data. The field activities will include borings advanced to depths ranging from 5 feet (hotel sub slab) to 20 feet bgs (subgrade parking garage) with analytical parameters, to include VOCs and metals. As requested, soil gas samples will also be collected. The scope is summarized below:

- Four borings located beneath the first floor hotel level (proposed indoor spaces) will be advanced to 5 feet bgs with soil samples collected at 5 ft bgs and analyzed for VOCs in accordance with EPA Method 8260B. Soil gas samples will also be collected from 5 feet bgs and analyzed for VOCs in accordance with EPA Method TO-15;
- Four borings located within the proposed subgrade parking garage will be advanced to 20 ft bgs with soil samples collected at 5, 10, and 15 ft bgs and analyzed for California Administrative Method (CAM) 17 metals and VOCs in accordance with EPA Methods 6010B and 8260B, respectively. Four of the locations will be sampled for soil gas VOCs collected from 20 ft bgs and analyzed in accordance with EPA Method TO-15.

Note: If the samples from the parking garage have lead detections in exceedance of ten times the Soluble Threshold Limit Concentration (STLC) of 50 milligrams per kilogram (mg/kg) or 20 times the Toxicity Characteristic Leaching Procedure (TCLP) concentrations of 100 mg/kg, samples will be subjected to the STLC and TCLP Waste Extraction Test (WET) procedures and the leachate analyzed for lead in accordance with 6010B.

It is Partners opinion that the soil characterization activities which will be used to prepare the SMP should adequately address concerns associated with the former tanks and we find no compelling reason to conduct further subsurface investigations beyond the scope of work outlined above.

- Continued implementation of the existing Asbestos Operations & Maintenance Plan, dated November 11, 2014.

1.0 INTRODUCTION

Partner Assessment Corporation (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 2500 North Hollywood Way in the City of Burbank, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

1.4 User Reliance

AWH Partners engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of AWH Partners. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

This report has been completed under specific Terms and Conditions relating to scope, relying parties, limitations of liability, indemnification, dispute resolution, and other factors relevant to any reliance on this report. Any parties relying on this report do so having accepted Partner's standard Terms and Conditions, a copy of which can be found at <http://www.partneresi.com/terms-and-conditions.php>.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past or current owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in **Section 3.0**), this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens, a title search, and completion of a pre-survey questionnaire from the Report User. This information was not provided at the time of the assessment.
- Partner submitted Freedom of Information Act (FOIA) requests to Burbank Fire Department and State Water Resources Control Board (SWRCB) for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property and/or adjacent properties. As of this writing, these agencies have not responded to Partner's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.
- Partner observed approximately 5% of all interior units and all common areas. Based on the size and nature of use of the unobserved units (guestrooms), this limited method of survey is not expected to alter the overall findings of this assessment.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 2500 North Hollywood Way in Burbank, California is located on the east side of Hollywood way south of Thornton Avenue. According to the Los Angeles County Assessor, the subject property is legally described as P M 279-84-86 LOT 1, and ownership has been vested in AWH Burbank Hotel LLC since 2014.

Please refer to **Figure 1: Site Location Map**, **Figure 2: Site Plan**, **Figure 3: Topographic Map**, and **Appendix A: Site Photographs** for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently developed with the Marriott Burbank hotel for hospitality and hotel use. Onsite operations consist of leasing of rooms to guests in two hotel towers designated as the East Tower and West Tower. No environmentally sensitive operations are conducted onsite. In addition to the current structures, the subject property is also improved with a convention center, two restaurants, two swimming pools, and interior amenities including meeting rooms, lounges, and a fitness center.

The subject property is designated for hospitality development by the City of Burbank.

The subject property was identified as a HAZNET, Well Investigation Program (WIP), Facility Index System (FINDS), California Integrated Water Quality System (CIWQS), California EPA Regulated Site Portal Data (CERS), as well as part of a larger National Priority List (NPL)/Superfund site in the regulatory database report, as further discussed in **Section 4.2**.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial and residential area of Los Angeles County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

- North:** Concentra Urgent Care (2550 North Hollywood Way)
Thornton Avenue, beyond which is VSP Parking (2612 North Hollywood Way)
- South:** Vacant land
Multi-tenant office building (2233 North Ontario Street)
Multi-tenant office building (2233 North Ontario Street)
- East:** Kaiser Permanente (3100 Thornton Avenue)
Multi-tenant office building (2255 North Ontario Street)
- West:** Hollywood Way, beyond which is:
McDonald's (2565 North Hollywood Way)
Denny's (2525 North Hollywood Way)
Del Taco (2515 North Hollywood Way)
Rental Car Facility (2501 North Hollywood Way)

The adjacent property to the north was identified as a ENVIROSTOR, Resource Conservation Recovery Act (RCRA) NonGen/NLR, RCRA-Small Quantity Generator (SQG), Emissions Inventory Data (EMI), HAZNET, WIP,

CERS, underground storage tank (UST), aboveground storage tank (AST), CERS HAZ WASTE; and the property to the east was identified as a AST, CERS TANKS, HAZNET, and CERS site in the regulatory database report of **Section 4.2**.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Burbank, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 670 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping toward the southeast.

A copy of the most recent topographic map is included as **Figure 3** of this report.

2.4.2 Hydrology

According to information from the California State Water Resources Control Board (SWRQCB) GeoTracker website, as well as information obtained from the EPA website associated with the San Fernando Valley (Area 1) North Hollywood, CA Superfund Site the depth to groundwater in the vicinity of the subject property is inferred to be approximately 200-250 feet below ground surface (bgs). In addition, according to information provided within the regulatory database report and from topographic map interpretation, groundwater flow is inferred to be toward the southeast.

The nearest surface water in the vicinity of the subject property is the Los Angeles River located approximately one mile south of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by Burbank Water and Power serves the subject property vicinity. According to the 2019 Water Quality Report, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for Burbank are purchased from the Metropolitan Water District which comes from the Northern Sierra Mountains in California and the Colorado River.

2.4.3 Geology/Soils

The subject property is situated within the Peninsular Ranges physiographic province of the State of California.

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Urban Land and Palmview-Tujunga Complex. Urban land are areas with high development and most original soils are displaced. The Palmview-Tujunga complex consists of deep, well drained to somewhat excessively drained, permeable soils with a profile consisting of fine sandy loam, sandy loam, and loamy sand. These soils are on broad Coastal Prairies. Slopes range from 0 to 5 percent.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06037C1328F, dated September 26, 2008, the subject property appears to be located in Zone X, an area of minimal flood hazard.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	Source	Description/Use
1928 - 1948	Aerial Photographs, Interviews, Topographic Maps	Undeveloped/Native land
1952 -1979	Aerial Photographs, Building Records, City Directories, Interviews, Sanborn Maps	Residential, Commercial, Industrial
1983 - 1988	Aerial Photographs, Building Records, City Directories, Interviews, Sanborn Maps	West Tower of Marriott Burbank and Industrial Building (East Portion)
1990 - Present	Aerial Photographs, Building Records, City Directories, Interviews, Onsite Observations, Sanborn Maps	Current Improvements

Tenants on the subject property have included Hilton Hotel under a variation of names (1980 - 2006); and Marriott Burbank under a variation of names (2010 – Present).

Based on our historical and regulatory review, the subject property was part of the historical Lockheed Martin Corporation facilities (eastern portion). Specifically, Sanborn Maps readily available between 1953 and 1968 identified the eastern portion of the subject property to be improved with a portion of a larger building which was identified to include assembling, shipping and crating, offices, and a test laboratory (1956, 1960, 1966, and 1968 Sanborns). There was no indication on Sanborn Maps reviewed to indicate that the historical onsite Lockheed Martin building conducted onsite operations that would have resulted in a significant release of chlorinated solvents. Overall, based on the reviewed data, it is Partner’s opinion that the onsite historical Lockheed Martin building improvements was not a contributor to the area-wide subsurface groundwater contamination associated with the San Fernando Valley (Area 1) North Hollywood, CA Superfund Site.

Based on our review of historical Sanborn Maps from 1960, 1966, and 1968, a lot at 2510 and 2516 Hollywood Way on the western portion of the subject property was improved with a small single-story battery manufacturing facility and a small single-story auto electric repair facility. This portion of the subject property has since been redeveloped into the existing restaurant portion which is connected to the Western Tower of the hotel property.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources, Inc. (EDR) on March 4, 2021. The following observations were noted to be visible on the subject property and adjacent properties during the aerial photograph review:

Date:	1928, 1938	Scale:	1"=500'
Subject Property:	Appears to be undeveloped land		
North:	Appears to be undeveloped land		
South:	Appears to be undeveloped land		

Date: 1928, 1938 **Scale:** 1"=500'
East: Appears to be undeveloped land
West: Appears to be undeveloped land across a roadway

Date: 1948 **Scale:** 1"=500'
Subject Property: No significant changes visible
North: No significant changes visible
South: No significant changes visible
East: No significant changes visible
West: Appears to be a large commercial/light industrial building across a roadway

Date: 1952 **Scale:** 1"=500'
Subject Property: Appears to be residential development on the western portion and improved with a large commercial/light building along the eastern portion
North: Appears to be residential development and possible mobile homes across a roadway
South: Appears to be residential development, commercial, and light industrial development
East: Appears to be commercial and light industrial development
West: No significant changes visible

Date: 1954, 1964 **Scale:** 1"=500'
Subject Property: No significant changes visible
North: No significant changes visible
South: No significant changes visible
East: No significant changes visible
West: No significant changes visible

Date: 1972, 1977, 1981 **Scale:** 1"=500'
Subject Property: No significant changes visible
North: Appears to be residential and commercial development and large parking lot across Thornton Avenue
South: No significant changes visible
East: Appears to be commercial development
West: No significant changes visible

Date: 1989 **Scale:** 1"=500'
Subject Property: The building to the east is no longer present and this portion is now vacant land.
North: No significant changes visible
South: No significant changes visible
East: No significant changes visible
West: No significant changes visible

Date: 1994 **Scale:** 1"=500'
Subject Property: Appears to be developed with the current improvements
North: No significant changes visible
South: No significant changes visible
East: No significant changes visible
West: No significant changes visible

Date:	2002, 2005	Scale:	1"=500'
Subject Property:	No significant changes visible		
North:	No significant changes visible		
South:	Appears to be vacant land to the southwest and commercial development to the southeast		
East:	No significant changes visible		
West:	Appears to be vacant land across a roadway		

Date:	2009, 2012, 2016	Scale:	1"=500'
Subject Property:	No significant changes visible		
North:	No significant changes visible		
South:	No, significant changes		
East:	No significant changes visible		
West:	Appears to be commercial development across a roadway		

Copies of select aerial photographs are included in **Appendix B** of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from EDR on March 5, 2021. The following observations were noted to be depicted on the subject property and adjacent properties during the fire insurance map review:

Date:	1953
Subject Property:	The western portion of the subject property is depicted with several structures including restaurants, residences, retail, and parking lots; the eastern portion is depicted as part of a large commercial/industrial building which extends to the south, containing assembling areas, crating and shipping areas, a pars warehouse, and offices
North:	Depicted with residences and electroplating businesses north of the western portion of the subject property; depicted as parking across West Thornton Avenue north of the eastern portion
South:	Depicted with parts warehouses associated with the onsite building noted above, as well as residences, restaurants, and offices
East:	Depicted with an oil storage yard, an enamel storage building, a 360,000-gallon concrete reservoir, a fire pump house, a scrap metal storage yard, and parts storage yards
West:	No coverage

Date:	1954
Subject Property:	Depicted with a painting area on the eastern portion; no other significant changes noted
North:	No significant changes depicted
South:	No significant changes depicted
East:	No significant changes depicted
West:	No significant changes depicted

Date: 1956

Subject Property: Depicted with a test laboratory on the eastern portion; no other significant changes noted
North: No significant changes depicted
South: No significant changes depicted
East: No significant changes depicted
West: No significant changes depicted

Date: 1960

Subject Property: Depicted with a small scale battery manufacturer along the western portion; no other significant changes noted
North: No significant changes depicted
South: No significant changes depicted
East: Depicted with 15,000-gallon oil tank in addition to the existing oil storage structures
West: No significant changes depicted

Date: 1966

Subject Property: Depicted with a small auto repair shop along the western portion; no other significant changes noted
North: No significant changes depicted
South: No significant changes depicted
East: No significant changes depicted
West: No significant changes depicted

Copies of reviewed Sanborn Maps are included in **Appendix B** of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from EDR on March 5, 2021 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for 2500-2516 North Hollywood Way (Subject Property)

Years	Occupant Listed
1942	2514 North Hollywood Way – Irwin Levey restaurant
1946	2504 North Hollywood Way – Vacant 2510 North Hollywood Way – Aeronatic Café 2514 North Hollywood Way – Roberto Gomez restaurant
1950	2508 North Hollywood Way – Seney & Maher Television
1952	2504 North Hollywood Way – Hubba Grill 2512 North Hollywood Way – Barter Mart used furniture 2514 North Hollywood Way – Wings Inn 2516 North Hollywood Way – Cal Chest Co.
1956	2504 North Hollywood Way – Liz & Fran’s Grill 2506 North Hollywood Way – Ted’s Sporting Goods 2510 North Hollywood Way – The Barter Mart 2514 North Hollywood Way – Broadway Direct Sales Co
1958	2506 North Hollywood Way – Ted’s Sporting Goods

City Directory Search for 2500-2516 North Hollywood Way (Subject Property)

Years	Occupant Listed
	2510 North Hollywood Way – Universal Battery Service Inc.
1962	2504 North Hollywood Way – Rocket In 2506 North Hollywood Way – Al Wolleck Aviation; Dob Boggs Co. 2510 North Hollywood Way – Universal Battery Service Inc. 2514 North Hollywood Way – Harry Hechter Aircraft Parts
1967	2510 North Hollywood Way – Universal Battery Service Inc.
1970	2506 North Hollywood Way – K&L Forklift Co 2510 North Hollywood Way – LTD Auto Rebuilders 2514 North Hollywood Way – Vacant
1971	2506 North Hollywood Way – K&L Forklift Co 2514 North Hollywood Way – Ozzie’s Auto Parts & Repair
1975	2510 North Hollywood Way – California Engine Co. 2514 North Hollywood Way – A 1 Wood Products
1985	2500 North Hollywood Way – Burbank Airport Hilton; Lews Restaurant
1986	2500 North Hollywood Way – Burbank Airport Hilton
1990	2500 North Hollywood Way – Burbank Airport Hilton; Alamo Rent A Car
1991	2500 North Hollywood Way – Burbank Airport Hilton
1994	2500 North Hollywood Way – Burbank Airport Hilton; Lews Restaurant
1995	2500 North Hollywood Way – Burbank Airport Hilton; Lews Restaurant
1999	2500 North Hollywood Way – Burbank Airport Hilton; Daily Grill; Lews Restaurant
2001	2500 North Hollywood Way – Burbank Airport Hilton; Daily Grill; Dollar Rent a Car
2004	2500 North Hollywood Way – Burbank Airport Hilton; Daily Grill; AGF Media Services; National Productions
2006	2500 North Hollywood Way – Burbank Airport Hilton; Daily Grill
2009	2500 North Hollywood Way – Burbank Marriot Hotel & Convention; Grill Concepts; Dollar Rent a Car; AGF Medical
2014	2500 North Hollywood Way – Marriot Burbank Airport; Daily Grill

According to the city directory review, the subject property has been occupied by a hotel since at least 1985. Previous uses of the subject property dating back to 1942 include several restaurants and commercial businesses, including Universal Battery Service between 1958 and 1967.

City Directory Search for Adjacent Properties

Years	Occupant Listed
1931	2505 North Hollywood Way – Pioneer Park
1942	2528 North Hollywood Way – Browns Café 2555 North Hollywood Way – Vega Airplane Co.

2009	3333 Empire Avenue – Yahoo Search Marketing Solutions 3100 Thornton Avenue – WMC Mortgage Corp.; GE Money Bank; GE Capital Mortgage Service 2233 North Ontario Street – Technicolor Techniques 2550 North Hollywood Way – Multi-tenant office building

City Directory Search for Adjacent Properties

Years	Occupant Listed
2014	3355 Empire Avenue – Esolar Inc. 2233 North Ontario Street – Technicolor Techniques 2515 North Hollywood Way – Del Taco 2525 North Hollywood Way – Denny's 2550 North Hollywood Way – Multi-tenant office building 2565 North Hollywood Way – McDonalds

According to the city directory review, several of the adjacent properties were occupied by the Lockheed Aircraft Corporation dating back to the 1940s. Sanborn maps indicate that the adjacent Lockheed uses were primarily used for warehousing and office purposes.

Copies of reviewed city directories are included in **Appendix B** of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from EDR on March 4, 2021. The following observations were noted to be depicted on the subject property and adjacent properties during the topographic map review:

Date: 1894, 1896, 1898, 1900, 1902, 1921, 1926

Subject Property:	Depicted as undeveloped
North:	Depicted as undeveloped
South:	Depicted as undeveloped
East:	Depicted as undeveloped
West:	Depicted as undeveloped

Date: 1948, 1953

Subject Property:	Depicted with a commercial/light industrial building to the east
North:	Depicted as undeveloped
South:	Depicted with a commercial/light industrial building
East:	Depicted as undeveloped
West:	Depicted with a commercial/light industrial building

Date: 1966, 1972, 1994

Subject Property:	Several structures are now depicted to the west
North:	Depicted as undeveloped
South:	Depicted with additional commercial development
East:	Depicted with several small structures
West:	Depicted with a large commercial/light industrial building

Date: 2012

Subject Property:	No specific improvements depicted
North:	No specific improvements depicted; only roadways
South:	No specific improvements depicted; only roadways
East:	No specific improvements depicted; only roadways
West:	No specific improvements depicted; only roadways

Copies of reviewed topographic maps are included in **Appendix B** of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

A copy of pertinent documents is included in **Appendix B** of this report.

4.1.1 State Department

Regulatory Agency Data

Name of Agency:	California Environmental Protection Agency (Cal/EPA)
Point of Contact:	https://calepa.ca.gov/
Agency Address:	1001 I Street, Sacramento, California 95814
Agency Phone Number:	(916) 323-2514
Date of Contact:	March 8, 2021
Method of Communication:	Online
Summary of Communication:	The Cal EPA Regulated Site Portal is a database and interactive map, which combines information from multiple state and federal data sources. The database provides an overview of regulated equipment, materials and activities for each site, such as underground and aboveground storage tanks; hazardous materials and waste; state and federal cleanups; impacted ground and surface waters; and/or toxic materials. According to the Cal EPA Portal, the subject property, identified as Burbank Airport Marriott Hotel, was identified as a chemical storage facility under the California Environmental Reporting System (CERS) database. The subject property was reportedly last inspected in August 2017 by the Los Angeles County Fire Department. No other information was provided.

4.1.2 Health Department

Regulatory Agency Data

Name of Agency:	Los Angeles Department of Public Health
Point of Contact:	http://publichealth.lacounty.gov/phi/admin.htm
Agency Address:	313 North Figueroa Street, Los Angeles, California 90012
Agency Phone Number:	(213) 240-7785
Date of Contact:	March 8, 2021
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the LADPH.

4.1.3 Fire Department

Regulatory Agency Data

Name of Agency:	Los Angeles County Fire Department (LACoFD)
Point of Contact:	https://fire.lacounty.gov/public-records-requests/
Agency Address:	1320 North Eastern Avenue, Los Angeles, California 90063
Agency Phone Number:	(323) 890-4045
Date of Contact:	March 8, 2021
Method of Communication:	Online

Regulatory Agency Data

Summary of Communication: As of the date of this report, Partner has not received a response from the LACoFD for inclusion in this report. Based on current use an jurisdiction within the City of Burbank, a response from LACoFD is not expected.

Regulatory Agency Data

Name of Agency: City of Burbank Fire Department (BFD)
Point of Contact: Leslie Sandoval, Intermediate Clerk
Agency Address: 311 East Orange Grove Avenue, Burbank, California 91502
Agency Phone Number: (818) 238-3456
Date of Contact: March 8, 2021
Method of Communication: Email
Summary of Communication: Information provided by the BFD includes copies of Hazardous Materials inventories detailing the various chemicals used in the operation of the hotel, and Operational Permits for the use of the diesel day tanks (75 and 100 gallons in size) used to fuel the emergency generators.

4.1.4 Air Pollution Control Agency

Regulatory Agency Data

Name of Agency: South Coast Air Quality Management District (AQMD)
Point of Contact: <http://www.aqmd.gov/nav/FIND>
Agency Address: 21865 Copley Drive, Diamond Bar, California 91765
Agency Phone Number: (909) 396-2000
Date of Contact: March 17, 2021
Method of Communication: Online
Summary of Communication: No Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) or the presence of AULs, dry cleaning machines, or USTs were on file for the subject property with the AQMD.

4.1.5 Regional Water Quality Agency

Regulatory Agency Data

Name of Agency: Regional Water Quality Control Board (RWQCB)
Point of Contact: <https://geotracker.waterboards.ca.gov/>
Agency Address: 320 West 4th Street, Los Angeles, California 90013
Agency Phone Number: (213) 576-6600
Date of Contact: March 5, 2021
Method of Communication: Online
Summary of Communication: No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB for the subject property. However, a listing was identified for the subject property, identified as Burbank Airport Hilton, which indicates that the subject property was investigated under the Well Investigation Program (WIP Case #104.1185) in 1985, likely as a potential contributor to the San Fernando Valley (Area 1) groundwater contamination NPL site. The GeoTracker database

Regulatory Agency Data

indicates that the case opened on January 1, 1985, was determined to be eligible for closure that same day but was not issued a Case Closed/No Further Action letter until April 27, 1990. Partner has requested copies of the WIP file for this site, and a response is pending.

4.1.6 Department of Toxic Substances Control

Regulatory Agency Data

Name of Agency: California Department of Toxic Substances Control (DTSC)
Point of Contact: <http://www.envirostor.dtsc.ca.gov/public/>
<http://hwts.dtsc.ca.gov>
Agency Address: 1001 I Street, Sacramento, California 95814
Agency Phone Number: (916) 323-7811
Date of Contact: March 17, 2021
Method of Communication: Online
Summary of Communication: The EnviroStor database is the DTSC's data management system for tracking cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known contamination or sites where there may be reason to investigate further. No records were identified for the subject property address on the EnviroStor database.

The DTSC Hazardous Waste Tracking System (HWTS) was researched for hazardous waste manifest data submitted to the California DTSC. The following EPA ID numbers were identified for the subject property:

CAC000866488 – Espinosa Photo Solutions (4/5/1993-10/25/00)
CAC002646154 – Burbank Airport Marriott Hotel & Convention Center (9/8/2009-3/8/2010)
CAC000884576 – Ilford (4/20/1994-10/25/2000)
CAC002581446 – Burbank Hilton (8/31/2004-4/25/2005)
CAC002597338 – Hilton Hotel Inc. (11/7/2005-5/7/2006)
CAC000838840 – Ilford Photo (3/17/1993-10/25/2000)
CAC002654084 – Burbank Marriott Hotel (5/26/2010-11/23/2010)
CAC001211280 – Burbank Airport Hilton (4/16/1996-10/25/2000)
CAP982454779 – Fuji Film Burbank Airport Hilton (5/13/1998-12/21/2000)
CAC000866512 – Burbank Hilton (4/5/1993- 10/25/2000)
CAP400480408 – Fuji Photo Film USA (5-13/1998-12/21-2000)

All identified EPA ID numbers are inactive. No active numbers were identified for the subject property. Given the nature of the onsite operations, which does not involve manufacturing or other industrial activities, the identification of these numbers does not represent a concern.

4.1.7 Building Department

Regulatory Agency Data	
Name of Agency:	Burbank Building Department (BBD)
Point of Contact:	https://permit.burbankca.gov/
Agency Address:	150 North Third Street, Burbank, California 91502
Agency Phone Number:	(818) 238-5220
Date of Contact:	March 8, 2021
Method of Communication:	Online
Summary of Communication:	Records were available for review date back to 2006, as further discussed in the following table:

Building Records Reviewed for 2500 North Hollywood Way (Subject Property)		
Years	Owner/Applicant	Description
2007	Not identified	Grease interceptor for Daily Grill Restaurant
2007	Not identified	Replacing all Hilton signs with Marriott signs
2007	Not identified	Interior renovation of all guestrooms
2007	Not identified	Plumbing TI for all guestrooms
2008	Not identified	Add exterior canopy, remodel parking lot, replaster existing swimming pool
2008	Not identified	Demolition, redesign and renovation of hotel public space to include the lobby and registration desk, lobby bar, business center, gift shop, public restrooms and pre-function area, new finishes and trellis at pool areas
2011	Not identified	New AT&T roof mounted cell site
2016	Not identified	New outdoor bar at courtyard
2017	Marriott Los Angeles Burbank	Install four EV charging stations and four dedicated outlets
2018	Trifecta Hotel	Remove and replace antennas and RRUs on the rooftop, replace other miscellaneous equipment un the equipment area for wireless facility
2020	Marriott Burbank	Replace HVAC unit on roof

4.1.8 Planning Department

Regulatory Agency Data	
Name of Agency:	Burbank Planning Department (BPD)
Point of Contact:	www.burbankca.gov/departments/community-development/planning/zoning-information
Agency Address:	150 North Third Street, Burbank, California 91502
Agency Phone Number:	(818) 238-5250
Date of Contact:	March 17, 2021
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is zoned PD for Planned Development by the City of Burbank.

4.1.9 Oil & Gas Exploration

Regulatory Agency Data

Name of Agency:	California Geologic Energy Management Division (CalGEM)
Point of Contact:	https://www.conservation.ca.gov/calgem/Pages/WellFinder.aspx
Agency Address:	801 K Street, MS 24-01, Sacramento, California
Agency Phone Number:	(916) 322-1080
Date of Contact:	March 17, 2021
Method of Communication:	Online
Summary of Communication:	According to CalGEM, no oil or gas wells are located on or adjacent to the subject property.

4.1.10 Assessor's Office

Regulatory Agency Data

Name of Agency:	Los Angeles County Office of the Assessor
Point of Contact:	https://assessor.lacounty.gov/
Agency Address:	500 West Temple Street, Los Angeles, California
Agency Phone Number:	(213) 974-3211
Date of Contact:	March 17, 2021
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 2464-004-015, and totals 11.72 acres in size. Three buildings were listed: a 167,854 SF building constructed in 182; a 138,512 SF building constructed in 1990; and a 39,820 SF building constructed in 1990.

4.1.11 United States Environmental Protection Agency (USEPA)

Regulatory Agency Data

Name of Agency:	United State Environmental Protection Agency (USEPA)
Point of Contact:	Bianca Handley, Remediation Project Manager
Agency Address:	75 Hawthorne Street, San Francisco, California 94105
Agency Phone Number:	(415) 972-3023
Date of Contact:	March 18, 2021
Method of Communication:	Email/telephone
Summary of Communication:	Partner contacted the USEPA for updated information regarding the San Fernando Valley Area 1 Superfund site. Ms. Handley indicated that the subject property appears to be within the Burbank Operable Unit (OU) portion of the groundwater plume. Ms. Handley stated that the groundwater is impacted by hexavalent chromium, 1,4-dioxane, tetrachloroethene (PCE) and trichloroethene (TCE), and that the plume is located approximately 200-250 feet bgs. Ms. Handley stated that groundwater from the plume is being remediated via a pump and treat system operated by the City of Burbank Department of Water and Power. All water treated by the City meets current drinking water standards. Although impacted water likely flows beneath the subject property, Ms. Handley indicated that no direct impact to receptors is anticipated due to the depth to groundwater and on-going

Regulatory Agency Data

remediation. Ms. Handley indicated that the presence of the plume should not impact any development in the area, provided no groundwater wells are installed.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by EDR. Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	Y	Y	N
Federal CERCLIS Site	0.50	Y	Y	N
Federal CERCLIS-NFRAP Site	0.50	N	Y	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	N	Y	N
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	N	N
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	Y	Y	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site	0.50	N	Y	N
State/Tribal Registered Storage Tank Sites (UST/AST)	0.25	N	Y	N
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	N	Y	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N

4.2.2 Subject Property Listings

The subject property is identified as a WIP/CPS-SLIC, HAZNET/HWTS, FINDS, CIWQS, and CERS site in the regulatory database report, as discussed below:

- The subject property, identified as **Lockheed A-1, B85, Lots 16, 16A** at 3220 West Thornton Avenue (a historical address), was identified on the Cleanup Program Sites-Spills, Leaks, Investigations, and Cleanups (CPS-SLIC), and Well Investigation Program (WIP) databases. Specifically, under the CPS-SLIC database, the status is listed as “Open-Site Assessment”, with a release report date of January 2, 1965 and a current status date of January 3, 1990. Of note, the WIP listing, identified as active, is a database that is no longer in use and existing WIP cases that are still being assessed or remediated are now overseen under the CPS-SLIC program.

According to information obtained from the California GeoTracker website, these listings appear to be associated with the San Fernando Valley (Area 1) North Hollywood, CA Superfund Site, which underlies the subject property and surrounding area. This Superfund site is discussed in more detail below.

- The subject property, identified on the WIP database as **Burbank Airport Hilton** at 2500 North Hollywood Way, was investigated under the Well Investigation Program (WIP Case #104.1185) in 1985, likely as a potential contributor to the San Fernando Valley (Area 1) groundwater contamination NPL site. The GeoTracker database indicates that the case opened on January 1, 1985, was determined to be eligible for closure that same day, but was not issued a Case Closed/No Further Action letter until April 27, 1990. Of note, the WIP is no longer in use and existing WIP cases that are still being assessed or remediated are now overseen under the Cleanup Program Sites-Spills, Leaks, Investigations, and Cleanups (CPS-SLIC) program.
- The subject property, identified on the HAZNET database as **1X Esponoisa Photo Solutions Systems** at 2500 North Hollywood Way, was reported as a generator and recycler of photochemicals/photo processing waste in 1993. No violations and releases were identified. Given the nature of the onsite operations, which do not involve manufacturing or other industrial activities, this listing is not expected to represent a significant environmental concern.
- The subject property, identified on the HAZNET database as **1X Burbank Hilton** at 2500 North Hollywood Way, was reported as a generator and recycler of photochemicals / photo processing

waste in 1993. No violations and releases were identified. Given the nature of the onsite operations, which do not involve manufacturing or other industrial activities, this listing is not expected to represent a significant environmental concern.

- The subject property, identified on the HAZNET database as **Hilton Hotel, Inc.** at 2500 North Hollywood Way, was reported as a generating asbestos containing waste (likely from renovation or abatement) in 2005. Given the type of waste removed, this listing is not expected to represent a significant environmental concern.
- The subject property, identified on the HAZNET database as **Illford** and **1x Illford** at 2500 North Hollywood Way, was reported as a generator and recycler of photochemicals/photo processing waste in 1993. No violations and releases were identified. Given the nature of the onsite operations, which do not involve manufacturing or other industrial activities, this listing is not expected to represent a significant environmental concern.
- The subject property, identified on the CIWQS and CERS database as **Burbank Airport Marriott Hotel** at 2500 North Hollywood Way, was listed for a stormwater discharge permit for construction between 2008 and 2010. Additionally, the site was listed as a chemical storage facility under the CERS listing. There were minor citations listed by the Burbank Fire Department for signs missing for a hazardous materials storage area in 2017. No associated releases were reported; therefore, this listing is not expected to represent a significant environmental concern.
- The subject property, identified on the HAZNET database as **Fuji Photo Film USA, Inc.** and **Fuji Film Burbank Airport Hilton** at 2500 North Hollywood Way, was reported as a generator and recycler of photochemicals/photo processing waste in 1993 and 1994. No violations and releases were identified. Given the nature of the onsite operations, which do not involve manufacturing or other industrial activities, this listing is not expected to represent a significant environmental concern.
- The subject property, identified on the HAZNET database as **Burbank Airport Hilton** at 2500 North Hollywood Way, was reported as a generator and recycler of an “unspecified organic liquid mixture” in 1996. Additional listings were reported in 2005, 2009, and 2010. No releases are listed. Given the nature of the onsite operations, which do not involve manufacturing or other industrial activities, this listing is not expected to represent a significant environmental concern.
- The subject property, identified as **Burbank Airport Marriott Hotel** at 2500 North Hollywood Way, was cross-referenced on the FINDS database regarding waste generation associated with the aforementioned HAZNET listings, discussed above.

4.2.3 Adjacent Property Listings

The adjacent property to the west and north is identified as an ENVIROSTOR site in the regulatory database report, as discussed below:

- The property identified as **Lockheed Corporation / Env. Systems & Tech** at 2550 North Hollywood Way, is located adjacent to the northwest of the subject property. This site appears to be an office address for the Lockheed facility located at 2555 North Hollywood Way, further west, which was

identified on several regulatory databases, discussed below. Of importance, it should be noted that the former Lockheed Martin Corporation facilities near Burbank Airport have contributed to sitewide groundwater contamination, identified as the San Fernando Valley (Area 1) Superfund Site, which has been previously discussed above.

The adjacent property to the west is identified on several databases, including EnviroStor, LUST, CPS-CLIS, CA FID UST, HIST UST, RCRA-SQG, and SEMS-ARCHIVE in the regulatory database report, as discussed below:

- The property identified as **Lockheed Plant A-1 North** at 2555 North Hollywood Way, is located adjacent to the west of the subject property. According to the GeoTracker database, a release of chromium and VOCs was reported in December 1987. A soil vapor extraction (SVE) system operated at the site from 2003-2008 and removed approximately 28,000 lbs. of VOCs, particularly PCE. Elevated levels of chromium were also removed during the excavation activities. GeoTracker notes that the site is being reviewed for a soils-only closure and is listed as eligible for closure as of September 27, 2016. Given the depth to groundwater in the area, this site does not represent a significant environmental concern.

The adjacent property to the north is identified as an RCRA NonGen site in the regulatory database report, as discussed below:

- The property identified as **US Healthworks Medical Group** at 2550 North Hollywood Way, is located adjacent to the northwest of the subject property. This site is listed as a non-generator of hazardous waste. Additionally, no violations are listed. As such, this listing is not expected to represent a significant environmental concern.

The adjacent property to the north is identified as an RCRA-SQG, EMI, HAZNET, WIP, and CERS site in the regulatory database report, as discussed below:

- The property identified as **Gerald Crawford Company** a 3031 Thornton Avenue, is located adjacent to the north of the subject property. This site is listed as a SQG with no violations listed. Specifically, this site is listed as a generator and recycler of aqueous solution and oil containing waste due to printing practices. No releases were identified and as such, these listings are not expected to represent a significant environmental concern. Of note, the WIP listing is suspected to be associated with the ongoing remediation activities associated with the San Fernando Valley (Area 1) Superfund Site groundwater contamination plume, discussed below.

The adjacent property to the east is identified as an AST site in the regulatory database report, as discussed below:

- The property identified as **3100 Partners LLC** at 3100 Thornton Avenue, is located adjacent to the east of the subject property. This site is listed with an AST (contents and size not disclosed). Additionally, no releases are listed. This listing is not expected to represent a significant environmental concern.

The adjacent property to the east is identified as a AST, CERS TANKS, HAZNET, and CERS site in the regulatory database report, as discussed below:

- The property identified as **Skunk Works** at 3100 Thornton Avenue, is located adjacent to the east of the subject property. This site is listed with an AST (contents and size not disclosed). This site is also listed as generating asbestos containing waste in 2005 disposed in a landfill. Additionally, no releases or violations are listed. This listing is not expected to represent a significant environmental concern.

The adjacent property to the east is identified as a CPS-SLIC, WIP, and CERS site in the regulatory database report, as discussed below:

- The property identified as **Lockheed A-1 East, Building 90** at 3110 West Thornton Avenue, is located adjacent to the east of the subject property. According to the GeoTracker database, a release of volatile organic compounds was reported in December 1987. Several site assessments were conducted and revealed elevated concentrations of PCE and TCE in the vadose zone in the northwest portion of this site near a former AST. A soil vapor extraction (SVE) system was installed and operated intermittently between 1997 and 2002, after which concentrations of PCE, TCE, and 1,1-DCE were found to have been significantly reduced. VLEACH modeling was conducted and indicated that residual VOCs would not further degrade groundwater quality beneath the site. A case closure was issued to the site in August 2016. Given the regulatory status of this site, it does not represent a significant concern.

The adjacent property to the southwest is identified as an CERS TANKS, CERS HAZ WASTE, CERS, AST, UST, and RCRA NonGen site in the regulatory database report, as discussed below:

- The sites are at the same location of 2501 North Hollywood Way within the rental car facility under the names **Avairpros Services, Fox Rent A Car, Hertz RAC, Ehi, Bur Conrac and, Avis Rent A Car**. These sites use an AST, UST, and generate hazardous waste in association with the rental car facility. No releases are listed. As such, these listings are not expected to represent a significant environmental concern.

The adjacent property to the south is identified as a RCRA-SQG, FINDS, ECHO, CPS-SLIC, WIP, and CERS site in the regulatory database report, as discussed below:

- The property identified as **Lockheed A-1 East** at 3401 West Empire Avenue, is located adjacent to the south of the subject property. This site is currently vacant land. According to the GeoTracker database, a release of petroleum hydrocarbons was reported in December 1987. Excavation activities were conducted between 1989 and 1996, which removed TPH and VOC-impacted soil. Soil vapor extraction operations were also conducted in 1997 and between 1999 and 2009, which removed approximately 32,000 lbs. of VOCs. No additional information was readily available. The status of this site is listed as Open as of July 17, 1996. However, given the depth to water in the area and the remedial activities which have taken place, this listing is not expected to represent a significant environmental concern.

Based on the findings, given the depth of contaminated groundwater, reported to be between 200-250 feet bgs, the potential for a vapor intrusion condition to exist within the onsite structures is unlikely.

4.2.4 Sites of Concern Listings

The **San Fernando Valley (Area 1) Groundwater Contamination Plume** was identified as an NPL site, as discussed below:

Based on information obtained on EPA's website, Area 1 is a 20 square mile area of contaminated groundwater located primarily in North Hollywood and Burbank, California and is one of four Superfund sites in the San Fernando Valley. The Area 1 site is divided into two Operable Units; Burbank Operable Unit (primarily in Burbank and south of the Burbank airport) and North Hollywood Operable Unit (west of the Burbank Operable Unit). The subject property is within the Burbank Operable Unit. Site contamination sources include, but are not limited to, the former Lockheed Martin Corporation facilities near Burbank Airport, and many other known sources throughout Area 1. Trichloroethylene (TCE) and tetrachloroethylene (PCE) were reported to be widely used in the San Fernando Valley beginning in the 1940s for dry cleaning and for degreasing machinery. The disposal of these chemicals was not well regulated during this time and as a result, releases from a large number of facilities throughout the eastern San Fernando Valley Area 1 have resulted in a large plume of VOC-contaminated groundwater, which begins in the Area 1 site and extends southeast, down-gradient.

Partner reviewed the most recent *Five-Year Review Report for San Fernando Valley (Area 1) Superfund Site*, dated September 21, 2018. Based on a map depicting former Lockheed Martin Burbank Properties, a majority of the subject property, except for a small area of the southwestern portion, was depicted to be improved with "Building 85" of the former Lockheed Martin properties. Of importance, based on the *Tetrachloroethene (PCE) Contamination in Groundwater Eastern San Fernando Valley* map, the subject property is within an area of the lowest concentrations of PCE (5-49 micrograms per liter (ug/L)). Similar findings were identified in regard to TCE contamination with concentrations ranging between 5-50 ug/L. In addition, PCE and TCE concentration trends between 1996-2017 were either stable or noted to be decreasing or probably decreasing within the subject property area. The well closest to the subject property along Thornton Avenue was depicted to be either stable or had no trend. It should also be noted that both the TCE and PCE concentration maps identified a well further northwest of the subject property (former Building B-6 located approximately 1,700 feet from the subject property and upgradient) to have had increasing trends between 1996-2017. This status of this location is currently listed as eligible for soil closure on the GeoTracker database.

Based on this data, it appears that this upgradient area is likely a release point for both TCE and PCE in groundwater and that the historical Lockheed Martin building located on the subject property is not a contributor to the source of the groundwater contamination. Further, there was no indication on Sanborn Maps reviewed to indicate that operations conducted in the Lockheed Martin building which encompassed the subject property would have resulted in a significant release of chlorinated solvents. Overall, based on the reviewed data, it is Partner's opinion that the

onsite historical Lockheed Martin building improvements were not a contributor to the area-wide subsurface groundwater contamination associated with the San Fernando Valley (Area 1) North Hollywood, California Superfund Site. However, while not believed to be a contributor to the regional groundwater contamination plume, operations at the former Lockheed facility may have resulted in surficial releases to the soil, particularly in areas identified on Sanborn maps as a testing laboratory and painting area with dip tanks. As such, the former operations at the Lockheed facility represent a REC.

Lockheed Martin remains financially responsible for monitoring and treatment of groundwater in the Burbank Operable Unit (this includes the subject property).

- The **San Fernando Valley (Area 1) North Hollywood, CA Superfund Site** is being addressed through federal, state, municipal, and potential responsible party (PRP) actions. The current site status of the Burbank Operable Unit area includes the temporary remedy of extraction and treatment of groundwater. The City of Burbank Public Service Department receives groundwater from the site blended with treated groundwater to reduce nitrate levels and then distributes it to the public water supply system. Operation of this remedy commenced in 1996 and groundwater treatment has since treated approximately 36 billion gallons of VOCs contaminated water. Contaminants of concern are reported to be TCE, PCE, 1,4, dioxane, hexavalent chromium, and 1,2,3-TCP. Although use of contaminated groundwater in this area is considered the greatest human health risk, the extraction of groundwater is strictly regulated, therefore no unauthorized use is anticipated. In addition, no impacts to indoor air (via the vapor intrusion pathway) or inhalation exposures for construction workers are likely due to the depth of contaminated groundwater, which is reported to be at 200-250 feet below ground surface (bgs).
- Partner contacted the USEPA for updated information regarding the **San Fernando Valley Area 1 Superfund Site**. Ms. Bianca Handley, Remediation Project Manager, indicated that although impacted water likely flows beneath the subject property, no direct impact to receptors is anticipated due to the depth to groundwater and on-going remediation. Ms. Handley indicated that the presence of the plume should not impact any development in the area, provided no groundwater wells are installed. Based on the above, the area wide confirmed groundwater contamination is not expected to present a risk to health or safety to the subject property occupants or to impede the current or future use of the subject property. As such, no further investigation is deemed warranted at this time.

Based on the findings, given the depth of contaminated groundwater associated with the San Fernando Valley (Area 1) Superfund Site sitewide groundwater contamination plume, reported to be between 200-250 feet bgs, the potential for a vapor intrusion condition to exist within the onsite structures, is unlikely.

4.2.5 Orphan Listings

The San Fernando Valley (Area 1) Groundwater Contamination Plume site was identified on the Orphans listings and is discussed above.

A copy of the regulatory database report is included in **Appendix C** of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from AWH Partners (User of this report).

User Responsibilities

Item	Provided By User	Not Provided By User	Discussed Below	Does Not Apply
Environmental Pre-Survey Questionnaire		X		
Title Records, Environmental Liens, and AULs		X		
Specialized Knowledge		X		
Actual Knowledge		X		
Valuation Reduction for Environmental Issues		X		
Identification of Key Site Manager	Section 5.1.3			
Reason for Performing Phase I ESA	Section 1.1			
Prior Environmental Reports			X	
Other				X

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property since 2014, identified as AWH Burbank Hotel LLC, was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to **Section 5.2** below for information requested from the Report User. The information requested was not received prior to the issuance of this report. Because the Report User (Client) is a lender, it is understood that the Report User would not have knowledge of the property that would significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

5.1.3 Interview with Key Site Manager

Mr. Alan Tate, General Manager, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

The following information was provided to Partner for review during the course of this assessment:

Phase I Environmental Site Assessment Report, Marriott Burbank, 2500 North Hollywood Way, Burbank, California 91505, Partner Assessment Corporation (October 18, 2019)

Partner Assessment Corporation (Partner) prepared this report on behalf of TPG RE Finance Trust, Inc. The assessment was performed in accordance with ASTM Standard E1527-13. The assessment consisted of a site reconnaissance, interviews with knowledgeable personnel, review of historical information, and a review of federal, state and local regulatory databases. Pertinent information contained in this report is summarized below:

- At the time of the 2019 assessment, the subject property was occupied by the Marriott Burbank hotel, consisting of 488 guestrooms, a convention center, restaurant, two pools and other amenities.
- According to the Partner report, the subject property formerly undeveloped as early as 1894; developed with what appears to have been a large commercial/industrial building associated with Lockheed Martin Corporation between circa 1952 – circa 1983 (eastern portion); developed with commercial, light industrial facilities and auto repair facilities from the 1950s – 1960s (western portion); and developed with the current structures in 1982 and 1990.
- Partner identified the use of two emergency generators, each equipped with a small diesel day tank. Other chemicals, typical of maintenance and service operations, were identified as well. No significant storage of hazardous materials was identified.

Partner identified the Area 1 of the San Fernando Valley Superfund (described in Section 4.2.4) as a REC and stated that based on the current status and great depth to groundwater that further investigation was not warranted at the time.

Partner identified the following environmental issue:

- Due to the age of the West Tower building, there is a potential that asbestos-containing material (ACM) are present. Readily visible suspect ACMs were observed in generally good condition and do not appear to pose a health and safety concern to the occupants of the subject property at this time. Of note, an existing Asbestos Operations & Maintenance Plan, dated November 11, 2014, is currently in place at the subject property.

Based on the conclusions of the assessment, Partner recommended the following:

- The status of the area-wide San Fernando Valley (Area 1) North Hollywood, CA Superfund Site should be monitored until granted regulatory closure.
- In the event that the subject property is to undergo redevelopment activities, Partner recommends the subsurface improvements at that time be characterized prior to redevelopment.
- Continued implementation of the existing Asbestos Operations & Maintenance Plan, dated November 11, 2014.

Copies of pertinent pages reviewed are included in **Appendix B** of this report.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was overcast. Refer to **Section 1.5** for limitations encountered during the field reconnaissance and **Sections 2.1** and **2.2** for subject property operations. The table below provides the site assessment details:

Site Assessment Data

Site Assessment Performed By: Carol Noland
Site Assessment Conducted On: March 12, 2021

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 2500 North Hollywood Way (Subject Property)

Name	Title/Role	Contact Number	Site Walk*
Alan Tate	General Manager	(818) 840-6487	Yes

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in two trash compactors and trash dumpsters located on the subject property. An independent solid waste disposal contractor, Athens, removes solid waste from the subject property. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of Burbank services the subject property vicinity. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the subject property and in the public right of way. Site storm water from roofs, landscaped areas, and paved areas is directed to the public right of way, and to on-site storm water drains. The subject property is connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Department of Agriculture. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling are provided by a central system that consists of boilers, cooling towers, air handling units, and fan coil units. The gas-fired boilers (three at East Tower and two at West Tower) located on the building exterior. Two galvanized steel BAC and Evapco cooling towers are located adjacent to the towers. Heating and cooling to the convention center, restaurants, and common areas of the towers are provided by gas-fired packaged HVAC units.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

Varying quantities of hazardous substances, used for maintenance, janitorial, housekeeping, and laundry purposes, were identified at several locations through the subject property. The hazardous materials were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills; however, secondary containment is not provided. Based on the nature of use, overall quantities observed, and lack of violations on-file with the local fire department, these materials are not expected to represent a significant environmental concern.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

Two ASTs that hold 100 and 75-gallons are associated with the emergency generators. The ASTs are located at each tower adjacent to each emergency generator. Dates of installation were not available, but they are equipped with secondary containment. De minimis staining was observed at the base of the emergency generator at the West Tower.

No evidence of current USTs was observed during the site reconnaissance.

Partner documented 2- 10,000-gallon diesel UST and one 10,000- gallon Stoddard Solvent UST depicted on what appears to be the proposed development site. Both of the diesel USTs were apparently abandoned and filled with sand per the notes on the Plot Plan.

The BFD did not have records on the abandonment of USTs or closure of Stoddard Solvent tank. From the location shown on the LMC Plant A-1 Site Plan, both USTs would have been removed when the current improvements were constructed or sooner. Neither former USTs represent a vapor intrusion concern at this point considering likely removal by 1982. Not likely to obtain UST removal records for USTs removed prior to the late 1980s. No documentation of the sampling and closure of Stoddard Solvent tank was obtained in regulatory or other records, but this UST most likely removed during redevelopment of site in 1980's and not likely to pose vapor intrusion concern given the proposed development plans for hotel.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – “Non-PCB;” 2) 50 ppm-500 ppm – “PCB-Contaminated;” and, 3) Greater than 500 ppm – “PCB-Containing.” The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

The onsite reconnaissance addressed indoor and outdoor transformers that may contain PCBs. One pad-mounted transformer was observed on the subject property. The transformer is not labeled indicating PCB content; however, it appears newer. No staining or leakage was observed in the vicinity of the transformer. Partner contacted a customer service representative of Burbank Water and Power, who confirmed that Burbank Water and Power maintains ownership and operational responsibility for the transformer and that the units do not contain PCBs. Based on the good condition of the equipment, the transformer is not expected to represent an environmental concern.

Two hydraulic trash compactors are located on the subject property. Mr. Tate was unaware of the exact age, but believed them to be less than 10 years. As such, the use of PCB-containing oil is not likely.

No other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, balers, etc.) was observed on the subject property during Partner's reconnaissance. Eight (elevators) are present however they are cable operated.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The east tower building was constructed in 1990. As such, the presence of ACMs within interior building materials is considered unlikely

The west tower building was constructed in 1982, and therefore there is the possibility for ACMs to exist. Readily visible suspect ACMs including, but not limited to, drywall systems, mastics, caulking, and roofing materials, were observed to be overall in good condition.

Based on west tower date of construction, prior to disturbance, Partner recommends a comprehensive asbestos survey of the subject property building to determine the presence, condition, friability and likely future condition of suspect or confirmed ACM. All suspect materials must be handled as ACM according to local, state and federal regulations until the results of sampling and analysis indicate the material is a non-ACM. According to the US EPA, ACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition.

An existing Asbestos Operations & Maintenance Plan, dated November 11, 2014, is currently in place at the subject property.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm² (or 5,000 ug/g or 0.5% by weight) or more of lead.

Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

It is unlikely that LBP is present in buildings constructed after 1977. Therefore, due to the age of the subject property buildings, it is unlikely that LBP is present and does not represent an environmental concern.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	Average Predicted Radon Levels	Potential
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification and commercial property use, radon is not considered to be an environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by Burbank Water and Power serves the subject property vicinity. According to the 2018 Water Quality Report, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for Burbank are purchased from the Metropolitan Water District which comes from the Northern Sierra Mountains in California and the Colorado River. According to the 2019 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property buildings for significant evidence of mold growth with the exceptions detailed in **Section 1.5** of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or suspect mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Based on our historical and regulatory review, a portion of the subject property was part of the historical **Lockheed Martin Corporation** facilities. Sanborn Maps between 1953 and 1968 identified the eastern portion of the subject property to be improved with a portion of a larger building, which was identified to be used for assembling, shipping and crating, offices, painting, and a test laboratory (1956, 1960, 1966, and 1968 Sanborns). In addition, what appears to have been a historical subject property address of 3220 West Thornton Avenue, under the name Lockheed A-1, B85, Lots 16, 16A, was identified on the Cleanup Program Sites-Spills, Leaks, Investigations, and Cleanups (CPS-SLIC), and Well Investigation Program (WIP) databases. Specifically, under the CPS-SLIC database, the status for 2500 North Hollywood Way is listed as case closed as of April 27, 1990. A historical address of 3220 Thornton is listed as "Open-Site Assessment", with a release report date of January 2, 1965 and a current status date of January 3, 1990.

Portions of this parcel were investigated with 3110 Thornton Avenue (former Lockheed Building 90). 3110 Thornton Avenue offered soil only closure in 2003 via letter to Lockheed Martin Corporation dated February 7, 2003. The February 7, 2003 RWQCB letter does reference the presence of a former 15,000-gallon above ground storage tank (AST) and it was the location where elevated PCE and TCE concentrations were detected. The remainder of Building 90 Site "had low to nondetectable concentrations of contaminants in soil matrix and soil gas" per the letter. The February 7 letter clearly states that "[c]oncentrations of PCE, TCE and 1,1-DCE in soil gas have been significantly reduced at all vapor monitoring probes...;" "The two VES pulsing and rebound periods were similar, indicating all asymptotic conditions have been attained in all vapor monitoring probes;" and "The concentrations of PCE, TCE and 1,1-DCE in soil vapor...meet the Tier 1 criteria for closure...except for the deepest probe (170 feet bgs)." On that basis, RWQCB exercised its discretion to allow the use of performance-based criteria (Tier 2 evaluation) for VES closure noting that "the residual VOC that remain in the vadose zone do not appear to pose a significant threat to groundwater quality and human health." Of note, the WIP listing, identified as active, is a database that is no longer in use and existing WIP cases that are still being assessed or remediated are now overseen under the CPS-SLIC program. According to information obtained from the GeoTracker website, these listings are associated with the San Fernando Valley (Area 1) North Hollywood, CA Superfund Site.

Regarding the potential for vapor encroachment from these former releases prior to their abandonment either on the proposed development site or along the property boundary, as stated above, the February 7, 2003 letter clearly addresses the vapor concerns. The proposed construction

involves construction of a new hotel and parking garage. The project will have a Soil Management Plan (SMP) in place which will as needed, adequately characterize the soils to be disturbed during development. The SMP will be implemented by an environmental consultant retained by AWH. Building plans for new hotel construction show a parking garage on the eastern portion of the current parking lot and a hotel on a partially raised platform in the central portion of the existing surface parking. No hotel rooms will be at grade. Based on the subgrade development plans and RWQCB responses, it is Partner conclusion and opinion that soil vapor does not represent a significant environmental concern to subject property and development plans for new hotel.

Based on information obtained on EPA's website, Area 1 is a 20 square mile area of contaminated groundwater located primarily in North Hollywood and Burbank, California and is one of four Superfund sites in the San Fernando Valley. The Area 1 site is divided into two Operable Units; Burbank Operable Unit (primarily in Burbank and south of the Burbank airport) and North Hollywood Operable Unit (west of the Burbank Operable Unit). The subject property is within the Burbank Operable Unit. Site contamination sources include, but are not limited to, the former Lockheed Martin Corporation facilities near Burbank Airport, and many other known sources throughout Area 1. Trichloroethylene (TCE) and tetrachloroethylene (PCE) were reported to be widely used in the San Fernando Valley beginning in the 1940s for dry cleaning and for degreasing machinery. The disposal of these chemicals was not well regulated during this time and as a result, releases from a large number of facilities throughout the eastern San Fernando Valley Area 1 have resulted in a large plume of VOC-contaminated groundwater, which begins in the Area 1 site and extends southeast, down-gradient.

Partner reviewed the most recent *Five-Year Review Report for San Fernando Valley (Area 1) Superfund Site*, dated September 21, 2018. Based on a map depicting former Lockheed Martin Burbank Properties, a majority of the subject property, except for a small area of the southwestern portion, was depicted to be improved with "Building 85" of the former Lockheed Martin properties. Of importance, based on the *Tetrachloroethene (PCE) Contamination in Groundwater Eastern San Fernando Valley* map, the subject property is within an area of the lowest concentrations of PCE (5-49 micrograms per liter (ug/L)). Similar findings were identified in regard to TCE contamination with concentrations ranging between 5-50 ug/L. In addition, PCE and TCE concentration trends between 1996-2017 were either stable or noted to be decreasing or probably decreasing within the subject property area. The well closest to the subject property along Thornton Avenue was depicted to be either stable or had no trend. It should also be noted that both the TCE and PCE concentration maps identified a well further northwest of the subject property (former Building B-6 located approximately 1,700 feet from the subject property and upgradient) to have had increasing trends between 1996-2017. This status of this location is currently listed as eligible for soil closure on the GeoTracker database.

Based on this data, it appears that this upgradient area is likely a release point for both TCE and PCE in groundwater and that the historical Lockheed Martin building located on the subject property is not a contributor to the source of the groundwater contamination. Further, there was no indication on Sanborn Maps reviewed to indicate that operations conducted in the Lockheed

Martin building which encompassed the subject property would have resulted in a significant release of chlorinated solvents. Overall, based on the reviewed data, it is Partner's opinion that the onsite historical Lockheed Martin building improvements were not a contributor to the area-wide subsurface groundwater contamination associated with the San Fernando Valley (Area 1) North Hollywood, California Superfund Site. However, while not believed to be a contributor to the regional groundwater contamination plume, operations at the former Lockheed facility may have resulted in surficial releases to the soil, particularly in areas identified on Sanborn maps as a testing laboratory and painting area with dip tanks. As such, the former operations at the Lockheed facility represent a REC.

Lockheed Martin remains financially responsible for monitoring and treatment of groundwater in the Burbank Operable Unit (this includes the subject property).

- The **San Fernando Valley (Area 1) North Hollywood, CA Superfund Site** is being addressed through federal, state, municipal, and potential responsible party (PRP) actions. The current site status of the Burbank Operable Unit area includes the temporary remedy of extraction and treatment of groundwater. The City of Burbank Public Service Department receives groundwater from the site blended with treated groundwater to reduce nitrate levels and then distributes it to the public water supply system. Operation of this remedy commenced in 1996 and groundwater treatment has since treated approximately 36 billion gallons of VOCs contaminated water. Contaminants of concern are reported to be TCE, PCE, 1,4, dioxane, hexavalent chromium, and 1,2,3-TCP. Although use of contaminated groundwater in this area is considered the greatest human health risk, the extraction of groundwater is strictly regulated, therefore no unauthorized use is anticipated. In addition, no impacts to indoor air (via the vapor intrusion pathway) or inhalation exposures for construction workers are likely due to the depth of contaminated groundwater, which is reported to be at 200-250 feet below ground surface (bgs).

Partner contacted the USEPA for updated information regarding the San Fernando Valley Area 1 Superfund site. Ms. Bianca Handley, Remediation Project Manager, indicated that although impacted water likely flows beneath the subject property, no direct impact to receptors is anticipated due to the depth to groundwater and on-going remediation. Ms. Handley indicated that the presence of the plume should not impact any development in the area, provided no groundwater wells are installed. Based on the above, the area wide confirmed groundwater contamination is not expected to present a risk to health or safety to the subject property occupants or to impede the current or future use of the subject property. As such, no further investigation related to groundwater is deemed warranted at this time.

A controlled recognized environmental condition (CREC) refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify CRECs during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify HRECs during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Based on our review of historical Sanborn Maps from 1960, 1966, and 1968, a lot at 2510 and 2516 Hollywood Way on the western portion of the subject property was improved with a small single-story battery manufacturing facility and a small single-story auto electric repair facility. These types of facilities typically generate various wastes such as chlorinated solvents and lead as part of their operations. However, based on the small size scale of these facilities, it is not suspected that significant manufacturing/generation of hazardous wastes occurred at these locations. Further, this portion of the subject property has since been redeveloped into the existing restaurant portion which is connected to the Western Tower of the hotel property and would have therefore undergone significant grading/excavation activities in order to accommodate the existing improvements. Based on the above, the direct contact to any potential remaining concentrations of contaminants (if any) in the soil is minimized and it is not expected that these historical improvements represent a significant environmental concern at this time.
- Due to the age of the West Tower building, there is a potential that asbestos-containing material (ACM) are present. Readily visible suspect ACMs were observed in generally good condition and do not appear to pose a health and safety concern to the occupants of the subject property at this time. An existing Asbestos Operations & Maintenance Plan, dated November 11, 2014, is currently in place at the subject property.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 of 2500 North Hollywood Way in Burbank, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in **Section 1.5** of this report.

This assessment has revealed evidence of RECs and environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

- Based on the redevelopment plans, a soil management plan will be prepared to characterize soils to be disturbed and to manage soil to be excavated for offsite disposal.

The purpose and scope of Soil Management Plan (SMP) is to establish environmental construction protocols and procedures during redevelopment which differ in detail depending on the nature of construction site's history and current condition. It's fairly typical in a site with a history such as this one to have an environmental professional present to field screen soil being disturbed by grading and excavation work, particularly if it's going to be sent offsite for disposal. Partner has been provided grading and development

plans illustrating the locations and areas to be disturbed with grading and/or excavation activities during construction phase of new hotel. In advance of preparation of the SMP, the scope of work summarized below includes soil sampling and analysis to pre-characterize soils in areas to be excavated in order to establish potential soil disposal or reuse options.

The proposed sampling procedures will conform to the requirements of the State Water Resources Control Board (SWRCB), the California Department of Toxic Substances Control (DTSC), and the United States Environmental Protection Agency (EPA). The analytical results will be compared to SWRCB and DTSC Regional Screening Levels (RSLs) for evaluation of disposal options, as warranted based on data. The field activities will include borings advanced to depths ranging from 5 feet (hotel sub slab) to 20 feet bgs (subgrade parking garage) with analytical parameters, to include VOCs and metals. As requested, soil gas samples will also be collected. The scope is summarized below:

- Four borings located beneath the first floor hotel level (proposed indoor spaces) will be advanced to 5 feet bgs with soil samples collected at 5 ft bgs and analyzed for VOCs in accordance with EPA Method 8260B. Soil gas samples will also be collected from 5 feet bgs and analyzed for VOCs in accordance with EPA Method TO-15;
- Four borings located within the proposed subgrade parking garage will be advanced to 20 ft bgs with soil samples collected at 5, 10, and 15 ft bgs and analyzed for California Administrative Method (CAM) 17 metals and VOCs in accordance with EPA Methods 6010B and 8260B, respectively. Four of the locations will be sampled for soil gas VOCs collected from 20 ft bgs and analyzed in accordance with EPA Method TO-15.

Note: If the samples from the parking garage have lead detections in exceedance of ten times the Soluble Threshold Limit Concentration (STLC) of 50 milligrams per kilogram (mg/kg) or 20 times the Toxicity Characteristic Leaching Procedure (TCLP) concentrations of 100 mg/kg, samples will be subjected to the STLC and TCLP Waste Extraction Test (WET) procedures and the leachate analyzed for lead in accordance with 6010B.

It is Partners opinion that the soil characterization activities which will be used to prepare the SMP should adequately address concerns associated with the former tanks and we find no compelling reason to conduct further subsurface investigations beyond the scope of work outlined above.

- Continued implementation of the existing Asbestos Operations & Maintenance Plan, dated November 11, 2014.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I ESA of the property located at 2500 North Hollywood Way in the City of Burbank, Los Angeles County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

ASBESTOS ABATEMENT: The South Coast Air Quality Management District adopted Rule 1403 (copy available at Building Division Counter) Asbestos Emissions From Demolition/Renovation Activities. This rule specifies work practice requirements for demolition and renovation activities and the associated disturbance of asbestos-containing waste material. If there is asbestos, a building permit will not be issued until the notification procedure is completed. Failure to comply with the provisions of this rule may result in a penalty or fine. Demolition or renovation operators must contact the AQMD (909-396-2000) for compliance information for the following requirements: Notification; Removal techniques for asbestos-containing material; Clean-up procedures; and Waste storage and disposal requirements. There is ___/ is not asbestos in the building. I HAVE READ THE SCAQMD RULE 1403 REQUIREMENTS. IF NOTIFICATION IS REQUIRED, THE APPLICATION MUST BE FILED WITH THE SCAQMD 10 DAYS PRIOR TO START OF ANY RENOVATION OR DEMOLITION WORK. _____ Signature of Applicant

CONSTRUCTION FENCING AND DEBRIS: All construction sites shall be fenced and secured. All construction debris shall be stored and contained so as not to create a public nuisance. BMC 9-1-1-3302.3

To: City of Burbank Department of Building and Safety

From: Andrew Rolf
Director of Engineering

I hereby designate Rahim Ghelani, P.E., from California Industrial to act on behalf of Los Angeles Marriott Burbank Airport to submit a project application, and obtain a building permit for the installation of two (2) 10 Ton HVAC Roof Top package Units located at our Convention Center at 2500 North Hollywood Way.

Mr. Rahim Ghelani may submit a project application, amend documents and pay project fees.

Respectfully,

A handwritten signature in black ink, appearing to read 'A. Rolf', written over a large, stylized circular flourish.

PARTNER

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

Marriott Burbank

2500 North Hollywood Way
Burbank, California 91505

Report Date: October 18, 2019
Partner Project No. 19-261580.1

Prepared for:

TPG RE Finance Trust, Inc.

888 Seventh Avenue
New York, New York 10106

October 18, 2019

Mr. Ryan Roberto
TPG RE Finance Trust, Inc.
888 Seventh Avenue, 35th Floor
New York, New York 10106

Subject: Phase I Environmental Site Assessment
Marriott Burbank
2500 North Hollywood Way
Burbank, California 91505
Partner Project No. 19-261580.1

Dear Mr. Roberto:

Partner Assessment Corporation (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (646) 794-5977.

Sincerely,

DRAFT

Sean H. Daly
Principal

EXECUTIVE SUMMARY

Partner Assessment Corporation (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by TPG RE Finance Trust, Inc. for the property located at 2500 North Hollywood Way in Burbank, Los Angeles County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide TPG RE Finance Trust, Inc. with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the south side of the Thornton Avenue and east side of North Hollywood Way within a mixed commercial, residential, and industrial area of Los Angeles County. Please refer to the table below for further description of the subject property:

Subject Property Data

Address:	2500 North Hollywood Way, Burbank, California
Property Use:	Hospitality
Land Acreage (Ac):	11.91
Number of Buildings:	Two
Number of Floors:	One and nine
Gross Building Area (SF):	380,530 (approx.)
Net Rentable Area (SF):	380,530 (approx.)
Date of Construction:	1982 (West Tower), 1990 (East Tower)
Assessor's Parcel Number (APN):	2464-004-015
Type of Construction:	Concrete masonry unit (CMU) load bearing walls
Current Tenants:	488 guestrooms
Site Assessment Performed By:	Christopher Rutledge of Partner
Site Assessment Conducted On:	October 9, 2019

The subject property is currently occupied by Marriott Burbank for hospitality and hotel use. Onsite operations consist of leasing of rooms to guests in two hotel towers designated as East Tower and West Tower. No environmentally sensitive operations are conducted onsite. In addition to the current structure, the subject property is also improved with a convention center, two restaurants, two swimming pools, and a host of interior amenities including meeting rooms, lounges, and a fitness center.

According to available historical sources, the subject property was formerly undeveloped as early as 1894; developed with what appears to have been a large commercial/industrial building associated with Lockheed Martin Corporation between circa 1952 – circa 1983 (eastern portion); developed with light industrial facilities and auto repair facilities from the 1950s – 1960s (western portion); and developed with the current structures in 1982 and 1990. The immediately surrounding properties consist of Pacific Radio Electronics and vacant land to the north across Thornton Avenue; a house, vacant land, Technicolor Cinema, and Media Studios to the south; Kaiser Permanente to the east; and Denny's, Del Taco, and McDonald's to the west across Hollywood Way.

According to information from the California GeoTracker website, as well as information obtained from the EPA website associated with the San Fernando Valley (Area 1) North Hollywood, CA Superfund Site the depth to groundwater in the vicinity of the subject property is inferred to be approximately 250 feet below ground surface (bgs). In addition, according to information provided within the regulatory database report, groundwater flow is inferred to be toward the southeast.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Based on our historical and regulatory review, the subject property was part of the historical Lockheed Martin Corporation facilities (eastern portion). Specifically, Sanborn Maps readily available between 1953 and 1968 identified the eastern portion of the subject property to be improved with a portion of a larger building which was identified to include assembling, shipping and crating, offices, and a test laboratory (1956, 1960, 1966, and 1968 Sanborns). In addition, what appears to have been a historical subject property address of 3220 West Thornton Avenue, under the name Lockheed A-1, B85, Lots 16, 16A, was identified on the Cleanup Program Sites-Spills, Leaks, Investigations, and Cleanups (CPS-SLIC), and Well Investigation Program (WIP) databases. Specifically, under the CPS-SLIC database, the status is listed as "Open-Site Assessment", with a release report date of January 2, 1965 and a current status date of January 3, 1990. Of note, the WIP listing, identified as active, is a database that is no longer in use and existing WIP cases that are still being assessed or remediated are now overseen under the CPS-SLIC program. According to information obtained from the California GeoTracker website, these listings are associated with the San Fernando Valley (Area 1) North Hollywood, CA Superfund Site, which the subject property is part of. Based on information obtained on EPA's website online, this area is a 20 square mile area of contaminated groundwater located primarily in North Hollywood and Burbank, CA and is one of four Superfund sites in the San Fernando Valley. The Area 1 site is divided into two Operable Units; Burbank Operable Unit (primarily in Burbank and south of the Burbank airport) and North Hollywood Operable Unit (west of the Burbank Operable Unit). The subject property is part of the Burbank Operable Unit. Site contamination sources include, but are not limited to, the former Lockheed Martin Corporation facilities near Burbank Airport, and many other known sources throughout Area 1. TCE and PCE were reported to be widely used in the San Fernando Valley beginning in the 1940s for dry cleaning and for degreasing machinery. The disposal of these chemicals were not well regulated during this time and as a result, releases from a large number of facilities throughout the eastern San Fernando Valley Area 1 have resulted in a large plume of VOC-contaminated groundwater, which begins in the Area 1 site and extends southeast, down-gradient.

Partner reviewed the most recent *Five-Year Review Report for San Fernando Valley (Area 1) Superfund Site*, dated September 21, 2018. Based on a map depicting former Lockheed Martin Burbank Properties, a majority of the subject property, except for a small area of the southwestern

portion, was depicted to be improved with "Building 85" of the former Lockheed Martin properties. Of importance, based on the *Tetrachloroethene (PCE) Contamination in Groundwater Eastern San Fernando Valley* map, the subject property was identified to be within an area of the lowest concentrations of PCE (5-49 ug/L). Similar findings were identified in regard to Trichloroethene (TCE) contamination with concentrations ranging between 5-50 ug/L. In addition, PCE and TCE concentration trends between 1996-2017 were either stable or noted to be decreasing/probably decreasing within the subject property area. Furthermore, the well closest to the subject property along Thorton Avenue was depicted to be either stable or had no trend. It should also be noted that both the TCE and PCE concentration maps identified a well further northwest of the subject property (former Building B-6 located approximately 1,700 feet from the subject property and upgradient) to have had increasing trends between 1996-2017. Based on this data, it appears that this area is likely a release point for both TCE and PCE in groundwater and that the historical Lockheed Martin building located on the subject property is not a contributor to the source of the groundwater contamination. Further, there was no indication on Sanborn Maps reviewed to indicate that the historical subject property Lockheed Martin building conducted any onsite operations that would have resulted in a significant release of chlorinated solvents. Overall, based on the reviewed data, it is Partner's opinion that the subject property's historical Lockheed Martin building improvements was not a contributor to the area-wide subsurface groundwater contamination associated with the San Fernando Valley (Area 1) North Hollywood, CA Superfund Site.

- The San Fernando Valley (Area 1) North Hollywood, CA Superfund Site is being addressed through federal, state, municipal, and potential responsible party (PRP) actions. The current site status of the Burbank Operable Unit area includes the temporary remedy of extraction and treatment of groundwater. The City of Burbank's Public Service Department receives groundwater from the site blended with treated groundwater to reduce nitrate levels and then distributes it to the public water supply system. Operation of this remedy commenced in 1996 and groundwater treatment has since removed approximately 36 billion gallons of VOCs contamination water. Contaminants of concern are reported to be TCE, PCE, 1,4, dioxane, hexavalent chromium, and 1,2,3-TCP. Although use of contaminated groundwater is considered the greatest human health risk, the extraction of groundwater is strictly regulated, therefore no unauthorized use is anticipated. In addition, no impacts to indoor air (via the vapor intrusion pathway) or inhalation exposures for construction workers are likely due to the depth of contaminated groundwater, which is reported to be at 250 feet below ground surface (bgs). Based on the above, the area wide confirmed groundwater contamination is not expected to present a risk to health or safety to the subject property occupants or to impede the current use of the subject property. As such, no further investigation is deemed warranted at this time.
- Based on our review of historical Sanborn Maps, the western portion of the subject property was improved with a small single-story battery manufacturing facility, as well as small single-story auto electric repair facility in the 1960, 1966, and 1968 Sanborns. These types of facilities typically generate various wastes such as chlorinated solvents and lead as part of their operations. However, based on the small size scale of these facilities, it is not suspected that any significant

manufacturing/generation of hazardous wastes occurred at these locations. Further, this portion of the subject property has since been redeveloped into the existing restaurant portion which is connected to the Western Tower of the hotel property, and would have therefore undergone significant grading/excavation activities in order to accommodate the existing improvements. Based on the above, the direct contact to any potential remaining concentrations of contamination (if any) in the soil is minimized and it is not expected that these historical improvements represent a significant environmental concern at this time.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any CRECs during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any HRECs during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Due to the age of the West Tower building, there is a potential that asbestos-containing material (ACM) are present. Readily visible suspect ACMs were observed in generally good condition and do not appear to pose a health and safety concern to the occupants of the subject property at this time. Of note, an existing Asbestos Operations & Maintenance Plan, dated November 11, 2014, is currently in place at the subject property.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 2500 North Hollywood Way in Burbank, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of RECs and environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

- The status of the area-wide San Fernando Valley (Area 1) North Hollywood, CA Superfund Site should be monitored until granted regulatory closure.

- In the event that the subject property is to undergo redevelopment activities, Partner recommends the subsurface improvements at that time be characterized prior to redevelopment.
- Continued implementation of the existing Asbestos Operations & Maintenance Plan, dated November 11, 2014.

1.0 INTRODUCTION

Partner Assessment Corporation (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 2500 North Hollywood Way in Burbank, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in

order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

TPG RE Finance Trust, Inc. engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of TPG RE Finance Trust, Inc.. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such

unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past or current owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens, a title search, and completion of a pre-survey questionnaire from the Report User. This information was not provided at the time of the assessment.
- Partner submitted Freedom of Information Act (FOIA) requests to Burbank Building, Planning, California Environmental Protection Agency (CEPA), California Air Resources Board (CARB), and State Water Resources Control Board (SWRCB) for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property and/or adjacent properties. As of this writing, these agencies have not responded to Partner's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.
- Partner observed approximately 5% of all interior units and all common areas. Based on the size and nature of use of the unobserved units (guestrooms), this limited method of survey is not expected to alter the overall findings of this assessment.
- Partner's view of the ground during the site assessment was obstructed due to parked cars. There are over 700 parking spaces in the parking lot and been though they weren't all covered by cars, several were. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.

Due to time constraints associated with this report, the Client has requested the report despite the above-listed limitations.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 2500 North Hollywood Way in Burbank, California is located on the south side of Thornton Avenue and east side of North Hollywood Way. According to the Los Angeles County Assessor, the subject property is legally described as P M 279-84-86 LOT 1.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently developed with the Marriott Burbank hotel for hospitality and hotel use. Onsite operations consist of leasing of rooms to guests in two hotel towers designated as the East Tower and West Tower. No environmentally sensitive operations are conducted onsite. In addition to the current structures, the subject property is also improved with a convention center, two restaurants, two swimming pools, and a host of interior amenities including meeting rooms, lounges, and a fitness center.

The subject property is designated for hospitality development by the City of Burbank.

The subject property was identified as a HAZNET, Well Investigation Program (WIP), Facility Index System (FINDS), California Integrated Water Quality System (CIWQS), California EPA Regulated Site Portal Data (CERS), as well as part of a larger National Priority List (NPL)/Superfund site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial, industrial, and residential area of Los Angeles County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

- North:** Concentra Urgent Care (2550 North Hollywood Way)
Thornton Avenue, beyond which is Pacific Radio Electronics (3031 Thornton Avenue)
- South:** Techni Color Cinema (2233 North Ontario Street)
Media Studios (2255 North Ontario Street)
- East:** Kaiser Permanente (3100 Thornton Avenue)
- West:** Hollywood Way, beyond which is:
McDonald's (2565 North Hollywood Way)
Denny's (2525 North Hollywood Way)
Del Taco (2515 North Hollywood Way)
Rental Car Facility (2501 North Hollywood Way)

The adjacent property to the north was identified as a ENVIROSTOR, Resource Conservation Recovery Act (RCRA) NonGen/NLR, RCRA-Small Quantity Generator (SQG), Emissions Inventory Data (EMI), HAZNET, WIP, CERS, underground storage tank (UST), aboveground storage tank (AST), CERS HAZ WASTE; and the property to the east was identified as a AST, CERS TANKS, HAZNET, and CERS site in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Burbank, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 670 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the southeast. The subject property is depicted on the 2012 map as developed with current improvements.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater flow in the vicinity of the subject property is inferred to be toward the southeast. The nearest surface water in the vicinity of the subject property is the Los Angeles River located approximately one mile south of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by Burbank Water and Power serves the subject property vicinity. According to the 2018 Water Quality Report, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for Burbank are purchased from the Metropolitan Water District which comes from the Northern Sierra Mountains in California and the Colorado River.

According to information from the California GeoTracker website, as well as information obtained from the EPA website associated with the San Fernando Valley (Area 1) North Hollywood, CA Superfund Site the depth to groundwater in the vicinity of the subject property is inferred to be approximately 250 feet below ground surface (bgs).

2.4.3 Geology/Soils

The subject property is situated within the Coastal Range physiographic province of the State of California. The uppermost geologic formation underlying the soils at the subject property is the Mesozoic sedimentary rock formation. This formation comprises the underlying stratigraphy and the radiolarian-bearing rocks are underlain by mudstones with foraminifers and oolitic limestones, implying deepening of the sediment basin.

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Urban Land and Palmview-Tujunga Complex. Urban land are areas with high development and most original soils are displaced. The Palmview-Tujunga complex consists of deep, well drained to somewhat excessively drained, permeable soils with a profile consisting of fine sandy loam, sandy loam, and loamy sand. These soils are on broad Coastal Prairies. Slopes range from 0 to 5 percent.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06037C1328F, dated September 26, 2008, the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	Source	Description/Use
1928 - 1948	Aerial Photographs, Interviews, Topographic Maps	Undeveloped/Native land
1952 -1979	Aerial Photographs, Building Records, City Directories, Interviews, Sanborn Maps	Residential, Commercial, Industrial
1983 - 1988	Aerial Photographs, Building Records, City Directories, Interviews, Sanborn Maps	West Tower of Marriott Burbank and Industrial Building (East Portion)
1990 - Present	Aerial Photographs, Building Records, City Directories, Interviews, Onsite Observations, Sanborn Maps	Current Improvements

Tenants on the subject property have included Hilton Hotel under a variation of names (1980 - 2006); and Marriott Burbank under a variation of names (2010 – Present).

Based on our historical and regulatory review, the subject property was part of the historical Lockheed Martin Corporation facilities (eastern portion). Specifically, Sanborn Maps readily available between 1953 and 1968 identified the eastern portion of the subject property to be improved with a portion of a larger building which was identified to include assembling, shipping and crating, offices, and a test laboratory (1956, 1960, 1966, and 1968 Sanborns). In addition, what appears to have been a historical subject property address of 3220 West Thornton Avenue, under the name Lockheed A-1, B85, Lots 16, 16A, was identified on the Cleanup Program Sites-Spills, Leaks, Investigations, and Cleanups (CPS-SLIC), and Well Investigation Program (WIP) databases. Specifically, under the CPS-SLIC database, the status is listed as "Open-Site Assessment", with a release report date of January 2, 1965 and a current status date of January 3, 1990. Of note, the WIP listing, identified as active, is a database that is no longer in use and existing WIP cases that are still being assessed or remediated are now overseen under the CPS-SLIC program. According to information obtained from the California GeoTracker website, these listings are associated with the San Fernando Valley (Area 1) North Hollywood, CA Superfund Site, which the subject property is part of. Based on information obtained on EPA's website online, this area is a 20 square mile area of contaminated groundwater located primarily in North Hollywood and Burbank, CA and is one of four Superfund sites in the San Fernando Valley. The Area 1 site is divided into two Operable Units; Burbank Operable Unit (primarily in Burbank and south of the Burbank airport) and North Hollywood Operable Unit (west of the Burbank Operable Unit). The subject property is part of the Burbank Operable Unit. Site contamination sources include, but are not limited to, the former Lockheed Martin Corporation facilities near Burbank Airport, and many other known sources throughout Area 1. TCE and PCE were reported to be widely used in the San Fernando Valley beginning in the 1940s for dry cleaning and for degreasing machinery. The disposal of these chemicals were not well regulated during this time and as a result, releases from a large number of facilities throughout the eastern San Fernando Valley Area 1 have resulted in a large plume of VOC-contaminated groundwater, which begins in the Area 1 site and extends southeast, down-gradient.

Partner reviewed the most recent *Five-Year Review Report for San Fernando Valley (Area 1) Superfund Site*, dated September 21, 2018. Based on a map depicting former Lockheed Martin Burbank Properties, a majority of the subject property, except for a small area of the southwestern portion, was depicted to be improved with "Building 85" of the former Lockheed Martin properties. Of importance, based on the *Tetrachloroethene (PCE) Contamination in Groundwater Eastern San Fernando Valley* map, the subject property was identified to be within an area of the lowest concentrations of PCE (5-49 ug/L). Similar findings were identified in regard to Trichloroethene (TCE) contamination with concentrations ranging between 5-50 ug/L. In addition, PCE and TCE concentration trends between 1996-2017 were either stable or noted to be decreasing/probably decreasing within the subject property area. Furthermore, the well closest to the subject property along Thorton Avenue was depicted to be either stable or had no trend. It should also be noted that both the TCE and PCE concentration maps identified a well further northwest of the subject property (former Building B-6 located approximately 1,700 feet from the subject property and upgradient) to have had increasing trends between 1996-2017. Based on this data, it appears that this area is likely a release point for both TCE and PCE in groundwater and that the historical Lockheed Martin building located on the subject property is not a contributor to the source of the groundwater contamination. Further, there was no indication on Sanborn Maps reviewed to indicate that the historical subject property Lockheed Martin building conducted any onsite operations that would have resulted in a significant release of chlorinated solvents. Overall, based on the reviewed data, it is Partner's opinion that the subject property's historical Lockheed Martin building improvements was not a contributor to the area-wide subsurface groundwater contamination associated with the San Fernando Valley (Area 1) North Hollywood, CA Superfund Site.

The San Fernando Valley (Area 1) North Hollywood, CA Superfund Site is being addressed through federal, state, municipal, and potential responsible party (PRP) actions. The current site status of the Burbank Operable Unit area includes the temporary remedy of extraction and treatment of groundwater. The City of Burbank's Public Service Department receives groundwater from the site blended with treated groundwater to reduce nitrate levels and then distributes it to the public water supply system. Operation of this remedy commenced in 1996 and groundwater treatment has since removed approximately 36 billion gallons of VOCs contamination water. Contaminants of concern are reported to be TCE, PCE, 1,4-dioxane, hexavalent chromium, and 1,2,3-TCP. Although use of contaminated groundwater is considered the greatest human health risk, the extraction of groundwater is strictly regulated, therefore no unauthorized use is anticipated. In addition, no impacts to indoor air (via the vapor intrusion pathway) or inhalation exposures for construction workers are likely due to the depth of contaminated groundwater, which is reported to be at 250 feet below ground surface (bgs). Based on the above, the area wide confirmed groundwater contamination is not expected to present a risk to health or safety to the subject property occupants or to impede the current use of the subject property. As such, no further investigation is deemed warranted at this time.

Based on our review of historical Sanborn Maps, the western portion of the subject property was improved with a small single-story battery manufacturing facility, as well as small single-story auto electric repair facility in the 1960, 1966, and 1968 Sanborns. These types of facilities typically generate various wastes such as chlorinated solvents and lead as part of their operations. However, based on the small size scale of these facilities, it is not suspected that any significant manufacturing/generation of hazardous

wastes occurred at these locations. Further, this portion of the subject property has since been redeveloped into the existing restaurant portion which is connected to the Western Tower of the hotel property, and would have therefore undergone significant grading/excavation activities in order to accommodate the existing improvements. Based on the above, the direct contact to any potential remaining concentrations of contamination (if any) in the soil is minimized and it is not expected that these historical improvements represent a significant environmental concern at this time.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on October 8, 2019. The following was observed on the subject property and adjacent properties during the aerial photograph review:

Date: 1928, 1938 **Scale:** 1"=500'

Subject Property: Appears to be undeveloped land
North: Appears to be undeveloped land
South: Appears to be undeveloped land
East: Appears to be undeveloped land
West: Appears to be undeveloped land across a roadway

Date: 1948 **Scale:** 1"=500'

Subject Property: No significant changes visible
North: No significant changes visible
South: No significant changes visible
East: No significant changes visible
West: Appears to be a large commercial/light industrial building across a roadway

Date: 1952 **Scale:** 1"=500'

Subject Property: Appears to be residential development on the western portion and improved with a large commercial/light building along the eastern portion
North: Appears to be residential development and possible mobile homes across a roadway
South: Appears to be residential development, commercial, and light industrial development
East: Appears to be commercial and light industrial development
West: No significant changes visible

Date: 1954, 1964 **Scale:** 1"=500'

Subject Property: No significant changes visible
North: No significant changes visible
South: No significant changes visible
East: No significant changes visible
West: No significant changes visible

Date: 1970, 1977 **Scale:** 1"=500'

Subject Property: No significant changes visible
North: Appears to be residential and commercial development and large parking lot across Thornton Avenue

Date: 1970, 1977 **Scale:** 1"=500'

South: No significant changes visible
East: Appears to be commercial development
West: No significant changes visible

Date: 1983 **Scale:** 1"=500'

Subject Property: Appears to be developed with the West Tower of the Marriott Burbank
North: No significant changes visible; however, appears to be a commercial high rise building to the northwest
South: Appears to be commercial development
East: No significant changes visible
West: No significant changes visible

Date: 1989 **Scale:** 1"=500'

Subject Property: The building to the east is no longer present and this portion is now vacant land.
North: No significant changes visible
South: No significant changes visible
East: No significant changes visible
West: No significant changes visible

Date: 1994 **Scale:** 1"=500'

Subject Property: Appears to be developed with the current improvements
North: No significant changes visible
South: No significant changes visible
East: No significant changes visible
West: No significant changes visible

Date: 2002, 2005 **Scale:** 1"=500'

Subject Property: No significant changes visible
North: No significant changes visible
South: Appears to be vacant land to the southwest and commercial development to the southeast
East: No significant changes visible
West: Appears to be vacant land across a roadway

Date: 2009, 2012, 2016 **Scale:** 1"=500'

Subject Property: No significant changes visible
North: No significant changes visible
South: No significant changes
East: No significant changes visible
West: Appears to be commercial development across a roadway

Copies of select aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from EDR on October 8, 2019. following was observed on the subject property and adjacent properties during the fire insurance map review:

Date: 1953, 1954, 1956, 1960

Date: 1953, 1954, 1956, 1960

Subject Property: Depicted with several structures including restaurants, residences, retail, and parking lot to the west, as well as a portion of a large commercial/industrial building on the east portion with operations including offices, receiving and storage, assembling, shipping/crating.

North: Depicted as parking across West Thornton Avenue

South: Remaining portions of the large commercial/industrial building, residentials, and restaurants

East: Appears to be commercial/light industrial development

West: No coverage

Date: 1966, 1968

Subject Property: No significant changes depicted; however, there appears to be an auto repair shop and battery manufacturer along the western portion.

North: No significant changes depicted

South: No significant changes depicted

East: No significant changes depicted

West: No significant changes depicted

Copies of reviewed Sanborn Maps are included in Appendix B of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from EDR on October 8, 2019 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for 2500 North Hollywood Way (Subject Property)

Years	Occupant Listed
2014	AV Marriott Burbank Airport AWH Burbank Hotel LLC Grill Concepts-DC Inc PHF II Burbank LLC SHC Burbank II LLC Spire Concessions LLC
2010	Above listings plus: Hazelwood Enterprises Inc Hilton Inns Inc AGF Media Services KRTH Marriot Hotel Quickpark Bur Swank Audio Visuals LLC
2006	Airport Burbank Airport Hilton Burbank Hilton Daily Grill

Based on the city directory review, no environmentally sensitive listings were identified for the adjacent property addresses.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from EDR on October 8, 2019. The following was observed on the subject property and adjacent properties during the topographic map review:

Date: 1894, 1896,
1898, 1900,
1900, 1902,
1921, 1926

Subject Property: Depicted as undeveloped
North: Depicted as undeveloped
South: Depicted as undeveloped
East: Depicted as undeveloped
West: Depicted as undeveloped

Date: 1932, 1933,
1942

Subject Property: No coverage (unmapped)
North: No coverage (unmapped)
South: No coverage (unmapped)
East: No coverage (unmapped)
West: No coverage (unmapped)

Date: 1948, 1953

Subject Property: Depicted with a commercial/light industrial building to the east
North: Depicted as undeveloped
South: Depicted with a commercial/light industrial building
East: Depicted as undeveloped
West: Depicted with a commercial/light industrial building

Date: 1966, 1972,
1994

Subject Property: Several structures are now depicted to the west
North: Depicted as undeveloped
South: Depicted with additional commercial development
East: Depicted with several small structures
West: Depicted with a large commercial/light industrial building

Date: 2012

Subject Property: No specific improvements depicted
North: No specific improvements depicted; only roadways
South: No specific improvements depicted; only roadways
East: No specific improvements depicted; only roadways
West: No specific improvements depicted; only roadways

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data

Name of Agency:	California Environmental Protection Agency (CEPA)
Point of Contact:	Online Request
Agency Address:	1001 I Street, Sacramento, CA 95814
Agency Phone Number:	(800) 242-4450
Date of Contact:	October 16, 2019
Method of Communication:	Email
Summary of Communication:	As of the date of this report, Partner has not received a response for inclusion in this report.

Copies of pertinent documents are included in Appendix B of this report.

4.1.2 Fire Department

Regulatory Agency Data

Name of Agency:	City of Burbank Fire Prevention Bureau (BFB)
Point of Contact:	Ms. Annie Zargarian
Agency Address:	Email request
Agency Phone Number:	818-238-3473
Date of Contact:	October 10, 2019
Method of Communication:	Email
Summary of Communication:	The BFB provided documents for the subject property which included permits for the diesel ASTs installed for the generators and hazardous waste manifests over the years. No environmental concerns were identified from review of these documents.

Copies of pertinent documents are included in Appendix B of this report.

4.1.3 Air Pollution Control Agency

Regulatory Agency Data

Name of Agency:	California Air Resources Board (CARB)
Point of Contact:	Online Request
Agency Address:	1001 I Street, Sacramento, CA 95814
Agency Phone Number:	(800) 242-4450
Date of Contact:	October 16, 2019
Method of Communication:	Email
Summary of Communication:	As of the date of this report, Partner has not received a response for inclusion in this report.

Copies of pertinent documents are included in Appendix B of this report.

4.1.4 Regional Water Quality Agency

Regulatory Agency Data

Name of Agency:	State Water Resources Control Board (SWRCB)
------------------------	---

Regulatory Agency Data

Point of Contact: Online Request
Agency Address: 1001 I Street, Sacramento, CA 95814
Agency Phone Number: (800) 242-4450
Date of Contact: October 16, 2019
Method of Communication: Email
Summary of Communication: As of the date of this report, Partner has not received a response for inclusion in this report.

Copies of pertinent documents are included in Appendix B of this report.

4.1.5 Building Department

Regulatory Agency Data

Name of Agency: City of Burbank Building Department
Point of Contact: General Staff
Agency Address: Email request
Agency Phone Number: 818-238-5220
Date of Contact: October 10, 2019
Method of Communication: Email
Summary of Communication: As of the date of this report, Partner has not received a response for inclusion in this report.

4.1.6 Planning Department

Regulatory Agency Data

Name of Agency: City of Burbank Planning Department
Point of Contact: General Staff
Agency Address: Email request
Agency Phone Number: 818-238-5250
Date of Contact: October 10, 2019
Method of Communication: Email
Summary of Communication: As of the date of this report, Partner has not received a response for inclusion in this report.

4.1.7 Assessor's Office

Regulatory Agency Data

Name of Agency: Los Angeles County Assessor (LACA)
Point of Contact: Online Request
Agency Address: 500 W Temple St, Los Angeles, CA 90012
Agency Phone Number: (213) 974-3211
Date of Contact: October 16, 2019
Method of Communication: Online
Summary of Communication: According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 2464-004-015. Ownership is not publicly listed with LA County typically. The current buildings were constructed in 1980 and 1990 and total approximately 380,530 square feet on a 11.91 acre lot.

Copies of pertinent documents are included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data				
Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	Y	Y	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSD Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	N	Y	N
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	N	N
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	Y	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site	0.50	N	N	N
State/Tribal Registered Storage Tank Sites (UST/AST)	0.25	N	Y	N
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N
EDR MGP	Varies	N	N	N
EDR US Hist Auto Station	Varies	N	N	N
EDR US Hist Cleaners	Varies	N	N	N
FINDS	Subject Property	Y	N	N
HAZNET	Subject Property	Y	Y	N
WIP	0.25	Y	Y	N
CIWQS	Subject Property	Y	N	N
CERS	Subject Property	Y	Y	N

Radius Report Data

Database	Search Radius (mile) Property	Subject Property	Adjacent Properties	Sites of Concern
----------	-------------------------------------	---------------------	------------------------	---------------------

4.2.2 Subject Property Listings

The subject property is identified as a CPS-SLIC, HAZNET, WIP, FINDS, CIWQS, and CERS site in the regulatory database report, as discussed below:

- What appears to have been a historical subject property address of 3220 West Thornton Avenue, under the name Lockheed A-1, B85, Lots 16, 16A, was identified on the Cleanup Program Sites-Spills, Leaks, Investigations, and Cleanups (CPS-SLIC), and Well Investigation Program (WIP) databases. Specifically, under the CPS-SLIC database, the status is listed as "Open-Site Assessment", with a release report date of January 2, 1965 and a current status date of January 3, 1990. Of note, the WIP listing, identified as active, is a database that is no longer in use and existing WIP cases that are still being assessed or remediated are now overseen under the CPS-SLIC program.

According to information obtained from the California GeoTracker website, these listings appear to be associated with the San Fernando Valley (Area 1) North Hollywood, CA Superfund Site, which the subject property is part of. According to information obtained on EPA's website online, this area is a 20 square mile area of contaminated groundwater located primarily in North Hollywood and Burbank, CA and is one of four Superfund sites in the San Fernando Valley. The Area 1 site is divided into two Operable Units; Burbank Operable Unit (primarily in Burbank and south of the Burbank airport) and North Hollywood Operable Unit (west of the Burbank Operable Unit). The subject property is part of the Burbank Operable Unit. Site contamination sources include, but are not limited to, the former Bendix Aviation and Allied Signal-Aerospace Company facilities in North Hollywood (successor corporation is now Honeywell International), the former Lockheed Martin Corporation facilities near Burbank Airport, and many other known sources throughout Area 1. TCE and PCE were reported to be widely used in the San Fernando Valley beginning in the 1940s for dry cleaning and for degreasing machinery. The disposal of these chemicals were not well regulated during this time and as a result, releases from a large number of facilities throughout the eastern San Fernando Valley Area 1 have resulted in a large plume of VOC-contaminated groundwater, which begins in the Area 1 site and extends southeast, down-gradient.

Currently, these areas are being addressed through federal, state, municipal, and potential responsible party (PRP) actions. The current site status of the Burbank Operable Unit area includes the temporary remedy of extraction and treatment of groundwater. The City of Burbank's Public Service Department receives groundwater from the site blended with treated groundwater to reduce nitrate levels and then distributes it to the public water supply system. Operation of this remedy commenced in 1996 and groundwater treatment has since removed approximately 36 billion gallons of VOCs contamination water. Contaminants of concern are reported to be TCE, PCE, 1,4, dioxane, hexavalent chromium, and 1,2,3-TCP.

Although use of contaminated groundwater is considered the greatest human health risk, the extraction of groundwater is strictly regulated, therefore no unauthorized use is anticipated. In addition, no impacts to indoor air (via the vapor intrusion pathway) or inhalation exposures for construction workers are likely due to the depth of contaminated groundwater, which is reported to be at 250 feet below ground surface (bgs). In addition, no evidence was identified during Partner's research to suggest that the existing subject property operations would be identified as a potential contributor to the contamination associated with the San Fernando Valley (Area 1) North Hollywood, CA Superfund Site study area. Based on the above, the confirmed groundwater contamination is not expected to present a risk to health or safety to the subject property occupants or to impede the current use of the subject property. No further investigation is deemed warranted at this time.

- The subject property, identified on the HAZNET database as 1X Esponoisa Photo Solutions Systems at 2500 North Hollywood Way, was reported as a generator and recycler of photochemicals/photo processing waste in 1993. No violations and releases were identified, and as such, in conjunction with the subject property being served by municipal water and sewer, this listing is not expected to represent a significant environmental concern.
- The subject property, identified on the HAZNET database as 1X Burbank Hilton at 2500 North Hollywood Way, was reported as a generator and recycler of photochemicals / photo processing waste in 1993. No violations and releases were identified, and as such, in conjunction with the subject property being served by municipal water and sewer, this listing is not expected to represent a significant environmental concern.
- The subject property, identified on the HAZNET database as Hilton Hotel, Inc. at 2500 North Hollywood Way, was reported as a generating asbestos containing waste (likely from renovation or abatement) in 2005. This listing is not expected to represent a significant environmental concern.
- The subject property, identified on the WIP database as Burbank Airport Hilton at 2500 North Hollywood Way, and was reported as "historical" with no other info. It should be noted that the WIP was developed to locate, access, and remediate sources of solvent contamination impacting drinking water wells. The WIP is no longer in use and existing WIP cases that are still being assessed or remediated are now overseen under the Cleanup Program Sites-Spills, Leaks, Investigations, and Cleanups (CPS-SLIC) program. The subject property, identified as 3220 West Thorton, and addressed as Lockheed A-1, B85, Lots 16, 16A was identified on this database, as previously discussed above.
- The subject property, identified on the FINDS database as Burbank Airport Marriott Hotel at 2500 North Hollywood Way, was reported with no info regarding waste generation or releases, however is suspected to be associated with the aforementioned HAZNET listings, discussed above.
- The subject property, identified on the HAZNET database as Illford and 1x Illford at 2500 North Hollywood Way, was reported as a generator and recycler of photochemicals/photo processing

waste in 1993. No violations and releases were identified, and as such, in conjunction with the subject property being served by municipal water and sewer, this listing is not expected to represent a significant environmental concern.

- The subject property, identified on the CIWQS and CERS database as Burbank Airport Marriott Hotel at 2500 North Hollywood Way, was listed for a stormwater discharge permit for construction between 2008 and 2010. Additionally, the site was listed as a chemical storage facility under the CERS listing. There were minor citations listed by the Burbank Fire Department for signs missing for a hazardous materials storage area in 2017. No associated releases were reported; therefore, this listing is not expected to represent a significant environmental concern.
- The subject property, identified on the HAZNET database as Fuji Photo Film USA, Inc. and Fuji Film Burbank Airport Hilt at 2500 North Hollywood Way, was reported as a generator and recycler of photochemicals/photo processing waste in 1993 and 1994. No violations and releases were identified, and as such, in conjunction with the subject property being served by municipal water and sewer, this listing is not expected to represent a significant environmental concern.
- The subject property, identified on the HAZNET database as 1x Illford at 2500 North Hollywood Way, was reported as a generator and recycler of photochemicals/photo processing waste in 1993. No violations and releases were identified, and as such, in conjunction with the subject property being served by municipal water and sewer, this listing is not expected to represent a significant environmental concern.
- The subject property, identified on the HAZNET database as Burbank Airport Hilton at 2500 North Hollywood Way, was reported as a generator and recycler of an “unspecified organic liquid mixture” in 1996. No releases are listed; therefore, this listing is not expected to represent a significant environmental concern.

4.2.3 Adjacent Property Listings

The adjacent property to the west and north is identified as an ENVIROSTOR site in the regulatory database report, as discussed below:

- The property identified as Lockheed Corporation / Env. Systems & Tech at 2550 North Hollywood Way, is located adjacent to the northwest of the subject property. This site appears to be an office address for the Lockheed facility located at 2555 North Hollywood Way, further west, which was identified on several regulatory databases. Of importance, it should be noted that the former Lockheed Martin Corporation facilities near Burbank Airport have contributed to sitewide groundwater contamination, identified as the San Fernando Valley (Area 1) Superfund Site, which has been previously discussed above.

The adjacent property to the north is identified as an RCRA NonGen site in the regulatory database report, as discussed below:

- The property identified as US Healthworks Medical Group at 2550 North Hollywood Way, is located adjacent to the northwest of the subject property. This site is listed as a non-generator of

hazardous waste. Additionally, no violations are listed. As such, this listing is not expected to represent a significant environmental concern.

The adjacent property to the north is identified as an RCRA-SQG, EMI, HAZNET, WIP, and CERS site in the regulatory database report, as discussed below:

- The property identified as Gerald Crawford Company a 3031 Thornton Avenue, is located adjacent to the north of the subject property. This site is listed as a SQG with no violations listed. Specifically, this site is listed as a generator and recycler of aqueous solution and oil containing waste due to printing practices. No releases were identified and as such, these listings are not expected to represent a significant environmental concern. Of note, the WIP listing is suspected to be associated with the ongoing remediation activities associated with the San Fernando Valley (Area 1) Superfund Site groundwater contamination plume, previously discussed above.

The adjacent property to the east is identified as an AST site in the regulatory database report, as discussed below:

- The property identified as 3100 Partners LLC at 3100 Thornton Avenue, is located adjacent to the east of the subject property. This site is listed with an AST (contents and size not disclosed). Additionally, no releases are listed. This listing is not expected to represent a significant environmental concern.

The adjacent property to the east is identified as a AST, CERS TANKS, HAZNET, and CERS site in the regulatory database report, as discussed below:

- The property identified as Skunk Works at 3100 Thornton Avenue, is located adjacent to the east of the subject property. This site is listed with an AST (contents and size not disclosed). This site is also listed as generating asbestos containing waste in 2005 disposed in a landfill. Additionally, no releases or violations are listed. This listing is not expected to represent a significant environmental concern.

The adjacent property to the southwest is identified as an CERS TANKS, CERS HAZ WASTE, CERS, AST, UST, and RCRA NonGen site in the regulatory database report, as discussed below:

- The sites are at the same location of 2501 North Hollywood Way within the rental car facility under the names Avairpros Services, Fox Rent A Car, Hertz RAC, Ehi, Bur Conrac and, Avis Rent A Car. These sites use an AST, UST, and generate hazardous waste in association with the rental car facility. No releases are listed. As such, these listings are not expected to represent a significant environmental concern.

Based on the findings, although vapor migration associated with the San Fernando Valley (Area 1) Superfund Site sitewide groundwater contamination exists, since the depth of contaminated groundwater, is reported to be at 250 feet bgs, the potential for a vapor intrusion condition to exist within the onsite structures, is unlikely.

4.2.4 Sites of Concern Listings

The regulatory database report identified several non-adjacent properties in various environmental databases located within their respective ASTM search distances. Due to regulatory status, relative

distance, and/or inferred groundwater flow, these listings are not expected to represent an environmental concern with respect to the subject property.

4.2.5 Orphan Listings

No orphan listings of environmental concern are identified.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from TPG RE Finance Trust, Inc. (User of this report).

User Responsibilities

Item	Provided By User	Not Provided By User	Discussed Below	Does Not Apply
Environmental Pre-Survey Questionnaire			X	
Title Records, Environmental Liens, and AULs			X	
Specialized Knowledge			X	
Actual Knowledge			X	
Valuation Reduction for Environmental Issues			X	
Identification of Key Site Manager	Section 5.1.3			
Reason for Performing Phase I ESA	Section 1.1			
Prior Environmental Reports		X		
Other				X

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. The information requested was not received prior to the issuance of this report. Because the Report User (Client) is a lender, it is understood that the Report User would not have knowledge of the property that would significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

The report user did not return the questionnaire.

5.1.3 Interview with Key Site Manager

Mr. Alan Tate (Hotel Manager), Key Site Manager, was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

Aside from an Asbestos Operations & Maintenance Plan, EBI Consulting (November 11, 2014) and Moisture Management Plan, EBI Consulting (November 5, 2014), no previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data

Site Assessment Performed By: Christopher Rutledge
Site Assessment Conducted On: October 9, 2019

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 2500 North Hollywood Way (Subject Property)

Name	Title/Role	Contact Number	Site Walk* Yes/No
Alan Tate	Key Site Manager	(818) 840-6487	Yes
Andrew Rolf	Maintenance Supervisor	(818) 843-6000	Yes

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located at the rear of the subject property. An independent solid waste disposal contractor removes solid waste from the subject property. According to property personnel, only household trash is collected in the on-site solid waste dumpsters.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of Burbank services the subject property vicinity. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the subject property and in the public right of way. Site storm water from roofs, landscaped areas, and paved areas is directed to the public right of way, and to on-site storm water drains. The subject property is connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Department of Agriculture; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling are provided by a central system that consists of boilers, cooling towers, air handling units, and fan coil units. The gas-fired boilers (three at East Tower and two at West Tower) located on the building exterior, were manufactured by Raypak and have a rated input capacity of 1 million MBh. Two galvanized steel BAC and Evapco cooling towers are located adjacent to the towers and has a reported capacity of (tonnage not known). Heating and cooling to the convention center, restaurants, and common areas of the towers are provided by gas-fired packaged HVAC units.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

Partner identified hazardous substances used, stored, and/or generated on the subject property as noted in the following table:

Hazardous Substances and/or Petroleum Products Noted Onsite				
Substance	Container Size	Location	Nature of Use	Disposal Method
Muriatic Acid	1 gallon	Maintenance shop	Pools	Used completely
Paints	Various 5-gallon cans	Maintenance Area	Routine Maintenance	N/A
Descaling solution	55-gallon x 5	Roof	HVAC	Used completely
Glycol	55-gallon x 1	Roof	HVAC	Used completely
Unlabeled	55-gallon x 1	Electrical room	Used sweeping compound	Used completely

The hazardous materials were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills; however, secondary containment is not provided.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former USTs was observed during the site reconnaissance; however, there are two ASTs associated with the emergency generators that hold 100 and 75-gallons. The ASTs are located at each tower near the associated emergency generator. Dates of installation were not available, but they are equipped with secondary containment. De minimis staining was observed at the base of the emergency generator at the West Tower. In any event, these ASTs are not considered to be of significant environmental concern.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – “Non-PCB;” 2) 50 ppm-500 ppm – “PCB-Contaminated;” and, 3) Greater than 500 ppm – “PCB-Containing.” The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after July 2, 1979.

The onsite reconnaissance addressed indoor and outdoor transformers that may contain PCBs. One pad-mounted transformer was observed on the subject property. The transformer is not labeled indicating PCB content; however, it appears newer. No staining or leakage was observed in the vicinity of the transformer. Partner contacted a customer service representative of Burbank Water and Power, who confirmed that Burbank Water and Power maintains ownership and operational responsibility for the transformer and that the units do not contain PCBs. Based on the good condition of the equipment, the transformer is not expected to represent a significant environmental concern.

Additionally, no other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, balers, etc.) was observed on the subject property during Partner’s reconnaissance. Eight (elevators) are present however they are cable operated.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. Construction materials including, but not limited to, thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building and that have not been appropriately tested may be considered "presumed asbestos-containing material" (PACM).

The subject property east tower building was constructed in 1990. As such, an ACMs within this building are not expected to be of significant environmental concern.

The west tower building was constructed in 1982, and therefore there is the possibility for ACMs to exist. Readily visible suspect ACMs including, but not limited to, drywall systems, mastics, caulking, and roofing materials, were observed to be overall in good condition.

Based on this building's date of construction, prior to disturbance, Partner recommends a comprehensive asbestos survey of the subject property building to determine the presence, condition, friability and likely future condition of suspect or confirmed ACM. All suspect materials must be handled as ACM according to local, state and federal regulations until the results of sampling and analysis indicate the material is a non-ACM. According to the US EPA, ACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition.

Of note, an existing Asbestos Operations & Maintenance Plan, dated November 11, 2014, is currently in place at the subject property.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm² (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the

disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Due to the dates of construction and commercial nature of use of the subject property, LBP is not expected to be of significant environmental concern.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	Average Predicted Radon Levels	Potential
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by Burbank Water and Power serves the subject property vicinity. According to the 2018 Water Quality Report, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for Burbank are purchased from the Metropolitan Water District which comes from the Northern Sierra Mountains in California and the Colorado River. According to the 2018 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property buildings for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is

intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

Of note, an existing Moisture Management Plan, dated November 5, 2014 and prepared by EBI Consulting, is currently in place at the subject property.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises.

6.4.1 PCBs

Pad-mounted transformers were observed on the adjacent properties. No staining or leakage was observed in the vicinity of the transformers. Based on these observations, the presence of adjacent transformers is not expected to represent a significant environmental concern.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Based on our historical and regulatory review, the subject property was part of the historical Lockheed Martin Corporation facilities (eastern portion). Specifically, Sanborn Maps readily available between 1953 and 1968 identified the eastern portion of the subject property to be improved with a portion of a larger building which was identified to include assembling, shipping and crating, offices, and a test laboratory (1956, 1960, 1966, and 1968 Sanborns). In addition, what appears to have been a historical subject property address of 3220 West Thornton Avenue, under the name Lockheed A-1, B85, Lots 16, 16A, was identified on the Cleanup Program Sites-Spills, Leaks, Investigations, and Cleanups (CPS-SLIC), and Well Investigation Program (WIP) databases. Specifically, under the CPS-SLIC database, the status is listed as "Open-Site Assessment", with a release report date of January 2, 1965 and a current status date of January 3, 1990. Of note, the WIP listing, identified as active, is a database that is no longer in use and existing WIP cases that are still being assessed or remediated are now overseen under the CPS-SLIC program. According to information obtained from the California GeoTracker website, these listings are associated with the San Fernando Valley (Area 1) North Hollywood, CA Superfund Site, which the subject property is part of. Based on information obtained on EPA's website online, this area is a 20 square mile area of contaminated groundwater located primarily in North Hollywood and Burbank, CA and is one of four Superfund sites in the San Fernando Valley. The Area 1 site is divided into two Operable Units; Burbank Operable Unit (primarily in Burbank and south of the Burbank airport) and North Hollywood Operable Unit (west of the Burbank Operable Unit). The subject property is part of the Burbank Operable Unit. Site contamination sources include, but are not limited to, the former Lockheed Martin Corporation facilities near Burbank Airport, and many other known sources throughout Area 1. TCE and PCE were reported to be widely used in the San Fernando Valley beginning in the 1940s for dry cleaning and for degreasing machinery. The disposal of these chemicals were not well regulated during this time and as a result, releases from a large number of facilities throughout the eastern San Fernando Valley Area 1 have resulted in a large plume of VOC-contaminated groundwater, which begins in the Area 1 site and extends southeast, down-gradient.

Partner reviewed the most recent *Five-Year Review Report for San Fernando Valley (Area 1) Superfund Site*, dated September 21, 2018. Based on a map depicting former Lockheed Martin Burbank Properties, a majority of the subject property, except for a small area of the southwestern portion, was depicted to be improved with "Building 85" of the former Lockheed Martin properties. Of importance, based on the *Tetrachloroethene (PCE) Contamination in Groundwater Eastern San Fernando Valley* map, the subject property was identified to be within an area of the lowest concentrations of PCE (5-49 ug/L). Similar findings were identified in regard to

Trichloroethene (TCE) contamination with concentrations ranging between 5-50 ug/L. In addition, PCE and TCE concentration trends between 1996-2017 were either stable or noted to be decreasing/probably decreasing within the subject property area. Furthermore, the well closest to the subject property along Thorton Avenue was depicted to be either stable or had no trend. It should also be noted that both the TCE and PCE concentration maps identified a well further northwest of the subject property (former Building B-6 located approximately 1,700 feet from the subject property and upgradient) to have had increasing trends between 1996-2017. Based on this data, it appears that this area is likely a release point for both TCE and PCE in groundwater and that the historical Lockheed Martin building located on the subject property is not a contributor to the source of the groundwater contamination. Further, there was no indication on Sanborn Maps reviewed to indicate that the historical subject property Lockheed Martin building conducted any onsite operations that would have resulted in a significant release of chlorinated solvents. Overall, based on the reviewed data, it is Partner's opinion that the subject property's historical Lockheed Martin building improvements was not a contributor to the area-wide subsurface groundwater contamination associated with the San Fernando Valley (Area 1) North Hollywood, CA Superfund Site.

- The San Fernando Valley (Area 1) North Hollywood, CA Superfund Site is being addressed through federal, state, municipal, and potential responsible party (PRP) actions. The current site status of the Burbank Operable Unit area includes the temporary remedy of extraction and treatment of groundwater. The City of Burbank's Public Service Department receives groundwater from the site blended with treated groundwater to reduce nitrate levels and then distributes it to the public water supply system. Operation of this remedy commenced in 1996 and groundwater treatment has since removed approximately 36 billion gallons of VOCs contamination water. Contaminants of concern are reported to be TCE, PCE, 1,4, dioxane, hexavalent chromium, and 1,2,3-TCP. Although use of contaminated groundwater is considered the greatest human health risk, the extraction of groundwater is strictly regulated, therefore no unauthorized use is anticipated. In addition, no impacts to indoor air (via the vapor intrusion pathway) or inhalation exposures for construction workers are likely due to the depth of contaminated groundwater, which is reported to be at 250 feet below ground surface (bgs). Based on the above, the area wide confirmed groundwater contamination is not expected to present a risk to health or safety to the subject property occupants or to impede the current use of the subject property. As such, no further investigation is deemed warranted at this time.
- Based on our review of historical Sanborn Maps, the western portion of the subject property was improved with a small single-story battery manufacturing facility, as well as small single-story auto electric repair facility in the 1960, 1966, and 1968 Sanborns. These types of facilities typically generate various wastes such as chlorinated solvents and lead as part of their operations. However, based on the small size scale of these facilities, it is not suspected that any significant manufacturing/generation of hazardous wastes occurred at these locations. Further, this portion of the subject property has since been redeveloped into the existing restaurant portion which is connected to the Western Tower of the hotel property, and would have therefore undergone significant grading/excavation activities in order to accommodate the existing improvements.

Based on the above, the direct contact to any potential remaining concentrations of contamination (if any) in the soil is minimized and it is not expected that these historical improvements represent a significant environmental concern at this time.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any CRECs during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any HRECs during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Due to the age of the West Tower building, there is a potential that asbestos-containing material (ACM) are present. Readily visible suspect ACMs were observed in generally good condition and do not appear to pose a health and safety concern to the occupants of the subject property at this time. Of note, an existing Asbestos Operations & Maintenance Plan, dated November 11, 2014, is currently in place at the subject property.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 2500 North Hollywood Way in Burbank, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of RECs and environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

- The status of the area-wide San Fernando Valley (Area 1) North Hollywood, CA Superfund Site should be monitored until granted regulatory closure.
- In the event that the subject property is to undergo redevelopment activities, Partner recommends the subsurface improvements at that time be characterized prior to redevelopment.
- Continued implementation of the existing Asbestos Operations & Maintenance Plan, dated November 11, 2014.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 2500 North Hollywood Way in Burbank, Los Angeles County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1.0 INTRODUCTION

This Operations and Maintenance (O&M) Plan addresses activities that may involve or disturb asbestos-containing materials (ACM) at the 2500 N Hollywood Way, located in Burbank, California. An O&M Plan minimizes the potential for facility/maintenance personnel, tenants, contractors/vendors, and the general public to be exposed to ACM and/or airborne asbestos fibers. Through the development and implementation of a procedural manual for company associates outlining the necessary procedures for emergency situations, associate training, periodic inspections, testing and record keeping, an O&M Plan can meet the needs of the facility in the management of confirmed and suspect ACM.

The objectives of the O&M Plan are to clean up existing contamination, minimize future fiber release by controlling access to ACM, and maintain intact ACM in-place until it is eventually removed. Intentional disruption of ACM should be limited to repair or removal of small areas of significantly damaged ACM, or small areas where removal is necessary to facilitate maintenance/renovation activities. These activities should be undertaken by licensed asbestos abatement contractors. Large abatement projects that require extensive planning and technical expertise are beyond the scope of this O&M Plan.

It is important to note that this O&M Plan is based on the original date of construction and/or provided information indicating the presence or potential presence of ACM. Furthermore, Partner has not performed an asbestos survey of the subject property; therefore, Partner recommends that all previously untested suspect ACM, surface applied materials, thermal insulation and miscellaneous materials are to be presumed to contain asbestos until sampled by an accredited asbestos inspector and characterized by the appropriate analytical methods.

2.0 OCCUPANT NOTIFICATION

It is the obligation of the property owner to notify appropriate persons as required by law, to take necessary steps to minimize the potential for asbestos exposure.

It is the obligation of the property owner that only trained and qualified individuals are authorized to disturb or remove any ACM.

It is the obligation of the property owner that maintenance/custodial staff receive appropriate O&M awareness training, as deemed necessary by the owner.

In California, Assembly Bill 3713, also known as the Connelly Bill, (Health and Safety Code, Section 25915), requires building owners to disclose to employees the presence of any known asbestos-containing materials (ACM).

Action for Owners

Building owners, in addition to informing building workers and vendors as required by the U. S. Occupational Safety and Health Administration (OSHA), should also inform occupants and tenants about the location and physical condition of the ACM, and stress the need to avoid disturbing these materials.

Building owners should inform occupants about the presence of ACM by distributing written notices, posting signs or labels in a central location where affected occupants can see them, and holding awareness or information sessions. Some states and localities have "right-to-know" laws that may require that all occupants, workers, and visitors in buildings with ACM be informed that asbestos is present.

Building owners/employers must attach warning labels to all products and containers of asbestos, including waste containers, and all installed asbestos products, when possible. Labels must be printed in large, bold letters on a contrasting background and used in accordance with OSHA's Hazard Communication Standard (29 CFR Part 1910.1200). All labels must contain a warning statement against breathing asbestos fibers and contain the following legend:

DANGER

CONTAINS ASBESTOS FIBERS

MAY CAUSE CANCER

CAUSES DAMAGE TO LUNGS

DO NOT BREATHE DUST

AVOID CREATING DUST

Labels are not required if asbestos is present in concentrations less than 1 % by weight. They also are not required if bonding agents, coatings, or binders have altered asbestos fibers, prohibiting the release of airborne asbestos over the OSHA permissible exposure limit or the excursion limit during reasonable use, handling, storage, disposal, processing, or transportation. When building owners or employers identify previously installed asbestos or suspect ACM, employers must attach or post clearly noticeable and readable labels or signs to inform employees as to which materials contain asbestos.

OSHA also requires warning signs to be displayed at each regulated area so that an employee may read the signs and take necessary protective steps before entering the area. Posted warning signs demarcating the area must be easily readable and understandable. The signs must bear the following information:

DANGER
ASBESTOS
MAY CAUSE CANCER
CAUSES DAMAGE TO LUNGS

AUTHORIZED PERSONNEL ONLY

In addition, where the use of respirators and protective clothing is required in the regulated area under this section, the warning signs shall include the following:

WEAR RESPIRATORY PROTECTION AND PROTECTIVE CLOTHING IN THIS AREA

Individual states and localities may require additional verbiage in their signage.

Building owners should inform new employees about the presence of ACM before they begin work. OSHA requires this notification for employees who will perform housekeeping activities where ACM is present. Additional steps may be needed for illiterate or non-English speaking workers and other occupants who may encounter language difficulties. For example, owners should consider providing information sessions in languages other than English where a significant number of workers, occupants, or visitors do not speak English. Furthermore, OSHA regulations require that employers ensure that employees can comprehend the warning signs posted. Owners may wish to consider developing a warning label system for illiterate workers showing them pictures about potential hazards of disturbing ACM and showing them where ACM is located. Translations of the warning labels should be provided by the owner for non-English speaking personnel.

O&M workers should receive the training necessary for them to perform their tasks safely.

Information for Occupants (workers, tenants and others)

Occupants should be notified for two reasons: (1) There may be a potential hazard in their vicinity; and (2) informed persons are less likely to disturb the material and cause fibers to be released into the air. All employees and tenants or tenant representatives likely to disturb ACM should be included in the notification program on a continuing basis. The specific information given to types of building occupants will vary. For example, because building maintenance and service workers carry out certain tasks that office workers or tenants do not perform, they should receive additional information. Most important, operations and maintenance workers should receive the training they need to perform their tasks safely.

For information on training requirements, see the OSHA regulations at [29 CFR § 1910.1001\(j\)\(7\) \(PDF\)](#) (53 pp, 408K, [about PDF](#)).

Whatever its form, the information given to building occupants and workers should address the following points to the extent they reflect building conditions:

- ACM has been found in the building or is suspected of being present and is located in areas where the material could be disturbed.
- The condition of the ACM, and the response that is appropriate for that condition.
- Asbestos only presents a health risk when fibers become airborne and are inhaled. The mere presence of intact ACM may not represent a health risk.
- The ACM is found in the following locations (e.g., ceilings in Rooms 101 and G-323, walls in the lobby, above suspended ceilings in the first-floor corridor, on columns in the main entry, on pipes in the boiler room).
- Do not disturb the ACM [e.g., do not push furniture against the ACM, do not damage thermal system insulation (TSI)].
- Report any evidence of disturbance or damage of ACM to [name, location, and phone number of the O&M Plan Manager (APM)].
- Report any dust or debris that might come from the ACM or suspect ACM, any change in the condition of the ACM, or any improper action (relative to ACM) of building personnel to (name, location, and phone number of the O&M Plan Manager).
- Cleaning and maintenance personnel are taking special precautions during their work to avoid disturbing ACM.
- All ACM is inspected periodically and additional measures will be taken if needed to protect the health of building occupants.

3.0 TRAINING

In order to ensure that all ACM are handled properly, this facility has created a collateral position entitled O&M Plan Manager, to be assigned by the Owner. All activities related to the handling of ACM are to be coordinated through this individual or management company and a licensed asbestos abatement contractor.

3.1 Training Program

A key element in initiating and carrying out this Asbestos O&M Plan is a properly trained building maintenance staff. This group is responsible for daily awareness/inspection of ACM as they perform their tasks. The maintenance staff will report any indication of potential problems resulting from changes of ACM condition, area use, or maintenance practices. The maintenance staff will receive, at a minimum, the training equivalent to the curriculum and method to EPA awareness training (see 29 CFR Part 1926.1101 for more information). Training must focus on the locations of ACM or suspect ACM and the ways to recognize damage and deterioration and avoid exposure. The course must be at least 2 hours in length. Newly employed maintenance and custodial personnel will receive awareness training within sixty (60) days of hire. This training will be provided either by in-house staff or by an independent consultant or training provider. Awareness level training does not allow an individual to legally disturb ACM and/or PACM.

The operations staff which will be working in direct contact with asbestos materials for repair operations will receive, at a minimum, training equivalent in curriculum and method to the 16-hour Operations and Maintenance course developed by EPA for maintenance and custodial workers whose work disturbs ACM (see 40 CFR Part 763.92). The course must include hands-on training on proper respirator use and work practices.

The following elements should be presented in the Asbestos training programs:

Building Maintenance Staff Training

Asbestos Awareness Training

- a. Introduction - General background on asbestos, common uses of asbestos in building materials, explanation of the Asbestos O&M Plan, and abatement activities to date, etc.
- b. Identification and Location of ACM and/or suspect ACM in the Building
- c. Medical/Mechanisms for Exposure - Mechanisms for exposure with an emphasis on fiber entrainment and the health effects associated with asbestos exposure.
- d. Recognition of Potentially Hazardous Conditions – including damage, deterioration, delamination, etc.
- e. Use of High-Efficiency Particulate Air (HEPA) Technology – Discussion and use of HEPA filtration, vacuums, and filter changes, etc.
- f. Cleaning Techniques – Implementation of specialized cleaning methods, dusting techniques, wet cleaning methods, and proper disposal, etc.

- g. Daily Awareness/Inspection - Training to focus an awareness of the indications of potential problems, chain of command and notification, and general techniques to avoid exposure.
- h. Mechanisms to Reduce Exposure
 - Proper use of mechanical engineering control systems
 - Protection or removal of exposed material in high traffic areas
 - Construction of temporary barriers
 - Minimization of air circulation
 - Use of water during maintenance
 - Use of specialized equipment: HEPA - vacuum filtration
 - Others
- i. Coordination with O&M Plan Manager - Schedules for cleaning, mopping, stripping, buffing, etc., as well as procedures for reporting damaged materials to the facility O&M Plan Manager.
- j. Continued Employee Education - Periodic training sessions, discussion of issues arisen between sessions, required attendance of senior maintenance staff, etc.

3.2 O&M Plan Manager Responsibilities

The O&M Plan Manager shall be responsible for the following tasks:

- Implement and monitor the asbestos control program.
- Coordinate all activities with asbestos consultants/contractors.
- Review specifications for services or work; retain consultant, and evaluate bids and proposals; and monitor contractor's performance of asbestos-related work.
- Provide access to training and technical assistance to construction and property managers to ensure asbestos control.
- Keep adequate records of asbestos exposure assessments, medical exam records (if required), abatement plans and actions, and ensure regional compliance with 29 CFR 1910.1001(m)(3), 29 CFR 1910.20, and 1926.1101
- Ensure that facility personnel do not handle or disturb ACM.
- Incorporate, schedule, monitor, and maintain records of the periodic ACM inspection program.
- Review all planned construction and maintenance activities in areas known to have asbestos-containing materials to prevent unnecessary damage to the material, occupant exposure, and contamination of the building.
- Monitor the above work while it is in progress to ensure that it complies with contract specifications.
- Ensure that a record is kept, and that the property owner is informed of all applicable incidents, and situations involving asbestos-containing material.

<i>Owner Designated O&M Plan Manager:</i>	
O&M Plan Manager	
Address:	
Telephone:	

The Management Company (if no management company is assigned, the following duties shall remain the responsibility of the O&M Plan Manager) shall be responsible for the following tasks:

- Ensure that only authorized persons repair, replace, or handle ACM.
- Maintain an on-site record of O&M Plan inspection reports as received.
- Report all damaged suspect or known ACM immediately to the O&M Plan Manager.
- Direct all unauthorized personnel to remain clear of ACM.
- Review all planned construction and maintenance activities in areas known to have ACM or suspect ACM to prevent damage to the material, occupant exposure and contamination of the building.
- Monitor the above work while it is in progress to ensure that it complies with contract specifications.
- Report and coordinate all asbestos-related issues through the O&M Plan Manager.
- Coordinate the response to all inquiries relative to asbestos through the O&M Plan Manager.
- Ensure that a record is kept and that the property owner is informed of all applicable incidents, and situations involving ACM.

SUGGESTED TRAINING COURSES FOR EMPLOYEES INVOLVED IN THE O&M PLAN

Custodial & Maintenance	General Awareness	2 hours
Maintenance Supervisor/Installation Head	O & M (includes hands on training)	16 hours
Maintenance Supervisor/Installation Head	Inspector	3 days
Asbestos O&M Plan Manager	Project Designer	3 days

CLASSIFICATION OF ASBESTOS WORK PRACTICES BY OSHA AND ASSOCIATED TRAINING

The following work practice classifications are appropriate for trained and authorized maintenance personnel under this O&M Plan.

Class III Repair and Maintenance activities where ACM or Suspect ACM is disturbed, does not include activities designed to remove ACM.

- a. Requires an EPA 16-hour Operations and Maintenance course or a licensed asbestos abatement contractor.
- b. Will require participation in a Respiratory Protection Program
- c. Will require participation in a Medical Surveillance Program

Class IV Maintenance and Custodial work where employees contact, but do not disturb ACM and suspect ACM.

- a. Requires two-hour General Awareness training
- b. If work requires entering a regulated area where respirators are required or workers are exposed to greater than the OSHA permissible exposure level for more than 30 days per year, participation in a Respiratory Protection Program and Medical Surveillance Program is Required

4.0 APPROPRIATE WORK PRACTICES

The following work practices are included for general information, as these materials may or may not be present in the facility. An ACM Inspection Form has been provided in Appendix A. All suspect asbestos containing building materials must be tested prior to disturbance. Removal or cleanup of ACM debris should be addressed by a licensed abatement contractor.

The following forms have been appended to this O&M Plan:

- A Job Request Form is provided in Appendix C.
- A Maintenance Work Authorization Form is provided in Appendix D.
- An Evaluation of Work Affecting ACM is provided in Appendix E.
- A hyperlink for asbestos regulations covering various work practices is included in Section 10.0 References.

4.1 Routine Maintenance or Repair Activities in Asbestos-Containing Environments

Maintenance or repair activities in the local of asbestos-containing resilient floor tiles or sheet flooring should not disturb ACM. Where maintenance activities cannot be avoided, special procedures must be introduced to limit the potential for damage and contamination of the surrounding areas. Work practices include, but are not limited, to the following:

- Use of wet methods;
- Use of HEPA vacuums;
- Use of a licensed asbestos abatement contractor to clean up ACM or suspect ACM debris; and
- Assume waste and debris in areas with accessible (friable) TSI and surfacing materials contains asbestos. A Waste Tracking Form has been provided in Appendix B.

4.1.1 *Preparation Prior to Renovation or Maintenance Activities & Emergency Response to Damaged Asbestos Containing Acoustical Ceiling Materials*

- Notify supervisor and cordon off area using appropriate signage (per 29 CFR 1910.1001(j)(3)).
- O&M Plan Manager will contract a licensed asbestos abatement contractor to remove ACM.
- O&M Plan Manager will contract an asbestos consultant to perform ambient air sampling upon completion of response action.
- Waste material should be properly manifested and disposed.

4.2 Suspect Asbestos Containing Building Materials

The following suspect ACM are materials that are typically encountered in buildings. The list should not be construed as being representative of all suspect materials that may be present in a building or property. Therefore, if a prior or subsequent survey is performed, the identified ACM should be incorporated for the purposes of this Operations & Maintenance Plan.

Plaster and Spray-Applied Acoustical Texture or Fireproofing

- Asbestos-containing plaster is generally considered to be friable if it is damaged or disturbed. Plaster is often applied to interior ceilings and walls and over irregularities, such as nail penetrations, to provide a textured, acoustically absorbent finish to the ceiling. It can be rough or smooth to the touch. It is not possible by sight or by touch to determine if plaster is asbestos-containing.
- Spray-applied acoustical ceiling texture is generally considered to be friable and could present a potential health hazard if disturbed. Acoustical ceiling plaster usually has a rough (popcorn like) finish and can be soft or hard to the touch. It is usually spray-applied; however, trowel-applied material is also observed.
- Asbestos-containing spray-applied fireproofing is generally considered to be friable and present a potential health hazard if it is disturbed. Fireproofing is often applied to steel structural members, and to the interior of elevator shafts. Spray-applied fireproofing is generally rough in appearance, and can be “cottage-cheese” like or firm and somewhat cement like in texture.

These materials are susceptible to water damage and are evident via discoloration. If water damage continues, delaminating will occur, resulting in an increased potential for asbestos fiber exposure. All potential sources of water leakage should be immediately addressed to prevent further water damage to the ACM.

Vinyl Composite Floor Tiles (VFT), Sheet Flooring (VSF), and Mastics

Vinyl floor tiles, sheet flooring, and associated mastics are generally considered to be non-friable materials, provided that they remain undisturbed on floor surfaces. It is not possible by sight or touch to determine if floor coverings are asbestos containing. Sheet flooring is typically composed of two layers, a top protective layer and a bottom paper-like insulating layer. A mastic material, often asbestos-containing, adheres the floor tile or sheet flooring to the substrate.

Drywall and Drywall Joint Compound (DWJC)

Drywall and drywall joint compound are generally considered to be friable materials if damaged or disturbed. DWJC is applied to interior drywall seams and over irregularities, such as nail penetrations, to provide a smooth finish to the wall system prior to painting. Because of the absence of rough edges and the typically painted surfaces, this material generally has a low propensity for disturbance under normal use and wear. It is usually hard to the touch. It is not possible by sight or by touch to determine if DWJC is asbestos-containing.

Thermal System / Transite Pipe Insulation

Asbestos-containing transite vent pipes are commonly used as exhaust flues for heaters, water heaters, and boilers. These materials are unlikely to pose a health threat if left undisturbed and should be monitored for damage.

Asbestos-containing thermal and transite pipe insulation is commonly applied to heating vessels such as boilers, hot water tanks, and the associated piping. Thermal insulation is generally considered to be friable, although it is commonly enclosed in a canvas jacket. It is very important the jacket material

remain free from tears or rips that can expose the underlying ACM. Other types of thermal insulation in use include a paper-type insulation. These materials are unlikely to pose a health threat if left undisturbed and should be monitored for damage. Often, the hard, mudded elbows and hanger supports used with fiberglass pipe insulation contains asbestos. Thermal insulation is particularly susceptible to water damage. Plumbing and roof leaks should be immediately repaired when determined to have caused water damage to ACM.

“Stucco”

Asbestos-containing “stucco” is commonly used as an exterior finish. “Stucco” is generally considered to be friable. These materials are unlikely to pose a health threat if left undisturbed and should be monitored for damage.

Black Roof Seal/Mastic and Roofing Materials (Shingles, Asphaltic Roofing)

Asbestos-containing roof seal/mastics are still in use today. The material is considered to be non-friable and the fibers are unlikely to be released from the asphaltic matrix. These materials are unlikely to pose a health threat if left undisturbed and should be monitored for damage.

Under normal conditions of use, asbestos fibers are bound into the matrix of the previously discussed materials as well as roof shingles and asphaltic roofing, and may pose a hazard to building occupants should the material become friable (pulverized or airborne). Mechanical disturbance of these materials should be avoided as activities such as cutting, drilling, grinding, sanding, or hammering may cause significant damage and lead to airborne fiber release.

5.0 INSPECTION PROGRAM

5.1 Responsibilities

In order to ensure that ACM and suspect ACM are maintained in the best possible condition, the following tasks must be performed:

5.2 Periodic Visual Inspection

The O&M Plan Manager will coordinate the inspection process, analyze and consolidate results, and report any problems or necessary corrective recommendations to the proper authority. Each facility containing friable asbestos must have a regular physical "walkthrough" by a qualified inspector (using the original survey report and subsequent re-inspection reports as a guideline) to confirm that all ACM in the facility is intact and manageable. If new damage is identified, it must be noted so that remedial action can be arranged.

Posting of warning signs and labels in areas with known ACM should be performed upon confirmation of the presence of ACM in the building (29 CFR 1926.58). Labeling is intended to prevent damage or disturbance of ACM by unprotected individuals and to prevent such persons from entering areas where there is potential exposure from ACM.

5.3 Air Monitoring

Upon disturbance of confirmed or suspect ACM and/or if required by law, air sampling must be conducted by qualified professionals to determine the airborne fiber concentration in the area.

5.4 Training

The reverse side of the inspection form is to document the initial training and annual re-training of personnel.

Outside persons (including contractor personnel) who may work in or around ACM environments (but not handle or maintain ACM) should receive the appropriate training from their employer in accordance with the guidelines delineated in the applicable regulations.

All training programs must inform employees about the following:

- Methods of recognizing asbestos;
- Health hazards of asbestos exposure;
- Relationship between asbestos and smoking in producing lung cancer;
- Operations that could result in asbestos exposure;
- Importance of necessary protective controls to minimize exposure including, as applicable, engineering controls, work practices, respirators, housekeeping procedures, emergency procedures, and waste disposal procedures;
- Purpose, proper use and limitations of respirators; and
- The medical surveillance program;
- A complete review of the OSHA standard(s) including appendices.

6.0 EMPLOYEE PROTECTION

It is the express policy of the property owner that ACM present in this facility shall be maintained in such a way as to preclude the necessity of using personal protection equipment (PPE). No employees or tenants of the subject site or outside contractor employee shall disturb any ACM. Anyone working in the vicinity of identified ACM shall receive the proper training consisting of the two-hour Asbestos Awareness Class.

Any asbestos-related abatement/removal/cleanup conducted at the subject site will be performed by an licensed contractor.

At a minimum, the following elements should be included in the contractor's worker protection program:

- Hazard determination, including exposure assessment;
- Engineering and work practice controls;
- Respiratory protection;
- Protective clothing and equipment;
- Housekeeping;
- Hygiene facilities and practices;
- Medical surveillance and provisions for medical removal;
- Training;
- Signs; and
- Recordkeeping.

7.0 RECORDKEEPING

All the building asbestos management documents should be stored in permanent files, including:

- Inspection and assessment reports
- The O&M Plan
- Work practices and procedures
- Respirator use procedures
- Fiber release reports
- Application for maintenance work and work approval forms
- Evaluations of work affecting ACM
- Reinspection/surveillance of ACM

EPA recommends that building owners make available all written elements of the O&M Plan to the building's staff as well as to tenants and other building occupants, if applicable. Building owners are also encouraged to consult with their legal counsel concerning appropriate recordkeeping strategies as a standard part of their O&M programs.

Occupational Safety and Health Administration (OSHA) standards require that employers with employees engaged in asbestos-related work retain the following records:

- Personal air sampling records, for at least 30 years; personal air samples are those collected in the worker's breathing zone during performance of work involving asbestos exposures.
- The data used to qualify for exemptions from OSHA's initial monitoring requirements for the duration of the exemption.
- Medical records for each employee subject to the medical surveillance program for the duration of their employment plus 30 years.
- All employee training records for one year beyond the last date of each worker's employment.

Additional OSHA recordkeeping requirements are listed below for reference:

- Access to employee exposure and medical records ([29 CFR 1910.1020](#))
- Hazard Communication ([29 CFR 1910.1200](#)).
- Also see the OSHA Construction Rule ([29 CFR 1926.1101](#)) or the EPA Worker Protection Rule ([40 CFR 763 Subpart G](#)) which incorporates the OSHA regulations by reference for certain state and local employees) for more details of recordkeeping requirements.

8.0 RESPIRATOR PROGRAM

No site employees, occupants, or unlicensed outside contractors shall be authorized to disturb ACM with the exception of maintenance and custodial workers. If authorized maintenance and custodial workers who engage in Class III and Class IV asbestos work are required to wear a respirator by the requirements of 29 CFR 1920.1101 or by employer/owner preference, then the employer/owner must establish and implement a written respirator program with worksite specific procedures according to 29 CFR 1910.134. The requirements for this respiratory protection program include, but are not limited to:

- Respirator selection for a given task
- Medical evaluation of the employee to wear a respirator
- Fit testing of employees to wear a respirator annually
- Guidance on the use of respirators
- Policy on maintenance and care of respirators
- Respirator training annually
- Program evaluation
- Record Keeping

Respirators must be selected according to the provisions of Title 42, CFR Part 84, and CCR 8.1529 Table 1 (California).

9.0 DEFINITIONS

Accessible Material - any material access to which can be gained by any means other than significant destruction of building components, or, for the purposes of describing building occupant activities, a material subject to disturbance by routine use or maintenance activities

Asbestos - the general name given to a number of naturally occurring hydrated mineral silicates each of which possesses a specific crystalline structure, is incombustible in air, and is separable into fibers; asbestos includes the asbestiform varieties of Chrysotile (serpentine), Crocidolite (riebeckite), Amosite (cummingtonite-grunerite), Anthophyllite, and Actinolite.

Asbestos Containing Material (ACM) - may be defined, as by the EPA, as any friable material or product containing greater than one percent asbestos or, by convention, as any material or product which contains >1% asbestos as determined by the EPA 600/R-93/116 Method using polarized light microscopy.

Asbestos Debris - pieces of material that can reasonably be identified by color, texture or composition as being traceable to a known asbestos containing application; may mean dust, if the dust is determined by analysis to be ACM

Bulk Samples - samples of bulk material; in the case of asbestos, suspect asbestos containing material; Chain-of-Custody (COC) - formal procedures for tracking samples and ensuring their integrity

Encapsulation - treatment of ACM with a material that surrounds or embeds asbestos fibers in an adhesive or cementitious matrix to inhibit the release of fibers; the encapsulant creates a membrane over the surface of the material (bridging encapsulant) or penetrates the material or binds its components together (penetrating encapsulant).

Enclosure - an airtight, impermeable, permanent barrier around ACM to prevent the release of asbestos fibers into the air

EPA - United States Environmental Protection Agency

Fair - as used to describe material condition, damage is more prevalent or severe than on materials rated as good

Fiber Release Episode - any uncontrolled or unintentional disturbance of ACM resulting in airborne asbestos fiber emission

Friability - the physical characteristic of any solid that describes its ability to be broken down to a powder or dust; a highly friable material is one that can be easily crumbled by hand pressure; a moderately friable material is one that can be crumbled with some difficulty by hand pressure or by mechanical means; a low friability material is one that may require mechanical means to crumble; while the condition of a material does not constitute a measure of its friability, weathering and deterioration can increase the friability of a material

Glovebag - a plastic enclosure with built-in gloves which is placed with an airtight seal around asbestos containing pipe lagging or other materials such that they may be removed or repaired without generating airborne fibers

Good - as used in the context of material condition, integrity of the material is generally complete, with possible small areas of delamination or indications of limited contact or water damage; the mechanism to retain the insulation in its original position (e.g. cloth wrapping over pipe insulation) is still present

Heating Ventilation and Air Conditioning (HVAC) system - the system of pipes, ducts, and equipment, (air conditioners, chillers, heaters, boilers, pumps, fans) used to heat, cool and filter air and move it through a building; the HVAC system is one of several mechanical systems found in most buildings

High Efficiency Particulate Air (HEPA) Filter - a filtering system capable of trapping and retaining at least 99.97 percent of all particles 0.3 micrometers in diameter or larger

Homogeneous Application - an application of surfacing material, thermal system insulation material, or miscellaneous material that is uniform in color, texture, and vintage of application

Lock-down - application of a sealing material to ensure that any residual microscopic fibers remaining following asbestos removal are prevented from becoming airborne

Mechanical System - a building component system: can include the plumbing system, elevator system, and others (see Heating Ventilation and Air Conditioning system (HVAC))

NIOSH - United States National Institute of Occupational Safety and Health

Operations and Maintenance (O&M) Plan - a program of work practices and training and management procedures designed to maintain ACM in good condition; an O&M Plan ensures clean-up of asbestos fibers previously released and prevention of further release by minimizing and controlling ACM disturbance or damage; an O&M Plan should be implemented at all buildings with ACM

Optical Microscope - a microscope that uses the transmission of light through lenses to magnify a specimen for examination; capable of resolution of fibers or other materials down to approximately 0.25 micrometers in diameter

OSHA - United States Occupational Safety and Health Administration

Permissible Exposure Limits (PELs)

1. Time-weighted average limit (TWA). The employer shall ensure that no employee is exposed to an airborne concentration of asbestos in excess of 0.1 fiber per cubic centimeter of air as an eight (8) hour time-weighted average (TWA), as determined by PCM, or by an equivalent method.
2. Excursion limit. The employer shall ensure that no employee is exposed to an airborne concentration of asbestos in excess of 1.0 fiber per cubic centimeter of air (1 f/cc) as averaged over a sampling period of thirty (30) minutes, as determined by PCM, or by an equivalent method.

Phase Contrast Microscopy (PCM) - an optical microscopic technique used for counting fibers in air samples; PCM does not distinguish between asbestos and non-asbestos fiber types; the PCM method currently recognized is referred to as NIOSH 7400

Physical Assessment - evaluating asbestos containing material to determine its current condition and potential for future disturbance

Plenum - a space in a building, other than a duct or shaft, designed to transport air; plenums are commonly the space between a suspended ceiling and the floor above

Polarized Light Microscopy (PLM) - an optical microscopic method for the identification of asbestos in bulk samples in which the sample is illuminated with polarized light

Poor - as used in the context of material condition, material is obviously damaged with evidence of delamination or inadequate adhesion of the material to its substrate

Presumed Asbestos Containing Material (PACM) - Presumed Asbestos Containing Material means thermal system insulation and surfacing material found in buildings constructed no later than 1980; the designation of a material as "PACM" may be rebutted pursuant to paragraph (k)(5) of 29 CFR 1926.1101

Quality Assurance (QA) - a process designed to provide confidence that the quality control program is being applied effectively; the process includes an auditing procedure designed to evaluate all known policies and procedures that affect the quality of results

Quality Control (QC) - a program comprised of the operational procedures to ensure that data are of known and acceptable precision and accuracy

Regulated Area - A regulated area is a marked-off site where employees work with asbestos, including any adjoining areas where debris and waste from asbestos work accumulates or where airborne concentrations of asbestos exceed, or can possibly exceed, the PEL.

Response Action - any method, including removal, encapsulation, enclosure, repair, or Operations and Maintenance Program that minimizes harm to human health and the environment from the hazards and effects of ACM

Specifications - a written set of standards, procedures, and materials for the abatement of asbestos; includes contract documents detailing the Scope of Work of the project and defining Contractor, Building Owner and Consultant responsibilities

Transite - a trade name for asbestos cement wallboard or pipe

Transmission Electron Microscopy (TEM) - State-of-the-art analytical method for air and bulk sample analysis; uses high magnification (typically 15,000x) to identify asbestos fibers; may utilize Energy Dispersive Spectroscopy (EDS) and/or Selected Area Electron Diffraction (SAED) to confirm asbestos and to identify the type of asbestos present; recommended for final clearance air samples and for bulk analysis of samples with difficult-to-analyze matrices (e.g., plaster, vinyl tile); provides the most definitive analysis of asbestos currently available.

PCB Inspection Form

1.0 INTRODUCTION

Concern about indoor exposure to mold has been increasing as the public becomes more aware that exposure to mold can cause a variety of health effects and symptoms, including allergic reactions and respiratory distress. This document, a *Moisture-Mold Action Prevention Plan* (MMAPP) provides guidance for moisture control, mold growth prevention and remediation. This MMAPP was designed to aid AWH Burbank Hotel, LLC in the management of moisture and mold for the property located at 2500 N Hollywood Way, in Burbank, California, this guide will provide the following information:

- How to identify, respond to and manage water intrusion/moisture issues;
- An understanding of mold (what it is, how to identify it, and potential health effects);
- How to prevent mold growth in multi-family residential dwellings;
- Inspection procedures to be implemented during residential unit turnovers and in response to complaints;
- How to make reasonable judgments as to whether mold clean-up can be handled in-house;
- How to develop and/or evaluate an in-house remediation plan or evaluate a remediation plan submitted by an outside contractor;
- Responsibilities of the building manager, building superintendent, and Maintenance Personnel.

Through the development and implementation of a procedural manual for company associates outlining the necessary procedures for emergency situations, associate training, periodic inspections, testing and record keeping, an MMAP Plan can meet the needs of the facility in the management of moisture and potential mold growth.

An implemented MMAP Plan can provide a level of assurance that prudent measures are being taken to minimize the potential exposure and/or conditions conducive for mold growth. Furthermore, this plan may serve as evidence that the owner is aware of the liabilities and outlines the steps that will be actively taken to minimize exposure potential.

It is important to note that this MMAP Plan is based on observations and/or provided information indicating an existing condition, potential presence, or anticipation for a moisture or mold occurrence. Furthermore, Partner has not performed either a limited or comprehensive moisture or mold survey of the subject property. The MMAP Plan is in conformance with the guidelines and recommendations provided by the Department of Health Services (DHS), the Environmental Protection Agency (EPA), and the New York Guidelines for Assessment of Fungi in Indoor Environments.

2.0 GENERAL INFORMATION ABOUT MOLD

2.1 Molds in the Environment

Molds live in the soil, on plants, and on dead or decaying matter. Outdoors, molds play a key role in the breakdown of leaves, wood, and other plant debris. Molds belong to the kingdom Fungi, which means molds are neither plants nor animals. Unlike plants, molds lack chlorophyll and must survive by digesting plant, animal, or other organic materials for food. Without molds, our environment would be overwhelmed with large amounts of dead plant matter.

Molds reproduce by tiny spores, much like some plants produce seeds. These mold spores are found in both indoor and outdoor air and settle on indoor and outdoor surfaces. When mold spores settle on a damp spot, they may begin growing and digesting the material they settled upon to survive. Since molds gradually decompose the substrate they grow on and potentially cause adverse health effects, the method of prevention is to respond to water intrusion/moisture issues in a timely manner.

2.2 Building Related Molds

Molds can grow on many building materials, such as wood, paper (e.g. wall-paper, books, and wall board liners), carpeting and rugs, fabrics, upholstery, wall-board (gypsum), plaster, and some insulation materials. Mold can grow on organic dirt that accumulates on virtually any surface including concrete and cinder block. When molds grow indoors they produce spores. This may cause the indoor concentration of spores of a particular type of mold to be higher than the outdoor concentration, a condition known as indoor mold amplification.

Molds need both food and water to survive. Since molds can digest many building materials, water is the greatest factor that limits the growth of building-related mold. Moisture control is the key to preventing mold. Molds will generally grow in damp or wet areas indoors faster than outdoors. Common sites for indoor mold growth include bathroom surfaces, basement walls, areas around windows where moisture condenses, and near leaky water plumbing. Common sources or causes of water or moisture problems include the following:

- Roof leaks
- Deferred maintenance
- Condensation associated with high humidity or cold spots in the building
- Flooding due to plumbing failures or heavy rainfall
- Slow leaks in plumbing fixtures
- Malfunction or poor design of humidification systems
- Inadequate foundation sloping/drainage
- Renovations
- Uncontrolled humidity, particularly in hot, humid conditions.

2.3 Hidden Molds

In some cases, indoor mold growth may not be obvious or visible. It is possible that mold may be growing on hidden surfaces, such as the back side of drywall, wallpaper, or paneling, the top of ceiling tiles, and the underside of carpets and carpet pads. Possible locations of mold can include pipe chases

and utility tunnels, in addition to walls behind large pieces of furniture (where condensation forms), condensate drain pans inside air conditioners, and roof materials above ceiling tiles (due to roof leaks or insufficient insulation). Some building materials, such as dry wall with vinyl wallpaper or baseboard molding may act as a vapor barrier increasing the chance of condensation.

You may suspect hidden mold if a building area smells moldy/musty, if the source is not identifiable, if there has been recent water damage and building occupants are reporting odors or health complaints. If you are aware of a water leak it is reasonable to suspect that hidden mold may exist behind walls or underneath carpeting that was affected.

Investigating mold problems may be difficult and will require caution when the investigation becomes intrusive. For example, removal of wallpaper can lead to a massive release of spores from mold growing on the underside of the wallpaper. If you believe that you may have a hidden mold problem, you may want to hire a professional whom is experienced and equipped with the necessary precautions to contain and minimize a potential release. Specialized equipment includes: boroscopes, fiber optic cameras, and wall chase air sampling equipment.

Photo of mold growth that was hidden beneath insulation inside the wall cavity.

3.0 HEALTH EFFECTS & SYMPTOMS ASSOCIATED WITH MOLD EXPOSURE

When moisture problems occur and mold growth results, building occupants may begin to report odors and a variety of health problems such as headaches, breathing difficulties, skin irritation, allergic reactions, and aggravation of asthmatic symptoms. All of these symptoms could potentially be associated with mold exposure. All molds have the potential to cause health effects. Molds produce allergens, irritants, and in some cases, toxins. Specific reactions to mold amplification can include the following:

Allergic Reactions

Inhaling or touching mold may cause allergic reactions in sensitive individuals. Some molds can act as sensitizers and cause a person to become allergic to molds, and in some cases, to other allergens. Allergic responses include hay fever symptoms such as running nose, sneezing, red eyes and skin irritation. Mold spores and fragments can produce allergic reactions in sensitive individuals regardless of whether the mold is dead (non-viable) or alive (viable).

Asthma

Molds can trigger asthmatic attacks in persons who are allergic (sensitized) to molds. The irritants produced by molds may also worsen or reveal asthmatic symptoms in non-sensitized individuals.

Irritant Effects

Mold exposure can cause irritation of the eyes, skin, nose, throat, and lungs, often in the form of a burning sensation.

Opportunistic Infections

People with weakened immune systems are potentially more vulnerable to mold-based infections. *Aspergillus fumigatus*, for example, has been known to infect the lungs of immune-compromised individuals. These individuals inhale the mold spores, which then start growing in their lungs. *Trichoderma* has also been known to infect immune-compromised children.

Healthy individuals are usually not vulnerable to opportunistic infections from airborne mold exposure. However, molds can cause respiratory distress and common skin diseases such as athlete's foot and yeast infections.

4.0 RESPONSE TO HEALTH COMPLAINTS RELATED TO MOLD EXPOSURE

Responding to building occupants' complaints in a timely manner is very important when potential mold exposures are an issue. Failing to do so could result in liability claims associated with environment-related illnesses. It is in the best interest of the owner or management to immediately respond to moisture and mold related complaints in a timely manner.

4.1 Response Actions

Several factors may influence the response actions taken by the property owner or management in response to occupant complaints. These factors may include the amount of mold observed, the source of the water intrusion into the occupied space, and the risk of exposure to the occupant(s). The appropriate level of response will vary significantly depending on the circumstances, and could include the following:

- Investigating sources of moisture intrusion and determining if water stains are from previous leaks that have been repaired or materials that are currently experiencing moisture intrusion;
- Retaining a qualified environmental consultant to conduct an assessment;
- Retaining a qualified building engineer or moisture intrusion specialist;
- Developing and implementing corrective actions (i.e. remediation);
- Performing quality assurance inspections and sampling to ensure the remediation is complete;
- Providing appropriate hazard communication for affected parties (i.e. renters, owners, employees, occupants), including notifying occupants of the actions that have been or will be taken to investigate and/or remediate mold problems);
- Seeking or recommending medical advice for diagnosis, treatment or determination of symptoms. Individuals with persistent health problems should go to an allergist or occupational health clinic or see their physicians for a referral to practitioners who are trained in specialties related to health effects caused by mold exposures and are knowledgeable about these types of exposures.

4.2 Responsibilities

The owner of the property is ultimately responsible for all action and response to complaints that are made; however, management and maintenance staff are responsible for day to day operations and are typically delegated to handle property complaints and create resolutions to issues that may arise. The following are the responsibilities that are allocated to these individuals typically involved in the operations and maintenance of a multi-family residential dwelling:

The building manager has responsibility for overall implementation of the MMAPP. The building manager will assign most of the site-specific activities to the building superintendent. The building manager will also be responsible for determining the extent of a moisture-mold complaint and when to utilize a specialist such as a Certified Industrial Hygienist (CIH), Professional Engineer (PE), or Certified Microbial Consultant (CMC) to conduct an environmental assessment.

The building superintendent will direct maintenance personnel and contractors to ensure that the steps of the MMAPP involving site activities are implemented. The building superintendent will perform routine inspections of the building exterior walls, roof, public areas, grading, mechanical rooms, and electrical rooms. These inspections are performed on a regular basis (i.e. weekly or bi-monthly).

The building superintendent will perform inspections of each apartment whenever there is a turnover to a new tenant. Other individuals trained in moisture-mold inspections may assist the building superintendent with the inspections. The apartments will be inspected for visual indications of moisture damage and/or mold growth.

The building superintendent is responsible for communicating to the building manager any concerns or issues such as leaking pipes leaks, indications of moisture damage, musty odors, and/or suspected health effects. The Superintendent will document the concern and/or complaint and investigate the concern. The Superintendent will then direct the superintendent and/or contractors as needed. The investigation, recommendations, and results will be documented in a report that is to be filed and maintained by the building manager.

If the concern is above the training and abilities of the building superintendent, the building superintendent will inform the building manager who will retain the services of an environmental specialist or other trained person to investigate the space and report their findings and recommendations to the building manager or Superintendent. The building superintendent must be cognizant of the impetus to ensure drying is complete 48 hours after a water incursion. Anytime interior building materials are suspected of having been wet for more than 48 hours, the building superintendent will contact the building manager. The building manager will determine if emergency drying and mold remediation services are warranted.

Tenants are responsible for immediately informing the building superintendent and/or building manager of any concerns within their occupied space.

5.0 PREVENTING INDOOR MOLD

5.1 Amplification

In general, if indoor environments become wet and drying cannot be completed within 48 hours then mold growth and indoor amplification is likely. Moisture can penetrate rugs, carpeting, carpet padding, wallboard, plaster, upholstery, papers, and other items commonly found indoors. Appendix A provides guidelines for water damage cleanup. Responses for water damage to various materials such as ceiling tiles, concrete, and fiberglass insulation are listed in Appendix A. The key to successful prevention of mold growth is a timely response within the time frame of less than 48 hours. A quick, effective response to water leakage/damage is critical in preventing mold amplification within buildings.

Photo of a basement partition where water damage was affecting a limited area of the basement and was allowed to go unchecked until the mold bloom was investigated

Rapid response to moisture intrusion and good building maintenance are essential to preventing mold growth. Adherence to the following steps can help prevent mold amplification that can lead to costly remediation:

- Look for indications of water intrusion signs and microbial amplification during routine site visits;
- Fix leaky plumbing and leaks in the building envelope as soon as possible;
- Watch for condensation and wet spots. Fix source(s) of moisture problem(s) as soon as possible;
- Be cautious and aware of repairs of the roof or rooftop mechanical equipment or any building penetration;
- Know what building systems may be prone to condensation, such as windowpanes, water pipes, refrigerant systems, and air conditioning ducts;
- Clean, dry and/or remove anything that is water-damaged, particularly carpets and padding. If you are installing new wall-to-wall carpet over a concrete floor, be sure to have an effective moisture barrier installed beneath it. Area rugs are a better choice for mold prevention;
- Keep bathrooms dry and well ventilated. Remove mold growth using detergent or soap from nonporous items (such as plastic, metals, and tiles). Moldy porous items are generally impossible to clean and should be discarded in sealed plastic bags;

Photo of insulation that was routinely wet by condensation and became a growth site for black mold.

- Be aware of all appliances/processes which introduce moisture into a building space such as cooking, bathing, clothes washing/drying, humidification, refrigeration, ground moisture migration, saunas, steam baths, pools, houseplants, seasonal humidity, cooling towers, and other areas specific to your building;
- Keep hard surfaces clean and dry. Weekly light mopping of floors is recommended;
- Minimize the amount of plants within any space. Plants require frequent watering, which leads to spillage. Furthermore, potting soil provides an excellent source for mold growth;
- Prevent moisture due to condensation by increasing surface temperature or reducing the moisture level in air (humidity). To increase surface temperature, insulate or increase air circulation. To reduce the moisture level in air, repair leaks, increase ventilation (if outside air is cold and dry), or dehumidify (if outdoor air is warm and humid);
- Keep relative humidity (RH) below 70%, ideally between 30-60%. If a location experiences RH greater than 60% on a regular basis, then corrective measures should be employed such as dehumidifiers, exhaust fans, moisture barriers, or whatever is necessary to maintain acceptable conditions;
- Make sure bathroom vents, kitchen vents, and clothes dryer vents are properly positioned to exhaust to the outdoors. An exhaust leak into a wall chase, plenum, attic, or other hidden space can cause moisture to linger and promote mold growth;
- Ensure that the bathroom exhaust fans are adequate for the bathroom size. Exhaust fans indicate air exchange capacity in cubic feet per minute (CFM);
- In areas of known high humidity/condensation (i.e. bathrooms), refrain from using or storing carpeting, furniture or other soft material goods that can hold both dust and moisture;
- Minimize the storage of large amounts of unused materials in crawlspaces to maximize airflow in these areas;

- Keep air-conditioning coils and condensate drip pans clean, flowing properly, and unobstructed. Consider the use of biocide treatments if standing water is always an unpreventable issue. Ensure filters are cleaned or changed as warranted;
- Keep heating systems clean. Empty humidifier water trays and change/cleanse filters on an annual basis or according to manufacturer's recommendations;
- Heating, cooling, humidifying, and dehumidifying systems that are owned and/or maintained by occupants can be, and often are, sources of bioaerosols. This equipment should always be inspected during complaint investigations, and occupants should be encouraged to perform proper maintenance;
- Try to maintain indoor temperatures between 72 and 77 degrees Fahrenheit to limit any growth and reduce the potential for condensation during the cooling season;
- Perform regular building inspections and maintenance as scheduled. Inspections should include, when applicable, site drainage, roof gutters and downspouts, building drains, plenums, musty odors, and indications of leaks. Inspect building penetrations monthly as a proactive measure;
- Clean and dry wet or damp spots within 48 hours. Porous building materials such as carpet, ceiling tiles, and wallboard that are wet for more than 48 hours or show signs of mold should be removed and replaced. Remove wallboard at least 24 inches beyond the visible extent of the mold;
- Check mechanical rooms and roofs for wet conditions, leaks, or spills;
- Don't let foundations stay wet. Provide adequate drainage and slope the ground away from the foundation. If water tends to pond against the building or on rooftops, take measures to prevent ponding.

5.2 Inspections

The property owner / manager should perform routine inspections of the building exterior walls, roof, public areas, grading, mechanical rooms, and electrical rooms. The owner or management should inspect each apartment for indications of moisture and mold whenever there is a turnover (new tenant). The building superintendent should be trained on visual indications of water damage and mold, use of a moisture meter and inspection mirror, typical sources of moisture such as toilets, sinks, washers and dryers, dryer vents, roof leaks, etc. The owner or management should be trained on follow-up inspections of areas where moisture damage has been established. The owner or management should be trained on investigating health and odor complaints and determining when to utilize a specialist, such as a Certified Industrial Hygienist (CIH), Professional Engineer (PE), or Certified Microbial Consultant (CMC) to conduct an environmental assessment.

Inspections of the exterior and non-rented areas are performed at least weekly. Apartments are inspected during turnover periods and whenever there is a complaint. Complaints are made directly to the Superintendent and inspections are typically initiated the same day.

Complaints of mustiness, dampness, or condensation will be addressed by the owner or management when that person feels they have accurately diagnosed the problem. For instance, the Superintendent may recommend opening the bathroom window when using the shower, and if necessary, installing a window fan or exhaust fan. If the building superintendent encounters moisture, mustiness, or condensation that they cannot account for or adequately correct, then they will bring the situation to the

attention of the building manager. Personnel performing inspections are also expected to have a flashlight and inspection mirror. In many cases, the person performing the inspection may wish to clean up a small surface area with suspect mold or cut a small inspection window into a wallboard.

The INTERIOR Inspection Checklist (provided within the appendices) is intended to help the owner or management to complete thorough inspections, including during apartment turnovers and in response to moisture or mold related complaints. Whenever deficiencies are noted, there needs to be a follow-up narrative. Reports on deficiencies, corrections, and follow-up reports should be maintained by the owner or management.

6.0 REMEDIATION OF MOLD PROBLEMS

The owner or management shall not perform remediation when affected surface areas exceed 10 square feet (sq. ft.) of mold damage. The owner or management will assess each mold situation to see if there is heavy growth on porous materials such as drywall, wood or plaster. If there is thick or dense mold, the owner or management is encouraged to request assistance, even for areas with less than 10-sq. ft. of mold.

6.1 Remediation Planning

Prior to the performance of remediation activities, both by in house personnel and licensed professionals; the building manager and superintendent should consider the following:

- Attempt to dry wet materials within 48 hours to prevent mold growth;
- Select cleanup methods for mold impacted items;
- Select Personal Protection Equipment (PPE) - protect remediators;
- Select containment equipment - protect building occupants;
- Select remediation personnel who have the experience and training needed to implement the remediation plan and employ adequate PPE, containment, waste containerization and disposal practices.

Additional details are outlined in *EPA Table 1 and 2* of the Appendix. Please note that the information contained within the tables is EPA guidelines that were provided in the Freddie Mac Moisture Management Plan Handbook.

6.2 Remediation Procedures

Four levels of abatement are described below. The building superintendent and any on-site staff that has not completed formal mold remediation training will only complete Level I remediation. The size of the area impacted by mold contamination primarily determines the type of remediation. The sizing levels below are based on professional judgment and practicality. Currently there is no adequate data to relate the extent of contamination to frequency or severity of health effects. The goal of remediation is to remove and/or clean contaminated materials in a contained area to prevent the spread of spores to unaffected areas. This is achieved using engineering controls and industry standards in remediation methods. However, due to the general nature of these methods, it is the responsibility of the people conducting remediation to ensure the methods enacted are adequate. Non-porous (e.g., metals, glass, and hard plastics) and semi-porous (e.g., wood, and concrete) materials that are structurally sound and are visibly moldy can be cleaned and reused.

Cleaning should be performed with a detergent solution. Porous materials such as ceiling tiles, insulation, and wallboards with more than a small area of contamination should be removed and discarded. Porous materials that can be cleaned, may be reused, but should be discarded if possible. All materials to be reused should be dry and visibly free from mold. Routine inspections should be conducted to confirm the effectiveness of remediation work.

The use of bleach or other biocides is questionable in most cases. The effectiveness of bleach in reducing living mold is dependent on concentration, residual chlorine levels, and contact time on the surface. All

these factors are difficult to control during remediation. Application of a biocide serves no purpose that could not be accomplished with a detergent or cleaning agent. The use of gaseous ozone or chlorine dioxide for remedial purposes is not recommended. Both compounds are highly toxic and contamination of occupied space may pose a health threat. Furthermore, the effectiveness of these treatments is unproven. Removal of all mold growth can generally be accomplished by the physical removal of impacted materials and thorough cleaning of non-porous materials. For additional information on the use of biocides for remedial purposes, refer to the American Conference of Governmental Industrial Hygienists' document, "Bioaerosols: Assessment and Control."

6.3 Four Remediation Levels

[Adapted from the New York City Department of Health (NYCDOH) Guidelines on Assessment and Remediation of Fungi in Indoor Environments (3) and EPA (1)]

As previously mentioned, any on-site staff that has not completed formal mold abatement training (minimum of 24 hours of training followed by on-the-job training) should be limited to Level I abatements, as described below.

LEVEL I: SMALL ISOLATED AREAS

Total surface area affected less than 10 square feet – (i.e., ceiling tiles, small areas on walls.)

Regular building maintenance staff, general contractors, and professional handymen can conduct this level of remediation. Such persons should receive training or demonstrate sufficient knowledge on proper cleanup methods, personal protection, and potential health hazards. This training can be performed as part of a program to comply with the requirements of the OSHA Hazard Communication Standard (29 CFR 1910.1200). Use of a dust mask (e.g., N95 disposable filtering face piece respirator), used in accordance with the OSHA respiratory protection standard is recommended. Gloves and goggles are part of the minimum Personal Protection Equipment (PPE) requirements for mold abatement. See Appendix for PPE guidance outlined in the *Materials and Equipment List*.

The work area should be unoccupied. Vacating people from spaces adjacent to the work area is not necessary but is recommended in the presence of infants (less than 12 months old), persons recovering from recent surgery, immune suppressed people, or people with chronic inflammatory lung diseases (e.g., asthma, hypersensitivity pneumonitis, and severe allergies).

Containment of the work area is not necessary. Dust suppression methods such as misting (not soaking) surfaces with a fungicide/mildew cleaner or equivalent, prior to remediation, are recommended. Contaminated materials that cannot be cleaned should be sealed and double-bagged in plastic bags and removed.

The work area and areas used by remediation workers for egress should be cleaned with a damp cloth and/or mopped with a detergent solution. All areas should be left dry and visibly free from contamination and debris.

LEVEL II: MEDIUM

Total Surface Area affected between 10 and 100 square feet – (i.e., several wallboard panels.)

At a minimum the following procedures are recommended. Limited or Full protection may be required depending on the situation. The work area and areas directly adjacent should be covered with a single layer of fire-retardant polyethylene sheeting and taped before remediation to contain dust/debris.

Seal ventilation ducts/grills in the work area and areas directly adjacent with polyethylene sheeting. Use an exhaust fan with a High Efficiency Particulate Air (HEPA) filter to generate negative pressurization. The work area and areas directly adjacent should be unoccupied. Further vacating of people from spaces near the work area is recommended in the presence of infants (less than 12 months old), persons having undergone recent surgery, immune suppressed people, or people with chronic inflammatory lung diseases (e.g., asthma, hypersensitivity pneumonitis, and severe allergies).

Dust suppression methods such as misting (not soaking) surfaces prior to Remediation, are recommended. Contaminated materials that cannot be cleaned should be sealed and double-bagged in plastic bags and removed. The work area and surrounding areas should be HEPA vacuumed (a vacuum equipped with a High-Efficiency Particulate Absolute filter) and cleaned with a damp cloth and/or mopped with a detergent solution.

All areas should be left dry and visibly free from contamination and debris. If abatement procedures are expected to generate a lot of dust (e.g., abrasive cleaning of contaminated surfaces, demolition of plaster walls) or the visible concentration of the mold is heavy (blanket coverage as opposed to patchy), then it is recommended that the remediation procedures for Level III be followed.

LEVEL III: LARGE AREA

Total Surface Area affected greater than 100 square feet or potential for increased occupant or remediator exposure during remediation is estimated to be significant.

The following procedures are recommended:

Completely isolate the work area from occupied spaces using double layers of polyethylene plastic sheeting sealed with duct tape including ventilation ducts/grills, fixtures, and any other openings. Utilize an exhaust fan with a HEPA filter to generate negative pressurization. Provide airlocks and a decontamination room.

The work area and areas directly adjacent should be unoccupied. Further vacating of people from spaces near the work area is recommended in the presence of infants (less than 12 months old), persons having undergone recent surgery, immune suppressed people, or people with chronic inflammatory lung diseases (e.g., asthma, hypersensitivity pneumonitis, and severe allergies).

Contaminated materials that cannot be cleaned should be sealed and double bagged in plastic bags and removed. The outside of the bags should be cleaned with a damp cloth and a detergent solution or HEPA vacuumed in the decontamination chamber prior to their transport to uncontaminated areas of the building. The contained area and decontamination room should be HEPA vacuumed and cleaned with a damp cloth and/or mop with a detergent solution and be visibly clean prior to the removal of isolation

barriers. Pre- and post-remediation sampling may also be useful in determining whether remediation efforts have been effective. After remediation, the types and concentrations of mold in the indoor air samples should be like what is found in the local outdoor air. Since no Federal limits have been set for mold or mold spores, sampling cannot be used to check a building's compliance with Federal mold standards. If any remediation sampling is deemed necessary contact your local industrial hygiene office or contact safety and health professionals with specific experience in designing mold sampling protocols, sampling methods, and interpretation of results.

Sample analysis should follow analytical methods recommended by the American Industrial Hygiene Association (AIHA) or the American Conference of Governmental Industrial Hygienists (ACGIH). The laboratory conducting the analyses should participate in the AIHA Environmental Microbiology Proficiency Analytical Testing (EMPAT) program.

LEVEL IV: REMEDIATION OF HVAC SYSTEMS

HVAC systems are occasionally sources of mold amplification. The air conveyance system can have areas with mold growth, such as the area in and around the condensation collection pan or insulation that becomes wet. The air conveyance system can also be a reservoir of mold spores, often on interior insulation panels, baffles, or in dirt inside the ducts.

The cleanup of mold contamination inside air conveyance systems should always be performed with the system turned off. Professional duct cleaning contractors are often utilized since they are trained and equipped to prevent cross-contamination and replace insulation that is water damaged or excessively dirty. For a small area (<10 sq ft) follow Level I guidance for PPE and containment and for a areas (> 10 sq ft) follow Medium (Level II) or when greater than 100 sq ft follow Large (Level III) guidance for PPE and containment.

A Small Isolated Area of Contamination (total surface area affected less than 3 square feet) inside an air conditioner can be considered a Level I remediation. The air conditioner system should be shut down prior to any remedial activities.

Regular building maintenance staff can conduct this level of remediation. Such persons should receive training on proper cleanup methods, personal protection, and potential health hazards. This training can be performed as part of a program to comply with the requirements of the OSHA Hazard Communication Standard (29 CFR 1910.1200). Respiratory protection (e.g., N95 disposable respirator), used in accordance with the OSHA respiratory protection standard (29 CFR 1910.134), is recommended. Gloves and goggles should be worn.

The work area should be unoccupied. Vacating people from spaces adjacent to the work area is not necessary but is recommended in the presence of infants (less than 12 months old), persons recovering from recent surgery, immune suppressed people, or people with chronic inflammatory lung diseases (e.g., asthma, hypersensitivity pneumonitis, and severe allergies). Containment of the work area is not necessary. Dust suppression methods, such as misting (not soaking) surfaces prior to remediation, are recommended. Growth supporting materials that are contaminated, such as the insulation of interior lined ducts and filters, should be removed. Other contaminated materials that cannot be cleaned should be sealed and double-bagged in plastic bags and removed. Since there are no special disposal

requirements for moldy materials, they can be discarded as ordinary construction waste. The work area and areas immediately surrounding the work area should be HEPA vacuumed and cleaned with a damp cloth and/or mop and a detergent solution. All areas should be left dry and visibly free from contamination and debris.

Areas of Contamination (Total surface area affected greater than 3 square feet) inside an air conditioner or Heating Ventilation and Air Conditioning (HVAC) System. The following procedures are recommended: **The HVAC system should be shut down prior to any remedial activities.** Completely isolate the work area from other areas. Isolate the HVAC system using double layers of polyethylene plastic sheeting sealed with duct tape (including ventilation ducts/grills, fixtures, and any other openings).

Utilize an exhaust fan with a HEPA filter to generate negative pressurization. Provide airlocks and a decontamination room. Growth supporting materials that are contaminated, such as the insulation of interior lined ducts and filters, should be removed. Other contaminated materials that cannot be cleaned should be sealed and removed in double bagged plastic. When a decontamination room is present, the outside of the bags should be cleaned with a damp cloth and a detergent solution or HEPA vacuumed prior to their transport to uncontaminated areas of the building. The contained area and decontamination room should be HEPA vacuumed and cleaned with a damp cloth and/or mop and a detergent solution prior to the removal of isolation barriers. All areas should be left dry and visibly free from contamination and debris.

Pre- and post-remediation sampling may also be useful in determining whether remediation efforts have been effective. After remediation, the types and concentrations of mold in the indoor air samples should be similar to what is found in the local outdoor air. Since no Federal limits have been set for mold or mold spores, sampling cannot be used to check a building's compliance with Federal mold standards. If remediation sampling is necessary contact safety and health professionals with specific experience in designing mold sampling protocols, sampling methods, and interpretation of results. Sample analysis should follow analytical methods recommended by the American Industrial Hygiene Association (AIHA) or the American Conference of Governmental Industrial Hygienists (ACGIH).

DISPOSAL OF CONTAMINATED MATERIALS:

Since there are no special disposal requirements for moldy materials, they can be discarded as ordinary construction waste. However, in instances where the affected areas have asbestos-containing materials (ACM) and/or lead-based paint (LBP), the licensed and registered abatement contractor shall make the necessary notifications to the appropriate regulatory agencies and proceed to remove, containerize and dispose of such affected materials in accordance with current regulations.

6.4 Identification of a Problem and the Communication Chain

The tenant, contractor, or maintenance personnel informs the owner or management of a concern, such as a leak, indications of moisture damage, odor, or suspected health affect. The owner or management investigates the concern and assigns maintenance personnel and contractors as needed. The owner or management documents the complaint, the investigation, and the outcome in a report. The owner or

management is responsible for ensuring the file is maintained and may request copies of the investigation forms and follow-up narratives.

The management is typically on-site daily and has a telephone contact that is provided to tenants. The management also completes follow-up investigations to check building materials for moisture content and potential mold amplification a few days after remedial measures are undertaken.

6.5 Tenant Outreach Program

A *Resident Tip Sheet: Mold Facts and Tips* information sheet from the Freddie Mac Moisture Management Plan Handbook is included in the Appendix. It is recommended that this information is distributed to the tenants.

6.6 Hazard Communication

If mold is found in an occupied apartment, then the tenants shall be notified by the owner/ management. If the mold is in a location where it could affect or be related to other apartments than those tenants would be notified and where appropriate, inspections would be extended to other apartments. Tenants would be notified of intended inspection and abatement efforts. If more than 10 square feet of mold were identified in a public area than all the tenants of the building would be notified of the presence of mold and the abatement schedule.

When mold growth requiring Level III or IV (large-scale) remediation is found, the owner/ management will notify occupants in the affected area(s) of its presence. Notification should include a description of the remedial measures to be taken and a timetable for completion. Well-planned group meetings held before and after remediation with full disclosure of plans and results can be an effective communication mechanism.

Maintenance personnel, general contractors, and handymen should be informed of the building owner/ management's intention to provide quick and effective response to indoor mold amplification. Personnel should understand the importance of early detection of moisture problems and the need for quick drying and cleaning after a flood or leak. Individuals who perform mold remediation should demonstrate sufficient knowledge of abatement strategies, cross-contamination and personal protective equipment appropriate for the designated job level.

7.0 TRAINING

The owners/ management will provide training for the contents of this MMAPP and what is expected from personnel to implement the program. The personnel will be trained in the moisture and mold inspection procedure to be used during moisture incidents, complaints, and apartment turnovers. Skills developed from the training for turnover investigations will be useful for assessments of moisture intrusion, odors, or health complaints and the ongoing implementation of the MMAPP.

Training Agenda for Management and participating personnel:

1. What is a Moisture – Mold Action and Prevention Plan (MMAPP)?

- *Components of the program include: training, inspections, Level I Remediation, and documenting moisture-mold problems and remediation.*

3. What is mold?

- *Molds in the environment, Building related molds, Health effects*

4. Why are complaints of building-related mold increasing?

- *Changes in building construction;*
- *Hidden molds: wall cavities, floor cavities, vents, air conditioners;*
- *Increased medical and toxicological interest*

5. Prevention

- *Knowledge: where does building mold occur and why;*
- *Inspections: Routine, rental turnover, leaks, complaints;*
- *Responding to leaks and water incidents quickly;*
- *Flood restoration activities, Moisture, mold and building materials;*
- *Relative humidity, Condensation, Temperature*
- *Roofs, Crawl Spaces;*
- *Plumbing, Building drains;*
- *Grounds, Site drainage;*
- *Air Conditioning, Sumps, Washers & Dryers, Vents (dryer, kitchen/bath);*
- *Off-site sources: animal boarding, vermin, farms, vents, tanneries*

6. Intrusive investigations

- *Personal Protective Equipment (PPE) and environmental containment*
- *Field test for confirmation of mold;*
- *Opening holes and looking inside;*
- *Examining building materials, advanced use of moisture meters;*
- *Is it dry? Should we get rid of it?;*
- *Where did the water come from, where did it go, is the situation corrected?;*
- *Where is the mold and how much is there?*

7. Flood and water restorations

- *The need for prompt response and complete drying within 48-hours;*
- *Drying methods including dehumidifiers and ventilation;*
- *Methods for drying carpeting, walls, insulation, framing, plaster, wood ;*

- *Determining when the services of a flood restoration contractor are required*

8. Mold abatements

- *Classifying abatements: small, limited and full;*
- *Personal Protective Equipment (PPE);*
- *Environmental containment, Air ventilation and filtration;*
- *Disinfecting porous and non-porous surfaces;*
- *Furniture, clothing, books, drapes, rugs, etc.*
- *Wallboard, carpeting, ceiling tiles;*
- *Wall cavities, floor cavities*

9. Conclusion

- *Implementing the MMAPP. Review of inspection frequency and procedure; Response to complaints; Evaluating moisture and mold damage; Determining when outside services (contractors) are required; Maintaining paperwork*

10. Discussion

8.0 DESIGNATED PROGRAM MANAGER

The owners of the subject property shall designate a Program Manager (PM) who will oversee the implementation of the MMAPP at this property. The responsibilities of the PM are as follows, but are not limited to:

- Serves as the primary contact between the onsite manager and the property owner when addressing moisture issues at the property;
- Ensures tenant complaints/concerns involving moisture issues are addressed in a timely manner; within 48 hours of initial complaint;
- Oversees all moisture-related inspections (initial moisture complaints, follow-ups, routine building inspections and unit turnover);
- Ensures all staff conducting moisture-related inspections has received adequate training,
- Ensures all moisture incidents are properly documented, and such reports are properly filed for auditing purposes;
- Assesses/recommends the need to retain the services of a professional environmental consultant;
- Develops and/or evaluates an in-house remediation plan or evaluates a remediation plan submitted by an outside contractor.

9.0 CONCLUSION

The prompt remediation of contaminated material and infrastructure repair must be the primary response to moisture intrusion in buildings. The simplest and most expedient remediation that properly and safely removes mold growth from buildings should be used. Widespread contamination poses much larger problems that must be addressed on a case-by-case basis in consultation with a health and safety specialist. Effective communication with building occupants is an essential component of all remedial efforts. Individuals with persistent health problems should go to the local occupational health clinic or see their physicians for a referral to practitioners who are trained in occupational/environmental medicine or related specialties and are knowledgeable about these types of exposures.

Upon discovery of indoor mold amplification, the following steps summarize the investigative process.

1. Roughly approximate the total surface area of visible mold. Categorization of the remediation levels are sometimes borderline, so when trying to decide the category to apply, consider the extent of visible growth, such as a heavy blanket of growth on the surface, to barely visible. If heavy growth is apparent, move up to the next level of protection.
2. **Do not skip this step.** Address the source of water or moisture problem or the mold will simply reappear.
3. Always protect the health and safety of the building occupants and remediators.
4. Mold may be hiding on the backside of drywall, vinyl wallpaper, or paneling, the top of ceiling tiles, the underside of carpets and pads. Check walls behind furniture, pipe chases and utility tunnels, porous thermal or acoustic liners inside ductwork, or check the rafters (due to roof leaks or insufficient insulation).
5. Use your best judgment during investigations, if not disturbing the mold you may need minimal PPE. Do not alarm building occupants unnecessarily but protect yourself as necessary. This typically entails use of gloves, splash goggles, and dust masks.
6. If the containment is working properly, the polyethylene sheeting will billow inwards on all surfaces. If it flutters or billows outward, containment has not been achieved, and you should find and correct the problem before starting your remediation activities. Confirm negative pressure with smoke tubes.
7. Select remediation personnel who have the experience and training needed to implement the remediation plan.
8. You must completely fix or eliminate the water or moisture problem to solve the problem.
9. You should revisit the site(s) approximately two weeks after remediation, and it should show no signs of water damage or mold growth. The cleanup should be discussed with the tenant and the Building superintendent or building manager should inquire with the tenant if the remediation was satisfactory and if there has been any further indication of mold or moisture intrusion.
10. If you discover hidden mold, revise your plan by reassessing the size of mold impacted area.
11. If you believe that you have a hidden mold problem, you may want to consider hiring an experienced mold investigative professional.
12. Odors and health complaints that have not been resolved may require an investigation by a professional investigator and an evaluation by a physician that specializes in occupational, environmental or allergic medicine.

APPENDIX

DESIGNATED PROGRAM MANAGER

AWH Burbank Hotel, LLC designated a Program Manager (PM) who will oversee the implementation of the MMAPP at this property. The responsibilities of the PM are as follows, but are not limited to:

- Serves as the primary contact between the onsite manager and the property owner when addressing moisture issues at the property,
- Ensures tenant complaints/concerns involving moisture issues are addressed in a timely manner; within 48 hours of initial complaint,
- Oversees all moisture-related inspections (initial moisture complaints, follow-ups, routine building inspections and unit turnover),
- Ensures all staff conducting moisture-related inspections has received adequate training,
- Ensures all moisture incidents are properly documented, and such reports are properly filed for auditing purposes,
- Assesses/recommends the need to retain the services of a professional environmental consultant,
- Develops and/or evaluates an in-house remediation plan or evaluates a remediation plan submitted by an outside contractor,

Designated Program Manager

Core Elements and Relevant Tools Summary

Core Element	Description	Relevant Tool(s)
<i>Annual Plan Requirements</i>		
Tenant Information	Provide information to all tenants at the time of lease signing or renewal, or once a year, whichever is most frequent. The information should provide residents with facts about mold and tips to minimize moisture and mold growth.	Resident Tip Sheet Resident Information Checklist
Tenant Information	Include language regarding tenant acknowledgement of mold hazards and his/her obligations to mitigate such hazards in every tenant lease.	Lease Provision or Lease Addendum Tips
Inspections	Inspections for water intrusion and mold must be routine, comprehensive, verifiable, and include: all inhabited spaces (especially any areas with past mold and/or moisture issues), HVAC systems (and associated spaces), and exterior building skin materials (to include roofing, siding, windows and doors).	Inspection Schedule All Inspection Checklists
<i>Ongoing Plan Requirements</i>		
Documentation	The plan must be written and verifiable at the subject property. Record every inspection, each observed or reported incident relating to water intrusion and/or mold, and all responses. Keep all records on site.	The Written Plan All Tools
Training	Provide information regarding the risks associated with mold and the procedures to properly respond to inspection, repair, remediation, and documentation requirements to maintenance workers and on-site management.	Annual Employee Training Checklist Resources for Training Sources for Industry Information EPA Tables 1 and 2 Resident Tip Sheet
<i>Incident Response/Remediation Requirements</i>		
Incident Response	Respond to all water intrusion events in a timely manner per EPA recommendations. Record all findings and actions	EPA Table 1 Materials and Equipment List Contact List
Tenant Information	Provide tenants written notification of findings and actions taken	Initial Resident Letter Follow-up Letter
Inspection	Re-inspect areas affected by water intrusion to determine if mold develops. Re-inspect areas where mold remediation has been conducted to determine if mold re-emerges. If water intrusion and/or mold is caused by a rain event, reinspect completed work after the next rain.	All Inspection Checklists

Remediation	Correct all mold issues per EPA guidance.	EPA Table 2 Materials and Equipment List Contact List
Documentation	Record all findings and actions.	Incident Tracking Log Event Checklist

Resources for Training

Management is responsible for ensuring that on-site maintenance and management staff have the knowledge and tools necessary to deal with mold and moisture problems. Although some training sources are identified below, these are not represented to be comprehensive or fully adequate; management must determine what level of information is necessary to provide workers with sufficient knowledge. All training must be documented.

Background Reading For the majority of staff training, the most cost-effective training method is having staff read applicable guidance documents, such as the following:

EPA's guidance, *Mold Remediation in Schools and Commercial Buildings*, which can be found at <http://www.epa.gov/iaq/molds/images/moldremediation.pdf> or by calling the Indoor Air Quality Information Clearinghouse at 800.438.4318.

The New York City Department of Health & Mental Hygiene's *Guidelines on Assessment and Remediation of Fungi in Indoor Environments*, which can be found at <http://www.ci.nyc.ny.us/html/doh/html/epi/moldrpt1.html> or by calling 212.788.4290.

See also the "Sources for Industry Information" tool for further reading resources.

Training Videos For a moderate initial cost, staff can also view training videos such as the *Mold Operations and Maintenance Training Program for Multifamily Housing Professionals*, from the National Apartment Association and the National Multi Housing Council. This 35-minute video can be ordered online at <http://www.naahq.org/Education/moldflyer.PDF> or by phone at 703.518.6141.

Intensive Training Courses

If formal training courses are desired, there are many potential options available online. For example, the Indoor Air Quality Association offers a 2-day mold remediation worker course (information available at http://www.iaqa.org/mold_remediation_worker_course.htm), and a Certified Mold Remediator course http://www.iaqa.org/cmr_info.htm though these are more expensive options and probably go beyond the level of training needed for maintenance staff. Training courses vary greatly in cost, location, and length.

Resident Tip Sheet: Mold Facts and Tips *Residents must be informed about the risks associated with mold and actions they can take to mitigate these risks.*

Facts about Mold

What are molds? Molds are simple, microscopic organisms, present virtually everywhere, indoors and outdoors. Molds, along with mushrooms and yeasts, are *fungi* and are needed to break down dead material and recycle nutrients in the environment. For molds to grow and reproduce, they need only a food source – any organic material, such as leaves, wood, paper, or dirt— and moisture. Because molds grow by digesting the organic material, they gradually destroy whatever they grow on. Sometimes, new molds grow on old mold colonies. Mold growth on surfaces can often be seen in the form of discoloration, frequently green, gray, brown, or black but also white and other colors. Molds release countless tiny, lightweight spores, which travel through the air.

Can mold become a problem in my home? Molds will grow and multiply whenever conditions are right— sufficient moisture is available and organic material is present. The presence of organic material cannot be prevented, because such materials are the materials with which your home is made. However, the moisture that mold needs to grow, and the accumulation of that moisture can be controlled. Be on the lookout in your home for common sources of indoor moisture that may lead to mold problems (see the following section for prevention tips).

Should I be concerned about mold in my home? Yes. If indoor mold contamination is extensive, it can release chemicals and cause very high and persistent airborne spore exposures. Persons exposed to high levels of chemicals or spore levels can become sensitized and develop allergies to the mold or other health problems. Mold growth can damage your furnishings, such as carpets, sofas, and cabinets. Clothes and shoes in damp closets can become soiled. In time, unchecked mold growth can cause serious damage to the structural elements in your home. Mold can also produce health effects through inflammation, allergy, or infection. Allergic reactions are common following mold exposure. Typical symptoms that mold-exposed persons report (alone or in combination) include:

- Respiratory problems, such as wheezing, difficulty breathing, and shortness of breath
- Nasal and sinus congestion
- Eye irritation (burning, watery, or reddened eyes)
- Dry, hacking cough
- Nose or throat irritation
- Skin rashes or irritation

Headaches, memory problems, mood swings, nosebleeds, body aches and pains, and fevers are occasionally reported in mold cases, but their cause is not understood.

Tips for Residents

It is our goal to maintain the highest quality living environment for our residents. To help achieve this

goal, it is important to work together to minimize the potential for conditions that could lead to the growth of naturally occurring mold. Residents can help minimize mold growth in their apartment homes by taking the following actions:

Ventilation

- Adequate ventilation is essential – open windows during dry weather. If it is not possible to open windows, run the fan on the apartment air-handling unit to circulate fresh air throughout your apartment.
- In damp or rainy weather conditions, keep windows and doors closed.
- If possible, maintain a temperature of between 50° and 80° Fahrenheit within your apartment at all times, and a comfortably low humidity (less than 60% relative humidity).
- Use the pre-installed bathroom fan or alternative ventilation when bathing or showering and allow the fan to run until all excess moisture has vented from the bathroom.
- Use the exhaust fans in your kitchen when cooking or while the dishwasher is running and allow the fan to run until all excess moisture has vented from the kitchen.
- Ensure that your clothes dryer vent is operating properly, and clean the lint screen after every use.
- When washing clothes in warm or hot water, watch to make sure condensation does not build up within the washer and dryer closet; if condensation does accumulate, dry with a fan or towel.

Cleaning and Maintenance

- Clean and dust your apartment on a regular basis as required by your lease. Regular vacuuming, mopping, and use of environmentally safe household cleaners is important to remove household dirt and debris that contribute to mold growth.
- Periodically clean and dry the walls and floors around the sink, bathtub, shower, toilets, windows and patio doors using a common household disinfecting cleaner.
- On a regular basis, wipe down and dry areas where moisture sometimes accumulates, like countertops, windows and windowsills.
- Use care when watering houseplants. If spills occur, dry excess water immediately.
- Thoroughly dry any spills or pet urine on carpeting.
- Do not overfill closets or storage areas. Ventilation is important in these spaces.
- Do not allow damp or moist stacks of clothes or other cloth materials to lie in piles for an extended period of time.

Reporting Problems

- Immediately report to the management office any evidence of a water leak or excessive moisture in your apartment, storage room, garage, or any common area.
- Immediately report to the management office any failure or malfunction with your heating, ventilation, air-conditioning system, or laundry system. As your lease provides, do not block or cover any of the heating, ventilation or air-conditioning ducts in your apartment.
- Immediately report to the management office any inoperable windows or doors.
- Immediately report to the management office any musty odors that you notice in your apartment.

Lease Provision or Addendum Tips

Tenants must be informed of the risks associated with mold and their obligations to reduce these risks. Following are points to be addressed in the lease itself or in an addendum.

Tenant responsibility/acknowledgement:

- Acknowledgement by the tenant of his/her obligation to take measures to prevent moisture accumulation and mold growth, including appropriate climate control, regular cleaning, removal of visible moisture accumulations, and clearing all vents and ducts from obstructions.
- Acknowledgement by the resident that he/she has received the information regarding mold and actions to mitigate its risk.
- Tenant's agreement to promptly report leaks, moisture or visible evidence of mold growth in his/her unit, malfunction of HVAC or laundry equipment in the unit, plumbing leaks, any water accumulation due to leaks.

Initial Resident Letter

Residents must be kept informed as observations are made and as actions are taken.

Property Name Property Manager or
Contact Person Address Phone Number

Date:

To: Resident(s) Name Building / Unit # _____

From: Property Manager's Name

Re: Moisture and Mold Inspection Results

Dear Resident(s),

It has been (insert appropriate time) days since we inspected (and/or treated) your apartment. We hope that all of your concerns have been addressed (and/or remedied) to your satisfaction.

Please refer to the attached information, which contains information about mold and useful tips for preventing mold growth in your apartment home.

If you notice any evidence of moisture intrusion or mold growth in your apartment, please immediately notify the management office.

Sincerely,

Property Manager

Attachment (Resident Tip Sheet)

Portions used with the permission of the National Multi-Housing Council, Inc.

Follow-Up Resident Letter

Residents must be kept informed as observations are made and as actions are taken.

Property Name Property Manager or
Contact Person Address Phone Number

Date:

To: Resident(s) Name Building / Unit # _____

From: Property Manager's Name

Re: Moisture and Mold Follow-Up

Dear Resident(s),

Following our initial remediation on (insert date) of moisture (and/or mold) in your apartment, we have reinspected to ensure that the problem has been solved. As of (insert date of re-inspection), no evidence of moisture or mold was found in your apartment. We hope that all of your concerns have been addressed to your satisfaction.

Thank you for your cooperation with this issue. If this problem recurs, or if you notice any other evidence of moisture intrusion or mold growth in your apartment, please immediately notify the management office.

Sincerely,

Property Manager

Portions used with the permission of the National Multi-Housing Council, Inc.

Inspection Schedule

Inspections must be regularly scheduled.

Property Name and Building Address: _____

Unit	Proposed Date of Inspection	Approval of Date by Tenant	Actual Date of Inspection	Name of Inspector

EXTERIOR / HVAC Inspection Checklist – Building _____, Observation Date _____

(Portions used with the permission of the National Multi-Housing Council, Inc.)

All of the areas noted on the checklist must be routinely checked by trained staff. Once the building has been inspected, the property manager must keep this documentation on file at the subject property.

Building exterior	Identify Issue	Date Corrected
Check foundation		
Check gutters / down spouts		
Check stairs		
Check landscaping at building perimeter		
Check exterior utility closet		
Check irrigation system		
Check roof		
Check caulk around windows and doors and connecting corner trim		
Check mortar and bricks for damage		
HVAC	Identify Issue	Date Corrected
Check operation		
Check air circulation		
Check thermostat		
Check evaporator coil		
Check condensate pan		
Check condenser coil		
Check condenser fan motor		
Check furnace		
Check baseboard heaters		
Check all vents		
Change filters		
Patio / Balcony	Identify Issue	Date Corrected
Check roof		
Check exterior doors		
Check deck surface		
Check storage closet		
Check exterior paint		

EPA Table 1

All water intrusion and associated damage must be addressed per EPA guidance. The Table below may change from time to time and the current resource should be sought from the EPA.

Water Damage – Cleanup and Mold Prevention	
Guidelines for Response to Clean Water Damage within 24-48 Hours to Prevent Mold Growth ^a	
Water-Damaged Materials ^b	Actions
Books and papers	For non-valuable items, discard books and papers. Photocopy valuable/important items, discard originals. Freeze (in frost-free freezer or meat locker) or freeze -dry
Carpet and backing – dry within 24-48 hours ^c	Remove water with water extraction vacuum. Reduce ambient humidity levels with dehumidifier. Accelerated drying process with fans
Ceiling tiles	Discard and replace.
Cellulose insulation	Discard and replace.
Concrete or cinder block surfaces	Remove water with water extraction vacuum. Accelerate drying process with dehumidifiers, fans, and/or heaters.
Fiberglass insulation	Discard and replace.
Hard surface, porous flooring ^c (Linoleum, ceramic tile, vinyl)	Vacuum or damp wipe with water and mild detergent and allow to dry; scrub if necessary. Check to make sure underflooring is dry; dry underflooring if necessary.
Non-porous, hard surfaces (Plastics, metals)	Vacuum or damp wipe with water and mild detergent and allow to dry; scrub if necessary.
Upholstered furniture	Remove water with water extraction vacuum. Accelerate drying process with dehumidifiers, fans, and/or heaters. May be difficult to completely dry within 48 hours. If the piece is valuable, you may wish to consult a restoration/water damage professional who specializes in furniture.
Wallboard (Drywall and gypsum board)	May be dried in place if there is no obvious swelling and the seams are intact. If not, remove, discard, and replace. Ventilate the wall cavity, if possible.
Window Drapes	Follow laundering or cleaning instructions recommended by the manufacturer.
Wood surfaces	Remove moisture immediately and use dehumidifiers, gentle heat, and fans for drying. (Use caution when applying heat to hardwood floors.) Treated or finished wood surfaces may be cleaned with mild detergent and clean water and allowed to dry. Wet paneling should be pried away from wall for drying.

- A. If mold growth has occurred or materials have been wet for more than 48 hours, consult Table 2 guidelines. Even if materials are dried within 48 hours, mold growth may have occurred. Items may be tested by professionals if there is doubt. Note that mold growth will not always occur after 48 hours; this is only a guideline. These guidelines are for damage caused by clean water. If you know or suspect that the water source is contaminated with sewage, or chemical or biological pollutants, then Personal Protective Equipment and containment are required by OSHA. An experienced professional should be consulted if you and/or your remediators do not have expertise remediating in contaminated water situations. Do not use fans before determining that the water is clean or sanitary.
- B. If a particular item has high monetary or sentimental value, you may wish to consult a restoration/water damage specialist.
- C. The subfloor under the carpet or other flooring material must also be cleaned and dried. See the

appropriate section of this table for recommended actions depending on the composition of the subfloor.

U.S. EPA, Mold Remediation in Schools and Commercial Buildings, March 2001 (updated June 2001).

EPA Table 2

All mold remediation must be conducted per EPA guidance. The Table below may change from time to time and the current resource should be sought from the EPA.

Guidelines for Remediating Building Materials with Mold Growth Caused by Clean Water ^A			
Material or Furnishing Affected	Cleanup Methods ^B	Personal Protective Equipment	Containment
SMALL – Total Surface Area Affected Less than 10 square feet			
Books and papers	3	Minimum N-95 respirator, gloves, and goggles	None Required
Carpet and backing	1, 3		
Concrete or cinder block	1, 3		
Hard surface, porous flooring (linoleum, ceramic tile, vinyl)	1, 2, 3		
Non-porous, hard surfaces (plastics, metals)	1, 2, 3		
Upholstered furniture and drapes	1, 3		
Wallboard (drywall and gypsum board)	3		
Wood surfaces	1, 2, 3		
MEDIUM – Total Surface Area Affected Between 10 and 100 square feet			
Books and papers	3	Limited or Full Use professional judgment, consider potential for remediator exposure and size of contaminated area	Limited Use professional judgment, consider potential for remediator/ occupant exposure and size of contaminated area
Carpet and backing	1, 3, 4		
Concrete or cinder block	1, 3		
Hard surface, porous flooring (linoleum, ceramic tile, vinyl)	1, 2, 3		
Non-porous, hard surfaces (plastics, metals)	1, 2, 3		
Upholstered furniture and drapes	1, 3, 4		
Wallboard (drywall and gypsum board)	3, 4		
Wood surfaces	1, 2, 3		
LARGE – Total Surface Area Affected Greater than 100 square feet or Potential for Increased Occupant or Remediator Exposure During Remediation Estimated to be Significant			
Books and papers	3	Full Use professional judgment, consider potential for remediator exposure and size of contaminated area	Full Use professional judgment, consider potential for remediator/ occupant exposure and size of contaminated area
Carpet and backing	1, 3, 4		
Concrete or cinder block	1, 3		
Hard surface, porous flooring (linoleum, ceramic tile, vinyl)	1, 2, 3, 4		
Non-porous, hard surfaces (plastics, metals)	1, 2, 3		
Upholstered furniture and drapes	1, 3, 4		
Wallboard (drywall and gypsum board)	3, 4		
Wood surfaces	1, 2, 3, 4		

A. Use professional judgment to determine prudent levels of Personal Protective Equipment and containment for each situation, particularly as the remediation site size increases and potential for exposure and health effects rises. Assess the need for increased Personal Protective Equipment, if, during the

remediation, more extensive contamination is encountered than was expected. Consult Table 1 if materials have been wet for less than 48 hours, and mold growth is not apparent.

These guidelines are for damage caused by clean water. If you know or suspect that the water source is contaminated with sewage, or chemical or biological pollutants, then Personal Protective Equipment and containment are required by OSHA. An experienced professional should be consulted if you and/or your remediators do not have expertise remediating in contaminated water situations. Do not use fans before determining that the water is clean or sanitary.

B. Select method most appropriate to situation. Since molds gradually destroy the things they grow on, if mold growth is not addressed **promptly**, some items may be damaged such that cleaning will not restore their original **appearance**. If mold growth is heavy and items are valuable or important, you may wish to consult a restoration/water damage/remediation expert.

Please note that these are guidelines; other cleaning methods may be preferred by some professionals.

Cleanup Methods Method 1: Wet Vacuum (in the case of porous materials, some mold spores/fragments will remain in the material but will not grow if the material is completely dried). Steam cleaning may be an alternative for carpets and some upholstered furniture.

Method 2: Damp-wipe surfaces with plain water or with water and detergent solution (except wood—use wood floor cleaner); scrub as needed.

Method 3: High-efficiency particulate air (HEPA) vacuum after the material has been thoroughly dried. Dispose of the contents of the HEPA vacuum in a well-sealed plastic bag.

Method 4: Discard—remove water-damaged materials and seal in plastic bags while inside of containment, if present. Dispose of as normal waste. HEPA vacuum area after it is dried.

Personal Protective Equipment (PPE)

Minimum: Gloves, N-95 respirator, goggles/eye protection Limited: Gloves, N-95 respirator or half-face respirator with HEPA filter, disposable overalls, goggles/eye protection Full: Gloves, disposable full body clothing, head gear, foot coverings, full-face respirator with HEPA filter

Containment

Limited: Use polyethylene sheeting ceiling to floor around affected area with a slit entry and covering flap; maintain area under negative pressure with HEPA filtered fan unit. Block supply and return air vents within containment area.

Full: Use two layers of fire-retardant polyethylene sheeting with one airlock chamber. Maintain area under negative pressure with HEPA filtered fan exhausted outside of building. Block supply and return air vents within containment area.

U.S. EPA, Mold Remediation in Schools and Commercial Buildings, March 2001 (updated June 2001).

Incident Tracking Log

All issues, repairs, and remediation actions must be tracked and recorded.

Building / Unit #	Chronology	Date / Time	Reported by / Action Taken by	Description of Issues and Actions
	Initial Situation Identified			
	Actions Taken			
	Initial Tenant Correspondence			
	Follow-Up Inspection			
	Follow-Up Tenant Correspondence			
	Initial Situation			
	Actions Taken			
	Initial Tenant Correspondence			
	Follow-Up Inspection			
	Follow-Up Tenant Correspondence			

Event Checklist

All observations and actions taken must be recorded and kept on site. Attach additional information to this document as appropriate. This document may need to be revisited over the span of several weeks to ensure that all requirements have been fulfilled.

Building Name: _____

Unit Number: _____

Date Notified: _____

Description of event :

Steps taken to alleviate problem:

Indicate with N/A or checkmark

- Responded to problem within 24 hours. (Date: _____)
- Documented event with Event Checklist and Incident Tracking Log. Document steps taken to alleviate the problem. Initial Resident Letter sent. (Date: _____)
- Follow-up inspection seven days after the event. Follow-up Resident Letter sent. (Date: _____)
- Re-inspect after next significant rainfall to ensure problem has been solved (if applicable). (Date: _____)
- Schedule an annual inspection for this unit. (Date: _____)

Materials and Equipment List

Maintenance staff and management must be prepared to deal with water intrusion and mold events as they occur. The following equipment is available at most supply stores. The MMP must document what materials are kept readily available and how this inventory is maintained.

- 1 Wet vacuum
- 2 High efficiency particulate air (HEPA) filtered vacuum cleaner
- 3 Blowers or fans (have on site or know where to rent)
- 4 Dehumidifiers (have on site or know where to rent)
- 5 Disinfectant or bleach and standard cleaning detergents
- 6 Disposable scrub brush, sponges, and cloths
- 7 Plastic spray cleaning bottles
- 8 Localized containment bag (2-glove bags)
- 9 Disposable clothing (1 box)
- 10 N-95 disposable respirators (5 pack)
- 11 6-mil disposable bags (1 box)
- 12 6-mil polyethylene sheeting (2 rolls)
- 13 Yellow caution tape (3 rolls)
- 14 Moisture meter (optional) See the Contact List for information on where to buy or rent materials.

Contact List

Maintenance staff and management must be prepared to deal with water intrusion and mold events as they occur. The MMP must include up-to-date information on resources that are not readily available on site.

Contact at Servicer

For questions about implementing the Moisture Management Plan, and for notification of mold contamination that cannot be addressed by in-house maintenance staff.

Operational Permit

Permit No. **130252**

Permit Fee: **\$230.00**

Permit Date: **05/07/2014**

Expiration Date: **05/07/2015**

Type: A-1 - Aboveground Storage Tanks (Annual) [CFC 105.6.16]

This permit is issued to the above referenced site to authorize the operation of storing, handling, or using flammable or combustible liquids in an aboveground storage tank. The owner/operator is responsible for proper maintenance and proper operating condition at all times in accordance with the California Fire Code.

- To store, handle, or use Class II or Class III combustible liquids in excess of 60 gallons except for fuel oil used in connection with oil-burning equipment.

Tank ID Number	AST02-130252
Location	At corner of Avon Street
Tank Capacity in Gallons	100
Tank Use	Emergency Generator
Tank Contents	Diesel Fuel

**THIS PERMIT IS NOT A BILL OR INVOICE
IT MUST BE KEPT ON THE PREMISES AT ALL TIMES AND
SHALL BE SUBJECT TO INSPECTION BY AN OFFICER OF THE FIRE DEPARTMENT**

Permit No. 130252

Permit Fee: \$230.00

Permit Date: 05/07/2014

Expiration Date: 05/07/2015

Type: A-1 - Aboveground Storage Tanks (Annual) [CFC 105.6.16]

While all fire code requirements for this permit are not noted, the owner and the owner's operators are responsible for ensuring compliance with all laws related to health and safety, including but not limited to the Burbank Municipal Code, California Fire Code, and the Health and Safety Code. Failure to do so may result in a revocation of this permit. Compliance with the requirements of the Burbank Fire Department does not preclude the necessity of complying with any other applicable laws, authorities, and/or licensing agencies.

If you have any questions, please call the Fire Prevention Bureau at (818) 238-3473.

III. EMERGENCY RESPONSE PLANS AND PROCEDURES

A. Notifications

Your business is required by State Law to provide an immediate verbal report of any release or threatened release of a hazardous material to local fire emergency response personnel, this Unified Program Agency (CUPA or PA), and the Office of Emergency Services. If you have a release or threatened release of hazardous materials, immediately call:

FIRE / PARAMEDICS / POLICE / SHERIFF PHONE: 911

AFTER the local emergency response personnel are notified, you shall then notify this Unified Program Agency and the Office of Emergency Services.

Local Unified Program Agency: (818) 238-3475
 State Office of Emergency Service: (800) 852-7550 or (916) 262-1621
 National Response Center: (800) 424-8802

Information to be provided during Notification:

- ❖ Your name and the telephone number from where you are calling.
- ❖ Exact address of the release or threatened release.
- ❖ Date, time, cause, and type of incident (e.g. fire, air release, spill etc.)
- ❖ Material and quantity of the release, to the extent known.
- ❖ Current condition of the facility.
- ❖ Extent of injuries, if any.
- ❖ Possible hazards to public health and/ or the environment outside of the facility.

B. Emergency Medical Facility

List the local emergency medical facility that will be used by your business in the event of an accident or injury caused by a release or threatened release of hazardous material

HOSPITAL/CLINIC: St. Joseph's Occupational Center	PHONE: 818-843-5111
ADDRESS: 3413 Pacific Ave.	
CITY: Burbank	ZIP CODE: 91505

OFFICIAL USE ONLY	DATE RECEIVED	REVIEWED BY		
-------------------	---------------	-------------	--	--

**UNIFIED PROGRAM (UP) FORM
CONSOLIDATED CONTINGENCY PLAN**

SECTION I: BUSINESS PLAN AND CONTINGENCY PLAN

C. Private Emergency Response

DOES YOUR BUSINESS HAVE A PRIVATE ON-SITE EMERGENCY RESPONSE TEAM? Yes No
If yes, provide an attachment that describes what policies and procedures your business will follow to notify your on-site emergency response team in the event of a release or threatened release of hazardous materials.

CLEANUP/DISPOSAL CONTRACTOR

List the contractor that will provide cleanup services in the event of a release.

NAME OF CONTRACTOR CHEMTEC	PHONE NO 800-424-9300
ADDRESS	
CITY	ZIP CODE

D. Arrangements With Emergency Responders

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements on the lines below:

N/A

E. Evacuation Plan

1. The following alarm signal(s) will be used to begin evacuation of the facility (*check all which apply*):

- Verbal Telephone (*including cellular*) Alarm System Public Address System Intercom
 Pagers Portable Radio Other (*specify*):

2. Evacuation map is prominently displayed throughout the facility.

3. Individual(s) responsible for coordinating evacuation including spreading the alarm and confirming the business has been evacuated:

Chuck Williams, Director of Security

Bill Gregory, Director of Property Operations

Manager on Duty along with Emergency Response Team

F. Earthquake Vulnerability

Identify areas of the facility where releases could occur or would require immediate inspection or isolation because of the vulnerability to earthquake related ground motion.

- Hazardous Waste/ Hazardous Materials Storage Areas Production Floor Process Lines
 Bench / Lab Waste Treatment Other

Identify mechanical systems where releases could occur or would require immediate inspection or isolation because of the vulnerability to earthquake related ground motion.

- Utilities Sprinkler Systems Cabinets Shelves
 Racks Pressure Vessels Gas Cylinders Tanks
 Process Piping Shutoff Valves Other:

UNIFIED PROGRAM (UP) FORM
CONSOLIDATED CONTINGENCY PLAN

SECTION I: BUSINESS PLAN AND CONTINGENCY PLAN

G. Emergency Procedures

Briefly describe your business standard operating procedures in the event of a release or threatened release of hazardous materials:

1. **PREVENTION** (prevent the hazard) - Describe the kinds of hazards associated with the hazardous materials present at your facility. What actions would your business take to prevent these hazards from occurring? You may include a discussion of safety and storage procedures.

See Attachments

2. **MITIGATION** (reduce the hazard) - Describe what is done to lessen the harm or the damage to person(s), property, or the environment, and prevent what has occurred from getting worse or spreading. What is your immediate response to a leak, spill, fire, explosion, or airborne release at your business?

See Attachments

3. **ABATEMENT** (remove the hazard) - Describe what you would do to stop and remove the hazard. How do you handle the complete process of stopping a release, cleaning up, and disposing of released materials at your facility?

See Attachments

UNIFIED PROGRAM (UP) FORM
CONSOLIDATED CONTINGENCY PLAN

Additional
Equipment
(Use Additional
Pages if
Needed.)

- * Use the Location Codes (LC) from the Site Map(s) prepared for your Contingency Plan.
- ** Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.

Unified Program Consolidated Form
CONSOLIDATED CONTINGENCY PLAN
SECTION 1: BUSINESS PLAN AND CONTINGENCY PLAN
ATTACHMENTS

C. Private On-Site Emergency Response Team

- a) The Emergency Response Team (ERT) consists of pre-appointed staff members from all 3 shifts to give us coverage 24 hours a day, seven days a week.

They consist of the following:

- MOD (manager on duty)
 - Security Officer
 - Engineer
 - Front Desk Representative
 - Housekeeper
- b) Notification to in-house ERT is via pagers, telephones and/or two-way radios from the hotel PBX station, which is staffed 24 hours a day.
- c) Additional outside ERT's are contacted through the hotel PBX station to 911; directed to the City of Burbank Hazardous Material Squad as part of the City of Burbank Fire Department compliment.

G. Emergency Procedures

1) Prevention

- a) While most of the hazardous materials at our site are Irritants or Corrosives, there are a few that cause concern regarding chronic health and/or flammability issues. The majority of the hazardous materials are in use in the following departments: Engineering, Laundry/Housekeeping, and both Kitchens.
- b) Safe handling procedures are in adherence to OSHA Hazard Communication Standards and MSDS guidelines issued by the product manufacturer. These procedures are upheld through training sessions with employees. Employees who use hazardous material shall not use the material until they have successfully completed the training, checked the container label, checked the MSDS, and are using the PPE specified on the label. Employees shall use and store chemicals as directed and will not mix chemicals without supervisory permission.

- c) Monthly Safety Committee meetings scheduled with key Administrative personnel and department managers which review the following:
 - safety hazard and the prevention thereof
 - “Safety Topic of the Month” Training (Hilton Corp. Program) which is then communicated to each manager and employee.
 - worker’s compensation claims and investigation into root cause of accident
 - Safety Suggestions submitted from employees to Administrator
 - review all employee injuries
 - receive additional guidance & training from our insurance representative
- d) Each department has Material Safety Data Sheets (MSDS) data for their own department’s chemicals and copies are available to all employees from the main binders (for entire facility) at the Employee entrance area for access.
- e) All hazardous material containment vessel kits, safety vests, protective gloves, protective suits, respirators and goggles are stored in the HazMat closet (storage near Parlor 129, #4 on site map, North end of East Tower) or in the Engineering Shop (#1 on site map, South end of East Tower) and issued by the Security Department and/or the Engineering Department.

2) Mitigation

- a) Notification to in-house ERT is via pagers, telephones and/or two-way radios from the hotel PBX station, which is staffed 24 hours a day.
- b) Additional outside ERT’s are contacted through the hotel PBX station to 911; directed to the City of Burbank Hazardous Material Squad as part of the City of Burbank Fire Department compliment.
- c) MOD (Manager-On-Duty) will coordinate with all local, county and state Emergency Response Organizations. Contact Insurance Carrier.
- d) After taking appropriate first aid action, employees shall report personal exposure with hazardous material to the Security Department, who will then contact the Hazardous Material Coordinator, Bill Gregory – Director of Property Operations. As part of HazMat internal emergency procedures Security or HMC is responsible for checking MSDS manual for further appropriate action.
- e) Threatened release: Activate Hazardous Material internal procedures (2a-2d). Place threatened vessel in new containment drum. Contact Hazardous Waste Contractor if needed.

Response to release: Activate Hazardous Material internal procedures. Contact Fire Department. Obtain containment vessel kit from Security or

Engineering, contain spill, clean up spill with protective clothing and place into approved containment drum. Contact Hazardous Waste Contractor if needed.

3) **Abatement**

- a) Procedure is the same as described above, only with Hazardous Waste Contractor playing a larger role. Hilton Hotels Corporation may also be more involved regarding legal and/or media issues.

If evacuation is required the following steps will be taken.

- In the event of an internal or external disaster, employees are notified through the long range pager system, two-way radios and the public address paging system.
- After the employees receive notice, they are instructed to meet at the pre-determined location, the Catering Office, for further instructions.
- The ERT members assign floor monitors to start the evacuation procedures on each guest floor. Two floor monitors per guest floor will knock on doors and monitors stationed in stairwells will assist guests to safe area-Southeast corner of parking lot.
- The ERT members will assign additional staff to evacuate all meeting and function rooms, pool areas, employee back of house areas and the restaurant.

RECORDKEEPING

Storage and documentation of training materials and records is as follows:

- In Human Resources Office:
 - Current employees' training records, retained indefinitely
 - Former employees' training records, retained for three years after termination
 - Copy of training programs, introductory and continuing
- In Engineering Shop:
 - Current copy of Consolidated Contingency Plan
 - Reported hazardous material releases
 - Hazardous materials storage area inspection reports
 - Emergency response drill documentation
 - Copy of training programs, introductory and continuing

WRITTEN HAZARD COMMUNICATION PROGRAM

PURPOSE

This written program describes how the Hilton Burbank Airport complies with the OSHA Hazard Communication (HAZCOM) standard. The Occupational Safety and Health Administration (OSHA) requires that the Hilton Burbank Airport implement the standards that are listed in 29 CFR 1910.1200 in the OSHA federal code of regulations. This standard provides all employees with information on any hazardous chemicals that are used in this hotel.

ASSIGNMENTS OF RESPONSIBILITY

The Director of Property Operations, Bill Gregory, is responsible for the requirements of this standard throughout the hotel. Any changes to this written program are only done with the approval of the Director of Property Operations, the Director of Loss Prevention/Security and the General Manager.

Each Department Manager is responsible as a coordinator, for the implementation of all applicable sections of the standard in his/her department.

Each employee at this hotel is responsible for complying with all hotel procedures that this written program requires in order to comply with the Hazard Communication standard.

INVENTORY OF CHEMICALS

Each department that uses chemicals in this hotel maintains an active and current inventory of all chemicals known to exist in each area. Department Managers maintain this inventory with the assistance of their supervisors and staff. Inventories of all chemicals used in each department are reviewed and updated at least annually by Department Managers and whenever a new chemical is purchased or a chemical is discontinued.

The chemical inventories are included in the master HAZCOM binder, and in each binder completed for each department. Each inventory lists the product or chemical name, the use and the personal protective equipment (PPE) required for each chemical. These inventories advise employees of the chemicals that are being used in this hotel or in their work areas. The corresponding Material Safety Data Sheets will give the complete information on each chemical.

MATERIAL SAFETY DATA SHEETS

Material Safety Data Sheets (MSDS) are detailed instructional sheets that explain all the information needed about a chemical. This hotel maintains a MSDS on all chemicals that are used in this hotel. These MSDS are available to all employees to review as needed. Employees should check with their supervisors for help with the MSDS. Employees obtain copies of MSDS by notifying their supervisor.

MSDS are present in each department using chemicals. These are kept with the written program and chemical inventories. A master file of MSDS is maintained with the written program and chemical inventory by the Director of Property Operations and is located in the hallway at the employee entrance.

Each Department Manager evaluates the MSDS for serious hazards and appropriate use within the department to include a review to check for new information, completed sections and any personal protective equipment that is required. Each Department Manager is responsible for informing employees of any changes on the chemical inventory or the MSDS. Whenever possible, the hotel replaces seriously hazardous products with available chemicals that are less hazardous.

Department Managers maintain and keep MSDS current and available for employees to review. Department Managers add MSDS when new chemicals are purchased, replace MSDS with the most current updated sheets provided by vendors and remove and **file** MSDS on chemicals that are no longer used in this hotel. Department Managers maintain the MSDS by the product name that is on the labels and chemical inventory lists for easy reference.

All vendors must supply MSDS to this hotel. While it is the responsibility of the vendor to provide accurate MSDS to the hotel, it is the Department Managers' responsibility to verify that they have a current MSDS for all chemicals being used in their areas.

All MSDS are in English and include the information listed below:

- General Information
- Date of Issue
- Product Identification
- Physical Data
- Storage and Handling Information
- Spill and Leak Procedures
- Health Hazard Data
- Reactivity Data
- Hazardous Ingredients
- First Aid
- Personal Protective Equipment
- Fire and Explosion Hazards
- Regulatory Information
- References

HAZARD EVALUATIONS

A hazard evaluation of each chemical is done by the chemical manufacturer and the information is included on the MSDS. Department Managers and employees are the users and rely on the hazard information on the MSDS.

Hazard ratings can be determined by reading the three ratings that the chemical manufacturers have issued for each chemical. These include FIRE, HEALTH and REACTIVE ratings. These topics are color coded on labels for easy recognition. FIRE is coded red, HEALTH is coded blue and REACTIVE is coded yellow. These topics are given a rating from zero (0) to four (4). Four (4) is the most hazardous. The hazard ratings are categorized as follows:

4 - EXTREME

3 - SERIOUS

2 - SIGNIFICANT

1 - SLIGHT

0 - MINIMUM

The MSDS may also have additional, special types of hazards that are also listed under other sections of the MSDS. Listed here (on the following pages) are the definitions for hazard ratings set by the National Fire Protection Association (NFPA):

HAZARD RATING DEFINITIONS

FIRE

4 Very flammable. Flash point (lowest temperature at which ignition occurs) is below 73° F.

3 Capable of igniting under almost all normal conditions. Flash points between 73° F and 100° F.

2 Requires some pre-heating to ignite. Flash points above 100° F but below 200° F.

1 Require considerable pre-heating to ignite. Flash points of 200° F or higher.

0 Will not burn.

HEALTH

4 A single or repeated exposure can cause major or permanent injury.

3 Quick first aid action and medical treatment required to prevent major injury.

2 Can cause temporary or minor injury

1 Can cause irritation or minor reversible injury.

0 Little or no risk to health

REACTIVE

4 Very unstable. Can detonate at normal temperature and pressure

3 Unstable. Requires strong initiator or confined heating to detonate. Reacts explosively with water.

2 Normally unstable but will not detonate. Can have a violent chemical change or reaction with water

1 Normally stable but can become unstable if heated under pressure. Reacts with water, but not violently.

0 Normally stable. Will not react with water.

CONTAINER LABELING

Each Department Manager in this hotel is responsible for the accurate and consistent labeling of all containers that carry chemicals. Department Managers accept containers from vendors only with the required labels. If a shipment arrives at this hotel without the proper label or without the MSDS on file, the Department Manager is to either refuse the shipment or to impound the shipment until the vendor properly labels the containers. At no time is any container to be used in this hotel without the approved labels attached. Employees at this hotel are not to remove, damage or cover existing labels that have been applied by the vendor.

All employees are required to use chemicals in containers that are properly labeled. If employees see a container that does not appear to be properly labeled, they are to notify their supervisor immediately before using the container.

Any chemical that this hotel dispenses into a secondary container must have the following information on the new container:

- Name of the Chemical
- The FIRE, HEALTH, and REACTIVE ratings
- Special Hazard Information (if any)
- Name, address and phone # of chemical Mfg.

Chemicals that are used directly from the container in which the chemical was shipped do not need the above additional information. The vendor is responsible for printing this information on the label. The Department Manager is responsible, however, to ensure that the original containers are properly labeled with the labels that the manufacturer applied.

All labels must be legible, written in English, and prominently displayed on all containers.

EMPLOYEE TRAINING

The Director of Property Operations, along with the Director of Loss Prevention/Security is responsible to see that all aspects of the hotel's employee HAZCOM training program is being conducted. Each Department has the responsibility to conduct HAZCOM training for all employees in their department. Managers may designate assistants to participate in departmental training. Only departments that use chemicals conduct departmental HAZCOM training; however, all employees receive information on the Hazard Communication program from their Department Managers.

All employees that are exposed to chemicals in their work areas receive HAZCOM training before they begin work or when any new hazard is introduced in their department. HAZCOM review courses are conducted at least annually for all employees that use or are exposed to chemicals.

HAZCOM training for employees include the following:

- Overview of the OSHA Hazard Communication Standard (29 CFR 1910.1200)
- Review of this hotel's written program
- MSDS and their purpose
- How to read MSDS
- Container labeling
- How to read labels
- Methods and observations of chemical releases
- How to obtain and use hazard information
- Departmental Chemical Inventory
- Explanation of non-routine tasks
- Physical & Health hazards of chemicals
- Protective Measures

Department Managers conduct this training using one or more of the following training techniques:

- Class Instruction
- Review of Written Materials
- Audio Visuals
- Employee Participation
- Handouts

- Guest Speakers
- Oral and/or written testing
- Case Studies

All employees sign an "Acknowledgment of Training" form that verifies all of the above training was conducted. Furthermore, that they understand and retain the information reviewed in order to implement the requirements of this standard at all times. These signed forms are kept on file by the Human Resources staff. "Completion of Hazard Communication Training" certificates are issued to each employee that completes the initial training session. Annual refresher training will be documented by a sign in sheet only.

NON - ROUTINE TASKS

Non-Routine tasks are jobs that could be conducted in the hotel only on a very infrequent basis. This hotel usually hires an outside contractor for these types of jobs.

The Hilton Burbank Airport has currently determined that there are not any non-routine tasks or pipe systems with any type of hazardous chemical. All tasks that are conducted at this hotel have been determined to be routine and consistently done in regular operations of this facility.

Department Managers have the responsibility to monitor operations at all times to determine if any new task could be determined to be non-routine and hazardous in order to advise and train all employees at risk before conducting the non-routine task. All routine tasks conducted by employees at this hotel are covered in the HAZCOM training program for each department.

LOCATION OF WRITTEN PROGRAM

Any employee may review this written program, the chemical inventory or the MSDS by notifying their supervisor who will assist the employee if needed.

This written program, along with the chemical inventory, a MSDS for each chemical and the OSHA Hazardous Communication standard, is kept in each department that uses chemicals. The master copy of all the above is maintained by the Director of Property Operations and is located in the hallway at the employee entrance.

All copies of the written program, the MSDS and the chemical inventories are accessible and available 24 hours a day for all employees to review.

CONTRACTOR SERVICE REQUIREMENTS

Contractors who are hired to perform services that require chemicals to be brought on hotel premises must also comply with these standards. Department Managers are responsible for requesting that any contractor they hire provides a chemical inventory list, the appropriate MSDS and precautions of any chemical before the job begins. Department Managers review the MSDS provided by the contractors for special hazards or precautions that will provide protection for all employees at this hotel. Department Managers advise and train employees of new chemicals that are brought and used in the hotel by outside contractors.

Both contractors and their employees have access to this written program, chemical inventories and MSDS's. The hotel's existing HAZCOM program serves to provide information on chemicals that contractors and their employees could be exposed to in this hotel. The Department Manager hiring the contractor advises the contractor of the hotel's written HAZCOM program. The location of the HAZCOM manuals and the MSDS and the availability of each will also be communicated to the contractor. It is the responsibility of the contractor to advise their employees of this information.

The Department Manager maintains the option of stopping all work by the contractor if it is determined that the contractor is not complying with all requirements of this HAZCOM standard.

PERSONAL PROTECTIVE EQUIPMENT

Personal protective equipment must be worn by all employees that work with hazardous chemicals and used as indicated on the MSDS. While few chemicals at this location are hazardous, PPE such as goggles, gloves, aprons and dust masks are made available to employees whenever required by the Department Managers. Employees may request appropriate personal protective equipment for any job that they feel may expose them to hazardous chemicals.

Subject: **00247 – BURBANK AIRPORT MARRIOTT HOTEL
2500 N HOLLYWOOD WAY**

As a hazardous materials handler your business is required to submit a completed hazardous materials inventory disclosure statement annually in accordance with the Section 25509 of the California Health & Safety Code. Hazardous Materials equal to or greater than the amounts of ***a total weight of 500 pounds, or a total volume of 55 gallons or 200 cubic feet*** qualify your business as a Hazardous Materials Handler.

Please review the following attached forms:

- Business Plan Annual Renewal Certification
- Business Owner / Operator Identification
- Business Activities

If there are changes or if there are no changes to your “Hazardous Materials Inventory” or “Consolidated Contingency Plan” or “Site Map” please review and follow the directions on the back of this letter.

BE SURE TO RETAIN A COPY OF ALL FORMS FOR YOUR RECORDS.

*Please note you have 30 days from the date of this notice to complete and return the required information.

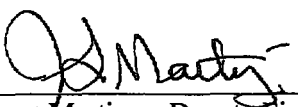

THIS LETTER IS YOUR ONLY NOTICE. No further notices will be issued.

Failure to submit the required inventory disclosure statement is a misdemeanor criminal violation of both the California Health & Safety Code and the Burbank Municipal Code. Each violation is punishable by a maximum of six months in jail and/or a **\$1,000 fine**, not including penalty assessments.

Additionally, if the city also elects to pursue civil enforcement of this matter, any business that violates these provisions can be assessed a civil penalty of up to two thousand (\$2,000) dollars for each day of the violation. If the business is determined to have knowingly failed to comply after reasonable notice of the violation, they are civilly liable for up to five thousand (\$5,000) dollars for each day in which the violation occurs.

Forms can now be downloaded from our website at www.Burbankfire.US. These forms may be completed on your computer by using Adobe Reader. If you are unable to download the required forms from our website, or have questions, or need assistance, please contact the Fire Prevention Bureau at (818) 238-3473.

Thank you for your cooperation.

Jorge Martinez, Deputy Fire Marshal

See schedule below for your submittal requirements.

If you have ...	Then complete, sign, and submit the following forms:
<p>A. No Changes to your Hazardous Materials Inventory or Consolidated Contingency Plan,</p>	<ol style="list-style-type: none"> 1. Business Plan Annual Renewal Certification Form – Signed; 2. HazMat Owner and Operator Identification page – signed; and 3. HazMat Business Activities page
<p>B. Changes to your <i>Hazardous Materials Inventory</i>,</p>	<ol style="list-style-type: none"> 1. In addition to submitting all items under A., 2. Chemical Description Form to add, revise, or delete reportable hazardous materials. Make as many copies as you need to disclose each reportable hazardous material that you will handle in 2011;
<p>C. Changes to your <i>Consolidated Contingency Plan</i>,</p>	<ol style="list-style-type: none"> 1. In addition to <u>all</u> items under A., 2. A revised <u>signed</u> Consolidated Contingency Plan form.

BUSINESS PLAN ANNUAL RENEWAL CERTIFICATION 2012

msg 9/15/11, Charles Chaffee, 818 843 6000
Hazardous Materials Inventory *9/15/11, KK*

I have reviewed my inventory and certify the following:

- Add:** Complete one **Hazardous Materials Inventory—Chemical Description Form** checking the “Add” box to add each hazardous material that you have not previously disclosed. Submit one form per chemical.
- Delete:** Write “delete” across the **Hazardous Materials Inventory—Chemical Description Form** checking the “Delete” box to delete any previously disclosed hazardous material that is no longer used. Submit one form per chemical.
- Revise:** Write the correct amounts, locations, or container type that have changed checking the “Revise” box to reflect the accuracy of any previously reported hazardous material. Submit one form per chemical.
- No Change:** The previously submitted inventory is accurate.

Consolidated Contingency Plan (CCP)

I have reviewed the CCP and certify that the CCP on file with your agency is accurate and current in accordance with the following conditions:

- Modification:** Significant changes in facility personnel or operations require a revision of the CCP. Complete, sign, and submit a new CCP with this form.
- No Change:** There have not been any significant changes in the facility’s personnel or operations that require a revision to the current CCP.

ANNUAL CERTIFICATION

I certify under penalty of law that I have personally examined the information submitted herein and believe the submitted information is complete, accurate, and up to date. Also, no hazardous materials subject to the inventory requirements of this Chapter, (California Health & Safety Code Chapter 6.95) are being handled that are not listed on the most recently submitted annual inventory form.

BURBANK FIRE DEPT.
15 SEP 11 12 16

CITY OF BURBANK FIRE DEPARTMENT

Business Plan and Hazardous Materials Management

PURPOSE OF THE BUSINESS PLAN. *The Health and Safety Code requires that your business plan gives the first responders, such as firefighters, information on the location, quantity, and health risks for the hazardous materials at your facility.*

CERTIFICATION OF YOUR BUSINESS PLAN – The Hazardous Materials Division intends to simplify your annual certification by providing you an Owner Operator Identification Form completed with the information as it currently appears in our database. Download additional unified program forms from our website at www.BurbankFire.US.

there is a change of owner or operator at a facility that has reportable quantities of hazardous materials (required by the new owner/operator), if the operations change in a way that compromise the procedures towards any release of a hazardous materials that are specified in the previously submitted CCP.

HAZARDOUS MATERIALS INVENTORY – Every three years each Hazardous Materials Handler is required to disclose the names, amounts, locations, and mixtures containing hazardous materials to this Department if the container amount equals or exceeds the following quantities at any one time during the reporting year: *a total weight of 500 pounds, or a total volume of 55 gallons, or 200 cubic feet.* When changes are made, you are required to send a new Chemical Description form with the annual certification. Download blank Hazardous Materials Chemical Description forms from our website at www.Burbankfire.US.

VIOLATIONS AND FINES – Any business that violates any Health and Safety Code Sections that pertain to hazardous materials reporting may be civilly liable for up to \$2,000 for each day of the violation. Any business that knowingly violates these provisions may be liable for up to \$5,000 for each day of the violation. Any person or business that, upon discovery of a release or threatened release, fails to immediately report to the Burbank Fire Department, may be fined up to \$25,000 per day of violation and/or be sentenced up to one (1) year in County jail. Furthermore, if the violation results in, or significantly contributes to, any emergency, including a fire, to which the county or city is required to respond, the person shall also be assessed the full cost of the county or city emergency response, as well as the cost of cleaning up and disposing of the hazardous material (Section 25514.5).

CONSOLIDATED CONTINGENCY PLAN – Every three years the Hazardous Materials Handler shall submit to the Burbank Fire Department the current personnel, owner, and business name, including the current and effective procedures that trained personnel would implement in the event of a hazardous materials release from an operation or storage condition at the site. When changes are made, you are required to send a new CCP with the annual certification. Furthermore, you must train the personnel about the revised procedures, because the Health and Safety Code requires a training program for employees on hazardous materials safety procedures in the event of a release or threatened release of hazardous materials. Download a blank CCP form from our website at www.BurbankFire.US.

EXEMPTIONS- A retail store, including the interior receiving and stockroom areas, that handles hazardous materials contained solely in a consumer product for direct distribution to and use by the general public is exempt from the State reporting requirements, unless the individual container size equals or exceeds the reportable quantities in State Law. Railcars or tankers containing hazardous materials if the mode of power (i.e. locomotive or tractor) is disconnected. Railroad cars containing hazardous materials remaining within the same railroad facility or business facility for more than thirty (30) days are deemed stored at that location and are subject to all reporting requirements.

SITE MAPS – A site map is included in the CCP form. The map is given to the firefighters. Therefore indicate the hazardous materials storage areas and operations on the map. Please use the site map grid that is included with the CCP form; blue prints will not be accepted. The site map may be multiple pages depending on the size of the facility. Download a blank Site Map form from our website at www.BurbankFire.US.

This Department, upon written application, may exempt a handler from any portion of the Business Plan and/or exempt a hazardous material, if it is determined this exemption does not pose a significant hazard to human health, safety, or the environment.

BUSINESS PLAN AMENDMENTS – Submit a Hazardous Materials Inventory—Chemical Description form to this Department within 30 days of the following changes: 100% of an increase of a previously disclosed hazardous material, or handling of a hazardous material that was not previously disclosed. Submit a CCP to this department within 30 days if

FACILITY MODIFICATIONS – If you are the owner or operator of a new facility or your facility is being modified in a way that results in any change to the safe operating limits or that introduces a new hazard, you must contact the Burbank Fire Department as soon as possible.

**INSTRUCTIONS FOR THE UNIFIED PROGRAM (UP) FORM
BUSINESS OWNER/OPERATOR IDENTIFICATION**

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials - Chemical Description for all hazardous materials inventory submissions. For the inventory to be considered complete, this page must be signed by the appropriate individual. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER This number is assigned by the CUPA. This is the unique number which identifies your facility.
3. BUSINESS NAME Enter the full legal name of the business.
100. BEGINNING DATE Enter the beginning year and date of the report (YYYYMMDD, ex. 1999/07/01).
101. ENDING DATE Enter the ending year and date of the report (YYYYMMDD, ex. 2000/06/30).
102. BUSINESS PHONE Enter the phone number, area code first, and any extension.
103. BUSINESS SITE ADDRESS Enter the street address where the facility is located. No post office box numbers are allowed.
104. CITY Enter the city or unincorporated area in which the business site is located.
105. ZIP CODE - Enter the zip code of the business site. The extra 4 digits in the zip code may also be added.
106. DUN & BRADSTREET Enter the Dun and Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or by visiting Dun and Bradstreet on the internet at www.dnb.com.
107. SIC CODE Enter the primary Standard Industrial Classification Code number for the primary business activity. Report only the first four digits.
108. COUNTY Enter the county in which the business site is located.
109. BUSINESS OPERATOR NAME Enter the name of the person who is the business operator.
110. BUSINESS OPERATOR PHONE Enter business operator's phone number including any extension, if different from the business phone.
111. OWNER NAME Enter name of the business owner, if different from the business operator.
112. OWNER PHONE Enter the business owner's phone number if different from the business phone, area code first, and any extension.
113. OWNER MAILING ADDRESS Enter the owner's mailing address if different from the business site address.
114. OWNER CITY Enter the name of the city for the owner's mailing address.
115. OWNER STATE Enter the 2 character state abbreviation for the owner's mailing address.
116. OWNER ZIP CODE Enter the zip code for the owner's address. The extra 4 digits in the zip code may also be added.
117. ENVIRONMENTAL CONTACT NAME Enter the name of the person, if different from the Business Owner or Operator, who receives all environmental correspondence and will respond to enforcement activity.
118. CONTACT PHONE Enter the phone number at which the environmental contact can be contacted including any extension.
119. CONTACT MAILING ADDRESS Enter the mailing address where all environmental contact correspondence should be sent.
120. CITY Enter the name of the city for the environmental contact's mailing address.
121. STATE Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE Enter the zip code for the environmental contact's mailing address. The extra 4 digits in the zip code may also be added.
123. PRIMARY EMERGENCY CONTACT NAME Enter the name of a representative that can be contacted in case of an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE Enter the title of the primary emergency contact.
125. BUSINESS PHONE Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. MOBILE NUMBER Enter the mobile number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE Enter the title of the secondary emergency contact.
130. BUSINESS PHONE Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE Enter a 24-hour phone number for the secondary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER Enter the pager number for the secondary emergency contact, if available.
- 133a. UNINCORPORATED AREA Check "Yes" if your facility is located in an unincorporated area of the County (ex. East LA, Marina Del Rey etc.).
- 133b. NUMBER OF EMPLOYEES Enter the number of employees working at your facility.
- 133c. TAX IDENTIFICATION NUMBER (TIN) Enter your business's tax identification number or social security number. The TIN number may be obtained from the Internal Revenue Service (IRS).
- 133d. MAILING/BILLING ADDRESS Enter the address that all correspondence and bills should be sent.
- 133e. MAILING/BILLING CITY Enter the city for the mailing/billing address.
- 133f. MAILING/BILLING STATE Enter the 2 character state abbreviation for the mailing/billing address.
- 133g. MAILING/BILLING ZIP CODE Enter the zip code for the mailing/billing address. The extra 4 digits in the zip code may also be added.
- 133h. MAILING/BILLING CONTACT Enter the name of the person who is your Mailing/Billing contact.
- 133i. MAILING/BILLING NAME Enter the Name of the company or department for Mailing/Billing.
- 133j. MAILING/BILLING PHONE Enter the Mailing/Billing phone number.
- SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies the signer is familiar with the information submitted, and based on the signer's inquiry of those individuals responsible for obtaining the information, it is the signer's belief that the information is true, accurate, and complete.
134. DATE Enter the date that the document was signed (YYYYMMDD, ex. 1999/07/01).
135. NAME OF DOCUMENT PREPARER Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER Enter the full printed name of the person signing the page.
137. TITLE OF SIGNER Enter the title of the person signing the page.

**INSTRUCTIONS FOR THE UNIFIED PROGRAM (UP) FORM
BUSINESS ACTIVITIES**

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. **FACILITY ID NUMBER** Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) and identifies your facility.
2. **EPA ID NUMBER** If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters "CA". If you do not have a number, contact the Department of Toxic Substances Control (DTSC) at (916) 324-1781, (800) 61-TOXIC or (800) 61-86942, to obtain one.
3. **BUSINESS NAME** Enter the full legal name of the business. This is the same as the terms "Facility Name" or "DBA - Doing Business As".
4. **HAZARDOUS MATERIALS ON-SITE** Check the box to indicate whether you have hazardous materials on-site. You have a hazardous material if:
 - It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of gas (calculated at standard temperature and pressure),
 - It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
 - Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

If you have hazardous materials on-site, then you must complete the Business Owner/Operator Identification page (OES Form 2730) and the Hazardous Materials Inventory - Chemical Description page (OES Form 2731), as well as an Emergency Response Plan (i.e. Consolidated Contingency Plan) and Training Plan. Do not answer "YES" to this question if you exceed only a local threshold, but do not exceed the state threshold.

5. **HAZARDOUS MATERIALS UNDERGROUND STORAGE TANK (UST)** Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) §25316. If "YES", then you must complete one UST Facility page and UST Tank pages for each tank. **You must also submit a plot plan and a monitoring program plan.**
6. **UPGRADE / INSTALL UST** Check the appropriate box to indicate whether you intend to install or upgrade USTs containing hazardous substances as defined in HSC §25316. If "YES", then you must complete the UST Installation - Certificate of Compliance page in addition to UST Facility and Tank pages, plot plan, and monitoring program plan.
7. **UST CLOSURE** Check the appropriate box if you are closing a UST and complete the closure portion of the UST Tank pages for each tank.
8. **OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK (APST)** Check the appropriate box to indicate whether there are APSTs on-site which exceed the regulatory thresholds. (There is no UPCF page for APSTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC §25270.2 (g)). The facility must have a single tank greater than 660 gallons, or cumulative storage capacity greater than 1,320 gallons for all APSTs. An aboveground petroleum storage tank (APST) facility with one or more of the following (see HSC §25270.2 (k)) is not subject to this act and is exempt:
 - A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
 - A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
 - An aboveground oil production tank which is regulated by the Division of Oil and Gas,
 - Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.
9. **HAZARDOUS WASTE GENERATOR** Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC §25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.
10. **RECYCLE** Check the appropriate box to indicate whether your facility recycles more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC §25143.2. Check "YES" and complete the Recyclable Materials Report pages, if you either recycled on-site or recycled excluded recyclable materials which were generated offsite. Check "NO" if you only send recyclable materials to an offsite recycler; you do not need to report.
11. **ON-SITE HAZARDOUS WASTE TREATMENT** Check the appropriate box to indicate whether your facility treats hazardous waste on-site. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of "treatment" for certain processes under specific, limited conditions. Refer to HSC §25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC §25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility treats hazardous waste on-site, complete the On-site Hazardous Waste Treatment Notification - Facility page and one set of On-site Hazardous Waste Treatment Notification - Unit pages for each unit.
12. **FINANCIAL ASSURANCE** Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an on-site treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR §67450.13 (b) and HSC §25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.
13. **REMOTE WASTE CONSOLIDATION SITE** Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer "YES" if you are a hazardous waste generator that collects hazardous waste at remote sites and transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC §25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.
14. **HAZARDOUS WASTE TANK CLOSURE** Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on your knowledge of the tank and its contents, the mixture rule, testing of the tank, the listed wastes in 40 CFR 261.31 or 40 CFR 261.32, or inability to remove hazardous materials stored in the tank. If the closed tank would be classified as hazardous waste, then complete the Hazardous Waste Tank Closure Certification page.
- 15a. **LOCAL REQUIRED INFORMATION: REGULATED SUBSTANCES (RS)** Check the box to indicate whether Regulated Substances (RS) are stored on-site. An RS is any substance, listed in CCR, Title 19, Section 2770.5. See attached Regulated Substance list. If you handle an RS at greater than the threshold planning quantities then complete the Regulated Substance Registration in addition to forms required under item number 4.
- 15b. **LOCAL HAZARDOUS MATERIALS THRESHOLD** Check the appropriate box to indicate if you are subject to reporting hazardous materials at a level established by your local CUPA or PA. Check with your local CUPA or PA for details.
- 15c. **LOCAL REQUIRED INFORMATION: HAZARDOUS WASTE** Check the "yes" box if your facility answered yes to item number 9 and generates hazardous waste. If you checked the "Yes" box, complete the Hazardous Waste Generator Form (LA County).

FINAL NOTICE
IMMEDIATE RESPONSE REQUIRED

June 10, 2014

Charles Chaffee
Burbank Airport Marriott Hotel
2500 N Hollywood WAY
Burbank CA 91505

Subject: CERS Compliance
Site: Burbank Airport Marriott Hotel
2500 N Hollywood WAY

CERS ID: 10229452
PA ID: 00247

Burbank Fire Department (BFD) records show that the business noted above has not complied with the California Electronic Reporting System (CERS). The mandatory deadline for submission of this information was **April 15, 2014**.

The BFD is providing you with the opportunity to comply with CERS requirements. **You have 30 days to comply from the date of this notice.**

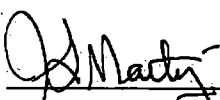

Failure to comply after receipt of this notice is a willful violation of the California Fire Code Section 109.4 and shall be guilty of a misdemeanor, punishable by a fine of not more than \$500 dollars or by imprisonment not exceeding 180 days, or both such fine and imprisonment. Each day that a violation continues after due notice has been served shall be deemed a separate offense. In addition to the imposition of penalties the fire code official is authorized to institute appropriate action to prevent conduct of business. California Fire Code Section 109.4.1

It is expected that you will comply with your legal obligations within the time limits stated by this notice.

See back of this notice for further instructions.

Should you have any questions please feel to contact the Fire Prevention Bureau at (818) 238-3743.

Thank you for your cooperation.

Jorge Martinez, Deputy Fire Marshal

PARTIAL SUBMITTALS

CERS has received elements of your submission, and they have either not been accepted, or not all elements have been received and accepted. See below for status of the submittal. If there is no date under Date Accepted, the submission **still needs to be completed**.

	<u>Submitted</u>	<u>Date Accepted</u>	<u>Under Review</u>
Hazardous Materials Inventory	X		
Emergency Response and Training Plans	X		

Forms can now be downloaded from our website at www.Burbankfire.US. These forms may be completed on a computer by using *Adobe Reader* and uploaded into CERS. If you are unable to download the required forms from our website, have questions, or need assistance, please contact the Fire Prevention Bureau at (818) 238-3473.

SUBJECT: 00247 - BURBANK AIRPORT MARIOTT HOTEL
2500 N HOLLYWOOD WAY

CERS ID: 10229452

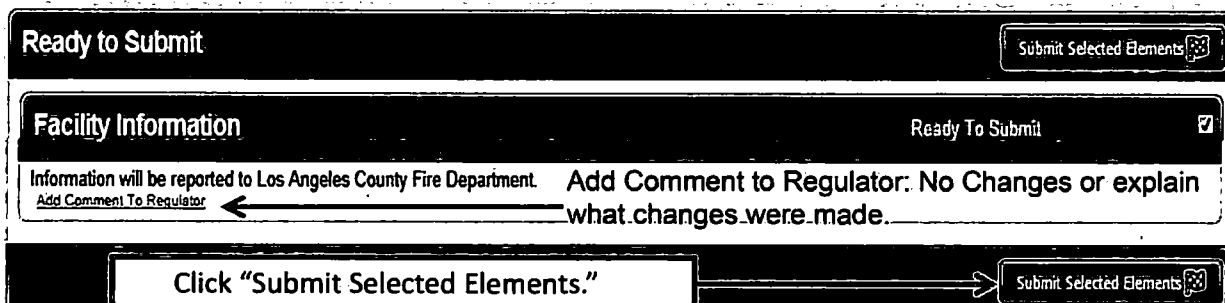

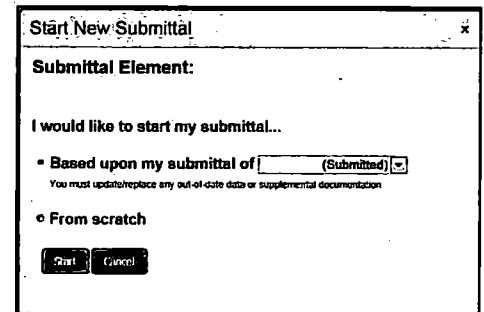

EMAIL ADDRESS ON FILE:

Hazardous Material submittals for Fiscal Year 2014-15 to the Burbank Fire Department (BFD) must be made through CERS (<http://cers.calepa.ca.gov>) by April 15, 2014.

What is required for this year:

Facility Information
Hazardous Materials Inventory and Site Map
Emergency Response/Contingency Plan and Employee Training Plan

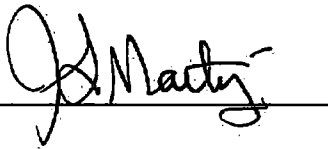

- It is suggested to base a new submittal on the previous submittal. (See Dialog Box to the Right)
- Verify that all the information is current and correct. Make changes as needed.
- **BFD requires that a Site Map, Emergency Response/Contingency Plan, and Employee Training Plan be uploaded into CERS this year.**
- **After clicking Submit, a link will appear that says "Add Comment to Regulator". Please click on this link and let us know what has been changed. If there were no changes, please indicate this as well. (See Dialog Box Below)**

A few important things to note:

1. The BFD will provide two **FREE** CERS training sessions on March 6, 2014. A minimum number of people will be required to RSVP for the trainings in order for them to be held. Please call 818-238-3473 to RSVP for a training session.
2. If you need individual help with your submission, a fee of \$91 per hour (minimum 1 hour) will be charged to assist businesses. Please call 818-238-3473 to set up an appointment.
3. Questions and comments regarding CERS should be sent to the following e-mail address: BurbankCERS@burbankca.gov.
4. A CERS Guidance document can be found attached to this letter.
5. For more information on the Hazardous Materials program, CERS, and various BFD/CERS forms, visit BFD's website at: <http://www.burbankfire.us/divisions/fire-prevention-bureau>.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Martinez", is written over a horizontal line.

SECOND NOTICE

April 1, 2017

Charles Chaffee
Burbank Airport Marriott Hotel
2500 N Hollywood Way
Burbank CA 91505

SUBJECT: PA ID: **00247** **2500 N HOLLYWOOD WAY**
CERS ID: **10229452** **BURBANK AIRPORT MARRIOTT HOTEL**

If there have been no submittals for the referenced site or if submittal elements have been "Not Accepted" the facility is not in compliance for FY 2017-18; the deadline for submission of this information was **March 1, 2017**.

The BFD is providing an extension opportunity to comply with CERS requirements. The new date to comply will be **May 1, 2017**.

Failure to comply after receipt of this notice is a willful violation of the California Health and Safety Code Section 25508(a)(1)(A) – Businesses that handle hazardous materials shall electronically submit annually to CERS. If a business fails to electronically submit complete and accurate information Burbank Fire Department shall take appropriate action including the imposition of administrative, civil, or criminal penalties.

It is expected that this facility shall comply with the legal obligations within the time limits stated by this notice.

Thank you for your cooperation.

A handwritten signature in blue ink that reads "Daniel J King".

Danny King
Fire Inspection Manager

BUSINESS PLAN ANNUAL RENEWAL CERTIFICATION 2011

Charles Chaffee 818 843 6000 9/22/10 KK

Hazardous Materials Inventory

I have reviewed my inventory and certify the following:

- Add:** Complete one **Hazardous Materials Inventory—Chemical Description Form** checking the “Add” box to add each hazardous material that you have not previously disclosed. Submit one form per chemical.
- Delete:** Write “delete” across the **Hazardous Materials Inventory—Chemical Description Form** checking the “Delete” box to delete any previously disclosed hazardous material that is no longer used. Submit one form per chemical.
- Revise:** Write the correct amounts, locations, or container type that have changed checking the “Revise” box to reflect the accuracy of any previously reported hazardous material. Submit one form per chemical.
- No Change:** The previously submitted inventory is accurate.

Consolidated Contingency Plan (CCP)

I have reviewed the CCP and certify that the CCP on file with your agency is accurate and current in accordance with the following conditions:

- Modification:** Significant changes in facility personnel or operations require a revision of the CCP. Complete, sign, and submit a new CCP with this form.
- No Change:** There have not been any significant changes in the facility’s personnel or operations that require a revision to the current CCP.

ANNUAL CERTIFICATION

I certify under penalty of law that I have personally examined the information submitted herein and believe the submitted information is complete, accurate, and up to date. Also, no hazardous materials subject to the inventory requirements of this Chapter, (California Health & Safety Code Chapter 6.95) are being handled that are not listed on the most recently submitted annual inventory form.

 or from the Burbank Fire Department at (818) 238-3473.

CITY OF BURBANK FIRE DEPARTMENT

Business Plan and Hazardous Materials Management

PURPOSE OF THE BUSINESS PLAN. *The Health and Safety Code requires that your business plan gives the first responders, such as firefighters, information on the location, quantity, and health risks for the hazardous materials at your facility.*

CERTIFICATION OF YOUR BUSINESS PLAN – The Hazardous Materials Division intends to simplify your annual certification by providing you an Owner Operator Identification Form completed with the information as it currently appears in our database. Download additional unified program forms from our website at www.BurbankFire.US.

HAZARDOUS MATERIALS INVENTORY – Every three years each Hazardous Materials Handler is required to disclose the names, amounts, locations, and mixtures containing hazardous materials to this Department if the container amount equals or exceeds the following quantities at any one time during the reporting year: *a total weight of 500 pounds, or a total volume of 55 gallons, or 200 cubic feet.* When changes are made, you are required to send a new Chemical Description form with the annual certification. Download blank Hazardous Materials Chemical Description forms from our website at www.Burbankfire.US.

CONSOLIDATED CONTINGENCY PLAN – Every three years the Hazardous Materials Handler shall submit to the Burbank Fire Department the current personnel, owner, and business name, including the current and effective procedures that trained personnel would implement in the event of a hazardous materials release from an operation or storage condition at the site. When changes are made, you are required to send a new CCP with the annual certification. Furthermore, you must train the personnel about the revised procedures, because the Health and Safety Code requires a training program for employees on hazardous materials safety procedures in the event of a release or threatened release of hazardous materials. Download a blank CCP form from our website at www.BurbankFire.US.

SITE MAPS – A site map is included in the CCP form. The map is given to the firefighters. Therefore indicate the hazardous materials storage areas and operations on the map. Please use the site map grid that is included with the CCP form; blue prints will not be accepted. The site map may be multiple pages depending on the size of the facility. Download a blank Site Map form from our website at www.BurbankFire.US.

BUSINESS PLAN AMENDMENTS – Submit a Hazardous Materials Inventory—Chemical Description form to this Department within 30 days of the following changes: 100% of an increase of a previously disclosed hazardous material, or handling of a hazardous material that was not previously disclosed. Submit a CCP to this department within 30 days if

there is a change of owner or operator at a facility that has reportable quantities of hazardous materials (required by the new owner/operator), if the operations change in a way that compromise the procedures towards any release of a hazardous materials that are specified in the previously submitted CCP.

VIOLATIONS AND FINES – Any business that violates any Health and Safety Code Sections that pertain to hazardous materials reporting may be civilly liable for up to \$2,000 for each day of the violation. Any business that knowingly violates these provisions may be liable for up to \$5,000 for each day of the violation. Any person or business that, upon discovery of a release or threatened release, fails to immediately report to the Burbank Fire Department, may be fined up to \$25,000 per day of violation and/or be sentenced up to one (1) year in County jail. Furthermore, if the violation results in, or significantly contributes to, any emergency, including a fire, to which the county or city is required to respond, the person shall also be assessed the full cost of the county or city emergency response, as well as the cost of cleaning up and disposing of the hazardous material (Section 25514.5).

EXEMPTIONS- A retail store, including the interior receiving and stockroom areas, that handles hazardous materials contained solely in a consumer product for direct distribution to and use by the general public is exempt from the State reporting requirements, unless the individual container size equals or exceeds the reportable quantities in State Law. Railcars or tankers containing hazardous materials if the mode of power (i.e. locomotive or tractor) is disconnected. Railroad cars containing hazardous materials remaining within the same railroad facility or business facility for more than thirty (30) days are deemed stored at that location and are subject to all reporting requirements.

This Department, upon written application, may exempt a handler from any portion of the Business Plan and/or exempt a hazardous material, if it is determined this exemption does not pose a significant hazard to human health, safety, or the environment.

FACILITY MODIFICATIONS – If you are the owner or operator of a new facility or your facility is being modified in a way that results in any change to the safe operating limits or that introduces a new hazard, you must contact the Burbank Fire Department as soon as possible.

Required by a CUPA or PA to provide other information?</p>	<p align="center"><input type="checkbox"/> YES <input checked="" type="checkbox"/> NO 15a <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO 15b <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO 15c</p> <p>In addition to Hazardous Materials requirements, complete: ✓ REGULATED SUBSTANCE REGISTRATION ✓ RISK MANAGEMENT PLAN (when required) ✓ Consult local CUPA or PA for added reporting requirements. ✓ WASTE GENERATOR FORM (LA County)</p>

INSTRUCTIONS FOR THE UNIFIED PROGRAM (UP) FORM
BUSINESS ACTIVITIES

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. **FACILITY ID NUMBER** Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) and identifies your facility.
2. **EPA ID NUMBER** If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters "CA". If you do not have a number, contact the Department of Toxic Substances Control (DTSC) at (916) 324-1781, (800) 61-TOXIC or (800) 61-86942, to obtain one.
3. **BUSINESS NAME** Enter the full legal name of the business. This is the same as the terms "Facility Name" or "DBA - Doing Business As".
4. **HAZARDOUS MATERIALS ON-SITE** Check the box to indicate whether you have hazardous materials on-site. You have a hazardous material if:
 - It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of gas (calculated at standard temperature and pressure),
 - It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
 - Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.If you have hazardous materials on-site, then you must complete the Business Owner/Operator Identification page (OES Form 2730) and the Hazardous Materials Inventory - Chemical Description page (OES Form 2731), as well as an Emergency Response Plan (i.e. Consolidated Contingency Plan) and Training Plan. Do not answer "YES" to this question if you exceed only a local threshold, but do not exceed the state threshold.
5. **OWN OR OPERATE UNDERGROUND STORAGE TANK (UST)** Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) §25316. If "YES", then you must complete one UST Facility page and UST Tank pages for each tank. **You must also submit a plot plan and a monitoring program plan.**
6. **UPGRADE / INSTALL UST** Check the appropriate box to indicate whether you intend to install or upgrade USTs containing hazardous substances as defined in HSC §25316. If "YES", then you must complete the UST Installation - Certificate of Compliance page in addition to UST Facility and Tank pages, plot plan, and monitoring program plan.
7. **UST CLOSURE** Check the appropriate box if you are closing a UST and complete the closure portion of the UST Tank pages for each tank.
8. **OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK (APST)** Check the appropriate box to indicate whether there are APSTs on-site which exceed the regulatory thresholds. (There is no UPCF page for APSTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC §25270.2 (g)). The facility must have a single tank greater than 660 gallons, or cumulative storage capacity greater than 1,320 gallons for all APSTs. An aboveground petroleum storage tank (APST) facility with one or more of the following (see HSC §25270.2 (k)) is not subject to this act and is exempt:
 - A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
 - A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
 - An aboveground oil production tank which is regulated by the Division of Oil and Gas,
 - Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.
9. **HAZARDOUS WASTE GENERATOR** Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC §25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.
10. **RECYCLE** Check the appropriate box to indicate whether your facility recycles more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC §25143.2. Check "YES" and complete the Recyclable Materials Report pages, if you either recycled on-site or recycled excluded recyclable materials which were generated offsite. Check "NO" if you only send recyclable materials to an offsite recycler; you do not need to report.
11. **ON-SITE HAZARDOUS WASTE TREATMENT** Check the appropriate box to indicate whether your facility treats hazardous waste on-site. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of "treatment" for certain processes under specific, limited conditions. Refer to HSC §25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC §25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility treats hazardous waste on-site, complete the On-site Hazardous Waste Treatment Notification - Facility page and one set of On-site Hazardous Waste Treatment Notification - Unit pages for each unit.
12. **FINANCIAL ASSURANCE** Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an on-site treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR §67450.13 (b) and HSC §25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.
13. **REMOTE WASTE CONSOLIDATION SITE** Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer "YES" if you are a hazardous waste generator that collects hazardous waste at remote sites and transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC §25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.
14. **HAZARDOUS WASTE TANK CLOSURE** Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on your knowledge of the tank and its contents, the mixture rule, testing of the tank, the listed wastes in 40 CFR 261.31 or 40 CFR 261.32, or inability to remove hazardous materials stored in the tank. If the closed tank would be classified as hazardous waste, then complete the Hazardous Waste Tank Closure Certification page.
- 15a. **LOCAL REQUIRED INFORMATION: REGULATED SUBSTANCES (RS)** Check the box to indicate whether Regulated Substances (RS) are stored on-site. An RS is any substance, listed in CCR, Title 19, Section 2770.5. See attached Regulated Substance list. If you handle an RS at greater than the threshold planning quantities then complete the Regulated Substance Registration in addition to forms required under item number 4.
- 15b. **LOCAL HAZARDOUS MATERIALS THRESHOLD** Check the appropriate box to indicate if you are subject to reporting hazardous materials at a level established by your local CUPA or PA. Check with your local CUPA or PA for details.
- 15c. **LOCAL REQUIRED INFORMATION: HAZARDOUS WASTE** Check the "yes" box if your facility answered yes to item number 9 and generates hazardous waste. If you checked the "Yes" box, complete the Hazardous Waste Generator Form (LA County).

IMMEDIATE RESPONSE REQUIRED*

September 10, 2010

MICHAEL MACK
BURBANK AIRPORT MARRIOTT HOTEL
2500 N HOLLYWOOD WAY
BURBANK CA 91505

Subject: **00247 – BURBANK AIRPORT MARRIOTT HOTEL
2500 N HOLLYWOOD WAY**

As a hazardous materials handler your business is required to submit a completed hazardous materials inventory disclosure statement annually in accordance with the Section 25509 of the California Health & Safety Code and Section 9-2-2701.5.1 of the Burbank Municipal Code. Hazardous Materials equal to or greater than the amounts of ***a total weight of 500 pounds, or a total volume of 55 gallons or 200 cubic feet*** qualify your business as a Hazardous Materials Handler.

Please review the following attached forms:

- Business Plan Annual Renewal Certification
- Business Owner / Operator Identification
- Business Activities

If there are no changes to your “Hazardous Materials Inventory” or “Consolidated Contingency Plan” or “Site Map” please review and follow the directions on the back of this letter.

If there are changes to your “Hazardous Materials Inventory” or “Consolidated Contingency Plan” or “Site Map” please review and follow the directions on the back of this letter.

BE SURE TO RETAIN A COPY OF ALL FORMS FOR YOUR RECORDS.

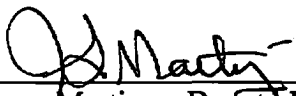

*Please note you have 30 days from the date of this notice to complete and return the required information. **THIS LETTER IS YOUR ONLY NOTICE.** No further notices will be issued.

FAILURE TO SUBMIT THE REQUIRED INVENTORY DISCLOSURE STATEMENT IS A MISDEMEANOR CRIMINAL VIOLATION OF BOTH THE CALIFORNIA HEALTH & SAFETY CODE AND THE BURBANK MUNICIPAL CODE. EACH VIOLATION IS PUNISHABLE BY A MAXIMUM OF SIX MONTHS IN JAIL AND/OR A \$1,000 FINE, NOT INCLUDING PENALTY ASSESSMENTS.

ADDITIONALLY, IF THE CITY ALSO ELECTS TO PURSUE CIVIL ENFORCEMENT OF THIS MATTER, ANY BUSINESS THAT VIOLATES THESE PROVISIONS CAN BE ASSESSED A CIVIL PENALTY OF UP TO TWO THOUSAND (\$2,000) DOLLARS FOR EACH DAY OF THE VIOLATION. IF THE BUSINESS IS DETERMINED TO HAVE KNOWINGLY FAILED TO COMPLY AFTER REASONABLE NOTICE OF THE VIOLATION, THEY ARE CIVILLY LIABLE FOR UP TO FIVE THOUSAND (\$5,000) DOLLARS FOR EACH DAY IN WHICH THE VIOLATION OCCURS.

Forms can now be downloaded from our website at www.Burbankfire.US. These forms may be completed on your computer by using *Adobe Reader*. If you are unable to download the required forms from our website, or have questions, or need assistance, please contact the Fire Prevention Bureau at (818) 238-3473.

Thank you for your cooperation.

 Jorge Martinez, Deputy Fire Marshal

See schedule below for your submittal requirements.

If you have ...	Then complete, sign, and submit the following forms:
A. No Changes to your Hazardous Materials Inventory or Consolidated Contingency Plan,	1. Business Plan Annual Renewal Certification Form – signed ; 2. HazMat Owner and Operator Identification page – signed ; and 3. HazMat Business Activities page
B. Changes to your Hazardous Materials Inventory,	1. In addition to submitting all items under A., 2. Chemical Description Form to add, revise, or delete reportable hazardous materials. Make as many copies as you need to disclose each reportable hazardous material that you will handle in 2011;
C. Changes to your Consolidated Contingency Plan,	353. In addition to all items under A., 354. A revised signed Consolidated Contingency Plan form.
D. Changes to your Site Map	1. In addition to all items under A., 2. A revised Site Map.

BUSINESS PLAN ANNUAL RENEWAL CERTIFICATION 2010

Ken Marcus 818-974-4219 12/10/09 KK

Hazardous Materials Inventory

I have reviewed my inventory and certify the following:

- Add:** Complete one **Hazardous Materials Inventory—Chemical Description Form** checking the “Add” box to add each hazardous material that you have not previously disclosed. Submit one form per chemical.
- Delete:** Write “delete” across the **Hazardous Materials Inventory—Chemical Description Form** checking the “Delete” box to delete any previously disclosed hazardous material that is no longer used. Submit one form per chemical.
- Revise:** Write the correct amounts, locations, or container type that have changed checking the “Revise” box to reflect the accuracy of any previously reported hazardous material. Submit one form per chemical.
- No Change:** The previously submitted inventory is accurate.

Consolidated Contingency Plan (CCP)

I have reviewed the CCP and certify that the CCP on file with your agency is accurate and current in accordance with the following conditions:

- Modification:** Significant changes in facility personnel or operations require a revision of the CCP. Complete, sign, and submit a new CCP with this form.
- No Change:** There have not been any significant changes in the facility’s personnel or operations that require a revision to the current CCP.

ANNUAL CERTIFICATION

I certify under penalty of law that I have personally examined the information submitted herein and believe the submitted information is complete, accurate, and up to date. Also, no hazardous materials subject to the inventory requirements of this Chapter, (California Health & Safety Code Chapter 6.95) are being handled that are not listed on the most recently submitted annual inventory form.

BURBANK FIRE DEPT.
-8 DEC 09 12 35

CITY OF BURBANK FIRE DEPARTMENT

Business Plan and Hazardous Materials Management

PURPOSE OF THE BUSINESS PLAN. *The Health and Safety Code requires that your business plan gives the first responders, such as firefighters, information on the location, quantity, and health risks for the hazardous materials at your facility.*

CERTIFICATION OF YOUR BUSINESS PLAN – The Hazardous Materials Division intends to simplify your annual certification by providing you an Owner Operator Identification Form completed with the information as it currently appears in our database. Download additional unified program forms from our website at www.BurbankFire.US.

HAZARDOUS MATERIALS INVENTORY – Every three years each Hazardous Materials Handler is required to disclose the names, amounts, locations, and mixtures containing hazardous materials to this Department if the container amount equals or exceeds the following quantities at any one time during the reporting year: *a total weight of 500 pounds, or a total volume of 55 gallons, or 200 cubic feet.* When changes are made, you are required to send a new Chemical Description form with the annual certification. Download blank Hazardous Materials Chemical Description forms from our website at www.Burbankfire.US.

CONSOLIDATED CONTINGENCY PLAN – Every three years the Hazardous Materials Handler shall submit to the Burbank Fire Department the current personnel, owner, and business name, including the current and effective procedures that trained personnel would implement in the event of a hazardous materials release from an operation or storage condition at the site. When changes are made, you are required to send a new CCP with the annual certification. Furthermore, you must train the personnel about the revised procedures, because the Health and Safety Code requires a training program for employees on hazardous materials safety procedures in the event of a release or threatened release of hazardous materials. Download a blank CCP form from our website at www.BurbankFire.US.

SITE MAPS – A site map is included in the CCP form. The map is given to the firefighters. Therefore indicate the hazardous materials storage areas and operations on the map. Please use the site map grid that is included with the CCP form; blue prints will not be accepted. The site map may be multiple pages depending on the size of the facility. Download a blank Site Map form from our website at www.BurbankFire.US.

BUSINESS PLAN AMENDMENTS – Submit a Hazardous Materials Inventory—Chemical Description form to this Department within 30 days of the following changes: 100% of an increase of a previously disclosed hazardous material, or handling of a hazardous material that was not previously disclosed. Submit a CCP to this department within 30 days if

there is a change of owner or operator at a facility that has reportable quantities of hazardous materials (required by the new owner/operator), if the operations change in a way that compromise the procedures towards any release of a hazardous materials that are specified in the previously submitted CCP.

VIOLATIONS AND FINES – Any business that violates any Health and Safety Code Sections that pertain to hazardous materials reporting may be civilly liable for up to \$2,000 for each day of the violation. Any business that knowingly violates these provisions may be liable for up to \$5,000 for each day of the violation. Any person or business that, upon discovery of a release or threatened release, fails to immediately report to the Burbank Fire Department, may be fined up to \$25,000 per day of violation and/or be sentenced up to one (1) year in County jail. Furthermore, if the violation results in, or significantly contributes to, any emergency, including a fire, to which the county or city is required to respond, the person shall also be assessed the full cost of the county or city emergency response, as well as the cost of cleaning up and disposing of the hazardous material (Section 25514.5).

EXEMPTIONS– A retail store, including the interior receiving and stockroom areas, that handles hazardous materials contained solely in a consumer product for direct distribution to and use by the general public is exempt from the State reporting requirements, unless the individual container size equals or exceeds the reportable quantities in State Law. Railcars or tankers containing hazardous materials if the mode of power (i.e. locomotive or tractor) is disconnected. Railroad cars containing hazardous materials remaining within the same railroad facility or business facility for more than thirty (30) days are deemed stored at that location and are subject to all reporting requirements.

This Department, upon written application, may exempt a handler from any portion of the Business Plan and/or exempt a hazardous material, if it is determined this exemption does not pose a significant hazard to human health, safety, or the environment.

FACILITY MODIFICATIONS – If you are the owner or operator of a new facility or your facility is being modified in a way that results in any change to the safe operating limits or that introduces a new hazard, you must contact the Burbank Fire Department as soon as possible.

**INSTRUCTIONS FOR THE UNIFIED PROGRAM (UP) FORM
BUSINESS OWNER/OPERATOR IDENTIFICATION**

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials - Chemical Description for all hazardous materials inventory submissions. For the inventory to be considered complete, this page must be signed by the appropriate individual. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER This number is assigned by the CUPA. This is the unique number which identifies your facility.
3. BUSINESS NAME Enter the full legal name of the business.
100. BEGINNING DATE Enter the beginning year and date of the report (YYYYMMDD, ex. 1999/07/01).
101. ENDING DATE Enter the ending year and date of the report (YYYYMMDD, ex. 2000/06/30).
102. BUSINESS PHONE Enter the phone number, area code first, and any extension.
103. BUSINESS SITE ADDRESS Enter the street address where the facility is located. No post office box numbers are allowed.
104. CITY Enter the city or unincorporated area in which the business site is located.
105. ZIP CODE - Enter the zip code of the business site. The extra 4 digits in the zip code may also be added.
106. DUN & BRADSTREET Enter the Dun and Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or by visiting Dun and Bradstreet on the internet at www.dnb.com.
107. SIC CODE Enter the primary Standard Industrial Classification Code number for the primary business activity. Report only the first four digits.
108. COUNTY Enter the county in which the business site is located.
109. BUSINESS OPERATOR NAME Enter the name of the person who is the business operator.
110. BUSINESS OPERATOR PHONE Enter business operator's phone number including any extension, if different from the business phone.
111. OWNER NAME Enter name of the business owner, if different from the business operator.
112. OWNER PHONE Enter the business owner's phone number if different from the business phone, area code first, and any extension.
113. OWNER MAILING ADDRESS Enter the owner's mailing address if different from the business site address.
114. OWNER CITY Enter the name of the city for the owner's mailing address.
115. OWNER STATE Enter the 2 character state abbreviation for the owner's mailing address.
116. OWNER ZIP CODE Enter the zip code for the owner's address. The extra 4 digits in the zip code may also be added.
117. ENVIRONMENTAL CONTACT NAME Enter the name of the person, if different from the Business Owner or Operator, who receives all environmental correspondence and will respond to enforcement activity.
118. CONTACT PHONE Enter the phone number at which the environmental contact can be contacted including any extension.
119. CONTACT MAILING ADDRESS Enter the mailing address where all environmental contact correspondence should be sent.
120. CITY Enter the name of the city for the environmental contact's mailing address.
121. STATE Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE Enter the zip code for the environmental contact's mailing address. The extra 4 digits in the zip code may also be added.
123. PRIMARY EMERGENCY CONTACT NAME Enter the name of a representative that can be contacted in case of an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE Enter the title of the primary emergency contact.
125. BUSINESS PHONE Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. MOBILE NUMBER Enter the mobile number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE Enter the title of the secondary emergency contact.
130. BUSINESS PHONE Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE Enter a 24-hour phone number for the secondary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER Enter the pager number for the secondary emergency contact, if available.
- 133a. UNINCORPORATED AREA Check "Yes" if your facility is located in an unincorporated area of the County (ex. East LA, Marina Del Rey etc.).
- 133b. NUMBER OF EMPLOYEES Enter the number of employees working at your facility.
- 133c. TAX IDENTIFICATION NUMBER (TIN) Enter your business's tax identification number or social security number. The TIN number may be obtained from the Internal Revenue Service (IRS).
- 133d. MAILING/BILLING ADDRESS Enter the address that all correspondence and bills should be sent.
- 133e. MAILING/BILLING CITY Enter the city for the mailing/billing address.
- 133f. MAILING/BILLING STATE Enter the 2 character state abbreviation for the mailing/billing address.
- 133g. MAILING/BILLING ZIP CODE Enter the zip code for the mailing/billing address. The extra 4 digits in the zip code may also be added.
- 133h. MAILING/BILLING CONTACT Enter the name of the person who is your Mailing/Billing contact.
- 133i. MAILING/BILLING NAME Enter the Name of the company or department for Mailing/Billing.
- 133j. MAILING/BILLING PHONE Enter the Mailing/Billing phone number.
- SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies the signer is familiar with the information submitted, and based on the signer's inquiry of those individuals responsible for obtaining the information, it is the signer's belief that the information is true, accurate, and complete.
134. DATE Enter the date that the document was signed (YYYYMMDD, ex. 1999/07/01).
135. NAME OF DOCUMENT PREPARER Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER Enter the full printed name of the person signing the page.
137. TITLE OF SIGNER Enter the title of the person signing the page.

**INSTRUCTIONS FOR THE UNIFIED PROGRAM (UP) FORM
BUSINESS ACTIVITIES**

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. **FACILITY ID NUMBER** Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) and identifies your facility.
2. **EPA ID NUMBER** If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters "CA". If you do not have a number, contact the Department of Toxic Substances Control (DTSC) at (916) 324-1781, (800) 61-TOXIC or (800) 61-86942, to obtain one.
3. **BUSINESS NAME** Enter the full legal name of the business. This is the same as the terms "Facility Name" or "DBA - Doing Business As".
4. **HAZARDOUS MATERIALS ON-SITE** Check the box to indicate whether you have hazardous materials on-site. You have a hazardous material if:
 - It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of gas (calculated at standard temperature and pressure),
 - It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
 - Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.If you have hazardous materials on-site, then you must complete the Business Owner/Operator Identification page (OES Form 2730) and the Hazardous Materials Inventory - Chemical Description page (OES Form 2731), as well as an Emergency Response Plan (i.e. Consolidated Contingency Plan) and Training Plan. Do not answer "YES" to this question if you exceed only a local threshold, but do not exceed the state threshold.
5. **OWN OR OPERATE UNDERGROUND STORAGE TANK (UST)** Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) §25316. If "YES", then you must complete one UST Facility page and UST Tank pages for each tank. You must also submit a plot plan and a monitoring program plan.
6. **UPGRADE / INSTALL UST** Check the appropriate box to indicate whether you intend to install or upgrade USTs containing hazardous substances as defined in HSC §25316. If "YES", then you must complete the UST Installation - Certificate of Compliance page in addition to UST Facility and Tank pages, plot plan, and monitoring program plan.
7. **UST CLOSURE** Check the appropriate box if you are closing a UST and complete the closure portion of the UST Tank pages for each tank.
8. **OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK (APST)** Check the appropriate box to indicate whether there are APSTs on-site which exceed the regulatory thresholds. (There is no UPCF page for APSTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC §25270.2 (g)). The facility must have a single tank greater than 660 gallons, or cumulative storage capacity greater than 1,320 gallons for all APSTs. An aboveground petroleum storage tank (APST) facility with one or more of the following (see HSC §25270.2 (k)) is not subject to this act and is exempt:
 - A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
 - A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
 - An aboveground oil production tank which is regulated by the Division of Oil and Gas,
 - Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.
9. **HAZARDOUS WASTE GENERATOR** Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC §25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.
10. **RECYCLE** Check the appropriate box to indicate whether your facility recycles more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC §25143.2. Check "YES" and complete the Recyclable Materials Report pages, if you either recycled on-site or recycled excluded recyclable materials which were generated offsite. Check "NO" if you only send recyclable materials to an offsite recycler; you do not need to report.
11. **ON-SITE HAZARDOUS WASTE TREATMENT** Check the appropriate box to indicate whether your facility treats hazardous waste on-site. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of "treatment" for certain processes under specific, limited conditions. Refer to HSC §25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC §25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility treats hazardous waste on-site, complete the On-site Hazardous Waste Treatment Notification - Facility page and one set of On-site Hazardous Waste Treatment Notification - Unit pages for each unit.
12. **FINANCIAL ASSURANCE** Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an on-site treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR §67450.13 (b) and HSC §25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.
13. **REMOTE WASTE CONSOLIDATION SITE** Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer "YES" if you are a hazardous waste generator that collects hazardous waste at remote sites and transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC §25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.
14. **HAZARDOUS WASTE TANK CLOSURE** Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on your knowledge of the tank and its contents, the mixture rule, testing of the tank, the listed wastes in 40 CFR 261.31 or 40 CFR 261.32, or inability to remove hazardous materials stored in the tank. If the closed tank would be classified as hazardous waste, then complete the Hazardous Waste Tank Closure Certification page.
- 15a. **LOCAL REQUIRED INFORMATION: REGULATED SUBSTANCES (RS)** Check the box to indicate whether Regulated Substances (RS) are stored on-site. An RS is any substance, listed in CCR, Title 19, Section 2770.5. See attached Regulated Substance list. If you handle an RS at greater than the threshold planning quantities then complete the Regulated Substance Registration in addition to forms required under item number 4.
- 15b. **LOCAL HAZARDOUS MATERIALS THRESHOLD** Check the appropriate box to indicate if you are subject to reporting hazardous materials at a level established by your local CUPA or PA. Check with your local CUPA or PA for details.
- 15c. **LOCAL REQUIRED INFORMATION: HAZARDOUS WASTE** Check the "yes" box if your facility answered yes to item number 9 and generates hazardous waste. If you checked the "Yes" box, complete the Hazardous Waste Generator Form (LA County).

I am so sorry this did not get to you sooner. I was sent to Atlanta Georgia when I returned this was on my desk. I had put it in our out going mail but it came back because someone forgot to put postage on it.

Sorry again
Kenneth Marcus
Assistant Director of Engineering
1-818-974-4219

FIRE DEPARTMENT

CITY OF BURBANK
311 E. ORANGE GROVE AVENUE, BURBANK CALIFORNIA 91502-1221
(818) 238-3473
FAX (818) 238-3483

September 10, 2009

IMMEDIATE RESPONSE REQUIRED*

MICHAEL MACK
BURBANK AIRPORT MARRIOTT HOTEL
2500 N HOLLYWOOD WAY
BURBANK CA 91505

Subject: **00247 – BURBANK AIRPORT MARRIOTT HOTEL
 2500 N HOLLYWOOD WAY**

As a hazardous materials handler your business is required to submit a completed hazardous materials inventory disclosure statement annually in accordance with the Section 25509 of the California Health & Safety Code and Section 9-2-2701.5.1 of the Burbank Municipal Code. Hazardous Materials equal to or greater than the amounts of *a total weight of 500 pounds, or a total volume of 55 gallons or 200 cubic feet* qualify your business as a Hazardous Materials Handler.

Please review the following attached forms:

- Business Plan Annual Renewal Certification
- Business Owner / Operator Identification
- Business Activities

If there are no changes to your “Hazardous Materials Inventory” or “Consolidated Contingency Plan” or “Site Map” please review and follow the directions on the back of this letter.

If there are changes to your “Hazardous Materials Inventory” or “Consolidated Contingency Plan” or “Site Map” please review and follow the directions on the back of this letter.

BE SURE TO RETAIN A COPY OF ALL FORMS FOR YOUR RECORDS.

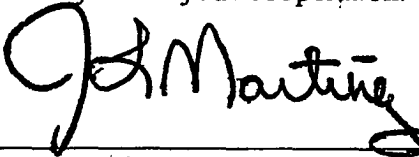

*Please note you have 30 days from the date of this notice to complete and return the required information. **THIS LETTER IS YOUR ONLY NOTICE.** No further notices will be issued.

FAILURE TO SUBMIT THE REQUIRED INVENTORY DISCLOSURE STATEMENT IS A MISDEMEANOR CRIMINAL VIOLATION OF BOTH THE CALIFORNIA HEALTH & SAFETY CODE AND THE BURBANK MUNICIPAL CODE. EACH VIOLATION IS PUNISHABLE BY A MAXIMUM OF SIX MONTHS IN JAIL AND/OR A \$1,000 FINE, NOT INCLUDING PENALTY ASSESSMENTS.

ADDITIONALLY, IF THE CITY ALSO ELECTS TO PURSUE CIVIL ENFORCEMENT OF THIS MATTER, ANY BUSINESS THAT VIOLATES THESE PROVISIONS CAN BE ASSESSED A CIVIL PENALTY OF UP TO TWO THOUSAND (\$2,000) DOLLARS FOR EACH DAY OF THE VIOLATION. IF THE BUSINESS IS DETERMINED TO HAVE KNOWINGLY FAILED TO COMPLY AFTER REASONABLE NOTICE OF THE VIOLATION, THEY ARE CIVILLY LIABLE FOR UP TO FIVE THOUSAND (\$5,000) DOLLARS FOR EACH DAY IN WHICH THE VIOLATION OCCURS.

Forms can now be downloaded from our website at www.Burbankfire.US. These forms may be completed on your computer by using *Adobe Reader*. If you are unable to download the required forms from our website, or have questions, or need assistance, please contact the Fire Prevention Bureau at (818) 238-3473.

Thank you for your cooperation.

Jorge Martinez, Deputy Fire Marshal

See schedule below for your submittal requirements.

If you have ...	Then complete, sign, and submit the following forms:
<p>A. no changes to your Hazardous Materials Inventory or Consolidated Contingency Plan,</p>	<ol style="list-style-type: none"> 1. Business Plan Annual Renewal Certification Form – signed; 2. HazMat Owner and Operator Identification page – signed; and 3. HazMat Business Activities page
<p>B. changes to your Hazardous Materials Inventory,</p>	<ol style="list-style-type: none"> 1. In addition to submitting all items under A., 2. Chemical Description Form to add, revise, or delete reportable hazardous materials. Make as many copies as you need to disclose each reportable hazardous material that you will handle in 2010;
<p>C. changes to your Consolidated Contingency Plan,</p>	<ol style="list-style-type: none"> 1. In addition to all items under A., 2. A revised signed Consolidated Contingency Plan form.
<p>D. changes to your Site Map</p>	<ol style="list-style-type: none"> 1. In addition to all items under A., 2. A revised Site Map.

If more hazardous components are present at greater than 1% by weight if non-carcinogenic, or 0.1% by weight if carcinogenic, attach additional sheets of paper capturing the required information.

III. EMERGENCY RESPONSE PLANS AND PROCEDURES

A. Notifications

Your business is required by State Law to provide an immediate verbal report of any release or threatened release of a hazardous material to local fire emergency response personnel, this Unified Program Agency (CUPA or PA), and the Office of Emergency Services. If you have a release or threatened release of hazardous materials, immediately call:

FIRE / PARAMEDICS / POLICE / SHERIFF PHONE: 911

AFTER the local emergency response personnel are notified, you shall then notify this Unified Program Agency and the Office of Emergency Services.

Local Unified Program Agency: (818) 238-3475
 State Office of Emergency Service: (800) 852-7550 or (916) 262-1621
 National Response Center: (800) 424-8802

Information to be provided during Notification:

- ⊗ Your name and the telephone number from where you are calling.
- ⊗ Exact address of the release or threatened release.
- ⊗ Date, time, cause, and type of incident (e.g. fire, air release, spill etc.)
- ⊗ Material and quantity of the release, to the extent known.
- ⊗ Current condition of the facility.
- ⊗ Extent of injuries, if any.
- ⊗ Possible hazards to public health and/ or the environment outside of the facility.

B. Emergency Medical Facility

List the local emergency medical facility that will be used by your business in the event of an accident or injury caused by a release or threatened release of hazardous material

HOSPITAL/CLINIC: St. Joseph's Occupational Center		PHONE: 818-843-5111
ADDRESS: 3413 Pacific Ave.		
CITY: Burbank		ZIP CODE: 91505

OFFICIAL USE ONLY	DATE RECEIVED	REVIEWED BY		
-------------------	---------------	-------------	--	--

**UNIFIED PROGRAM (UP) FORM
CONSOLIDATED CONTINGENCY PLAN**

SECTION I: BUSINESS PLAN AND CONTINGENCY PLAN

C. Private Emergency Response

DOES YOUR BUSINESS HAVE A PRIVATE ON-SITE EMERGENCY RESPONSE TEAM? Yes No
 If yes, provide an attachment that describes what policies and procedures your business will follow to notify your on-site emergency response team in the event of a release or threatened release of hazardous materials.

CLEANUP/DISPOSAL CONTRACTOR

List the contractor that will provide cleanup services in the event of a release.

NAME OF CONTRACTOR CHEMTREC		PHONE NO 800-424-9300
ADDRESS		
CITY		ZIP CODE

D. Arrangements With Emergency Responders

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements on the lines below:

N/A

E. Evacuation Plan

1. The following alarm signal(s) will be used to begin evacuation of the facility (*check all which apply*):

- Verbal Telephone (*including cellular*) Alarm System Public Address System Intercom
 Pagers Portable Radio Other (*specify*):

2. Evacuation map is prominently displayed throughout the facility.

3. Individual(s) responsible for coordinating evacuation including spreading the alarm and confirming the business has been evacuated:

Chuck Williams, Director of Security

Michael Mack, Director of Property Operations

Manager on Duty along with Emergency Response Team

F. Earthquake Vulnerability

Identify areas of the facility where releases could occur or would require immediate inspection or isolation because of the vulnerability to earthquake related ground motion.

- Hazardous Waste/ Hazardous Materials Storage Areas Production Floor Process Lines
 Bench / Lab Waste Treatment Other

Identify mechanical systems where releases could occur or would require immediate inspection or isolation because of the vulnerability to earthquake related ground motion.

- Utilities Sprinkler Systems Cabinets Shelves
 Racks Pressure Vessels Gas Cylinders Tanks
 Process Piping Shutoff Valves Other:

UNIFIED PROGRAM (UP) FORM
CONSOLIDATED CONTINGENCY PLAN

SECTION I: BUSINESS PLAN AND CONTINGENCY PLAN

G. Emergency Procedures

Briefly describe your business standard operating procedures in the event of a release or threatened release of hazardous materials:

1. **PREVENTION** (prevent the hazard) - Describe the kinds of hazards associated with the hazardous materials present at your facility. What actions would your business take to prevent these hazards from occurring? You may include a discussion of safety and storage procedures.

See Attachments

2. **MITIGATION** (reduce the hazard) - Describe what is done to lessen the harm or the damage to person(s), property, or the environment, and prevent what has occurred from getting worse or spreading. What is your immediate response to a leak, spill, fire, explosion, or airborne release at your business?

See Attachments

3. **ABATEMENT** (remove the hazard) - Describe what you would do to stop and remove the hazard. How do you handle the complete process of stopping a release, cleaning up, and disposing of released materials at your facility?

See Attachments

UNIFIED PROGRAM (UP) FORM CONSOLIDATED CONTINGENCY PLAN

SECTION I: BUSINESS PLAN AND CONTINGENCY PLAN

IV. EMERGENCY EQUIPMENT

22 CCR, Section 66265.52(e) [as referenced by Section 66262.34(a)(3)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equip Category	2. Equipment Type	3. Location *	4. Description**
Personal Protective Equipment, Safety Equipment, And First Aid Equipment	<input type="checkbox"/> Cartridge Respirators		
	<input type="checkbox"/> Chemical Monitoring Equipment <i>(describe)</i>		
	<input type="checkbox"/> Chemical Protective Aprons/Coats		
	<input checked="" type="checkbox"/> Chemical Protective Boots	Eng Shop 1	2 pair
	<input checked="" type="checkbox"/> Chemical Protective Gloves	Eng Shop 1 & Storage 4	2 pair each location
	<input type="checkbox"/> Chemical Protective Suits <i>(describe)</i>		
	<input checked="" type="checkbox"/> Face Shields	Eng Shop 1 & Laundry 6	2 face shields
	<input checked="" type="checkbox"/> First Aid Kits/Stations <i>(describe)</i>	Numerous Locations throughout hotel

Additional Equipment (Use Additional Pages if Needed.)	<input type="checkbox"/> Underground Tank Leak Detection Monitors		
	<input type="checkbox"/> Other (describe)		

- * Use the Location Codes (LC) from the Site Map(s) prepared for your Contingency Plan.
- ** Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages. numbered appropriately, if needed.

HAZARD COMMUNICATION TRAINING PROGRAM

1. GENERAL

The OSHA Hazard Communication Standard (HCS) requires employers to prepare and implement a Hazard Communication Program (HCP). This written program is a summary of the Burbank Airport Marriott efforts and provides a reference for employees and management. A copy of this program will be filed in the Material Safety Data Sheet (MSDS) binder located in the employee entrance. The binder shall be made available to any employee upon request.

2. RESPONSIBILITIES

- A. The Director of Property Operations, Michael Mack shall be responsible for the overall administration of the program, ensure all aspects of the program are utilized properly to comply with the HCS, and provide assistance to all departments in regard to compliance with the HCS. This person is designated as the Hazard Material Coordinator (HMC).
- B. The HMC is responsible for the day-to-day compliance with HCS, maintaining the MSDS Binder, maintaining the Chemical List, issuing HazCom Update Memos, determining label data, and conducting compliance inspections at intervals and locations determined by the HMC, Director of Security and/or the Safety Committee.
- C. Director of Security, Chuck Williams and Members of the Safety Committee, along with Department Heads are responsible for compliance to the HCS within their departments. They shall ensure hazardous materials are not used by department employees until employees have successfully completed the Chemical Hazard Identification Program (CHIP) training, MSDS forms are on file, personal protective equipment (PPE) is available, employees trained on use of required PPE, and initiating disciplinary actions against department employees for non-compliance to the HCP. Employees with three documented infractions can be terminated. All Departments shall request an MSDS, as a Hazard Communication Program Condition of sale, for appropriate material. All MSDS received by any department shall be forwarded immediately to the HMC. The HMC shall be informed when a hazardous material is received without an MSDS. Each Department Manager shall be responsible for conducting HazCom and Chemical Safety training prior to employee use of a hazardous material. The HMC, Director of Security or members of the Safety Committee can assist if necessary.
- D. Employees who use hazardous material shall not use the material until they have successfully completed the training, checked the container label, checked the MSDS, and are using the PPE specified on the label. Employees shall use chemicals as directed and will not mix chemicals without supervisory permission. After taking appropriate first aid action, employees shall report personal exposure with hazardous material to the HMC.

3. HAZARD DETERMINATION

- A. Prior to use, all chemicals used at our facility will be evaluated in regard to physical and health hazards. Our facility will rely upon supplier-provided MSDS for the hazard determination. The provided MSDS will be reviewed for completeness by the HMC. The HMC shall make appropriate usage recommendations or develop a Special Work Practice/Procedure (S form) in regard to safe use of the chemical by employees.

4. MATERIAL SAFETY DATA SHEETS

- A. An MSDS form is to be obtained and on file in the MSDS Binder before a chemical is used by any employee. The MSDS will be filed by area of usage (i.e. – Laundry, Kitchen, etc.), and then alphabetically. The HMC is the only person permitted to add or remove MSDS forms from the binder. The (S) form, when required, shall be attached to appropriate MSDS. In the event an MSDS is not received with a chemical or the MSDS is not complete, the HMC will request an MSDS form from the manufacturer of the product. The MSDS binder shall be readily accessible to all employees. Employees need to obtain their supervisor's permission to review the MSDS. The Main MSDS binders are located at the employee entrance. Each Department has their own binder (or folder) which lists chemicals specific to their area or job function.

5. CHEMICAL LIST

- A. A list of hazardous chemicals shall be maintained by the HMC and distributed to all departments. Each employee shall receive a copy of the current Chemical List during the initial training. The list shall be reviewed for accuracy annually, updated and distributed by the HMC to each department. The current list will be posted in the appropriate work areas. The list shall contain all chemicals by department/work area, including the alphanumeric codes, common names, hazard severity ratings, PPE requirements, odors, physical appearance and indications of any carcinogenic/chronic health hazards. When a chemical is deleted from the list, the HMC shall draw a line through the deleted chemical and date and initial the line. When a new chemical hazard is added to our facility, the HMC will add the Chemical to the list and mark the chemical with an asterisk (*). The new Chemical List will also be filed in each MSDS binder. A file of old Chemical Lists and HazCom Update Memos shall be maintained by the HMC to meet the exposure records requirement of 29CFR1910.20.

6. LABELING

- A. Manufacturing labels will not be removed, defaced or covered. Except as described below, all containers in use are to be labeled with completed CHIP label. Containers include drums, large cans, large bottles, boxes, etc. Department Heads are responsible for affixing completed labels if necessary. Chemicals in containers must not be used until the label is affixed. The exceptions to this requirement are:
1. Portable containers do not require labels when chemicals are transferred from labeled containers for immediate use, provided the chemical will be used by the employee who performs the transfer and will be used during the employee's shift.
 2. Smaller containers do not require labels when they are removed from a labeled box or labeled rack, provided they will be used immediately by the employee who removed the containers and the material will be used during the employee's shift.
 3. If chemicals in an unlabeled container have not been completely used at the end of the employee's shift, the chemical must be returned to a labeled container, box or rack.
- B. As a general rule, pipes in our facility will not be labeled as they generally contain non-hazardous liquids and are only opened by maintenance personnel who are aware of the pipe contents.
- C. Employees must be able to identify the health, fire and reactive hazards of the container contents by reading the label. The affixed label will be the standard CHIP label and must provide the following information:
1. The identity of the hazardous chemical in the container. Identification shall be through the use of alphanumeric codes such as C-016 or F-114. The alpha part of the code will indicate the specific physical and/or health hazards the chemical presents. The codes used will be "C" for Corrosive, "R" for Reactive, "I" for Irritant, "F" for Flammable, "T" for Toxic and "S" for Sensitizer (CRIFTS). In the event a chemical presents more than one hazard, both codes shall be indicated, such as a chemical which is Corrosive and Reactive will be designated "CR". The first letter will indicate the most severe hazard. The numeric part of the code will indicate a specific chemical within the category. Large storage areas, such as labeled racks or boxes of small containers, must also list the common name of the chemical on the label. The alphanumeric code will also be on the Chemical List and MSDS.

2. Appropriate warning hazards. The immediate physical and health hazards shall be indicated by colored bands (Red = Fire, Blue = Health, Yellow = Reactive) on the label. The severity of the immediate chemical hazards will be indicated by the numbers "0 through 4", with a "4" indicating the most severe hazard rating. These acute hazard ratings do not include all hazards, but only the hazards that influence immediate safety considerations. Chemicals, which present chronic or carcinogenic health hazards, will be indicated with a circled letter "C" on the label.
3. Personal Protective Equipment (PPE). Required PPE will be indicated on the label by symbols. Each symbol will represent a specific item of PPE that must be used to prevent the employee's immediate exposure to the chemical.
4. All chemicals, which require a Special Work Practice/Procedure (S) will be marked with the circled letter "S" on the label.

7. CONTRACTORS

- A. Contractors working in facility areas where hazardous chemicals are used will be informed of the hazards within the area. The HMC will provide a contractor representative with copies of the current Chemical List and a brief description of how to read a "CHIP" label. The contractor is responsible for making his/her employees aware this information. Questions related to the hazardous chemicals shall be addressed to the HMC. Contractors will be required to provide a list (or copies of MSDS) of the hazardous chemicals they will use in our facility to the HMC. The HMC shall review the provided list/MSDS to ensure that there are no chemicals prohibited by our facility.

8. EMPLOYEE INFORMATION/TRAINING

- A. Posters. These will describe the hazards, severity of the hazards, PPE symbols, MSDS binder locations and hazards represented by the letters C, R, I, F, T and S. The posters will be posted in departments where hazardous material is present and in employee common areas. Employees will be provided "training examples" copies of the posters during training.
- B. HazCom Update Memos. These memos shall be used to alert employees to new chemical hazards which are introduced into the work area or when new hazard information is received. The memo format will include a completed label, the user location of the chemical, routes of entry, the hazards of the product, first aid procedure, symptoms of exposure, the physical characteristics of the chemical, indication of chronic or carcinogenic hazards, and post/pull dates. Each memo shall be posted two weeks. A "training example" of the memo will be provided to employees during training.
- C. Other Information. Employees shall be provided with a copy of the current Chemical List and trained on how to read a "CHIP" label.

D. Employee Training. Employees must successfully complete the required training program before they use any hazardous chemical. All employees, who routinely use chemicals in the performance of their job, shall complete the training. The training program has two parts: Hazard Communication and Chemical Safety.

1. The Hazard Communications portion of the training will include, as a minimum:

- A. Details of our facility's HCP;
- B. An explanation of the labeling system;
- C. An explanation of the MSDS;
- D. An explanation of how employees can obtain and use the hazard information;
- E. Methods which can be used to detect the presence or release of a hazardous chemical in the workplace; and
- F. Hazard categories of chemicals we use.

2. The Chemical Safety portion of the training will include, as a minimum:

- A. The physical and health hazards of chemicals in our facility;
- B. Routes of entry into the body and physical effects;
- C. Symptoms of exposure;
- D. Measures, including PPE, employees can take to protect themselves from the hazards; and
- E. Initial first aid steps to be taken for exposure.

WRITTEN HAZARD COMMUNICATION PROGRAM

PURPOSE

This written program describes how the Burbank Airport Marriott Hotel complies with the OSHA Hazard Communication (HAZCOM) standard. The Occupational Safety and Health Administration (OSHA) requires that the Burbank Airport Marriott Hotel implement the standards that are listed in 29 CFR 1910.1200 in the OSHA federal code of regulations. This standard provides all employees with information on any hazardous chemicals that are used in this hotel.

ASSIGNMENTS OF RESPONSIBILITY

The Director of Property Operations, Michael Mack, is responsible for the requirements of this standard throughout the hotel. Any changes to this written program are only done with the approval of the Director of Property Operations, the Director of Loss Prevention/Security and the General Manager.

Each Department Manager is responsible as a coordinator, for the implementation of all applicable sections of the standard in his/her department.

Each employee at this hotel is responsible for complying with all hotel procedures that this written program requires in order to comply with the Hazard Communication standard.

INVENTORY OF CHEMICALS

Each department that uses chemicals in this hotel maintains an active and current inventory of all chemicals known to exist in each area. Department Managers maintain this inventory with the assistance of their supervisors and staff. Inventories of all chemicals used in each department are reviewed and updated at least annually by Department Managers and whenever a new chemical is purchased or a chemical is discontinued.

The chemical inventories are included in the master HAZCOM binder, and in each binder completed for each department. Each inventory lists the product or chemical name, the use and the personal protective equipment (PPE) required for each chemical. These inventories advise employees of the chemicals that are being used in this hotel or in their work areas. The corresponding Material Safety Data Sheets will give the complete information on each chemical.

MATERIAL SAFETY DATA SHEETS

Material Safety Data Sheets (MSDS) are detailed instructional sheets that explain all the information needed about a chemical. This hotel maintains a MSDS on all chemicals that are used in this hotel. These MSDS are available to all employees to review as needed. Employees should check with their supervisors for help with the MSDS. Employees obtain copies of MSDS by notifying their supervisor.

MSDS are present in each department using chemicals. These are kept with the written program and chemical inventories. A master file of MSDS is maintained with the written program and chemical inventory by the Director of Property Operations and is located in the hallway at the employee entrance.

Each Department Manager evaluates the MSDS for serious hazards and appropriate use within the department to include a review to check for new information, completed sections and any personal protective equipment that is required. Each Department Manager is responsible for informing employees of any changes on the chemical inventory or the MSDS. Whenever possible, the hotel replaces seriously hazardous products with available chemicals that are less hazardous.

Department Managers maintain and keep MSDS current and available for employees to review. Department Managers add MSDS when new chemicals are purchased, replace MSDS with the most current updated sheets provided by vendors and remove and **file** MSDS on chemicals that are no longer used in this hotel. Department Managers maintain the MSDS by the product name that is on the labels and chemical inventory lists for easy reference.

All vendors must supply MSDS to this hotel. While it is the responsibility of the vendor to provide accurate MSDS to the hotel, it is the Department Managers' responsibility to verify that they have a current MSDS for all chemicals being used in their areas.

All MSDS are in English and include the information listed below:

- General Information
- Date of Issue
- Product Identification
- Physical Data
- Storage and Handling Information
- Spill and Leak Procedures
- Health Hazard Data
- Reactivity Data
- Hazardous Ingredients
- First Aid
- Personal Protective Equipment
- Fire and Explosion Hazards
- Regulatory Information
- References

HAZARD EVALUATIONS

A hazard evaluation of each chemical is done by the chemical manufacturer and the information is included on the MSDS. Department Managers and employees are the users and rely on the hazard information on the MSDS.

Hazard ratings can be determined by reading the three ratings that the chemical manufacturers have issued for each chemical. These include FIRE, HEALTH and REACTIVE ratings. These topics are color coded on labels for easy recognition. FIRE is coded red, HEALTH is coded blue and REACTIVE is coded yellow. These topics are given a rating from zero (0) to four (4). Four (4) is the most hazardous. The hazard ratings are categorized as follows:

4 - EXTREME

3 - SERIOUS

2 - SIGNIFICANT

1 - SLIGHT

0 - MINIMUM

The MSDS may also have additional, special types of hazards that are also listed under other sections of the MSDS. Listed here (on the following pages) are the definitions for hazard ratings set by the National Fire Protection Association (NFPA):

HAZARD RATING DEFINITIONS

FIRE

4 Very flammable. Flash point (lowest temperature at which ignition occurs) is below 73° F.

3 Capable of igniting under almost all normal conditions. Flash points between 73° F and 100° F.

2 Requires some pre-heating to ignite. Flash points above 100° F but below 200° F.

1 Require considerable pre-heating to ignite. Flash points of 200° F or higher.

0 Will not burn.

HEALTH

4 A single or repeated exposure can cause major or permanent injury.

3 Quick first aid action and medical treatment required to prevent major injury.

2 Can cause temporary or minor injury

1 Can cause irritation or minor reversible injury.

0 Little or no risk to health

REACTIVE

4 Very unstable. Can detonate at normal temperature and pressure

3 Unstable. Requires strong initiator or confined heating to detonate. Reacts explosively with water.

2 Normally unstable but will not detonate. Can have a violent chemical change or reaction with water

1 Normally stable but can become unstable if heated under pressure. Reacts with water, but not violently.

0 Normally stable. Will not react with water.

CONTAINER LABELING

Each Department Manager in this hotel is responsible for the accurate and consistent labeling of all containers that carry chemicals. Department Managers accept containers from vendors only with the required labels. If a shipment arrives at this hotel without the proper label or without the MSDS on file, the Department Manager is to either refuse the shipment or to impound the shipment until the vendor properly labels the containers. At no time is any container to be used in this hotel without the approved labels attached. Employees at this hotel are not to remove, damage or cover existing labels that have been applied by the vendor.

All employees are required to use chemicals in containers that are properly labeled. If employees see a container that does not appear to be properly labeled, they are to notify their supervisor immediately before using the container.

Any chemical that this hotel dispenses into a secondary container must have the following information on the new container:

- Name of the Chemical
- The FIRE, HEALTH, and REACTIVE ratings
- Special Hazard Information (if any)
- Name, address and phone # of chemical Mfg.

Chemicals that are used directly from the container in which the chemical was shipped do not need the above additional information. The vendor is responsible for printing this information on the label. The Department Manager is responsible, however, to ensure that the original containers are properly labeled with the labels that the manufacturer applied.

All labels must be legible, written in English, and prominently displayed on all containers.

EMPLOYEE TRAINING

The Director of Property Operations, along with the Director of Loss Prevention/Security is responsible to see that all aspects of the hotel's employee HAZCOM training program is being conducted. Each Department has the responsibility to conduct HAZCOM training for all employees in their department. Managers may designate assistants to participate in departmental training. Only departments that use chemicals conduct departmental HAZCOM training; however, all employees receive information on the Hazard Communication program from their Department Managers.

All employees that are exposed to chemicals in their work areas receive HAZCOM training before they begin work or when any new hazard is introduced in their department. HAZCOM review courses are conducted at least annually for all employees that use or are exposed to chemicals.

HAZCOM training for employees include the following:

- Overview of the OSHA Hazard Communication Standard (29 CFR 1910.1200)
- Review of this hotel's written program
- MSDS and their purpose
- How to read MSDS
- Container labeling
- How to read labels
- Methods and observations of chemical releases
- How to obtain and use hazard information
- Departmental Chemical Inventory
- Explanation of non-routine tasks
- Physical & Health hazards of chemicals
- Protective Measures

Department Managers conduct this training using one or more of the following training techniques:

- Class Instruction
- Review of Written Materials
- Audio Visuals
- Employee Participation
- Handouts

- Guest Speakers
- Oral and/or written testing
- Case Studies

All employees sign an "Acknowledgment of Training" form that verifies all of the above training was conducted. Furthermore, that they understand and retain the information reviewed in order to implement the requirements of this standard at all times. These signed forms are kept on file by the Human Resources staff. "Completion of Hazard Communication Training" certificates are issued to each employee that completes the initial training session. Annual refresher training will be documented by a sign in sheet only.

NON - ROUTINE TASKS

Non-Routine tasks are jobs that could be conducted in the hotel only on a very infrequent basis. This hotel usually hires an outside contractor for these types of jobs.

The Burbank Airport Marriott Hotel has currently determined that there are not any non-routine tasks or pipe systems with any type of hazardous chemical. All tasks that are conducted at this hotel have been determined to be routine and consistently done in regular operations of this facility.

Department Managers have the responsibility to monitor operations at all times to determine if any new task could be determined to be non-routine and hazardous in order to advise and train all employees at risk before conducting the non-routine task. All routine tasks conducted by employees at this hotel are covered in the HAZCOM training program for each department.

LOCATION OF WRITTEN PROGRAM

Any employee may review this written program, the chemical inventory or the MSDS by notifying their supervisor who will assist the employee if needed.

This written program, along with the chemical inventory, a MSDS for each chemical and the OSHA Hazardous Communication standard, is kept in each department that uses chemicals. The master copy of all the above is maintained by the Director of Property Operations and is located in the hallway at the employee entrance.

All copies of the written program, the MSDS and the chemical inventories are accessible and available 24 hours a day for all employees to review.

CONTRACTOR SERVICE REQUIREMENTS

Contractors who are hired to perform services that require chemicals to be brought on hotel premises must also comply with these standards. Department Managers are responsible for requesting that any contractor they hire provides a chemical inventory list, the appropriate MSDS and precautions of any chemical before the job begins. Department Managers review the MSDS provided by the contractors for special hazards or precautions that will provide protection for all employees at this hotel. Department Managers advise and train employees of new chemicals that are brought and used in the hotel by outside contractors.

Both contractors and their employees have access to this written program, chemical inventories and MSDS's. The hotel's existing HAZCOM program serves to provide information on chemicals that contractors and their employees could be exposed to in this hotel. The Department Manager hiring the contractor advises the contractor of the hotel's written HAZCOM program. The location of the HAZCOM manuals and the MSDS and the availability of each will also be communicated to the contractor. It is the responsibility of the contractor to advise their employees of this information.

The Department Manager maintains the option of stopping all work by the contractor if it is determined that the contractor is not complying with all requirements of this HAZCOM standard.

PERSONAL PROTECTIVE EQUIPMENT

Personal protective equipment must be worn by all employees that work with hazardous chemicals and used as indicated on the MSDS. While few chemicals at this location are hazardous, PPE such as goggles, gloves, aprons and dust masks are made available to employees whenever required by the Department Managers. Employees may request appropriate personal protective equipment for any job that they feel may expose them to hazardous chemicals.

**Unified Program Consolidated Form
CONSOLIDATED CONTINGENCY PLAN
SECTION 1: BUSINESS PLAN AND CONTINGENCY PLAN
ATTACHMENTS**

C. Private On-Site Emergency Response Team

- a) The Emergency Response Team (ERT) consists of pre-appointed staff members from all 3 shifts to give us coverage 24 hours a day, seven days a week.

They consist of the following:

- MOD (manager on duty)
 - Security Officer
 - Engineer
 - Front Desk Representative
 - Housekeeper
- b) Notification to in-house ERT is via pagers, telephones and/or two-way radios from the hotel PBX station, which is staffed 24 hours a day.
- c) Additional outside ERT's are contacted through the hotel PBX station to 911; directed to the City of Burbank Hazardous Material Squad as part of the City of Burbank Fire Department compliment.

G. Emergency Procedures

1) Prevention

- a) While most of the hazardous materials at our site are Irritants or Corrosives, there are a few that cause concern regarding chronic health and/or flammability issues. The majority of the hazardous materials are in use in the following departments: Engineering, Laundry/Housekeeping, and both Kitchens.
- b) Safe handling procedures are in adherence to OSHA Hazard Communication Standards and MSDS guidelines issued by the product manufacturer. These procedures are upheld through training sessions with employees. Employees who use hazardous material shall not use the material until they have successfully completed the training, checked the container label, checked the MSDS, and are using the PPE specified on the label. Employees shall use and store chemicals as directed and will not mix chemicals without supervisory permission.

- c) Monthly Safety Committee meetings scheduled with key Administrative personnel and department managers which review the following:
 - safety hazard and the prevention thereof
 - “Safety Topic of the Month” Training which is then communicated to each manager and employee.
 - worker’s compensation claims and investigation into root cause of accident
 - Safety Suggestions submitted from employees to Administrator
 - review all employee injuries
 - receive additional guidance & training from our insurance representative
- d) Each department has Material Safety Data Sheets (MSDS) data for their own department’s chemicals and copies are available to all employees from the main binders (for entire facility) at the Employee entrance area for access.
- e) All hazardous material containment vessel kits, safety vests, protective gloves, protective suits and goggles are stored in the HazMat closet (storage near Parlor 129, #4 on site map, North end of East Tower) or in the Engineering Shop (#1 on site map, South end of East Tower) and issued by the Security Department and/or the Engineering Department.

2) Mitigation

- a) Notification to in-house ERT is via pagers, telephones and/or two-way radios from the hotel PBX station, which is staffed 24 hours a day.
- b) Additional outside ERT’s are contacted through the hotel PBX station to 911; directed to the City of Burbank Hazardous Material Squad as part of the City of Burbank Fire Department compliment.
- c) MOD (Manager-On-Duty) will coordinate with all local, county and state Emergency Response Organizations. Contact Insurance Carrier.
- d) After taking appropriate first aid action, employees shall report personal exposure with hazardous material to the Security Department, who will then contact the Hazardous Material Coordinator, Bill Gregory – Director of Property Operations. As part of HazMat internal emergency procedures Security or HMC is responsible for checking MSDS manual for further appropriate action.
- e) Threatened release: Activate Hazardous Material internal procedures (2a-2d). Place threatened vessel in new containment drum. Contact Hazardous Waste Contractor if needed.

Response to release: Activate Hazardous Material internal procedures. Contact Fire Department. Obtain containment vessel kit from Security or

Engineering, contain spill, clean up spill with protective clothing and place into approved containment drum. Contact Hazardous Waste Contractor if needed.

3) **Abatement**

- a) Procedure is the same as described above, only with Hazardous Waste Contractor playing a larger role. Hilton Hotels Corporation may also be more involved regarding legal and/or media issues.

If evacuation is required the following steps will be taken.

- In the event of an internal or external disaster, employees are notified through the long range pager system, two-way radios and the public address paging system.
- After the employees receive notice, they are instructed to meet at the pre-determined location, the Catering Office, for further instructions.
- The ERT members assign floor monitors to start the evacuation procedures on each guest floor. Two floor monitors per guest floor will knock on doors and monitors stationed in stairwells will assist guests to safe area-Southeast corner of parking lot.
- The ERT members will assign additional staff to evacuate all meeting and function rooms, pool areas, employee back of house areas and the restaurant.

RECORDKEEPING

Storage and documentation of training materials and records is as follows:

- In Human Resources Office:
 - Current employees' training records, retained indefinitely
 - Former employees' training records, retained for three years after termination
 - Copy of training programs, introductory and continuing
- In Engineering Shop:
 - Current copy of Consolidated Contingency Plan
 - Reported hazardous material releases
 - Hazardous materials storage area inspection reports
 - Emergency response drill documentation
 - Copy of training programs, introductory and continuing

ATTENTION: MICHAEL MACK

**Re: 00247 - BURBANK AIRPORT MARRIOTT HOTEL
2500 N HOLLYWOOD WAY**

This letter is to notify you that your business is in violation of California Health & Safety Code, Chapter 6.95, Article 1 and Burbank Municipal Code §9-1-2701-5.1 which requires all businesses storing, using, or handling hazardous materials in quantities that meet or exceed the thresholds established in Health & Safety Code §25503.6 to submit a completed Hazardous Materials Inventory Disclosure Statement annually.

Complete the forms requested in September 2008 for the above noted business and sign where indicated. Return ORIGINAL forms to the BURBANK FIRE DEPARTMENT and BE SURE TO RETAIN A COPY FOR YOUR FILES.

Failure to comply will result in a loss of your permit to operate as a business, a court appearance and issuance of a fine. You are required to return the required forms listed below no later than ten business days from the date of this notice.

The Hazardous Materials Section

The Consolidated Contingency Plan Section

The Site Map

Forms may be downloaded from the Burbank Fire Department website at <http://www.Burbankfire.us>. If you are unable to download the required forms from our website, have questions, or need assistance, please contact the Burbank Fire Prevention Bureau at (818) 238-3473.

Thank you,

**Jorge L. Martinez
Deputy Fire Marshal**

MICHAEL MACK
BURBANK AIRPORT MARRIOTT HOTEL
2500 N HOLLYWOOD WAY
BURBANK CA 91505

Subject: **HAZARDOUS MATERIALS INVENTORY DISCLOSURE SUBMITTAL FOR 2009**
00247 – BURBANK AIRPORT MARRIOTT HOTEL
2500 N HOLLYWOOD WAY

California Health & Safety Code, Chapter 6.95, Article 1 requires all businesses that store, use, or handle hazardous materials in quantities that meet or exceed the thresholds established in Health & Safety Code §25503.6 (as indicated below), to submit a completed Hazardous Materials Inventory Disclosure Statement annually. Our records indicate that you meet these requirements.

The established thresholds are a hazardous material or a mixture containing a hazardous material in an **aggregate quantity** at any one time during the reporting year equal to or greater than a **TOTAL weight of 500 pounds**, or a **TOTAL volume of 55 gallons**, or a **TOTAL volume of 200 cubic feet** at standard temperature and pressure for compressed gas, or the threshold quantity (if less than 500 pounds) for regulated substances. A mixture that contains one percent (1%) or more of a hazardous ingredient is a hazardous material. A mixture that contains one tenth of one percent (.1%) or more of a carcinogen is a hazardous material. The *California Accidental Release Prevention (CalARP) Program* requires all regulated substance handlers to register with the Burbank Fire Department. Our records indicate that you meet these requirements.

These Hazardous Materials Inventory Disclosure forms are currently part of a Consolidated Permit Package issued by the Los Angeles County Certified Unified Program Agency (LACoCUPA). Please carefully read the instructions, complete the required forms, and sign where indicated. In order to comply with LACoCUPA's new reporting requirements, it is requested that **ORIGINAL** forms be returned to the Burbank Fire Department with original signatures by **November 26, 2008**. Failure to submit a properly completed and signed Hazardous Materials Inventory Disclosure Submittal for 2009 by the due date could result in civil penalties. Please send your properly completed forms to:

**Burbank Fire Department
Hazardous Materials Section
311 East Orange Grove Ave
Burbank CA 91502-1221**

BE SURE TO RETAIN A COPY FOR YOUR RECORDS.

- ✓ **Business Owner / Operator Identification page *and* Business Activities page**
Everyone is required to submit a signed Business Owner / Operator Identification page annually. This form contains facility information currently on file. If there are any blanks, please complete this information. If there are any changes, please cross out the filled-in information and write in the new information.

Everyone is required to complete and submit the Business Activities page annually.

✓ **Hazardous Materials Inventory – Chemical Description Forms**

Everyone is required to properly complete and submit Hazardous Materials Inventory – Chemical Description Forms. The last general request for these forms was in 2006. **Once properly completed forms have been received, a recertification letter may be sent for two consecutive years requesting that the status of the information previously submitted is currently correct.** Recertification forms will not be accepted for 2009. Please refer to the notes below to facilitate completing the forms correctly.

NOTE #1: The Largest Container (Box #215) should reflect the amount of your largest container for a particular chemical, i.e., if you have three different size containers for window cleaner which are 5 Gallons, 10 Gallons, and a 55 Gallon Drum, your largest container would be 55 Gallons.

NOTE #2: The maximum Daily Amount (Box #218) for the above referenced chemical would be 70 Gallons, which would be the total of the three containers (55+10+5). Even if your containers are not full, this would be the Maximum Daily Amount because it is the maximum amount you could have if the containers were full.

✓ **Consolidated Contingency Plan and Site Map**

Everyone is required to properly complete and submit for 2009 a signed Consolidated Contingency Plan with Site Map using the proper symbols as provided in the instructions. The last general request for these forms was in 2006. **Once the properly completed forms have been received, a letter will be sent for the next two years requesting certification that the information previously submitted is currently correct.**

✓ **Regulated Substance Registration**

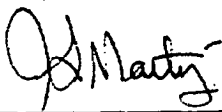

Any business that has above threshold quantities of a regulated substance in a process shall fill out the Regulated Substance (RS) Registration Form. A list of regulated substances is available along with the registration form can be found on our website below.

✓ **Hazardous Waste Forms**

Please send properly completed forms to: Bill Westcott, LA County Fire Department, Health HazMat/SF Valley, 14425 Olive View Drive, Sylmar CA 91342.

Forms may be downloaded from our website at www.Burbankfire.US. These forms may be completed on your computer by using Microsoft Word. If you are unable to download the required forms from our website, or have questions or need assistance, please contact the Burbank Fire Prevention Bureau at (818) 238-3473.

Thank you for your cooperation.

Jorge Martinez, Deputy Fire Marshal
Fire Prevention Bureau

FIRE DEPARTMENT

March 20, 1992

Mr. Kevin E. Shephard
Engineering Manager
Burbank Airport Hilton Hotel
2500 N. Hollywood Way
Burbank, CA 91505

Dear Mr. Shephard:

On December 23, 1991 the Burbank Fire Department requested that you submit a Hazardous Materials Inventory Form within 30 days. The Burbank Fire Department received your Inventory Form on March 10, 1992. Upon review of this form it was found to be incomplete. The following corrections are needed:

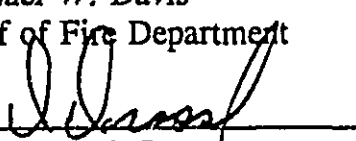

- During our last inspection of your business, several chemicals were noted that were not listed in your last submittal. Specific reference is made to the cylinders of carbon dioxide and the diesel fuel for your generators. Please check your inventory and resubmit corrections to your Hazardous Materials Inventory Form.

An additional seven days has been given to complete and submit a new form. Failure to provide this information by April 3, 1992 may result in civil penalties up to \$2,000 per day. Should this violation result in, or significantly contribute to a fire or other emergency, the business may be assessed the full cost of cleaning up and disposing of the hazardous materials.

If you have any questions contact the Fire Prevention Bureau, Hazardous Materials Section at (818) 953-8773.

Thank you for your cooperation.

Michael W. Davis
Chief of Fire Department

RE: Disclaimer & Notice of Status Change:

Dear Pat. Chief Whittier HW

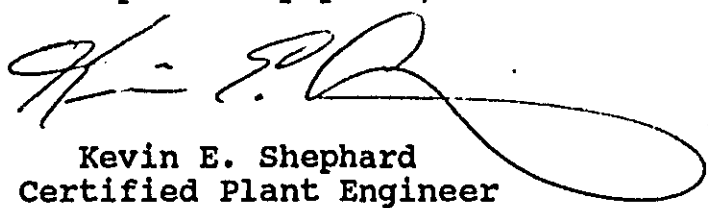

Good day. Please be advised that as of May 20, 1993 I am not involved or associated with the day-to-day facility engineering & maintenance management operations, decisions, Fire-Life/Safety, Fire Alarm Response with the City of Burbank F. D., Hazardous Material, Disaster Response or adherence to any NFPA, Dept. of Bldg. & Safety, AQMD, HazMat, ADA, Titles 22, 24 codes and/or compliances concerning the Burbank Airport Hilton Hotel and Convention Center at 2500 Hollywood Way, Burbank, California 91505.

I will however remain associated with their corporate office as an engineering consultant through August of 93. Please remove my name for accountability and my engineering license number from your files (if applicable) concerning your, "Contact Person" for the hotel as of May 20, 1993.

Please direct all correspondence to Mr. Tim A. Ellis the General Manager who will forward you to the proper in-house contact person.

Thank you for your time in this matter and if you have any questions please feel free to contact either Mr. Ellis or myself.

Respectfully yours,

Kevin E. Shephard
Certified Plant Engineer

*Chief,
Please pass
this info. on to the
Hay Mat. official
in your department.
Thanks,
Kevin*

FIRE DEPARTMENT

February 06, 1992

Mr. Keven Shopland
Burbank Hilton
2500 N Hollywood Way
Burbank, CA 91505

Dear Mr. Keven Shopland:

A recent review of our fire prevention inspection records indicates that you have not submitted a Hazardous Materials Inventory Disclosure Statement for the above premises.

The Burbank Fire Department requested on January 02, 1992 that you submit a Hazardous Material Inventory Form within 30 days. As of this date, we have not received your Inventory Form. You have been given an additional seven days to complete and submit this form. Failure to provide this information by February 16, 1992 may result in civil penalties of up to \$2,000 per day. Should this violation significantly contribute to an emergency which could arise, your business shall also be assessed the full cost of cleaning up and disposing of the Hazardous Materials. [BMC Section 15-180.103; CCR Title 19 (2729); California Health and Safety Code, Division 20, Chapter 6.95, Section 25514]

RECEIVED
BURBANK FIRE DEPARTMENT

February 26, 1992

MAR 2 1992
AM 7 8 9 10 11 12 1 2 3 4 5 6 PM

Dear Inspector Burns,

Good day. Per our phone conversation today I would like to confirm my request for a further extension for submitting the, Hazardous Materials disclosure list from our company. The reason and request for the additional extension is as follows;

After the hotel had received our annual Fire Department tour & inspection by Captain Towbridge in January 1992 I received the Hazardous Materials disclosure form package through our in-house mail system.

At that time I started to read through the information and process the forms accordingly but was informed that I should turn this over to our in-house Director of Security and Life/Safety Manager, Mr. Jake DeLeon.

Approximately two days passed when I contacted the Fire Prevention bureau for an extension so Mr. DeLeon could complete the package. We were given an extension from 02-01-92 to 02-21-92 which I re-confirmed in a letter to the bureau.

Approximately two weeks passed when I was asked to now assist in the gathering of information and to now complete the mentioned Hazardous Materials disclosure package. I received the package back to my department on Tuesday, February 25, 1992.

Due to our new procedures and in-house communications I again respectfully request a final extension to complete in its entirety the City of Burbank's Hazardous Materials Disclosure List for the Burbank Airport Hilton Hotel and Convention Center.

Per our mutual agreement, the final due date will be March 10, 1992.

*OK!
DHB S*

Respectfully yours,

Kevin E. Shephard, CPE
acting Chief Engineer

Dear Inspector Drossel,

Per our conversation today, I would like to respectfully request an extension to February 21, 1992 to complete the Hazardous Inventory Discloser statement for, the Burbank Airport Hilton Hotel.

Mr. Jake de Leon will be submitting the completed statement to your attention by the 21st. Mr. de Leon is our Director of security and life/safety.

If you have any questions or concerns, please contact Mr. de Leon or myself at the following number (818) 843-6000.

Respectfully submitted,

Kevin Shephard

Email address on file: cchaffee@pyramidhotelgroup.com

Per Health and Safety Code Chapter 6.95, § 25508 - Hazardous Material submittals for Fiscal Year 2018-19 to the Burbank Fire Department (BFD) must be made through the California Environmental Reporting System (CERS) (<http://cers.calepa.ca.gov>) by March 1, 2018.

All sections are required to be submitted this year including Facility Information, Hazardous Materials Inventory and Site Map, Emergency Response and Training Plans, and Underground Storage Tanks (if applicable).

Some important things to note:

- **If there are no changes**, please refer to the CERS Guidance Document on the back of this letter.
- **For more information and various BFD/CERS forms**, visit www.burbankfire.us/cers.
- **If you need individual help** with your submission, a fee of \$97 per hour (minimum 1 hour) will be charged to assist businesses. Please call (818) 238-3473 to set up an appointment.
- **Questions and comments** regarding CERS can be sent to the following e-mail address: BurbankCERS@burbankca.gov.

Sincerely,

A handwritten signature in blue ink that reads "Daniel J King".

Danny King, Fire Inspection Manager
Burbank Fire Department

CERS Guidance Document – NO CHANGES

LOG IN TO CERS:

1. Go to <http://cers.calepa.ca.gov> and click on “Business Portal Sign In”.
2. Enter your CERS account Username, click “Next”, then enter your password.

START SUBMITTAL:

1. Click on the “Start/Edit Submittal” button.
2. At the top of the page is the option below. Click on “Create All HMBP Submittal Elements”.

If there has been **NO CHANGE** in the HMBP submittal elements (*Facility Information, Hazardous Material Inventory, and Emergency Response/Training Plans*) since the last submittal, you may select the following button to prepare them.

Create All HMBP Submittal Elements

3. This dialog box will appear.
Click the Confirm button.

HMBP Submittal Elements Creation Confirmation

By selecting the Confirm button, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; **and**
- There has been no change since the last submitted HMBP Submittal Elements

Confirm

Cancel

4. Click Add Comment to Regulator (circled in red) for each section. Type in NO CHANGE.
5. Click the Submit button in either the Hazardous Materials Inventory or Emergency Response and Training Plans section.

MONITORING PROCEDURES

The information on this monitoring program are conditions of the operating permit. The permit holder must notify the City of Burbank Fire Department Aboveground Storage Tank Unit within 30 days of any changes to the monitoring procedures, unless required to obtain approval before making the change.
Required by Uniform Fire Code Article 79

A. Describe the frequency of performing the monitoring:

Tank weekly

Piping weekly

B. What method and equipment, identified by name and model, will be used for performing the monitoring:

Tank Visual inspection of tank and containment tub

Piping Visual inspection of piping to generators

C. Describe the location(s) where the monitoring will be performed, include plot plan.

attached

D. List name(s) of responsible person (s) performing the monitoring and/or maintaining the equipment.
Randolph Caravantes - Director of Property Operations

E. Explain the reporting format for all monitoring performed.
Tank maintenance log
Piping maintenance log

F. Provide the preventative maintenance schedule for the monitoring equipment. (Minimum of a 12 month interval.)
Annual maintenance performed by Commercial Filters, Inc.
818-986-6803

G. Describe the training necessary for the operation of AST system, including piping, and the monitoring equipment.

**EMERGENCY RESPONSE PLAN
ABOVEGROUND STORAGE TANK MONITORING PROGRAM**

This monitoring program must be kept at the AST location at all times. The information on this monitoring program are conditions of the operating permit. The permit holder must notify the City of Burbank Fire Department Aboveground Tank Unit within 30 days of any changes to the monitoring procedures, unless required to obtain approval before making the changes.
Required by Uniform Fire Code Article 79.

1. If an unauthorized release occurs, how will the hazardous substance be cleaned up?

Release remediation by licensed contract services company

Note: The City of Burbank Fire Department Aboveground Storage Tank Unit must be notified within 24 hours, if the released hazardous substances impact the environment, increase the fire or explosion hazard, are not cleaned up from the secondary containment system within 8 hours, or deteriorate the secondary containment.

2. Describe the proposed methods and equipment to be used for removing and properly disposing of any hazardous substances.

Supplied by contractor

3. Describe the location and availability of the required cleanup equipment in item 2 above.

Supplied by contractor

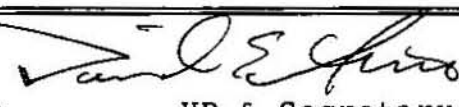

4. Describe the maintenance schedule for the cleanup equipment.

Maintenance by contractor

5. List name(s) and title(s) of the person(s) responsible for authorizing any work necessary under the response plan.

Adam Keller General Manager
Randolph Caravantes - Director of Property Operations

SUBJECT: **00247 - BURBANK AIRPORT MARIOTT HOTEL**
2500 N HOLLYWOOD WAY

CERS ID: **10229452**

EMAIL ADDRESS ON FILE:

Hazardous Material submittals for Fiscal Year 2014-15 to the Burbank Fire Department (BFD) must be made through CERS (<http://cers.calepa.ca.gov>) by April 15, 2014.

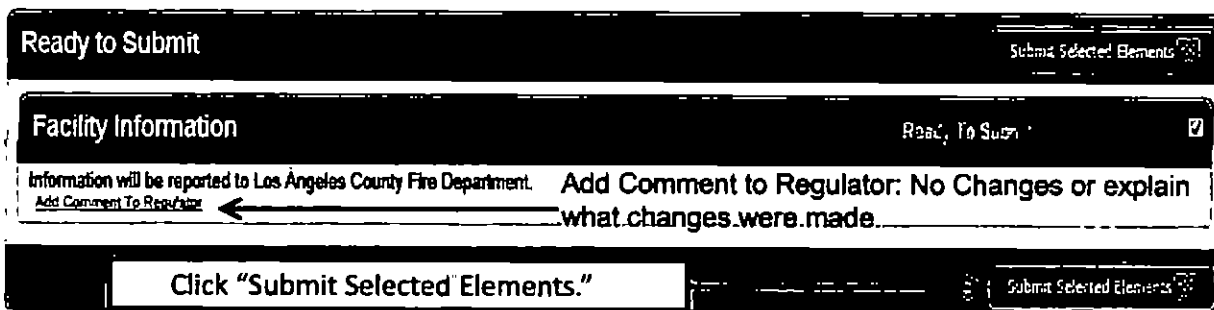

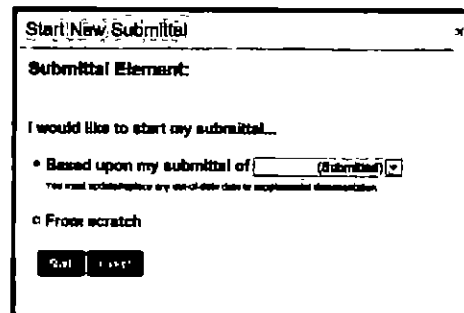

What is required for this year:

Facility Information

Hazardous Materials Inventory and Site Map

Emergency Response/Contingency Plan and Employee Training Plan

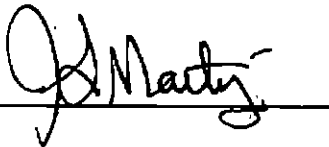

- It is suggested to base a new submittal on the previous submittal. (See Dialog Box to the Right)
- Verify that all the information is current and correct. Make changes as needed.
- BFD requires that a Site Map, Emergency Response/Contingency Plan, and Employee Training Plan be uploaded into CERS this year.
- After clicking Submit, a link will appear that says "Add Comment to Regulator". Please click on this link and let us know what has been changed. If there were no changes, please indicate this as well. (See Dialog Box Below)

A few important things to note:

1. The BFD will provide two **FREE** CERS training sessions on March 6, 2014. A minimum number of people will be required to RSVP for the trainings in order for them to be held. Please call 818-238-3473 to RSVP for a training session.
2. If you need individual help with your submission, a fee of \$91 per hour (minimum 1 hour) will be charged to assist businesses. Please call 818-238-3473 to set up an appointment.
3. Questions and comments regarding CERS should be sent to the following e-mail address: BurbankCERS@burbankca.gov.
4. A CERS Guidance document can be found attached to this letter.
5. For more information on the Hazardous Materials program, CERS, and various BFD/CERS forms, visit BFD's website at: <http://www.burbankfire.us/divisions/fire-prevention-bureau>.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Martinez", is written over a horizontal line.

Jorge Martinez, Deputy Fire Marshal
Burbank Fire Department

CERS Guidance Document

FIRST TIME CERS USERS:

Establish CERS Account

1. Go to <http://cers.calepa.ca.gov>
2. Under the green "Businesses" heading, click on "Business Portal Sign In".
3. Select "Create New Account" under the "New to CERS" heading.
4. Complete the form to create your account and select the "Create my Account" in the lower right corner of the form.
5. You will be brought to the "Account Status" page, with notification that your account activation is pending.
6. You will receive an email from the CERS Administrator to the e-mail address you provided containing instructions to follow in order to complete the activation.
7. To verify your email address and complete this account request, select the link contained in the CERS Administrator email for authorization and completion of the activation process.
8. You will be brought to the "Account Status" page, with notification that your account activation is completed.

Log-in to CERS

1. Go to <http://cers.calepa.ca.gov> and click on "Business Portal Sign In".
2. Enter your CERS account Username, click "Next", then enter your password.

NOTE: If there is not a CERS ID # located at the top of the BFD mailed letter or if the business being added is NEW, then your facility has not been populated to CERS. You will need to create a new facility.

NOTE: If there is a CERS ID # located at the top of the BFD mailed letter DO NOT create a new facility. Your facility already exists in the database – follow the below instructions.

Existing Facility

Los Angeles County has populated most of the currently regulated City of Burbank facilities into the CERS database. It is important to search for your facility prior to entering your business as a new facility. Click on the green "Search Existing Businesses/Facilities" button. Please use the CERS ID # located at the top of the mailed letter to search for your facility. Note that the business name may be different, but the address will be correct.

1. When your facility is displayed in the search results table, select the appropriate check box to the left of the CERS ID #, and then click the green "Request Access" button.
2. This request will be sent to Los Angeles County. An email will be sent to the account's email address once access has been granted. Once access is granted, go to <http://cers.calepa.ca.gov> and log in as usual under the "Business Portal Sign In". The facility information will now show on the Home page.

FOR FIRST TIME SUBMITTALS AND EDITING SUBMITTALS:

To Start Submittal, click on the green "Start/Edit Submittal" button. For editing previous submittals, select "I would like to start my submittal... Based upon my submittal of".

To Add Facility Information

1. Click on the green "Start" button in the Facility Information grey bar.
2. CERS will open the Business Activities form. Click the green "Edit" button to edit information, and the "Done" button when complete.
3. Next, CERS will open the Business Owner/Operator Identification page. Complete all information by clicking the "Edit" button to edit information, and the "Done" button when complete.

To Add Chemical Inventory

1. Click on the green "Start" button in the Hazardous Materials Inventory grey bar.
2. Then click on "Add Material" button on right-hand side of screen.
3. Search for chemical by chemical name or CAS#.
4. When the chemical is found, click on the green "Add" button to begin adding information. If the chemical does not show up in the search, click on the green "Unable to Find Material/Add material" button.
5. Fill in all fields for each chemical.
6. Click "Done" when complete, or "Add Another Material" to add more chemicals.

To Add Site Map

1. Site maps can be uploaded in PDF, Word, or Excel format to CERS. For instructions, a list of items required on the map, and a blank form visit BFD's website at: <http://www.burbankfire.us/divisions/fire-prevention-bureau>.
1. From the Chemical Inventory screen, click the green "Add Site Map" button. From the Hazardous Materials Inventory section, click on the link for "Site Map (Official Use Only)".
2. On the left hand side, "Document Options", select "Upload Document". Click the Browse button, find the document file, and click "Open".
3. Click "Save & Finish".

To Add Emergency Response/Contingency Plan & Employee Training Plan

2. Please upload these documents in PDF, Word, or Excel formats.
3. From the Emergency Response and Training Plan section, click on the link for "Emergency Response and Contingency Plan" or for a fillable form visit BFD's website at: <http://www.burbankfire.us/divisions/fire-prevention-bureau>.
4. On the left hand side, "Document Options", select "Upload Document". Click the Browse button, find the document file, and click "Open".
5. Click "Save & Finish".
6. Repeat steps for the Training Plan.

To Add Underground Storage Tank Information (if applicable)

Please ensure the following information is completed if applicable or marked Exempt if your business has Underground Storage Tanks (for fillable forms visit BFD's website at: <http://www.burbankfire.us/divisions/fire-prevention-bureau>):

- Facility Operating Permit Application
- Certification of Financial Responsibility
- Letter from Chief Financial Officer
- Tank Information/Monitoring Plan
- Response Plan
- Owner Statement of Designated UST Operator Compliance
- Monitoring Site Plan
- Owner/Operator Written Agreement

Ready to Submit all Sections

1. Select the green "Submit" button on either the Hazardous Materials Inventory or Emergency Response and Training Plans grey bar.
2. You will be taken to the Business Submittal Verification page. Review the Submittal completeness Verification, add comments to regulator if applicable, and once it has been verified that all items are complete, select the "Submit All Selected Elements" button. If you realize you have submitted your data in error, please call the BFD at 818-238-3473 immediately to let us know and we will reject your submission so you may continue to work on your submittal.

BURBANK CA 91505

SUBJECT: CERS # 10229452 – Burbank Airport Marriott Hotel, 2500 N Hollywood WAY

Burbank Fire Department (BFD) records show that the business listed above has not complied with the Hazardous Materials California Environmental Reporting System (CERS) as of April 15, 2013.

The mandatory deadline for submission of this information is **May 1, 2013**.

Late or non-submittals by Burbank businesses will be subject to a fine and a notice of violation for non-compliance. Avoid these penalties by signing-in, entering and submitting this data through CERS before the May 1, 2013 deadline.

Questions or concerns can be emailed to BurbankCERS@burbankca.gov, where they will be answered promptly. The BFD encourages its local businesses to attend Los Angeles County Fire Department training sessions provided free of charge. Information, training dates, and registration can be found at http://fire.lacounty.gov/HealthHazMat/cers_calendar.asp.

Please confirm receipt of this letter by signing and dating the section below and mailing it in the provided envelope. Thank you for the cooperation and support that all Burbank businesses with hazardous materials have shown during this transitional time period.

Sincerely,

Jorge Martinez, Deputy Fire Marshal
Burbank Fire Department
Hazardous Materials Division

CERS ID #: **10229452**
EMAIL ADDRESS ON FILE: **cchaffee@pyramidhotelgroup.com**

In accordance with the Health and Safety Code, as of January 2013 Hazardous Materials Business Plan information shall be submitted electronically to the California Environmental Reporting System (CERS): <http://cers.calepa.ca.gov>. The Burbank Fire Department (BFD) is currently ready to receive and review information entered into this website. **Submittals to the BFD must be made through CERS by March 1, 2013.**

The BFD encourages its local businesses to attend Los Angeles County Fire Department (LACoFD) training sessions provided free of charge. Information, new training dates, and registration can be found at http://fire.lacounty.gov/HealthHazMat/cers_calendar.asp. Training dates have been scheduled as follows:

- January 17th – Los Angeles, CA
- January 24th – Lawndale, CA
- February 15th – Burbank, CA

The following are required in order to access CERS:

1. **An e-mail address:** Websites such as www.google.com, www.yahoo.com, and www.hotmail.com provide free e-mail addresses. (If you have provided us with your e-mail address, we have included it in the subject line above. If your e-mail address has changed, please send an e-mail to BurbankCERS@burbankca.gov with the new e-mail address information.)
2. **Access to a computer:** If a personal computer is not available, computers at all Burbank libraries are free to use for those with a Burbank Library card or a valid photo identification card. Access to a computer will also be provided at the BFD during designated hours for a fee.
3. **Web browser:** CERS supports many common current browsers - Internet Explorer 8+, FireFox 3.6+, current versions of Google Chrome and Safari.

4. **Current, accurate, and detailed inventory of chemicals** that meet California Code of Regulations - Title 27 threshold quantities: *weight of 500 pounds, volume of 55 gallons, or a volume of 200 cubic feet or 1,000 cubic feet depending on the gas.*

The attached page represents a step-by-step guide on how to create a username and password, log-in, and start adding information. The LACoFD has already populated certain business information into the website such as business name, address, owner, and Underground Storage Tank information (if applicable). If there is a CERS ID # provided in the subject line of this letter, you will be able to access this populated information. The information that each populated Burbank business needs to input is their emergency contacts and their chemical information. For more details, please see the attached page.

Consolidated Contingency Plans and Site Maps will NOT need to be uploaded online. The BFD requires these documents readily available onsite at the business, for inspections by a BFD Inspector.

A few important things to note:

1. If unable to attend a LACoFD training opportunity and unable to log-in or navigate the website, the BFD will charge a fee of \$91 per hour (minimum 1 hour) to help businesses setup their account and learn how to navigate the website. These one-on-one trainings are limited to the following business days and hours:

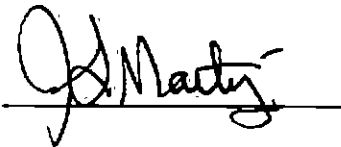

Tuesday through Thursday, 9am – 12pm and 1 – 3pm.

Please call the BFD after January 2, 2013 at 818-238-3473 to set up an appointment.

2. Questions and comments regarding CERS should be sent to the following e-mail address: BurbankCERS@burbankca.gov.
3. For phone inquiries, contact the BFD Fire Prevention Bureau at 818-238-3473.
4. Additional CERS training materials and CERS information can be found on BFD's Fire Prevention Bureau website at <http://www.burbankca.gov/index.aspx?page=1028>.
5. Most of you will also be receiving a letter from Los Angeles County Fire Department letting you know that they have populated CERS with your information. Please refer to their letter for further instructions.

The BFD thanks you for your time and patience during this transition.

Sincerely,

Jorge Martinez, Deputy Fire Marshal
Burbank Fire Department

BURBANK FIRE DEPARTMENT

CERS Guidance Document

Establish CERS Account

1. Go to <http://cers.calepa.ca.gov>
2. Under the green "Businesses" heading, click on "Business Portal Sign In".
3. Select "Create New Account" under the "New to CERS" heading.
4. Complete the form to create your account and select the "Create my Account" in the lower right corner of the form.
5. You will be brought to the "Account Status" page, with notification that your account activation is pending.
6. You will receive an email from the CERS Administrator to the e-mail address you provided containing instructions to follow in order to complete the activation.
7. To verify your email address and complete this account request, select the link contained in the CERS Administrator email for authorization and completion of the activation process.
8. You will be brought to the "Account Status" page, with notification that your account activation is completed.

Log-in to CERS

1. Go to <http://cers.calepa.ca.gov> and click on "Business Portal Sign In".
2. Enter your CERS account Username, click "Next", then enter your password.
3. You will be brought to the CERS "Business Home" page.

NOTE: If there is NOT a CERS ID # located at the top of the letter below the SUBJECT line, then your facility has not been populated to CERS. You will need to create a new facility.

NOTE: If there is a CERS ID # located at the top of the letter below the SUBJECT line, DO NOT create a new facility. Your facility already exists in the database – follow the below instructions.

Existing Facility

Los Angeles County has populated most of the regulated City of Burbank facilities into the CERS database. It is important to search for your facility prior to entering your business as a new facility. Please use the CERS ID # located at the top of the letter to search for your facility. Note that the business name may be different, but the address will be correct.

1. When your facility is displayed in the search results table, select the appropriate check box to the left of the CERS ID #, and then click "Add Selected" at the upper left hand corner of the table.
2. Be sure to make appropriate changes to the business name and owner fields to reflect the current information for your business.

To Add Chemical Inventory

1. Click on "Chemicals" tab.
2. Then click on "Add Inventory" tab on right-hand side of screen.
3. Search for chemical by chemical name or CAS#. Do not "Add Chemical" unless the chemical cannot be found by searching.
4. When chemical is found, click on chemical link to begin adding to inventory.

Underground Storage Tank Page

Please ensure the following information is completed if your business has Underground Storage Tanks. (Much of this information will have been populated into CERS. Please verify that it is correct, and make changes as necessary)

1. UST Sites Page
 - Tank(s)
 - Monitoring Plan(s)
 - Response Plan
 - Installation(s)
 - Designated Operator
 - Financial Assurance
 - Unauthorized Release(s)

Business Plan Submittal

The following information must be completed prior to submittal to the BFD:

1. Business Details Page
 - Business Activities
 - Annual HMBP Certification
2. Chemicals Page

1. Select the "Submittals" tab and click on the "Add Submittal" icon.
2. You will be taken to the Business Submittal Verification page. Review the Submittal completeness Verification, and once it has been verified that all items are complete, select the "Electronically Submit Inventory" icon. If you realize you have submitted your data in error, **please call the BFD at 818-238-3473** immediately to let us know and we will reject your submission so you may continue to work on your submittal.

INSPECTOR'S FINDINGS (Precede by Date and Time):

8134

(12-23-91)

(3-10-92)

During our last inspection of your business, chemicals were noted that had not been listed in your last inventory submittal. Specific reference is made to the cylinders of carbon dioxide and the diesel fuel for your generators. Please check your inventory and resubmit corrections to your Hazardous materials Inventory Form.

(4-3-92)

FIRE DEPARTMENT
March 20, 1992

Mr. Kevin E. Shephard
Engineering Manager
Burbank Airport Hilton Hotel
2500 N. Hollywood Way
Burbank, CA 91505

Dear Mr. Shephard:

On December 23, 1991 the Burbank Fire Department requested that you submittal Hazardous Materials Inventory Form within 30 days. The Burbank Fire Department received your Inventory Form on March 10, 1992. Upon review of this form it was found to be incomplete. The following corrections are needed:

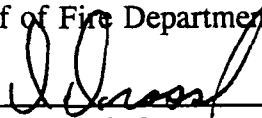

- During our last inspection of your business, several chemicals were noted that were not listed in your last submittal. Specific reference is made to the cylinders of carbon dioxide and the diesel fuel for your generators. Please check your inventory and resubmit corrections to your Hazardous Materials Inventory Form.

An additional seven days has been given to complete and submit a new form. Failure to provide this information by April 3, 1992 may result in civil penalties up to \$2,000 per day. Should this violation result in, or significantly contribute to a fire or other emergency, the business may be assessed the full cost of cleaning up and disposing of the hazardous materials.

If you have any questions contact the Fire Prevention Bureau, Hazardous Materials Section at (818) 953-8773.

Thank you for your cooperation.

Michael W. Davis
Chief of Fire Department

RE: Disclaimer & Notice of Status Change:

Dear Bob - Chief Whitteland MW

Good day. Please be advised that as of May 20, 1993 I am not involved or associated with the day-to-day facility engineering & maintenance management operations, decisions, Fire-Life/Safety, Fire Alarm Response with the City of Burbank F. D., Hazardous Material, Disaster Response or adherence to any NFPA, Dept. of Bldg. & Safety, AQMD, HazMat, ADA, Titles 22, 24 codes and/or compliances concerning the Burbank Airport Hilton Hotel and Convention Center at 2500 Hollywood Way, Burbank, California 91505.

I will however remain associated with their corporate office as an engineering consultant through August of 93. Please remove my name for accountability and my engineering license number from your files (if applicable) concerning your, "Contact Person" for the hotel as of May 20, 1993.

Please direct all correspondence to Mr. Tim A. Ellis the General Manager who will forward you to the proper in-house contact person.

Thank you for your time in this matter and if you have any questions please feel free to contact either Mr. Ellis or myself.

Respectfully yours,

Kevin E. Shephard
Certified Plant Engineer

*Chief,
Please pass
this info on to the
Hay Mat. officials
in your department.
Thanks,
Kevin*

FIRE DEPARTMENT

February 06, 1992

Mr. Keven Shopland
Burbank Hilton
2500 N Hollywood Way
Burbank, CA 91505

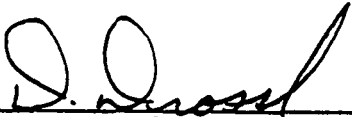

Dear Mr. Keven Shopland:

A recent review of our fire prevention inspection records indicates that you have not submitted a Hazardous Materials Inventory Disclosure Statement for the above premises.

The Burbank Fire Department requested on January 02, 1992 that you submit a Hazardous Material Inventory Form within 30 days. As of this date, we have not received your Inventory Form. You have been given an additional seven days to complete and submit this form. Failure to provide this information by February 16, 1992 may result in civil penalties of up to \$2,000 per day. Should this violation significantly contribute to an emergency which could arise, your business shall also be assessed the full cost of cleaning up and disposing of the Hazardous Materials. [BMC Section 15-180.103; CCR Title 19 (2729); California Health and Safety Code, Division 20, Chapter 6.95, Section 25514]

RECEIVED
BURBANK FIRE DEPARTMENT

February 26, 1992

MAR 2 1992
AM 7 8 9 10 11 12 1 2 3 4 5 6 PM

Dear Inspector Burns,

Good day. Per our phone conversation today I would like to confirm my request for a further extension for submitting the, Hazardous Materials disclosure list from our company. The reason and request for the additional extension is as follows;

After the hotel had received our annual Fire Department tour & inspection by Captain Towbridge in January 1992 I received the Hazardous Materials disclosure form package through our in-house mail system.

At that time I started to read through the information and process the forms accordingly but was informed that I should turn this over to our in-house Director of Security and Life/Safety Manager, Mr. Jake DeLeon.

Approximately two days passed when I contacted the Fire Prevention bureau for an extension so Mr. DeLeon could complete the package. We were given an extension from 02-01-92 to 02-21-92 which I re-confirmed in a letter to the bureau.

Approximately two weeks passed when I was asked to now assist in the gathering of information and to now complete the mentioned Hazardous Materials disclosure package. I received the package back to my department on Tuesday, February 25, 1992.

Due to our new procedures and in-house communications I again respectfully request a final extension to complete in its entirety the City of Burbank's Hazardous Materials Disclosure List for the Burbank Airport Hilton Hotel and Convention Center.

Per our mutual agreement, the final due date will be March 10, 1992.

*OK!
DWB S*

Respectfully yours,

Kevin E. Shephard, CPE
acting Chief Engineer

P.O. Box 6459
Burbank, Ca 91510-6459

Dear Inspector Drossel,

Per our conversation today, I would like to respectfully request an extension to February 21, 1992 to complete the Hazardous Inventory Discloser statement for, the Burbank Airport Hilton Hotel.

Mr. Jake de Leon will be submitting the completed statement to your attention by the 21st. Mr. de Leon is our Director of security and life/safety.

If you have any questions or concerns, please contact Mr. de Leon or myself at the following number (818) 843-6000.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Kevin Shephard'.

REQUEST FOR HAZARDOUS MATERIAL INFORMATION

Hazardous Material Disclosures filed with the Burbank Fire Department are a matter of public record, with the exception of disclosures filed as Trade Secrets, per Chapter 6.95, Section 25511(a) of the Health and Safety Code. Copies of disclosures are available to the public for a fee.

Copies of disclosures must be picked up from Burbank Fire Department Headquarters at 353 East Olive Avenue, Burbank, and will not be mailed out. For current fee schedule, please call (818) 953-8771.

Information requested for the following business:

Business Name Burbank Hillen
Business Address 2500 2550 Hollywood Way
Burbank Telephone _____

Information requested: LOT INFO

Reason for request: FIREFIGHT

Information requested by:

Name Ananda Kama / BSA, Environmental
Address 1300 Ananda Acasb South H
Telephone # 805 987-0217
Signature Ananda Kama Date 11/19/93

Within 15 days of any of the following events, any business shall contact the Burbank Fire Department, Hazardous Material Section for an updated disclosure form.

- 1) Change of business address.
- 2) Change of business ownership.
- 3) Change of business name.
- 4) Cessation of business operations.
- 5) Use or handling of previously undisclosed hazardous materials.
- 6) A significant change in the use, handling or 100% or more increase in quantity of a hazardous material for which disclosure has previously been made.

For Trade Secret - Use Yellow Disclosure Form.

PART IV: SIGNATURE

I certify, under the penalty of perjury, that all the above information is true and correct to the best of my knowledge.

Return Form to:

Burbank Fire Department
 Hazardous Materials Section
 353 E. Olive Avenue
 Burbank, CA 91502

For information or additional forms, please call:

SEP 2 1993
AM 7:10:11:12:12:3:4:5:6 PM

THIS INVOICE IS APPLICABLE TO THE STORAGE AND HANDLING OF HAZARDOUS MATERIALS IN THE CITY OF BURBANK

DATE	DESCRIPTION	UNIT	QTY	RATE/UNIT	AMOUNT DUE
8/31/93	HAZARDOUS MATERIAL DISCLOSURE FEE				
	ANNUAL BILLING FOR LIQUIDS	1.00		50.00	50.00
				SUB TOTAL:	50.00
				INVOICE AMOUNT:	50.00
				AMOUNT PAID:	0.00
				TOTAL DUE:	50.00

PAYMENT IS DUE WITHIN 21 DAYS OF THE INVOICE DATE. RETURN A COPY OF THIS INVOICE WITH YOUR CHECK (OR M.O.) PAYABLE TO CITY OF BURBANK. WRITE THE INVOICE NO. ON YOUR CHECK. PLEASE DO NOT COMBINE THIS PAYMENT WITH ANY OTHER PAYMENT.

**** FAILURE TO PAY THE ABOVE FEES WITHIN THE PERIOD SPECIFIED ****
***** WILL RESULT IN A PENALTY AS INDICATED BELOW : *****
1. FAILURE TO PAY WITHIN 30 DAYS OF BILLING: 10% OF FEE DUE.
2. FAILURE TO PAY WITHIN 60 DAYS OF BILLING: 25% ADDITIONAL TO (1).
3. FAILURE TO PAY WITHIN 90 DAYS OF BILLING: 50% ADDITIONAL TO (1&2)

***** P E R M I T *****

IN ACCORDANCE WITH SECTION 15-104.101 OF THE BURBANK MUNICIPAL CODE THIS INVOICE WITH PROOF OF PAYMENT SHALL SERVE AS A PERMIT TO STORE MAINTAIN, USE OR HANDLE MATERIALS, AS LISTED IN THE HAZARDOUS MATERIALS DISCLOSURE STATEMENT FOR A PERIOD OF 1 YEAR FROM DATE OF INVOICE. THIS PERMIT IS GOOD ONLY FOR THE BUSINESS AND ADDRESS LISTED ON THIS INVOICE. FAILURE TO COMPLY WITH ALL RELATED LAWS, INCLUDING BUT NOT LIMITED TO THE BURBANK MUNICIPAL CODE & THE HEALTH & SAFETY CODE, SHALL REVOKE THIS PERMIT. WE DIRECT YOUR ATTENTION TO THE FACT THAT COMPLIANCE WITH THE REQUIREMENTS OF THE BURBANK FIRE DEPT DOES NOT PRECLUDE THE NECESSITY OF COMPLYING WITH REGULATIONS OF OTHER AUTHORITIES & LICENSING AGENCIES.

* THIS PERMIT MUST BE KEPT ON THE PREMISES AT ALL TIMES AND SHALL *
* BE SUBJECT TO INSPECTION BY AN OFFICER OF THE FIRE DEPARTMENT. *

C: MITIGATION, PREVENTION, AND ABATEMENT OF HAZARDS

1. Describe your businesses procedures for mitigation, prevention and abatement of hazards to person, property, or the environment:

N/A

2. Does your business have a private on-site response team?
Yes _____ No XXX
If yes, what is the method of notification in the event of an incident at your business?

D: IMMEDIATE NOTIFICATION AND EVACUATION OF YOUR FACILITY:
Evacuation drills shall be conducted annually or more frequently if required.

SECTION III EMPLOYEE TRAINING PROGRAM

OUTLINE THE STEPS YOUR BUSINESS WILL TAKE TO MEET THE TRAINING REQUIREMENTS NOTED IN THIS SECTION

1. METHODS FOR SAFE HANDLING OF HAZARDOUS MATERIALS:

N/A

2. PROCEDURES FOR COORDINATION WITH LOCAL EMERGENCY RESPONSE ORGANIZATIONS:

N/A

3. USE OF EMERGENCY RESPONSE EQUIPMENT AND SUPPLIES UNDER THE CONTROL OF THE HANDLER:

N/A

4. EMERGENCY MITIGATION PROCEDURES IN RESPONSE TO A RELEASE OR THREATENED RELEASE OF A HAZARDOUS MATERIAL:

N/A

5. FAMILIARIZATION WITH THE BUSINESS EMERGENCY RESPONSE PLANS AND PROCEDURES (SECTIONS II, III, IV, AND V)

N/A

6. PROVISIONS FOR INSURING INITIAL AND REFRESHER TRAINING:

N/A

SECTION IV BUSINESS SITE PLAN
(See Attachments)

SECTION V PREVENTION

This section is meant to initiate a prevention plan at your business to assist in preventing a release or threatened release of a hazardous material. In the spaces provided, list preventive actions which have been initiated by your business to abate hazards relating to hazardous material handling, use or storage.

Considerations shall include:

A: Drum storage and/or above ground storage area:

- * Isolation and separation of incompatible materials.
- * Diking areas to contain spills.
- * Storage on paved ground.

B: Compressed and/or cryogenic gas storage areas:

- * Cylinders stored upright and secured.
- * Isolation and/or separation of incompatible cylinders (oxygen and flammable gases etc...).

C: General:

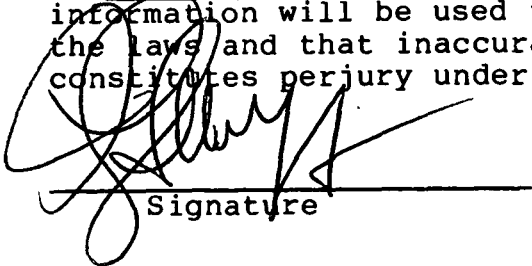

- * Labeling of all materials and storage areas with the product name and hazards associated with the product (drums, piping, tanks etc...).
- * Uniform Fire Code (UFC) required separation between outside hazardous material storage areas or tanks and combustible materials (wood, brush etc...).
- * Material Safety Data Sheets readily available for all hazardous materials on the premises.
- * Posting of "No Smoking" signs where appropriate.

Dear Dolly,

Attached is the information I sent to LA County Fire Department that we spoke about the other day. I hope this give your office enough information to update our account and issue us an updated Permit/License.

I greatly appreciate your immediate assistance to this important matter. Please feel free to give me a call at (818) 840-6446 if you need additional information.

Thank you!

Sincerely,

FIRE DEPARTMENT

January 10, 2007

William Gregory
Hilton Burbank Airport
2500 N Hollywood Way
Burbank CA 91505

**SUBJECT: 00247 - HILTON BURBANK AIRPORT/CONVNTN CNTR
2500 N HOLLYWOOD WAY**

In July 1997, the City of Burbank became part of the Los Angeles County Certified Unified Program Agency (LACoCUPA). The LACoCUPA consolidates six environmental programs. The City of Burbank is responsible for the management of four of these six programs. They include Underground Storage Tanks, Hazardous Materials Disclosure and Response, Risk Management, and enforcement of the Hazardous Materials Management requirements of the Fire Code.

California Health & Safety Code, Chapter 6.95, Article 1 and Burbank Municipal Code §15-1-8001-3.3 require all businesses that store, use, or handle hazardous materials in quantities that meet or exceed the thresholds established in Health & Safety Code §25503.6, must submit a completed Hazardous Materials Inventory Disclosure Statement annually. Our records indicate that you meet these requirements.

Enclosed you will find the following forms which you are required to complete and submit to us by March 1, 2007:

✓ **The Hazardous Materials Annual Re-Certification Procedure**

A list of the hazardous materials identified at your facility may be included in the package. Review it carefully. You may complete and sign and submit the Annual Re-Certification Procedure for the Hazardous Materials Disclosure Report only, provided you can attest to the following:

- The most recent information submitted to the Burbank Fire Department is complete, accurate and up to date. (See attached list)
- There have been no changes in the quantities of hazardous materials as reported in the most recent submittal.
- No hazardous materials subject to the inventory reporting requirements are being handled that are not listed in the most recently submitted inventory report.
- The most recently submitted annual inventory report contains information required by Section 11022 of Title 42 of the United States Code.

FH

HAZARDOUS MATERIALS INVENTORY DISCLOSURE STATEMENT

00247 - 2500 N Hollywood Way

January 10, 2007

Page 2

✓ **The Facility Information Section**

Everyone is required to submit their signed Facility Information for 2007. This form has been filled out with the information we currently have on file. If there are any blanks, please complete this information. If there are any changes, please cross out the filled in information and write in your new information.

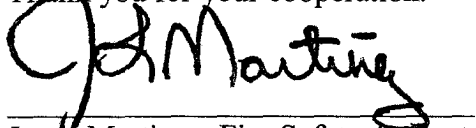

✓ **The Hazardous Materials Section**

These forms are provided for your convenience to be completed if you have added any new Hazardous Materials, deleted any Hazardous Materials, or if there are any changes in quantities or substances to be reported.

These Hazardous Materials Inventory Disclosure forms are currently part of a Consolidated Permit Package issued by the Los Angeles County Certified Unified Program Agency (LACoCUPA). Please carefully read the instructions, complete the appropriate forms, and sign where indicated. Return **ORIGINAL** forms to the Burbank Fire Department by **March 1, 2007**. Failure to submit a properly completed Inventory or signed Annual Re-Certification Statement by the due date could result in civil penalties. A self-addressed envelope is enclosed for your convenience. **BE SURE TO RETAIN A COPY FOR YOUR RECORDS.**

You can now request the Hazardous Materials and the Consolidated Contingency Plan forms to be sent to you by Email. These forms may be completed on your computer by using Microsoft Word. If you have any questions, or if we can be of any assistance, please contact the Fire Prevention Bureau at (818) 238-3475.

Thank you for your cooperation.

Jorge Martinez, Fire Safety Analyst

Attn.: Bill Westcott – Supervisor
Fax #: 323-869-0729
of Pages : 4

Dear Mr. Westcott,

We received the current Permit/License to Operate for fiscal year 6/2007 to 5/2008. This property has change it's ownership in September 2006. The property's new DBA is Burbank Airport Marriott Hotel since December 2006.

Attached is a copy of the current permit we received, copy of the payment and LACoCUPA Form 2730. The payment for renewal was paid by the new owner under the new property name, Burbank Airport Marriott Hotel. We will greatly appreciate it if you can send us a new Permit/License with the new property name or let us know what we need to do to have an updated permit.

Thank you for your immediate attention in this matter. Please give me a call at (818) 840-6446 if you have any question.

Sincerely,

Connie Santos-Tejeira

Does your facility . . .	If Yes, please complete these pages of the UPCF. . .	
A. HAZARDOUS MATERIALS Have on site (for any purpose) hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO 4	<input checked="" type="checkbox"/> HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESC <input checked="" type="checkbox"/> CONSOLIDATED CONTINGENCY PLAN (Section I and Site Map(s)) <input checked="" type="checkbox"/> TRAINING PLAN
B. UNDERGROUND STORAGE TANKS (USTs) 1. Own or operate underground storage tanks? 2. Intend to upgrade existing or install new USTs? 3. Need to report closing a UST?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO 5 <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO 6 <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO 7	<input checked="" type="checkbox"/> UST FACILITY <input checked="" type="checkbox"/> UST TANK (one page per tank) <input checked="" type="checkbox"/> UST FACILITY <input checked="" type="checkbox"/> UST TANK (one per tank) <input checked="" type="checkbox"/> UST INSTALLATION - CERTIFICATE OF COMPLIANCE (one page per tank) <input checked="" type="checkbox"/> UST TANK (closure portion –one page per tank)
C. ABOVE GROUND PETROLEUM STORAGE TANKS (ASTs) Own or operate ASTs above these thresholds: any tank capacity is greater than 660 gallons, or the total capacity for the facility is greater than 1,320 gallons?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO 8	NO FORM REQUIRED TO CUPA's
D. HAZARDOUS WASTE 1. Generate hazardous waste? 2. Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)? 3. Treat hazardous waste on site? 4. Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)? 5. Consolidate hazardous waste generated at a remote site? 6. Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO 9 <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO 10 <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO 11 <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO 12 <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO 13 <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO 14	<input checked="" type="checkbox"/> EPA ID NUMBER – provide at the top of this page. <input checked="" type="checkbox"/> As a generator, answer YES to Item E2b and complete Waste Generator Form. <input checked="" type="checkbox"/> RECYCLABLE MATERIALS REPORT <input checked="" type="checkbox"/> ON-SITE HAZARDOUS WASTE TREATMENT – FACILITY <input checked="" type="checkbox"/> ON-SITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit) <input checked="" type="checkbox"/> CERTIFICATION OF FINANCIAL ASSURANCE <input checked="" type="checkbox"/> REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION <input checked="" type="checkbox"/> HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
E. LOCAL REQUIREMENTS 1. REGULATED SUBSTANCES Have Regulated Substances (RS) including Extremely Hazardous Substances (EHS) stored on site at greater than the threshold planning quantities established by the California Accidental Release Program (CalARP)? 2. OTHER REQUIREMENTS a. Have hazardous materials stored on site at or above a threshold amount established by a CUPA's or PA's local ordinance? b. Required by a CUPA or PA to provide other information?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO 15a <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO 15b <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO 15c	In addition to Hazardous Materials requirements, complete: <input checked="" type="checkbox"/> REGULATED SUBSTANCE REGISTRATION <input checked="" type="checkbox"/> RISK MANAGEMENT PLAN (when required) <input checked="" type="checkbox"/> Consult local CUPA or PA for added reporting requirements. <input checked="" type="checkbox"/> WASTE GENERATOR FORM (LA County)

 PAGE **26** OF **92**

I. FACILITY INFORMATION

BUSINESS NAME (Same as FACILITY NAME or DBA – Doing Business As) 3		
Hilton Burbank Airport & Convention Center		
CHEMICAL LOCATION 201	CHEMICAL LOCATION CONFIDENTIAL 202	
Engineering Shop	(EPCRA) <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
FACILITY ID #	MAP# (optional) 203	GRID# (optional) 204

II. CHEMICAL INFORMATION

CHEMICAL NAME 205	TRADE SECRET (If Subject to EPCRA, refer to instructions) 206	
Propane C3H8	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
COMMON NAME 207	EHS (RS)* 208	
Propane Gas	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
CAS# 209	*If EHS (RS) is "Yes", all amounts below must be in Lbs.	
74-98-6		
FIRE CODE HAZARD CLASSES (Complete if required by CUPA) 210		
HAZARDOUS MATERIAL TYPE (Check one item only) 211	RADIOACTIVE 212	CURIES 213
<input checked="" type="checkbox"/> a. PURE <input type="checkbox"/> b. MIXTURE <input type="checkbox"/> c. WASTE	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
PHYSICAL STATE (Check one item only) 214	LARGEST CONTAINER 215	
<input type="checkbox"/> a. SOLID <input type="checkbox"/> b. LIQUID <input checked="" type="checkbox"/> c. GAS	5 gallon cylinder	
FED HAZARD CATEGORIES (Check all that apply) 216		
<input checked="" type="checkbox"/> a. FIRE <input type="checkbox"/> b. REACTIVE <input checked="" type="checkbox"/> c. PRESSURE RELEASE <input checked="" type="checkbox"/> d. ACUTE HEALTH <input type="checkbox"/> e. CHRONIC HEALTH		
AVERAGE DAILY AMOUNT 217	MAXIMUM DAILY AMOUNT 218	ANNUAL WASTE AMOUNT 219 STATE WASTE CODE 220
20	20	
UNITS* (Check one item only) * If EHS (RS), amount must be in pounds. 221		DAYS ON SITE: 222
<input checked="" type="checkbox"/> a. GALLONS <input type="checkbox"/> b. CUBIC FEET <input type="checkbox"/> c. POUNDS <input type="checkbox"/> d. TONS		365
STORAGE CONTAINER 223		
<input type="checkbox"/> a. ABOVE GROUND TANK <input type="checkbox"/> e. PLASTIC/NONMETALLIC DRUM <input type="checkbox"/> i. FIBER DRUM <input type="checkbox"/> m. GLASS BOTTLE <input type="checkbox"/> q. RAIL CAR <input type="checkbox"/> b. UNDERGROUND TANK <input type="checkbox"/> f. CAN <input type="checkbox"/> j. BAG <input type="checkbox"/> n. PLASTIC BOTTLE <input type="checkbox"/> r. OTHER <input type="checkbox"/> c. TANK INSIDE BUILDING <input type="checkbox"/> g. CARBOY <input type="checkbox"/> k. BOX <input type="checkbox"/> o. TOTE BIN <input type="checkbox"/> d. STEEL DRUM <input type="checkbox"/> h. SILO <input checked="" type="checkbox"/> l. CYLINDER <input type="checkbox"/> p. TANK WAGON		
STORAGE PRESSURE 224		
<input checked="" type="checkbox"/> a. AMBIENT <input type="checkbox"/> b. ABOVE AMBIENT <input type="checkbox"/> c. BELOW AMBIENT		
STORAGE TEMPERATURE 225		
<input checked="" type="checkbox"/> a. AMBIENT <input type="checkbox"/> b. ABOVE AMBIENT <input type="checkbox"/> c. BELOW AMBIENT <input type="checkbox"/> d. CRYOGENIC		
%WT 226	HAZARDOUS COMPONENT (For mixture or waste only) 227	EHS (RS) 228
1		<input type="checkbox"/> Yes <input type="checkbox"/> No
2		<input type="checkbox"/> Yes <input type="checkbox"/> No
3		<input type="checkbox"/> Yes <input type="checkbox"/> No
4		<input type="checkbox"/> Yes <input type="checkbox"/> No
5		<input type="checkbox"/> Yes <input type="checkbox"/> No

If more hazardous components are present at greater than 1% by weight if non-carcinogenic, or 0.1% by weight if carcinogenic, attach additional sheets of paper capturing the required information.
