1383**

CALIFORNIA'S SHORT-LIVED CLIMATE POLLUTANT REDUCTION STRATEGY

Ensure your business has implemented a compliant solid waste collection program and is ready for the new year.

Organic material, including food scraps and plant trimmings, are no longer allowed in the garbage due to a statewide effort to reduce methane emissions. Senate Bill 1383 now requires businesses and multi-family properties (five or more units) to have separate trash, recycling, and organic collection service through one of the City's permitted haulers.

ENFORCEMENT STARTS JANUARY 1, 2024.

The City and its partners are conducting site inspections to determine SB 1383 compliance starting in January 2024. Failure to comply with the requirements may result in a Notice of Violation and administrative civil penalties. For more information, refer to Burbank Municipal Code Title 4, Chapter 2 (effective April 15, 2022).

NOT IN COMPLIANCE?

Contact your waste hauler to help provide guidance, educational materials and compliant disposal service for SB 1383. Additionally, ask them about "right sizing" your service and waiver eligibility.

CAREIT

SHARE IT WITH CAREIT!

Businesses with edible food to donate can find a local food recovery organization and track donation activity for State reporting utilizing the City of Burbank's partner, Careit app.

JANUARY 1, 2024 SOLID WASTE COMPLIANCE CHECKLIST

ALL COMMERCIAL ENTITIES HAVE

- Subscribed to a three-stream collection service with your primary hauler.
- Provided accessible separate collection containers indoors and outdoors in compliant colors (blue = recycling, green = organics, and black or gray = trash).
- Provided education to employees, customers, and vendors, including clear signage (labels) and instructions on proper sorting to prevent cross-contamination.
- Monitored disposal areas for contamination.

Additional requirements for the following:

MULTI-FAMILY PROPERTIES (with five or more units)

- Notified and provided education to new tenants within 14 days of occupancy.
- Provided annual reminders to tenants to reinforce participation and prevent contamination.

BUSINESSES MANDATED FOR EDIBLE FOOD GENERATION

- Developed a program to identify, manage, and donate the maximum edible food that would otherwise go to waste.
- Signed agreement with a recognized non-profit food recovery organization for distribution of edible food for donation.
- Are tracking and retaining records of the food donated (by type, frequency & pounds) for regular inspection and reporting.
